# WHAT'S IN A NAME?

**More, infinitely more, than many people suppose.**

Particularly is this true in a business sense. For instance, when any individual or firm have conducted a business with such care as to quality and reliability of goods, coupled with reasonable prices and fair and honorable dealing with the public for a number of years, the name of the individual or firm comes to be accepted as a positive guarantee of high quality on everything with which it is connected. That is one of the things that is in a name. This is especially true of the

# "OLD RELIABLE"

## INCUBATORS AND BROODERS

The name stands for unequaled excellence in incubators and brooders. As a further evidence of a name we may say that this is not only true in this country but it is equally true in more than fifty foreign countries, where the "Reliables" are now being used to the exclusion of other machines of this class of both home and foreign make.

### "Reliables" at the Paris Exposition.

We shall further increase our hold on foreign popular favor by making one of our characteristic complete exhibits at the Paris Exposition of 1900.

## The 20th Century Catalogue

of more than 160 pages tells more in detail. We cannot dwell at length upon the merits of the Reliables in this space. It contains in addition more of value to poultry people than has ever been crowded into one catalogue. We send it to interested parties for 10c. to pay postage.

### Our Reliable Copper Pliant Leg Bands

are undoubtedly the best bands made, **Easy to apply** and sure to **stay.** Marked in **plain, large figures** and **cheap.** 12 bands for 20c; 50 for 50c; 100, 80c; 500, $3.75; 1,000, $7.00. We are making a specialty of

### The Reliable Exhibition Coops

They are **light, strong** and **easy to open.** Made in four regular **sizes.** Neatly painted and finished. Are easily cleaned and are very durable. They make poultry look neat and clean on the show benches.

## Reliable Incubator & Brooder Co.

**BOX A-1. QUINCY, ILL.**

## Welles' Invincible Strain of Barred Plymouth Rocks

That have been bred for years in line of the New York wiuners. Never fail to win in the strongest competition. I do uot advertise on birds of my breeding that win iu the hauds of my customers, but ou my own honors.

**Record at**

## Madison Square Garden, N. Y., 1899:

**1st and 2d hens,**
**1st and 2d cocks,**
**1st, 2d and 3d pullets,**
**2d, 3d, 4th and 5th cockerels,**
**1st, 2d and 4th Breeding pens,**

And all Specials

Including the

## *Barred Plymouth Rocks.*

Winners at Indianapolis and Danville, Ill., with the following scores: Cock, 91½; hens, 93½, 93½, 93, 93; cockerels, 93½, 93½, 93, 93, 92½; pullets, 94¼, 94, 94, 93¾, 93½. At the great Columbus, Ohio, show, 1 won 1st on cockerel, 1st on breeding pen, (tied on 1st pullet), and Silver Cup for highest scoring male and female. My matings proved a grand success, producing the best chicks I ever owned.

I have a number of cockerels sired by **COLUMBUS for which I refused $100.** Can mate up pairs, trios or breeding pens for best results. Stock not satisfactory can be returned. Write for what you want.

***DANIEL CHRISTIAN,***
***Huntington Ind.***

---

### Barred Rocks.

From the choicest strains, both cockerels and pullets, cheap. Eggs after March 1st, $1 per 13. Good hatch guaranteed.

**W. D. SOPER, R. D. No. 3, Jackson, Mich.**

---

***Dr. J. H. BOYER,***
***Frankfort, Ind.***

No more stock for sale.

# Miller's MILLHOOK FARM

Is noted the world over as the one place where you can get the best poultry for the least money. We have been in the poultry business on a pretty large scale for a good many years and during that time we have sold as many as 3,000 birds in a single season. In all our years of experience in the poultry business we have never before had so many really good birds as we have at the present time. In fact, we have more stock than we can find roosting room for even on Millhook Farm with its many large and comfortable houses. It is dangerous to crowd poultry too much, therefore to help ourselves and our poultry as much as possible we have determined to sell as many as 1,000 or more birds in January. ***To do this we realize that the price must be right.***

## THE PRICE:

***$2 Each, $3.90 per pair, $5 per trio.***

## THE VARIETIES:

**Light Brahmas,**
**Partridge Cochins,**
**Black Langshans,**
**White P. Rocks,**
**Dark Brahmas.**
**Buff P. Rocks,**
**Mottled Javas,**
**Buff Cochins,**
**American Dominiques,**
**Houdans,**
**White Wyandottes,**
**Black Minorcas,**
**White Faced Black Spanish,**
**White Minorcas,**
**Buff Leghorns,**
**Silver Wyandottes,**
**Single Comb Brown Leghorns,**
**Rose Comb Brown Leghorns,**
**Blue Andalusians,**
**Cornish Indian Games,**
**Single Comb White Leghorns,**
**Silver Spangled Hamburgs,**
**Buff Cochin Bantams,**
**Barred P. Rocks.**

Fine large Pekin Ducks, $1.50 each, $2 per pair, $3 per trio.

**Extra large M. B. Turkeys and Toulouse Geese, $3 each, $6 per pair, $8 per trio.**

Every bird bought from us we guarantee to be as represented and to give the customer satisfaction, and that every bird shipped by us will reach our customer in good condition, no matter where he may live. We back up the above guarantee with the necessary capital and with our reputation as honorable business men.

**Order Direct from this Advertisement and Save Time and Unnecessary Expense.**

## OUR CATALOGUE.

Perhaps you do not know that we issue a very complete and handsome poultry catalogue. Well, we do; and if you are interested in poultry, even just a little, you will surely want this book. We will name just a few of the good things that it contains: We show in colors Barred Plymouth Rocks, Buff Cochins, Black Langshans, S-c. Brown Leghorns, Black Minorcas and Buff Plymouth Rocks. We tell you how to build poultry houses and yards, how to prevent and cure all diseases of poultry, how to feed and care for your poultry from the time they are hatched until they are full grown. We illustrate and describe 40 of the leading varieties of poultry, answer hundreds of important questions, give lowest prices of poultry and eggs, and much other useful information. This book contains 84 pages and should be in the hands of all who are interested in poultry. Sent postpaid for 10 cents.

# Leffel's Unconquerable Barred Rocks

## Always Win Lions Share of Prizes.

First Prize Pullet, Cleveland, O., Show, December, scored 94½ by L. G. Jarvis, Guelph, Canada.

If you do not believe it **SEND AND GET HIS CATALOGUE** and it will tell you who scored his birds. He stands in front, with highest scores by leading judges. I. K. Felch gave one of his cockerels score of 95 points, and wrote across score card, every doubt given against this noble big fellow; weight, 11 lbs. H. A. Bridge gave one of his birds score 95 points. B. N. Pierce cut one of his cockerels one-half in color. L. G. Jarvis, Guelph, Canada, scored 4 birds 94½. J. Y. Bicknell scored cockerel 94½. Charles McClave, 93½ scores of birds. I have exhibited 30 times in past 8 years and won 24 times on cockerel, and tie the other one score. Sharp Butterfield scored 3 cockerels in one show 93¼. Send for my catalogue and see my winnings and scores, and who scored them, and you will say he leads the procession in winnings.

## Never Lost on Breeding Pen

in any score-card show, nor any pullet where they were weighed and weighed correctly. Eggs $3 per sitting. Only lost once on first cock. I won all prizes at Springfield, O., Aug. 21-24, 1900, all prizes offered. My strain won all prizes at Urbana, O., Aug. 14-17, 1900, this season making 30 times I have exhibited in 8 years. No breeder ever made such record.

## Ten Times I Have Won Every Money Prize Offered. Eggs $3 per sitting.

500 cockerels—choice ones—for sale, and pullets in any number. I have a grand lot of show birds for winter shows. They never fail to win for me, and they will win for my customers. Residence, 363 South Fountain ave. Farm one-half mile from city. 265 acres.

**GEO. M. LEFFEL, Springfield, Ohio.**

# Profits in Poultry

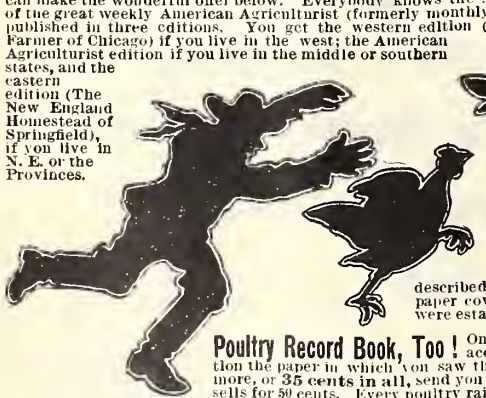
**Contains 352 Pages, 154 Illustrations, Illuminated Cover and Color Plates**

*By JAMES RANKIN, P. H. JACOBS, T. M. FERRIS, BURR KNAPP, W. H. RUDD, and others. Edited by the Poultry Editor American Agriculturist.*

This new, revised and enlarged edition of what has always been recognized as the standard work on poultry, is nearly one-third larger than any previous edition, and has been fully brought up to the requirements of the present day. The ways and means by which eggs or poultry can be grown at a profit are discussed in great detail. Care of chicks, diseases and their treatment, feeding and care for eggs, or for meat, building coops and houses, caponizing, marketing, warfare against pests, raising waterfowl and ornamental poultry, are described at length. This great work was never before sold for less than $1 in cloth, but we have printed an enormous edition so we can make the wonderful offer below. Everybody knows the sterling merit of the great weekly American Agriculturist (formerly monthly). It is now published in three editions. You get the western edition (Orange Judd Farmer of Chicago) if you live in the west; the American Agriculturist edition if you live in the middle or southern states, and the eastern edition (The New England Homestead of Springfield), if you live in N. E. or the Provinces.

**FREE**

The regular price of our paper is $1.00 per year, but to introduce it in thousands of homes where it is not now taken, we make the following wonderful proposition to *new* subscribers only: To anyone sending us only 25 cents (in silver, stamps or otherwise), we will send American Agriculturist for three months and in addition a copy, postpaid, of Profits in Poultry as described, substantially bound in illuminated paper covers. Money back if not satisfied. We were established in 1842. You can depend on us.



**Poultry Record Book, Too!** On condition (1) that you promptly accept this offer and (2) that you mention the paper in which you saw this offer, we will for **only 10 cents** more, or **35 cents in all**, send you our **Poultry Record Book**, which sells for 50 cents. Every poultry raiser large or small should have this record book, as he can keep count of laying record, hatching, expenses, sales, and receipts for every day in the year and summarize at the end of the year just how the poultry have paid. **Remember** for only 35 cents you get the American Agriculturist 3 months, Profits in Poultry and the Poultry Record Book.

Address orders to either of our offices, but to avoid delay, send to the one nearest you.

SPRINGFIELD, MASS., Homestead Building.

# Buy of a Specialist.

***The Largest W. Wyandotte Specialist in the West is at***

Highland Poultry Farm, home of Hall's famous prize winners. We invite inspection and challenge any breeder to show a better flock. We have a fine lot to sell. We have 200 fine birds to pick from in Barred and White Plymouth Rocks, and can please you in fine breeders and exhibition birds that will win. We must sell these birds and will make prices that will move them. A good many score 90 to 95½. Write for bargain list before you buy.

**17 YEARLING LIGHT BRAHMAS,** dams of Shellabarger's sweepstake winners at Cedar Rapids, Ia., score 90 to 94 points. Must sell. Write quick. **Many visitors say our birds are elegant.** A trial order will convince you.

HALL'S GUARANTEED ROUP CURE
KEEP IN A DRY PLACE W.A. PAISLEY, Mfg'r.
READ DIRECTIONS BEFORE USING

J.D.W.HALL, Sole Distributor
MGR. HIGHLAND POULTRY FARM & SEC'Y & TREAS. WESTERN WYANDOTT CLUB.
BOX F. U.P.STATION DES MOINES, IOWA.

Your money refunded if it fails. Price 25 and 50 cents per box. Everyone who exhibits fine birds cannot afford to be without a box. It is instantaneous for colds and distemper. It is folly to run any risk when a 50-cent box of Hall's Roup Cure will save them.

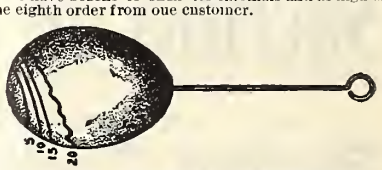
New Orleans, La., 11, 22, 1900.

J. D. W. Hall, Des Moines, Ia.

DEAR SIR:—I received the box of your Roup Cure and must say it does the work. I can cheerfully recommend it to all poultrymen. I had a sore on my ear, something like eczema, and a few applications of your wonderful preparation cured me. Yours truly,

C. HELWIG, Pres. American Poultry Yards,
1830 Soledano St., New Orleans, La.

We have dozens of such testimonials and as high as the eighth order from one customer.



## HALL'S AIR CELL EGG MODEL

The lines and figures on the Air Cell Model represent the size of a properly formed air cell on the 5th, 10th 15th and 20th days of incubation. When testing the eggs on the 7th day, the air cells should show at least one-third of the distance between the 5th and 10th days; for the second test, or the 14th day, air cells should be nearly up to the 15th day line shown on the model. When testing hold model up by the side of egg being tested. This is the most successful invention ever brought out and a great help to incubator operators. Price 50 cents.

Don't fail to get an Air Cell Egg Model. It will be the best 50 cents you ever invested. Why, if you run an incubator, it is indispensable. Judging the air cell is the secret in incubation to get good hatches and strong, healthy chicks. A better guide has never been produced. J. D. W. HALL, Mfgr.,
Highland Poultry Farm, U. P. Station, Des Moines, Ia.

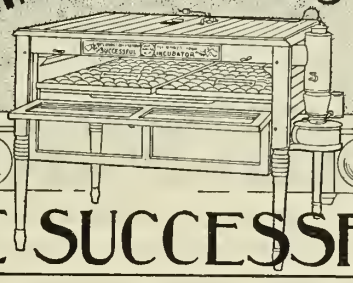
NOTHING SUCCEEDS LIKE



THE SUCCESSFUL

The success of the Successful Incubators and Brooders has opened the eyes of manufacturers and of the poultry world. And yet it is not hard to explain.

It rests on the solid foundation of correct principle, perfect workmanship, practical results. The record of the

**INCUBATORS and BROODERS**

made by this firm stands like a pyramid above all others. They SUCCEED without the assistance of a nurse or night watch.

**Our Handsome Book,**

finely illustrated—contains 154 pages and perfect engravings in natural colors of our leading machines. This edition ALONE cost us over $4,000.00. We send it to you for 6c. 60-page German, French, Spanish and Swedish catalogues FREE.

**DES MOINES INCUBATOR CO.**

WHEN WRITING TO ADVERTISERS SAY YOU SAW IT IN AMERICAN POULTRY JOURNAL

First Prize Pen at Great New York State Fair, 1900. Bred and Owned by U. R. FISHEL, Hope, Ind.

## "White Ply. Rocks Galore"

This is the way Mr. W. S. Russell started out in his description of his visit to my yards in November. I showed him stock on four farms and his verdict was:

**"Whiter than the Whitest, Larger than the Largest."**

This is not only Mr. Russell's verdict, but that of every one that has bought or owns

## *Fishel's White Rocks*

The record won by my birds has never been equaled, and could any reader of this ad see my stock of

**1300—Select Birds for Sale—1300**

they would say as Mr. Russell, **"IN YOUNG STOCK WE WERE ASTONISHED AT THE EXCELLENT QUALITY."** This, as well as my winnings at the great New York State Fair in September, proves my birds

## *The Best in the World.*

No breeder pleases more customers than I do, The cause for this is quality, for Mr. Russell says: **"I did not see a late hatch nor a cull** in a flock of 1,300 birds." Can any other White Rock breeder show 1,300 birds with the verdict Mr. Russell gave mine? It costs no more to rear good ones. It costs but little more to buy them. Others are winning the leading prizes with Fishel White Rocks, and so can you. If you want breeders or want a cockerel to head your yard, remember, get the winning type, with good size, plumage, etc. I now offer

## Customers Letters of 1900.

**Send 10 cents for Fortune Catalogue.**

We have 200 such letters. All say it beats the hen in raising chicks by 20 per cent.

Taunton, Mass., July 17, 1900.

Natural Hen Brooder Co.
J. M. Sontag, Pres., Dear Sir:—Your brooders are wonderful. We raised all chicks. The heat is just like the hen; no hot, dry heat. Also ventilation cannot be improved upon; even better than the old hen. Chicks are growing like weeds; not one sick or dead. We tried all other brooders. Your brooders are the dearest on the market, but are the cheapest on practical work. Respct. yours, O. Z. RUGG.

Mobile, Ala., August 10, 1900.

Natural Hen Brooder Co.
Mr. Jno. M. Sontag, Dear Sir:—20 years experience tells me you have the most wonderful brooder on the market. I never lost a chick this summer in using your brooder. Book me for 12 brooders in the spring.
Truly yours, R. J. GIBBONS.
Sept. 14 (second letter to date).—Not a chick dead. All growing like ducks.—R. J. GIBBONS.

Leuapah, Indian Ter.

Natural Hen Brooder Co.
Mr. Sontag, Dear Sir:—Your brooder raised more chicks than three of other makes. I'm the happiest woman in the United States. I had terrible times for the last five years because I could not get a brooder that could raise over half of chicks. I raised more chicks this summer than I have in three years put together, with your wonderful discovery and invention. I want two more in the spring. Sincerely, JULIA FLANNIGAN.

Natural Hen Brooder Co.
Gents:—I have looked up your letter of your customer in Puxico, Mo., of Dec. number and find it O K. I want about one dozen of your brooders and I will get rid of my dead traps. J. C. HAMILTON, New Castle, Pa.

## 200 BELGIAN HARES

At a bargain, for room. Long Rufus Red, 8, 10 to 12 lb. each. 3 mo. old, $5 per pair; 6 mo. old, $7 per pair. Ready to breed. Old Breeding stock $10 per pair and up. Pedigreed breeders $50 per pair. Send 10c for catalogue. Are ready now, sure.

**SHOW BIRDS**
THAT CAN WIN IN ANY COMPETITION.

Have won more prizes at New York, Boston, and America's greatest shows than all others. The product of my matings this season are the best I ever owned.

At the Great National Show, WASHINGTON, D.C., in hot competition with over 300 birds of these varieties, the best that could be found regardless of price, I won 45 Regular and Special Prizes on 39 Entries, including First Prize on Breeding-Pen in each variety, Special for Best Display in the American Class, Special for Best Exhibit of Plymouth Rocks, Sweepstakes Special for Best Cockerel in the show (Bantams excluded), and this on my First Prize Barred P. Rock Cockerel. My winning White Wyandotte cock was pronounced by the judges to be the best they had ever seen. I won twice as many first prizes as all other exhibitors of these varieties. My BUFF ROCKS, at BOSTON, 1899, in hot competition, won more first and special prizes than all others. My customers are winning all over the country. If you want the BEST, write me. Hundreds of Choice Exhibition and Breeding Birds at Honest Prices. Catalogue of America's finest Plymouth Rocks and Wyandottes free.

# Fitting and Preparing Birds for the Show Room.

Written by W. R. WOODEN, Battle Creek, Mich.

Firty percent of success is in properly fitting and preparing birds for the show-room. Time and experience have demonstrated the truth of this statement to the writer's entire satisfaction. The careless and lazy caretaker and indifferent handler win no prizes where there is competition. Of course, the birds must be of good stock and grown to proper size, but with the care to bring them to proper weight and condition, their chance of winning is very small.

What little success the writer has attained in the show-room is attributed to the effort made in getting his birds to proper weight and in form where they looked their best. His experience has been wholly confined to Buff Wyandottes for so long that it is difficult to say anything applicable to other varieties, yet much that would be said could be applied to others as well. All that can be consistently said is to cover the ground of one's own work from the time that the birds are taken up in the fall until they are taken to the show-room. About Nov. 1st all birds that have grown to full size are closely confined and fed to bring them to standard weight.

Cockerels are cooped singly and fed chiefly corn with an occasional feed of ground oats, and all the meat or ground bone that they will eat two or three times per week. Notwithstanding that the claim is often made that the free feeding of fresh bone or meat will cause an abnormal growth of comb, the writer's experience leads him to think differently. All abnormal combs coming within the writer's experience could always be traced to something of the kind in close ancestry. Experience has produced as large combs with an exclusively grain diet as by a free feed of meat.

Pullets and hens in lots of from four to six are confined under shelter in small pens, well bedded with cut straw, and fed little but corn, with a sprinkle of millet seed in the litter to give them exercise. The ground oats and fresh bone are equally as good for them as the males, but are too liable to start them laying with the consequent dulling of plumage. Pullets are at their best but a few days, hence it is well to crowd but few at one time, for if all are ripe for the early shows, the late show finds you without females, that are other than mottled and otherwise in bad condition.

Precautions should be taken to guard against scale or lice when the birds are first brought in, and it is well to thoroughly oil the shanks of all as often as once in two weeks, that they may be kept bright and fresh; for it is a well established fact that yellow shanks will pale and fade when birds are taken from free range and closely yarded.

The use of air slaked lime or ashes should not be permitted, as they not only cause yellow shanks to fade but soil the plumage. Road dust or sand is much better for dropping boards. Neither should a dust bath be left in the pen, as females are almost certain to injure their plumage while dusting.

When the birds are cooped for the show they should be thoroughly cleaned. Use a tooth or nail brush and strong soap suds in scrubbing all dirt and stain from the shanks.

Clean all dirt from under the scales with sharpened pieces of wood or toothpicks, and grease the shanks well with sweet oil, after which rub them thoroughly with a woolen cloth until they are free from oil and are burnished bright. Sponge the comb, wattles and ear-lobes with a mixture of equal parts of sweet oil and vinegar. This will remove foreign substances and cause them to remain bright. Before the birds are finally cooped they should be thoroughly examined and all dead or discolored feathers removed.

The writer has often heard exhibitors deprecate the pulling of defective feathers in preparing a bird for the show room and has noted similar expressions in articles written for the poultry press. Such people may possibly be filled with a spirit of honesty that would preclude such work to result in a practice of fraud, their resorting to such practices, but they never win prizes. Such statements when made by successful exhibitors can be counted as coming from a near relative of one Ananias. The successful exhibitor finds that he must do all that is possible to make his birds look their best and feels that he is justified in doing all that does not result in fraud to attain that result. He knows that the fancy and the judges know that a black feather in a white bird will be removed if he succeeds in finding it. And he would much rather pull it himself than wait for the judge to do so. If there is enough of the judge and buying public will know it by giving the bird a close examination. Small feathers or bits of down are apt to be found on all clean shanked varieties, and where the same are so small that when removed they leave no holes to be filled, the writer believes such feathers of little account, though they may be cause for disqualification and that their removal is justified.

At least the example has been often set by older and more successful exhibitors than most of us. If all birds in the American classes that at one time showed feathers on their feet were kept out of our show rooms, the classes would be mighty small, and if all disqualifications were found by the judges there would be many less birds scored.

Partridge Cochin Cockerel, as bred by O. E. Skinner, Columbus, Kans.

Exhibitors will be heard making the statement that their winning birds were hurriedly caught and their shanks wiped off and without further attention were thrown into the coop for transportation to the exhibition. Such talk usually comes from a man that has set up nights to doctor and tinker with his birds to remove disqualifications and make them look better than nature intended. The writer's policy in preparing a bird for the show room is to do all possible and to go as far as possible without resorting to trickery that is fraud, for the reason that some competitor will go further and

our birds must be judged in competition with his.

Birds carelessly prepared for the show room do not win. Work and mighty hard work is the only thing that insures success even with the best of birds. The lazy man has no business raising and exhibiting fancy poultry.

Trickery and fraud should debar an exhibit from the show room. A deserving judge can always spot it and it should be the aim of all judges to protect buyers and honest exhibitors from imposition. The practice of coloring feathers, plugging holes left by the removal of stubs from clean shanked varieties, is not common, though occasionally reported. But, it is to be hoped that the fraternity of the present time have too much self-respect and too much regard for decency to resort to such methods.

We must depend upon the judges who are upright and honorable men to protect us.

Good hard honest work is necessary to make them look their best and no exhibitor unwilling to devote the time and energy, or too indifferent or heedless to make the best of what is placed at hand, should be permitted to carry off prizes from present day exhibits.

The honors are due to the energetic, the diligent and the painstaking, and a careful observation will show that success in the show room is attained only by those to whom honors are due.

---

## A LETTER FROM PRESIDENT E. A. KEGLEY ON PREPARATION FOR THE SHOW ROOM.

CEDAR RAPIDS, IOWA, Dec. 15, 1900.
GEO G. BATES, Chicago, Ill.

Dear Sir:—Recently I have visited a large number of fanciers and I have been surprised to find in nearly every instance that the stock is small and decidedly under weight. They are just now selecting for the purposes of fitting and stuffing for the late shows with the hope of overcoming the size, weight and qualifications. I feel certain that they will practically all of them be disappointed in not being able to reach that point now. Experience has taught me that the only way to fit birds for exhibition is to keep them growing and in condition from the time they are hatched up to the time they wish to exhibit them. The birds that are at the last few weeks forced to reach the desired point will show the effects of the handling and confinement in the show room very much more than birds that are brought up carefully and are bound to shrink very much more. When they arrive home they are always very much more out of condition and are rarely fit for breeding purposes for several weeks or months if they survive at all.

The causes for these small birds is not so much due to the size of their ancestors as so many fanciers would believe (and are therefore constantly seeking for larger stock) as to the manner in which fanciers care for their breeding stock and the chicks from the time they are hatched throughout the summer and fall. I would give a few hints in the way of directions for producing exhibition stock as my experience has taught me: Never use anything but good, vigorous stock for breeding purposes. Never use a male or female unless they are in prime condition. Incubate only perfectly shaped and fresh eggs. Kill all deformed and weaklings. Do not feed or water the little ones for thirty-six hours after hatching. Do not feed slops or mashes, always dry feed. Do not crowd too many birds together at any age. I think perhaps this is the most common cause of stunted birds of any that I can recall. Have running water if possible; at least always fresh and cool. Separate cockerels and pullets early. Separate the males from the females after breeding season is over. Get them in their winter quarters early before the cold fall weather sets in. Examine the birds frequently for lice. No birds can thrive or have good feathers if infected by this troublesome mite. There will be very little trouble in this respect if we are always careful to keep everything clean at the yards and especially the roosts and houses. I make a practice when shipping birds to customers to instruct the buyer just how I have been feeding. This often saves a shrinkage and makes my customer feel that I am interested in his welfare. There is little necessity for washing the bird if you have kept plenty of straw in your scratching pen. Try this last suggestion and see how quickly a dirty bird will become clean. E. A. KEGLEY.

# Water Fowl and Their Care

By Chas. McClave, New London, Ohio.

## The First of a Regular Series of Articles on this Subject to be Published During the Year.

Why do not breeders and farmers interest themselves more in the growing improvement of pure bred varieties of geese? Here is a wide field for observation and labor. This part of the fowl industry has most certainly been neglected to a great extent. In the various poultry journals and farm papers we read of the large duck farms in nearly all parts of the country and especially in the east, where thousands and tens of thousands of market ducks are produced annually, but not a line can be found in our journals regarding geese farms. Green goslings and fat geese always command fancy prices in our eastern markets and never go begging for buyers. We predict that the time is not far distant when this branch of the industry will receive more attention than in the past.

Of the seven varieties of geese recognized by the American Poultry Association and called standard varieties, the Toulouse are one of the largest and most popular of the geese family.

It is safe to say that more Toulouse are bred throughout the country than all other pure varieties combined. Opinions differ regarding the origin of the Toulouse, however, our best authority traces them to the city of Toulouse, province of Haute Garonne, in southern France. Marked improvement has been made in both size and color by judicious breeding in the hands of both English and American breeders. The standard weights for Toulouse are 33 pounds per pair for young and 38 pounds per pair for adult specimens.

In selecting Toulouse the head should be large and good shape; neck long, large and carried erect; back, moderate length, broad and slightly curved from shoulders to tail; breast and body, broad, deep, compact, nearly touching the ground and giving the bird a massive appearance; wings, large and strong; tail, short and comparatively small; color, deep gray on head, neck, back and breast shading to white on lower part of body.

As layers the Toulouse outrank all other varieties. A single goose, if not allowed to sit will produce from 30 to 50 eggs in a season, according to age and conditions. Care should be exercised in the selection of breeding stock. Two or three year old birds are far superior to yearlings as they will lay fully double the number of eggs and will hatch stronger and better goslings.

One male will usually mate with two or three females if yarded together in January or February. If a gander has mated with but one goose, it is sometimes very difficult to add one or two more geese to his family as he has very peculiar ideas along this line. For good results in breeding, geese should have the range of a pasture field or marsh as they are strictly vegetarians. If large flocks are kept together, do not allow more than one male and three females for best results. Past experience has taught that the breeding stock should be fed sparingly on grain—that is, only enough to keep them in fair condition, but not to fatten during the fall and winter. They should have access to clover hay all winter and will also consume large quantities of grass when ground is covered with snow. Sufficient water must be supplied for drink and if possible a pond or stream of water to swim in as they will require less grain and keep in much better condition. In this section of the United States geese commence to lay about March 1. However, conditions may vary somewhat in this matter. Nesting boxes should be provided for them in secluded places in different parts of the pasture. Our plan is to take a box three or three and a half feet long, two feet wide and two and a half feet high, cut an entrance in one end about eighteen inches square. Fill box one-half full of fine straw and place in a secluded spot. A nest box should be provided for each goose as many eggs are broken where two or more lay in the same nest.

Care should be taken to gather them regularly when weather is severe. We recommend chicken hens for hatching goose eggs and will later give our idea of raising the goslings.

---

ASHBY, OHIO, Dec. 10, 1900.
*Editor American Poultry Journal.*

DEAR SIR: At the Ashby Poultry Show just closed I won every prize on Barred Plymouth Rocks except 3d hen. Ten pullets scored about 92. We had a fine show, over 550 birds and lots of good ones. Yours truly,

CHAS. HOPPER.

# The Black Langshan

Thirteenth Paper on this Variety by C. I. Forsyth, Winfield, Kas.

In this paper I present a half-tone picture of a five months' pullet that certainly bids fair to finally mature into a magnificent fowl. She has already been laying about two weeks and holds a remarkably stiff and erect comb. Her poise is that of fright, for she never was in a photographer's den before. I scored this pullet 96 points before taking her picture. She is just about through the turkey period, i. e., that age when the gawking, giddy pullet commences to realize that her true mission in life is to lay lots of eggs and raise a numerous progeny.

While she is not so symmetrical as the Salisbury Cathedral spire, she is very nearly so. She has possibly a little too much daylight under her, but when she settles a little more on her legs I fancy she will be a hummer. Indeed, she is

YTH'S CHOICE."
Five months Black Langshan pullet, score by Mr Forsyth 96 points.

probably my choice out of a large flock of pretty pullets, and therefore I call her "Forsyth's Choice." She has a very pretty green sheen over her plumage, and in the sun the green tint pervades her entire breast. She is perfect in shape of breast, body and fluff. She has perfect shanks, a good fan tail, spreading and open behind—one whole side of tail and the tip of a feather on the other showing. A very good back, very broad, but too much angle at base of tail. Feathering quite smooth and close. Such birds always are heavier than they appear. This pullet weighed six pounds at five months with no crowding of feed, and bids fair to make a very large hen. Over a month has passed since she was photographed and she looks more settled now, more matronly, and lays right along. In a few months I hope to have her pose for another picture. She is a 97-point bird, good, hard, honest points, when matured. You Langshan breeders, take a good look at her. She is a good bird, boys. Her head, although appearing somewhat large, is done growing. Her neck is well arched and in her frightened condition sets back, thus appearing shorter than it really is. Her breast is magnificent, broad, round and quite deep. Her body is now in the midst of its growth and really instead of a pullet or cockerel settling down on its legs so much, the fact is what makes the bird appear to settle is the body growing larger, broader and deeper, thus filling out the air space along the thighs with good, honest, solid body. Then when this pullet is matured her body will approach the hock joints a little more. The long, slender shanks are Langshan. The medium feather development on them is Langshan. The close fluff showing a well tucked up stern is Langshan and affords very little offal storage room. Nearly the entire bird, outside of plumage, is, for culinary uses, given to body. That includes a long meaty breast or keel with immense muscular development. This is the choice part of a chicken when fine grained and juicy. As this is a pure Chinese Langshan, the meat is fine-grained and quite juicy. This pullet's eye color is a rich hazel. She shows quite a nervous make-up. Still she bears no possible resemblance to a Leghorn, a Minorca, a Game or a Black Spanish. Who would ever say she shows Cochin characteristics? Set a Cochin pullet down by her and let a grasshopper alight equi-distant from both pullets and the Langshan would nail it before the Cochin saw it. Throw a fresh oyster ten feet away from both birds and the Langshan would run and down it before the Cochin could take a step. Yet the Langshan is not a glutton, but it is an extremely active bird. What it does, it does in a hurry, and is off on *some other business.* For instance, while I was getting her picture the photographer was a long time getting her focused, and she isn't properly focused in her picture. She has five very even serrations which don't show and just on that account. She wasn't a bit afraid of me. I stood by her and quietly stroked her. I chanced to turn my head, looking off at some distant object, and when I again looked where she had stood she was gone. She had suddenly darted ten feet high in the air and alighted on a high screen and did it so noiselessly that I hadn't heard her fly. She had simply got tired of posing and took a short change of venue. The Langshan is *not* a Cochin. In my description of the Langshan female I have been faithful to my ideal. The accompanying picture is not the picture of a perfect Langshan hen. It is as I have before stated, too immature. The back is not concave enough. There is not enough sweep from the back to the top of the tail. But, generally speaking, the picture represents a grand pullet and follows generally my description in a former paper of an ideal Langshan hen. I try to practice in my breeding yards what I write in the magazines. I don't say breed high-headed, rangy birds, and then breed duck-legged fowls that are anything but Langshans, in my own yards. The Langshan is an active, nervous bird, with great development of breast meat of snowy whiteness and with little offal. The plate accompanying this article shows just that kind of a bird. This pullet's general bearing is that of an extremely active, intelligent bird. Such a bird always makes a fine layer and kind and gentle mother. With only moderate care in mating she will be an exceptionally good breeder, and if I ever take a notion to sell her fifty cents won't buy her.

(Continued.)

# TURKEY LORE.

Well, this is the month when the poultry shows are abroad in the land. They are in full blast now. It is the time when some are made happy, some are made sad, because they could not win all the prizes in their lines. If they have not the winning kind they should buy stock to improve the flock, that is bred in line and is producing winners year after year. It is the man who breeds the strains that is up to date, in whatever variety you may name, that is producing the very finest specimens.

* * *

I have a letter from a gentleman in Oklahoma saying that he would like to have a sure cure for roup but says that he agrees with me that the ax is the surest remedy. He says that he has cured it in its first stages. I agree with him yet I disagree. I have cured the very worst case I ever saw in roup, but it is a disease that will crop out in the young. That is why I said that it cannot be cured premanently.

* * *

I did not mean in the December number that I took the fine birds and cured them of roup and then showed them or sold them for breeders and show birds, as that is not according to my motto, which is the "Golden Rule." I try and watch my flock, and when I find that extra fine birds have a cold I give them extra attention. Sometimes they get started and I cannot stop it and it runs into roup. Then their heads come off and I have a bonfire. I very seldom have a case of roup but I find it is nearly every time from the stock or eggs I buy for new blood. I am with Mr. Campbell on roup. He has said that there is no use of anyone having roup in their flock if they are careful in not using any birds for breeders that have had the roup. The best plan is to use the ax freely on those that have had roup.

* * *

A lady writes me from Missouri that she has been breeding thoroughbred Bronze turkeys, or supposed to be, since 1894; at least that is when she started to buy of breeders in the East. They were fine looking birds, but they got mixed with her neighbors' birds. She culled out all that looked anything like they had any mixture in them. She kept a tom from the flock of '95 to '98. In '99 she bought a tom of the same man in the East from whom she had bought in '94, and kept the same tom this year, besides four of her own raising, which were of very fine markings and of large size. When they molted one of her own raising, and one of the best looking ones, went wrong in color. She seems to think that it is a freak of nature; but let me tell you that Bronze turkeys, if bred true and all right, will not turn out gray or white wings and tails. I simply quoted you her letter to show you how long that impure blood will stay in a flock, and then not show itself probably for two or three years. I have seen Bronze crossed on White, and the young would be as finely marked Bronze as anyone would need to look at; but the next year would tell the tale. So the best plan is to get rid of all doubtful stock

and start in anew. Buy of reliable breeders that are careful to always weed out the culls. That lady should have kept the trio the second year and sold all her young and then been careful to not let them mix the second year. Then the result will be thoroughbreds that are thoroughbreds.

My turkeys this season are large framed and big boned, but I believe weigh less at this time of year than in former years, and I have had several write from the South in the same manner of complaint. I cannot account for it; only in my flocks I think the reason is that they have the frame and will make larger birds than heretofore, as they do not lay on fat until they have nearly matured in frame. S. B. JOHNSTON.

Boggstown, Ind.

# WINTER FEEDING.

**The Problem of Winter Feeding as Solved by H. J. Blanchard, Groton, N. Y. The Subject of Housing First Considered, then Mr. Blanchard Gives his own Poultry Bill of Fare with which he has been so Successful.**

The whole problem of winter feeding for eggs can be expressed in one short sentence—turn winter into summer. This is easy to say, but very hard to accomplish, and the best we can do is to supply some of the conditions which exist in summer.

The first essential is warmth, but it must not be supplied by artificial heat, as this makes the fowls tender and susceptible to colds, but by warm houses, to keep out wind and frost and conserve the natural heat of the birds.

Dryness is next to be considered and this is best brought about by keeping the house clean and the floor well littered with straw and some absorbent material like chaff. Also ventilate a little by the windows every mild day by opening them a little, according to the weather. This will carry out moisture, purify the air, and keep the fowls accustomed to the outdoor temperature, so they will not be affected so much by extremely cold spells.

A straw-filled loft in the poultry house is a great aid in keeping it warm and dry in winter. This loft floor may be made of cheap boards and should have plenty of cracks to let moisture pass up and be absorbed in the straw above.

Now that the fowls are properly housed, we will consider their food. Of course, they need good food and enough of it, but I firmly believe it is not so much the kind of food but the way they are fed and managed that makes them lay best.

I can do no better than to give our own poultry bill of fare. Our whole grains are corn, wheat, buckwheat and oats mixed about equal parts. In morning a very scant ration of the mixed grains is given, not more than one-fourth of what they would eat, scattered in litter on the floor. Next comes water slightly warmed in coldest weather.

They are kept busy scratching for grain and running to the water pan for an hour or more, and the exercise thus induced warms them more effectually on a cold morning than would a warm mash. They are next given cabbages or mangle beets cut in halves and placed on the floor. The birds are thus kept busy all the forenoon working for a little food, and at noon are hungry and ready for a big dinner of warm mash, which is fed in troughs, all they will clean up in a short time.

Our mash is made as follows: Ground oats, cornmeal and wheat bran, about equal parts by measure for the base. To this we add one pound oil meal and three pounds high grade beef scrap for each hundred fowls, all well mixed while dry. To each hundred hens we also allow two quarts clover cut in one-eighth inch lengths and soaked in hot water, in which has been disolved a little salt. The whole is then thoroughly mixed with a shovel until in a moist and crumbly state, neither dry nor sloppy. It is then fed while yet warm.

We sometimes substitute boiled and mashed potatoes or turnips for the clover for a change.

After this big dinner of warm mash the birds are not very active for a while, but as it is easily digested they are ready for their supper of mixed whole grain, which is fed in the litter early enough so they will have time to scratch

Chickens and Peaches on Fairview Farm, H. J. Blanchard, Groton, N. Y., Proprietor.

View of a section of Fairview Farm, H. J. Blanchard, Proprietor, Groton, N. Y.

it out before dark.

The water pans have to be inspected to see that all have water enough, as a laying hen almost always takes a heavy drink shortly before going on the roost for the night.

Crushed oyster shells and granite are always kept within reach of the fowls. When the ground is bare our birds are allowed to run outside at liberty, but when covered with snow they are kept inside.

By thus feeding and managing we compel enough exercise so that the birds go to roost warm, healthy and happy.

A tour of the houses is then made, all water pans emptied and the windows and doors tightly closed.

H. J. BLANCHARD.

## BLANCHARD'S MODEL PLANT AT GROTON, N. Y.

A recent visit to the plant of H. J. Blanchard, Groton, N. Y., proved to be an object lesson of the most instructive kind. Here is a poultry farm which is about all that could be desired. It is devoted to single comb White Leghorns, and the owner knows how to make them pay. Mr. Blanchard now has about 1,500 birds on the farm, most of which are pullets that have gotten fairly started making egg records, for which this strain of fowl is noted. The birds are scattered over the farm in colony houses, thirty in number, and present an appearance which justifies one in going quite a distance to see. For twenty years these birds have been bred by Mr. Blanchard, with the main object of developing a strain of layers of large white eggs, and he has succeeded admirably in accomplishing the desired result. At the same time standard requirements have not been neglected, and the flocks show that utility and fancy points can be and are found in the same fowl. We did not see an undersized, weakly specimen in all the lot and when the owner claims, as he does, that they are large, vigorous, active and handsome, the claims are fully justified by the condition of the birds. Mr. Blanchard has kindly consented to furnish A. P. J. readers with the details of the management of his plant, and this will appear at an early date. He informed us that orders for cockerels were coming in rapidly and that the supply would not equal the demand. These birds are eagerly sought for in view of the fact that they stamp their egg laying proclivities so strongly upon their progeny and are valuable to improve even the best flocks in this respect.

Mr. Blanchard has built, since our visit, and is furnishing two new hen houses. He believes that he has now the largest, finest, best equipped and most practical poultry plant in the United States, which is devoted entirely to S. C. White Leghorns. The capacity is easily 1,000 laying hens and 3,500 chicks. There has been a great demand this fall for high grade breeding birds, and he has sold some for exhibition. Mr. Blanchard believes he has as good birds as can be found, and if there are any better he would willingly try to buy some. Trade in hatching eggs was very heavy last spring and the anticipation is a much larger one next season. Besides his other trade he has a large demand and trade in New York City for guaranteed new laid eggs.

FRANK HECK.

The Terre Haute, Ind., poultry show is changed from Jan. 22nd to Feb. 2nd.

# Bantam Briefs

## POLISH BANTAMS.

This breed is another very attractive and ornamental breed and the non-bearded variety is now undergoing a radical change. This concession, as it may be called on the one hand, and great improvement on the other hand, had to be asked for and agreed to by its friends and admirers to save this variety from being dropped from the Standard when the revision committee met at Fisher's Island, N. Y. As all our readers well know, the non-bearded variety was admitted to the Standard when not perfected as they should have been. In other words, they lacked some very essential Polish characteristics when admitted, viz.: The *V comb* and *prominent nostril*, also the *blue leg*, and therefore they were allowed and in fact the Standard demanded a *single comb*, and *white* or *silvery white leg*. Soon after the breed was recognized by the American Standard, the writer became interested in the breed, and purchased the entire original stock, and many specimens he had to discard because they came with blue legs, and the Standard called for white. Some twelve years ago the writer became interested in an improvement of another variety of Polish Bant, after seeing some specimens the English breeders called Bearded White Polish Bantams, and termed miniature Polish, but which had single combs and white legs, as did the American production, and he conceived the idea that there was a great chance for an improvement, and determined to breed a Bearded White Polish Bantam that was truly a miniature Polish and this effort is what accounts for the existence of the Bearded Polish Bantam, as described by the American Standard of today, and has entirely done away with the English effort, with white legs and single combs. Our fanciers and show-goers after seeing the bearded birds shown with their genuine Polish features, became disgusted to an extent, with our first American effort, the non-bearded variety, because they lacked some of these features, and it was proposed at the Fisher's Island meeting to drop them from the Standard, but after hearing the other side of the question, it was voted to allow breeders five years to do away with the white legs and single combs, which was the same length of time given the breeders of Cochin Bants to breed out the fifth toe and willow legs of that breed. Therefore in 1903 all Polish Bantams must have blue legs and V combs or suffer disqualification. The Standard also recognizes the Buff Polish Bantam, but they are seldom seen at our shows of late, although there have been some quite good specimens shown in the past, of two different strains, one strain originating in England and one in America. However, it is very evident they have passed into careless hands and are not bred and improved as they should be. Efforts on both sides of the water have been made to produce a W. C. Blk. Polish Bantam and we have seen mentioned that some fairly good specimens have been produced in England, and have seen one, only one, beautiful pullet of this variety, that was bred in America. Yet it is safe to say to establish the breed has been a failure so far. We, however, have seen very pretty specimens; solid black, that came from the matings to produce W. C.

Feathers from the prize-winning strain of Barred Plymouth Rocks of R. W. Duryea, Great River, L. I., N. Y.

Blacks. We really believe that W. C. Black Polish Bantams can be bred, but as it requires several matings and plenty of time, it is no easy task to begin. That such a variety would be very beautiful, goes without the saying, and they would sell readily and at good figures. The Polish Bantams are as hardy as the large Polish. To raise either successfully, the owner must keep down the lice and guard against cold fall rains. Their large crests act as a detriment to pruning their plumage, and lice thrive in consequence, and this same large crest, if allowed to become thoroughly wet cannot be pruned, or dried by the birds, and it is similar to putting a wet cloth on the back of a person's neck, a severe cold is the result, particularly in spring or fall, when the air is chilly. ZIM.

# Poultrymen and Poultry Shows,

## As Seen and Reported by Frank Heck.

### JEFFERSON'S WHITE ROCKS AND WHITE WYANDOTTES.

One of the best flocks of White Rocks and White Wyandottes which we have seen this season is owned by John L. Jefferson, Des Plaines, Ill. Mr. Jefferson has winners and lots of them, and in this respect is better prepared to please his customers than ever before. He has a large farm devoted almost entirely to these two varieties and has built up a trade which extends all over the country. His White Rocks show that he has had much experience in mating and breeding, and that he thoroughly understands what is required in them. They are large, vigorous birds and in securing size, shape and other desirable points have not been sacrificed, which is so often the case. We saw scores of birds that will be winners in strong competition this winter, and many that will not receive a cut, for color. Mr. Jefferson won some of the most desirable prizes at Chicago and other shows last season in the strongest competition it was possible to find, and his flocks are better in quality this season than last. In White Wyandottes he is particularly strong both as regards quality and quantity. He has about 50 large early hatched pure white cockerels which are just now in prime show condition, and which he is selling at a price much below that usually charged for birds of this kind. It may be impossible for some breeders to get White Wyandottes that will stay white, but Mr. Jefferson is not in that class, and he has profited greatly by his knowledge in this direction.

Mr. Eb. Denny, Aurora, Ill.

The above cut is an excellent likeness of Mr. Eb. Denny, president of the Aurora Poultry Association, and breeder of Barred Rocks which have made an enviable reputation for him as a breeder. Mr. Denny is one of Aurora's most prominent and successful merchants, and he raises Barred Rocks more for pleasure than profit. We have noticed in cases of this kind that more attention is paid to the quality of stock than the number raised, and Mr. Denny is not an exception to the rule. For this reason a customer always gets the best birds, as culls are not generally sold at any price. We found an unusually fine flock of birds at Mr. Denny's and a pen which he was preparing for show gave every evidence of being able to hold their own at any large show. His surplus stock is now for sale and intending purchasers of Barred Rocks will find it to their advantage to write him for prices.

Scene at Des Plaines, Ill., on farm of J. L. Jefferson, breeder of White Wyandottes and White Plymouth Rocks.

### GALESBURG, ILL., SHOW.

The first exhibition we have had the pleasure of attending this season was at Galesburg, and it is worthy of special mention. Its success should be an inspiration to other associations everywhere. Here in a town where 500 birds would have been a very creditable display, were to be seen nearly 1,000 specimens of nearly every standard variety, with quality away up. The one point which makes the show a notable success is the fact that it was the first exhibtion ever held there. This shows what may be accomplished when enterprise and harmony are found in an association. The able efforts of the secretary, B. J. Tilden; his assistant, D. B. Blick and the president, Mr. Coolidge, with the hearty support of all the members, made the show what it was—a decided success. W. S. Russell placed the awards and as usual did it to the entire satisfaction of all concerned. AMERICAN POULTRY JOURNAL advertisers won as follows:

Mr. John Coolidge, President Galesburg Poultry Association.

John Coolidge of Galesburg was one of the largest exhibitors and secured most of the premiums in his classes. On White Wyandottes he had first cock, first and second hens; first, second and third cockerels; first and fourth pullets, and first and second hens. Also sterling silver cup, value $30, for ten highest scoring birds in the American class. On R. C. White Leghorns he won first, second, fourth cockerel; first, second and fourth pullet; third and fourth hen, and first pen. Also tie for silver cup on ten highest scoring birds in the Mediterrenean class. Too much cannot be said in favor of Mr. Coolidge's birds, for he certainly has as fine specimens of these two varieties as can be found anywhere. He has always won at the largest shows and has customers who procure their winners from him each season. He has a record on White Wyandottes at Chicago which is probably unequaled and his White Leghorns are bred from winners at the large eastern shows. He is closing out his Leghorns and is disposing of them at prices below their real value. He has 150 White Wyandottes for sale and can furnish birds scoring as high as

96 by prominent judges. His first prize pen at Galesburg scored 189⅝, which is a very unusual score.

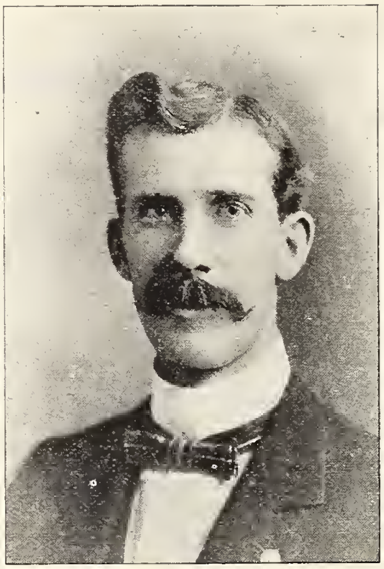
J. C. Stewart, Monmouth, Ill., showed some Light Brahmas of exceptional merit and won first cock, second cockerel, first pullet, second and third hen. Mr. Stewart also had a fine exhibit of White Wyandottes and won his share of the premiums. He is particularly strong in Light Brahmas and showed some of as good specimens as we have seen thus far at the shows.

O. L. King, of Walnut Grove, Ill., won second pullet, third pen, and tied for third cockerel in the Barred Rock class. His birds were not quite up to weight, and the record does not do him justice on that account. He has color and shape in his birds which is far above the average and will undoubtedly win heavily at the later shows as he has in the past.

J. E. Lanphere, Ponemah, Ill., won on White Plymouth Rocks first, third and fourth cockerels; second hen; first, second, third, fourth pullets, and first pen. His first prize pen scored 190⅛, and was the highest scoring pen in the show, which fact will give some idea of the quality of his White Rocks. His first cockerel scored 95 and first and second pullets 95½ each. He not only has a few of this kind, but has quite a number for sale. In Buff Rocks be won second and third on cockerel and third on pullet. Buff Cochins, first cock; first and second hens; first and third cockerels; first, second, fourth pullets, and first pen. Also $25 silver cup for ten highest scoring birds in the Asiatic class.

In the White Cochin class he won first, and second hens, first and second cockerels, first and fourth pullets and first pen. Buff Cochin bantams, first cock, third hen, second cockerel and first pullet.

Mr. Lanphere showed forty-two birds and won thirty-two regular premiums and twenty-nine specials. This is a record that is seldom duplicated and is the strongest possible evidence of Mr. Lanphere's ability to breed the right kind of stock. He is the kind of a breeder who can be depended upon to ship just what he promises and his prices are as low as tbe same quality of stock can be bought for anywhere. He has a prize record to be proud of and enjoys a large trade.



H. E. Bates, Galesburg, Ill.

Mr. E. L. Famulener had one of the best exhibits at the show, and won a number of the desirable prizes. His specialty is White Plymouth Rocks and his birds scored up around the top notch. His best cockerel reached 95 points and was a stay white bird. We have not seen a better display of White Rock at any show this season than that of Mr. Famulener, and he informed us that he had a large number of high grade exhibition birds for sale. He also breeds Buff Rocks and White and Buff Cochins, and has always won his share of premiums wherever he has exhibited. He is in a position to furnish the best and guarantees to satisfy his customers.

WHITE PLYMOUTH ROCK HEN.
Bred and owned by E. L. Famulener, Cameron, Ill.

Mr. H. E. Bates, one of Galesburg's most prominent breeders, won as follows: White Rocks, 1st cock, 3rd hen and 3rd pen. Buff Wyandottes, 2nd and 4th cockerels and 2nd pen. S.-c. Brown Leghorns, tie for 2nd cockerels, 1st and 2nd pullets, 3rd hen and 2nd pen. He won 11 regular and 2 special prizes on 16 birds, which shows that his exhibits possessed exceptional merit as a whole. He is closing out his Leghorns and is offering them at less than their value. He gives all correspondence his personal and prompt attention and those who need birds of his varieties will find it a pleasure to deal with Mr. Bates.

———o———

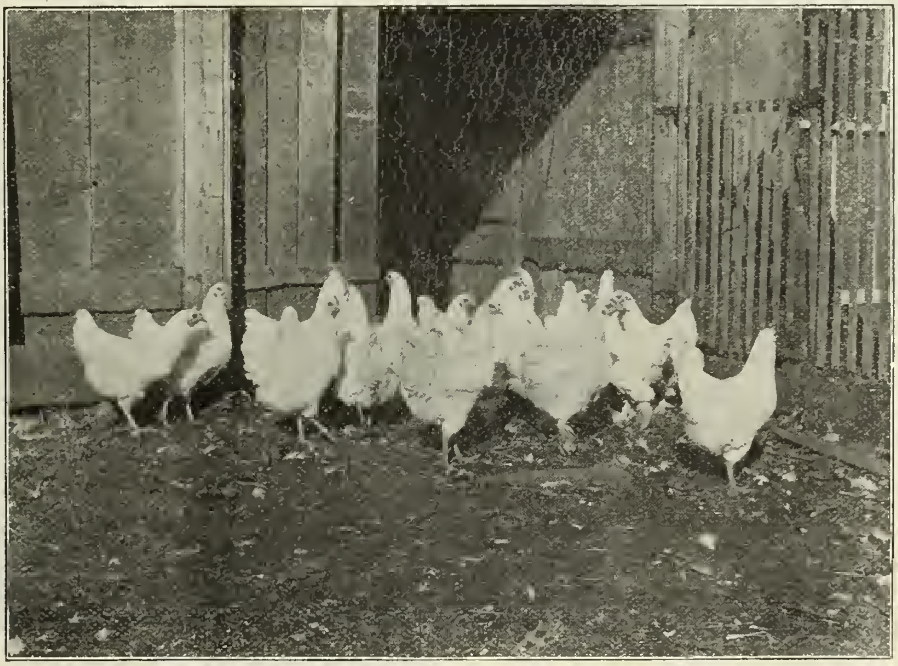
## INDIANAPOLIS SHOW A RECORD BREAKER.

The Indianapolis, Ind., show, held during the second week of December, was a grand success and surpassed all previous records in regard to quality as well as number of entries. Nearly 1,200 birds were upon exhibition and about every standard variety of fowls was represented as well as some which are not in the standard, such as Orpingtons, Klondikes, Rhode Island Reds, etc. One most noticeable feature of the show was the prompt and businesslike manner in which all details were handled. We actually failed to hear of a single dissatisfied exhibitor, and we all know, of course, that it is almost impossible to conduct a poultry show to the entire satisfaction of all exhibitors. The president of the association, Wm. Tobin, and Secretary Frank R. Hale have been untiring in their efforts to make the show a success and, best of all, every promise made was fulfilled to the letter. The judges were Theo. Hewes, B. N. Pierce, Jas. A. Tucker and Wesley Lanius. The work was done quickly and the ribbons were up and premiums awarded the second day of the show. A. P. J. advertisers won as follows:

Barred Plymouth Rocks—1st cock, 92, Geo. Muck, Edinburg, Ind.; 2d cock, 90¾, M. O. Gentry, Danville, Ind.; 3d cock, 90, and 4th cock, 89½, C. A. Porter, Flatrock, Ind.; 1st and 2d hen, 93¾, Geo. Muck; 1st cockerel, 93½, Geo. Muck; 2d cockerel, Ed. Murphy, Carmel, Ind., score 93½; 3d cockerel, 92¾, White's Feathered Stock Farm, Battle Creek, Mich.; 4th cockerel, 92¾, C. A. Porter; 1st pullet, 92¾, White's Feathered Stock Farm; 2d pullet, White's Feathered Stock Farm; 3d pullet, 92½, Geo. Muck; 4th pullet, 92½, C. A. Porter, Muck, 1; Murphy, 2; White, 3; Porter, 4.

White Plymouth Rocks—1st cock, 96¼, 2d, 95¾, 3d, 95¼, W. C. Pierce & Co., Indianapolis, Ind.; 4th cock, J. H. Boyer, Frankfort, Ind.; 1st and 2d hen, 96 and 95½, W. C. Pierce & Co.; 3d hen, 95¼, J. H. Boyer; 4th hen, 95¼, W. C. Pierce & Co.; 3d and 4th cockerel, 95¾ and 95¾, W. C. Pierce & Co.; 1st and 2d cockerel, 96 and 95¾, John Landis, Edinburg, Ind.; 1st, 2d, 3d and 4th pullet, 96¼, 96¼, 96¼, 96, respectively, W. C. Pierce & Co. Pierce, 1; Pierce, 2; Landis, 3; Boyer, 4.

Buff Plymouth Rocks—1st and 4th cockerel, 93½ and 91½, A. L. Weckler, Bunker Hill, Ind.; 2d cock, 92¾, J. D. Keyworth, Evanston, Ill.; 3d cock, 92¼, S. Lynch & Son, Alsworth, Ind.; 1st and 2d hen, 92¾ and 92½, J. D. Keyworth; 3d hen, 91½, A. L. Weckler; 4th, 91½, S. Lynch & Son; 3d and 1st cockerel, 92¾ and 92¼, Ed. Murphy; 2d cockerel, 92¼, and 3d pullet, 93, J. D. Keyworth; 4th cockerel,



White Plymouth Rocks and White Cochins as bred by J. E. Lamphere, Ponemah, Ill.

92, S. Lynch & Son; 1st and 2d pullet, 93 and 93, Ed. Murphy; 4th pullet, 92¾, A. L. Weckler. Weckler, 1; Murphy, 2; Keyworth, 3; Lynch, 4.

Silver Wyandottes—1st and 2d cock, 93¼ and 93¼, R. E. Jones, Flatrock, Ind.; 3d, 92, K. S. Trimble, Somerset, Ky.; 4th cock, 89½, W. F. Coats, Columbus, Ind.; 1st 2d and 4th hen, 94¼, 91 and 89¾, R. E. Jones; 3d hen, 91, K. S. Trimble; 1st, 2d and 3d cockerel, 93¼, 92¾ and 92, R. E. Jones; 4th cockerel, 91¾, W. F. Coats; 1st pullet, 93¾, W. H. Bolinger, Pendleton, Ind.; 2d pullet, 93½, W. F. Coats; 3d pullet, 93½, R. E. Jones; 4th pullet, 93, Adam Jose & Co., city. Jones, 1; Boliuger, 2; Coats, 3; Coats, 4.

White Wyandottes—1st cock, 94¾, 4th cock, 93¾, 1st hen, 96½, 1st cockerel, 95, and 4th pulet, 96¼, W. C. Pierce & Co.; 2d cock, 93¾, 4th hen, 96, John Krumholtz, city; 3d cock, 93¾, R. E. Jones; 2d hen, 96, 2d cockerel, 95, 2d aud 3d pullet, 96¼ and 96¼ Miller Bros.; 3d hen and 1st pullet, 96 and 96¼, Fred B. Keefer, Marshall, Ill.; 3d cockerel, 94¼, Ed. B. Murphy; 4th cockerel, 93¾, D. C. Harrold, Elwood, Ind. Pierce, 1; Miller, 2; Jones, 3.

Golden Wyandottes—1st and 2d cock, 92¾ aud 92¼; 1st, 2d and 3d hen, 93, 92¾ 93½; 1st, 2d, 3d and 4th cockerel, 93½, 93¼, 93 and 92¼; 1st, 2d, 3d and 4th pullet, 93, 92½, 92¼ and 92, R. E. Jones. Joues, 1; Jones, 2.

Buff Wyaudottes—1st and 2d cock, 94½ and 93; 1st, 2d, 3d and 4th hen, 94¼, 94¼, 94¼ and 93; 1st and 2d cockerel, 92¼ and 92; 1st, 2d, 3d and 4th pullet, 94, 93¾, 93 and 93, W. C. Pierce & Co.; 3d cockerel, V. Krabtree, Tiffin, Ohio. Pierce, 1; Pierce, 2; Krabtree, 3.

Light Brahma—1st cockerel, 94¼, Rosebower Poultry Yards, Owenshoro, Ky.; 1st cock, 94½, 1st and 3d hen, 93¾, 93¼; 2d cockerel, 93; 1st, 2d and 3d pullet, 95, 94¾ and 94 1-3, N. E. Woods, Pecksburg, Ind.; 2d cock, 93¼, 4th cock, 92½, 4th pullet, 94½, S. Lynch & Son; 3d cock, 92½, 4th hen, 93, 4th cockerel, 92½, Indiana Poultry Farm, city; 2d hen, 93¾, C. D. Day, Kokomo, Ind.; 3d cockerel, 92¾, F. P. Johnson, Howlands, Ind. Woods, 1; Haas, 2; Johnson, 3; Jay, 4.

Buff Cochin—1st cock, 92, 1st hen, 93, J. B. Clark, Chicago, Ill.; 2d, 3d and 4th hen, 92¾, 91½; 2d and 3d cock, 87½ and 86, 2d pullet, 92, Mrs. W. McMullen, Thorntown, Ind.; 1st cockerel, 91, 1st pullet, 92¾, Indiana Poultry Farm; 2d and 4th, 90 and 80, 3d pullet, 91¾, T. B. Poe, Oakford, Ind.; 3d cockerel, 89½, 4th pullet, 91, C. J. Ward, Irvington, Ind. Haas, 1; Ward, 2; McMullen, 3; Ward, 4.

Partridge Cochins—1st, 2d and 4th cock, 94, 93 and 91¼ and 90½; 1st, 2d and 3d hen, 92½, 92¼ and 91½; 1st, 2d and 3d cockerel, 93¾, 92½; 1st, 2nd and 3d pullet, 93¾, 93¼, 92¾, Geo. D. Corlies, Atlanta, Ohio. Corlies, 1.

Langshans—1st and 2d cock, 92¾ and 92½; 1st and 2d pullet, 95½ and 93, Rees F. Matson, Greencastle, Ind.

Black Langshans—1st cock, 95½; 1st, 2nd, 3d and 4th hen, 95¾, 95, 94¾ aud 94½; 2d and 3d cockerel, 94¼, L. C. Hoss, Kokomo, Ind.; 2d cock, 95¼; 3d cock, 93¼; 1st aud 4th cockerel, 94½ and 94; 1st, 2d, 3d and 4th pullet, 95¾, 95, 95, 95, Ben. S. Myers, Crawfordsville, Ind. Myers, 1; Hoss, 2; Matson, 3.

S. C. Brown Leghorns—1st and 2d cock, 94½ and 94, W. H. Wiebke, Ft. Wayne, Ind.; 3d cock, 94, E. C. Brattain, Connersville, Ind.; 4th, 94, F. R. Hale, Shelhyville, Ind.; 1st cockerel, 94½, 1st pullet, 95, W. H. Wiebke; 3d hen, 93; 2d cockerel, 94½; 2d pullet, 94; 4th pullet, 93½; 4th hen, 93, F. R. Hale; 2d hen, 93½, J. E. Lauterhach; 3d cockerel 94½; 3d pullet, 94, B. J. Bedell, city., Wiebke, 1; Hale, 2.

B. C. Brown Leghorns—1st cock, 92½; 1st hen, 94½; 2d hen, 94; 3d cockerel, 94; 3d pullet, 92; 4th pullet, 91½, Drexel Poultry Yards, Drexel, Ill.; 3d hen, 94; 4th hen, 92½; 2d cockerel, 94½; 4th cockerel, 93; 1st pullet, 94; 2d pullet, 93½. Marion Akc, Ft. Wayne, Ind.; 1st cockerel, 95, T. N. Smiley, Milligan, Ind. Ake, 1; Drexel, 2; Drexel, 3.

S. C. White Leghorns—1st cock, 95½; 2d cock, 93½; 1st hen, 96½; 2d cockerel, 94½, Geo. W. Gilbert, Pleasant Lake, Ind.; 3d cock, 93½; 2d hen, 95; 3d hen, 95; 1st pullet, 96; 3d, 96; 4th, 95½, Harmon Bradshaw, Lebanon, Ind.; 4th cock, 92½, J. E. Lauterbach, Spriugfield, Ill.; 4th hen, 94, 4th cockerel, 94½, Jas. L. Wood, Elwood, Ind.; 1st cockerel, 95, 3d, 94½, B. F. Hill, city. Gilbert, 1; Bradshaw, 2; Hill, 3; Bradshaw, 4.

## PROFITABLE EGG FARMING.

*One of the Stand bys of the Poultry Business—Description of Two Large Egg Farms—Housing, Care and Feeding—The Profits.*

BY GEO. H. POLLARD.

[Reprinted by permission from the New Year Book and Complete Catalogue of the Cyphus Incubator Company, for 1901, entitled, "Profitable Poultry Keeping in All Its Branches."]

Egg farming is undoubtedly one of the most profitable branches of the poultry business. In all sections of the country fresh eggs are readily salable at fair prices. While at times the margin of profit may be small, yet in the average it will compare favorably with the proportionate profit which is yielded by any other branch of the industry. In the East, especially, egg production is perhaps the strongest prop on which the market poultry business rests. Every year the competition from the West makes it more difficult in all branches of farming to get satisfactory and reasonable profits for the labor expended. In the production of eggs this competition is less dangerous, as it is a physical impossibility to lay down the Western eggs sufficiently fresh and in good enough condition to seriously injure the trade in near-by, new-laid eggs.

It is for the general interest of all who keep poultry to know something of the larger egg farms and the method of their operation. The egg farm of Mr. Geo. F. Hosmer of Woburn, Mass., is one of the largest plants in Massachusetts. It is devoted exclusively to the production of fresh eggs for the best family trade. Mr. Hosmer began about fifteen years ago with only nine hens, one male bird and three chickens, having bought the lot for an experiment in poultry keeping. At this time his business kept him in Boston during the hours of day. Night and morning he cared for the fowl and chickens. Through the day they were cared for by members of the family, until the flock increased to such proportions that it became necessary to have additional help. The flock grew in number until Mr. Hosmer was carrying one thousand head of laying hens. He still continued in his Boston business and hired a young man to care for the hens. His birds were yielding him a net income of from ten to twelve hundred dollars per year, and as his business was also fairly prosperous he felt that he was on the high road to success.

Ultimately the Boston business began to drop off and the outlook was less promising, and Mr. Hosmer finally decided to devote his whole time to his poultry interests. More buildings were added, and a larger number of laying hens were wintered. This number at one time reached thirty-six hundred layers carried through the winter. The present season there will be wintered from twenty-five hundred to three thousand.

Few pure-bred fowls are kept. The larger proportion are cross-bred or common, scrub birds. They are kept for eggs only, and little attention is paid to the production of chickens, except to replenish the flock of layers. Of the straight crosses kept, those of the Light Brahmas and White Leghorns and the Plymouth Rocks and Leghorns have done the best.

Views of Geo. F. Hosmer's Egg Farm, Woburn, Mass.

All the houses on this plant are close-front, shed-roof, plain structures. The entire plant is designed for business and for the comfort of the birds. No scratching shed houses have ever been used, therefore no comparison can be made of the respective values of the two types of buildings. There is one house of 480x18 feet, with pens 9x18 feet. Others of 108x14 feet, 72x11 feet, 108x12 feet, and one 198x13 feet, which includes a sleeping room for the help, an office, an egg packing room, etc. There are several other houses, and all are of the same general type. The farm contains thirty acres. From the accompanying views a good idea may be had of the general style of the houses. They have gravel floors, which are kept deeply littered with straw, hay or such other material as will make scratching a necessary part of their exercise in getting the hard foods which are always scattered broadcast in the litter. There is a roosting bench which extends across the back side of the pen about twenty inches from the floor, and two perches are placed about ten inches above this platform. These are kept well oiled with kerosene, to which napthalene has been added.

A great many hogs plucks are used in feeding. Usually four times a week the birds have a soft feed, consisting of two parts of cracked corn, one part of shorts, one part of mixed feed, to which is added about fifteen percent in bulk of the plucks, which have been well cooked and run through a meat cutter. A liberal proportion of second crop clover or rowen is also used in this mixture. The balance of the time, beef scrap is used instead of the plucks, but in rather a less proportion. A steam boiler is used for cooking the food, as when cooked it will keep much longer without souring than where it is merely mixed with hot water. Green bone is cut and used to some extent in winter. A power ensilage cutter is used to cut the green food.

For hard foods, corn, oats and wheat are used, but more corn than of the other grains. Mr. Hosmer thinks corn is the best hard food used for poultry, everything considered, and that most of the outcry against its use which has been made in various poultry papers has been based upon ignorance of the results which come from its free feeding.

Green food is used in abundance. We saw a large quantity of growing kale from which the lower leaves are pulled and fed to the flocks. The lower leaves are pulled a few at a time, leaving those higher up to grow, and in this way several pickings may be made from the same plant. The fowls are very fond of this food, and from six to ten bushels per day are fed. In this climate kale lasts from the latter part of June to freezing weather. Before it is ready green rye, barley and other grain growths are fed for green stuff. Clover is used extensively during the winter months. A good many common table beets are used. They are sometimes run through a bone cutter and mixed with the soft food, sometimes cooked, and at other times they are hung up to be picked at pleasure. All soft foods are fed in a common V-shaped trough.

A large proportion of the eggs from this farm have been retailed directly to regular customers. Within a short time, however, Mr. Hosmer has sold the egg

W. S. Harris' Egg Farm, Mansfield, Mass.

route and now supplies the buyer with the eggs which he delivers. It is calculated that the fowls average to lay about ten dozen eggs each per year, with the chances under rather than over this number.

This year about nine thousand chickens have been hatched. One-third of these were hatched in Cpyhers Incubators, the balance with hens. Previons to this year the hatching has been done altogether by hens. The surplus cockerels are dressed and sold to egg customers, or are sold alive to dealers.

Very little trouble is experienced from sickness or disease. There are always more or less of the old birds which are ailing and have colds or sore eyes. These are weeded out and are put in a hospital, which is merely a quiet, open, cold coop, where they recover or do not, and the "do nots" are burned in the furnace. If the chickens are much crowded in the houses they are liable to take cold if allowed to run out early, before the air has become somewhat warmed by the sun. Consequently, they are kept indoors a reasonable time, and are not allowed to have free egress from the coops as soon as day breaks.

## EGG FARM OF W. S. HARRIS, MANSFIELD, MASS.

Mr. Harris has had an all-round experience as a poultryman. After a considerable time spent with ducks he gradually worked more into the chicken and hen end of the business. While he had considerable success with ducks his experience led him to believe that either, kept separately, would do better than to try to combine both the ducks and hens on the same ranch, especially where there was no water-run. Mr. Harris is a firm believer in a water range or a swimming-pool for breeding ducks, and being without this he naturally worked more toward the dry land fowl. He began raising chickens for market, producing fall and winter chickens. He has marketed as high as 5,000 fall chickens in a season, and always had the reputation of producing a thoroughly good article, which commanded top prices. As an instance of what he has done, we might cite the case of ninety-six chickens returning to him the sum of $200.32 net, above the expense of picking, expressage and commissions. This was received in the latter part of the month of May, and was not extraordinarly high priced, and is simply one instance of many which could be quoted.

Mr. Harris keeps White Wyandottes, Barred Plymouth Rocks and Rhode Island Reds. He makes a specialty of furnishing eggs for hatching as well as breeding stock. Each variety is bred for egg production. When asked how many eggs hens would average to lay in a year, he thought that 150 eggs per hen would be a fair average. Some hens would lay 200. They are kept in flocks of from twenty to thirty-five each, according to the size of the pens. While Mr. Harris believes ten square feet of floor space is the proper amount for each pen, yet he seldom practices what he preaches in this respect, for almost always his fowls have less room.

His buildings nearly all have closed fronts, and the six scratching sheds are perhaps a trifle too cold to get the best results in egg production. His buildings are a variety of shapes and show the growth of the owner's convictions with regard to utility. Several of the buildings have slanting fronts, but Mr. Harris very positively affirms that no more buildings with slanting sides will be built on his place. The latest type has a nearly flat roof, there being no more than two or three inches drop from the front to the rear. The roofs are covered with two-ply tar paper and the sides with either one or two-ply. These are washed with hot coal tar and given a generous sprinkling of fine sand or gravel.

The hens are given rye straw as a scratching material and are fed soft food of one-half bran and one-half meal, with about 10 percent in bulk of the best beef scrap added. This is mixed with hot water in cold weather and with cold water in warm weather. They have as a hard food two-thirds cracked corn and one-third wheat with an occasional feed of buckwheat. Some ground oats are used, but very few whole oats are fed.

The example which Mr. Harris presents is that of a man who begins with a few birds and with little or no experience, and who, by close application to the business and by the use of brains and energy, has built up what is at present one of the biggest egg farms of New England.

## THE "ALL RIGHT" DRINKING FOUNTAIN AND FEED COOKER COMBINED.

This invention is one of the best and most practical on the market. It is not a novelty but a useful addition to the list of poultry appliances. The fountain works automatically, always supplying the fowls with fresh clean water. It is made of galvanized iron and will not rust or corrode and is made to hold 2½ gallons. It is so constructed that the birds cannot get into the water nor scratch dirt into it. The heater is designed for a three-fold purpose. 1st, to keep the water in the fountain from freezing during the cold winter months; 2d, to keep the poultry house warm at night; 3d, to cook the feed. The heater is 8 inches square and is heated with an oil lamp which makes a very powerful heat, boiling water in ten minutes The lamp is perfectly safe and there is no danger whatever in keeping it burning in the house overnight. The invention is one which will be appreciated by all who use it. It is inexpensive, occupies but a small space and costs but little to run it. It is manufactured and for sale by I. E. Bever, Keithsburg, Ill., who will be pleased to send descriptive reading matter to all who request it.

———o———

It is hardly necessary to call attention to the advertising of the Cyphers Incubator Co., in this month's issue, for to use a common expression it "sticks out like a sore thumb," occupying as it does two-page space. Every word of this ad should be read by every reader of AMERICAN POULTRY JOURNAL, for it would undoubtedly be of much benefit to them. The Cyphers have something to say and they say it very nicely. This ad states in full the contents of the new catalogue the Cyphers are getting out that should claim the attention of every one interested in this line of industry. Their catalogue of this year is better than last year's. We urge every reader to secure one. The illustrations in this catalogue will be of exceptional interest and the reading matter has been obtained without regard to expense. Every AMERICAN POULTRY JOURNAL reader should look up this ad for a full description of the book and then send to the office nearest them for a copy.

———

M. S. Gardner, Philadelphia, N. Y., writes that the show at Johnstown, N. Y., was the hottest show he ever saw in the state outside of New York, and many New York and Boston winners were shown. He won as follows on Barred Plymouth Rocks: First, second and third cocks, second hen (no former winners shown), first, second and fourth pullets, and the $30.00 sweepstakes cup for best twelve birds in show, any variety. This show was judged by H. A. Bridge, of Ohio, who was pleased with the class. He scored first pullet 94½, first 94, not yet in full feather. He wrote on card of first cockerel, "best wing I ever saw on a Barred Rock male or female." This bird and the second cockerel were sired by the cockerel at Boston, 1900, whose sire (Jefferson) won first at New York State Fair, 1899, defeating noted eastern winners. These four birds were all bred by him and trace back to a long line of winners.

———

W. R. Wooden, the Buff Wyandotte breeder, won at Battle Creek show as follows: First cock, first, second and third cockerels, first, second and third hen, first, second and third pullet, and first and second pen. This seems rather too much to advertise, as it looks like no competition, but his winnings on cockerels were against four or five birds secured from the east at high price especially to compete with him.

———

The Battle Creek, Mich., exhibition was a very fine show and it was decided to make an effort to get the State Association at Battle Creek next year, as it was found not desirable to have the state show and the Battle Creek show in competition. If possible the two will be combined next year and give the finest show Michigan ever produced.

———

At the Harrison County (Mo.) Poultry Asociation's show, November 26-7, held at Harrisonville, Mo., Mr. H. T. Rogers won on his Light Brahmas as follows First cock, tied on second; first hen, tied on third; first, second and third pullet; first, second and third cockerel; first, second and third pen; also

**CORNELL'S LEGHORNS, Buff & White.**

My Buffs will all be sold without reserve to make room for Penciled Wyandottes. These birds have been bred in line for ten years and are to-day the finest in this country. My yards contain more noted prize winners than those of any other breeder. At last Boston show I won four times as many first prizes as all competitors combined. Besides this I have won 1st on breeding pen for more consecutive years at the New York Show than any other breeder, i. e., 1st on pen at New York in 1897, 1898, 1899, and 1900 at Boston. My White Leghorns have been well known winners for years, and to-day lead as layers and winners all other strains. Send for catalogue.

EZRA CORNELL, Ithaca, N. Y.

A "Majestic" White Wyandotte Hen.
Score 95½.

**Majestic Strain**

**White Wyandottes.**

There are no handsomer, more profitable birds in the world than the White Wyandottes. No Wyandottes are superior to my "Majestic" strain. My stock is bred from prize winners at the big Eastern shows. I now have yearling stock for shipment, a limited number of pullets and plenty of cockerels. Score cards by Judge J. Y. Bicknell. I guarantee satisfaction in every particular.

**C. S. Wetmore,**
**Box 377,**
**Lockport, N. Y.**

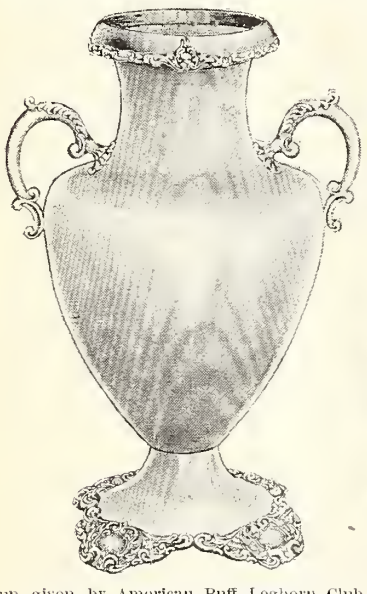
**Belgian Hares.**

FOR SALE—One buck, 7 mo. old, sired by Pilot, winner at Boston and New York. One doe by Genl. White, (imported) is bred to the Cardinal, (imported). One doe by Tonawanda Chief, and he by Climax, Jr. The does are six mo. old and over and are well bred. A copy of pedigree and further information on application.
C. S. Wetmore, Box 377, Lockport, N. Y.

won every special given on Light Brahmas and a Grand Special for highest ten birds in show. It was the largest exhibition in the history of the Association, there being over 500 birds entered, of which the Light Brahmas were the largest, containing 200 birds. There was a close contest and Mr. Rogers is to be congratulated on his record. The judging was done by Thos. F. Rigg.

We call attention to G. M. Whiteford's (Arlington, Neb.) change of ad. He has high grade stock at prices that are right, consisting of Buff Rocks, Black Langshans and Silver Wyandottes and also Belgian Hares. Write him and mention AMERICAN POULTRY JOURNAL.

F. S. Nicholson, of Cambridge, N. Y., won recently at the Cambridge fair the following prizes: Four firsts, two seconds and four thirds in very hot competition. At all shows where he has exhibited this season his birds have been in competition with some of the best birds and best breeders in the country. The Cambridge show had over five thousand birds and was conceded to be the largest fall show ever held. Mr. Nicholson is a breeder of Barred Plymouth Rocks and is building up a fine reputation as a breeder and exhibitor.



Cup given by American Buff Leghorn Club at their annual Meeting at Chicago. Given for best cock, hen, cockerel, pullet and pen, by club member.

W. P. Slaone, of Knoxville, Tenn., has published and placed on the market a very excellent book upon pit games, which is advertised in our columns. This has splenlid information on breeding, conditioning and healing. It also contains treatment for the diseases of fowls and dogs. The price is 50 cents, which can be sent direct to Mr. Sloane at Knoxville, Tenn.

G. C. Flegel, of Westville, Indiana, made a splendid record on White Wyandottes and Buff Cochin Bantams at La Porte, Ind. He secured four firsts, two seconds, three thirds and three fourths; his winnings were as follows: First cock, first, second and third hen; first pen. on White Wyandottes. First hen, third cock, second pen and many others on Buff Cochin Bantams, and they were hard classes to compete in all through.

John M. Sontag, of St. Charles, Ill., manufacturer and inventor of the Natural Hen Heat Brooder, wishes us to say that his catalogues will be out in January. The delay has been caused by the printers, who have been slow in finishing the job. These catalogues will be sent on receipt of 10 cents.

Mrs. E. I. Reynolds, of Haskells, Ind., is a very successful breeder of Pure Nugget Strain Buff Plymouth Rocks. She has made some fine winnings this season and has refused $50 each for the first and second cock birds and has refused at big prices to sell every hen that she exhibited. She has choice stock to sell at reasonable prices and is now closing out fine cockerels at $2, $3 and $5 each; these are all farm raised and Mrs. Reynolds assures us that she breeds the very best birds only, quality counting with her.

CAMDEN, ARK., Dec. 12, 1900.

*Editor American Poultry Journal.*

DEAR SIR: Well, the great Arkansas State Poultry Show is over and was the largest and best ever seen in this section. Competition was the strongest we ever met and still with all that again won the lion's share of the prizes. We don't plant poultry, but our poultry plant, the Ouachita Valley, represents the largest and best in Dixie. Our birds are beyond any doubt natural born winners and those we had at the state show were nearly foundered on prizes. The judges gave us all colors but mostly blue. Think of it. In competition with a thousand or more birds we won twelve 1sts, ten 2ds and eight 3ds, besides many specials. We simply swept the deck on S. Wyandottes and Buff Cochins, besides won out easy on our B. Rocks, I. Games and Light Brahmas. It's no use talking—we don't say it boastingly—but as our show record proves, we have as fine as

R. W. Ward, Hettick, Ill.

any on earth, and will prove this fact to all wishing good stock. Just try us is all we ask. G. W. BROWN.

LOCKPORT, N. Y., Dec. 17, 1900.

*Mr. Geo. G. Bates, Editor American Poultry Journal, Chicago, Ill.*

DEAR SIR: I inclose copy of bill of sale, which kindly publish in your next issue.

He is a fine bird of the stay white type and extra fine in shape, comb, eyes and legs.

Won 1st and special at Philadelphia,

Pa., last winter and 3d at New York in hot competition.

This is his second year and I consider him at his best. I shall mate him to some of my best pullets scoring 93½ to 96 points.

In fact, all my breeding pens are well up in quality, not a bird scoring less than 93½ and up to 96½ points. A majority scoring 94½ to 95½.

Besides the first mentioned cock bird, my males heading next season's breeding pens score 96, 96, 95½. All birds scored by Mr. J. Y. Bicknell, of Buffalo, N. Y.

These birds are the cream of what I have raised this year.

Thanking you for past favors, I am, yours very truly, C. S. WETMORE.

ROCHESTER, N. Y., June 15, 1900.

This is to certify that I have this day sold to C. S. Wetmore, Lockport, N. Y., the 1st cockerel at Philadelphia, Pa., December, 1899; also 3d cockerel at Madison Square Garden, New York, 1900, for the sum of ——.

Received payment.

JOSEPH N. PRUE,

Wm. F. Coats, of Columbus, Ind., proprietor of the Old Homestead Poultry Yards, had a very attractive display of his silver Wyandottes at the Indianapolis show last month. Among his

R. E. HAEGER, ALGONQUIN, ILL.

birds were thirteen pullets which made an average score of 92 points, which is an exceptional record on birds of this variety. Mr. Coats has reduced the breeding of Silver Wyandottes to a science and has gotten toether a strain of birds which has a national reputation. The lacing on some of these birds is nearly perfection itself and admirers of this variety will be serving their interests by corresponding with Mr. Coats before placing their order.

At the Indianapolis show last month B. H. White, Battle Creek, Mich., exhibited ten barred Plymouth Rocks and won ten premiums, including 1st and 2nd pullet, 3rd cockerel and 3rd pen. Mr. White is showing some stock this season that is just about the thing in Barred Rocks, and he informs us that he has 500 choice birds for sale.

Mr. John McMillan, breeder of Buff Orpingtons at Bridgeport, Ind., will make a specialty of furnishing his customers this season with eggs from the very best stock of this variety. His claims for quality of his birds are backed up by his record at the late In-

# Hamm's Buff Plymouth Rocks Win Three Firsts

And a large number of specials at the Battle Creek Show, Dec. 4-7, 1900, in the strongest competition. (A representative of American Poultry Journal saw my exhibit.) Birds winning here are second to none. As I shall not show again this season, I offer a long line of grand exhibition and breeding birds for sale.

Self regulators that **keep the heat just right.** No getting up nights to look after them. So simple a child can run them. Sold at low prices and fully guaranteed. Send four cents for Catalogue and special prices. **FOREST INCUBATOR CO., Lock Box D, FOREST, O.**

## Black Prince Strain

## DARK BRAHMAS EXCLUSIVELY

### Champions of the World!

This strain has been shown continuously for over twenty years and has never acknowledged defeat. The Black Prince strains of Dark Brahmas is not only the greatest exhibition strain, but the greatest laying strain in existence. 75 grand, good breeding birds for sale, by Advance, the greatest show and breeding male living, and Black Prince, the male that dazzled the eyes of Eastern exhibitors last winter. Choice breeding birds at $2.00, $3.00 and $5.00 each.

**CLARK E. ADAMS,**
**Racine, Wis.**

Sec-Treas. American Dark Brahma Club.

dianapolis show, and those of our readers who wish to get a start with these fowls will make no mistake in placing their order with Mr. McMillan.

J. D. W. Hall, of Des Moines, Iowa, has arranged to have his roup cure placed on sale in three large supply houses of Cyphers Incubator Company, at New York, Chicago, and Boston. The success of this roup cure is proving remarkable and Mr. Hall is having large orders for it, as well as for his Egg Cell Air Model. At Des Moines, Iowa, the Highland Poultry Farm, of which Mr. Hall is manager, is receiving many improvements. Mr. Hall is completing several new buildings, which will

CHICAGO BELL 2D.

Score 93½ as hen. A first prize winner at Chicago, Milwaukee and Davenport. Photo taken at six years old. Dam was Blue Bell, score 94½ as hen by Felch. Owned and bred by R. E. Haeger, Algonquin, Ill.

afford him still greater facilities for handling his White Wyandottes. Mr. Hall is one of the representative breeders of the west, and is secretary and treasurer of the Western Wyandotte Club. He makes a specialty of White Wyandottes, but also pays great attention to other varieties, especially White and Barred Plymouth Rocks.

The Famulener Poultry Yards, E. L. Famulener, proprietor, Cameron, Ill., won the following prizes at the late Galesburg, Ill., show: White Plymouth Rocks, 1st and 4th hen, 2nd cockerel, 4th cock and 2nd pen. Buff Cochins, 3rd and 4th hen, 2nd cockerel, 2nd pen. White Cochins, 2nd and 3rd pullet, 3rd and 4th cockerel, 2nd pen. Buff Cochin bantams, 2nd pullet, 3rd cockerel. These winnings are very creditable considering the competition, which was very strong, although they hardly do the birds justice for the reason that many of them were not fully matured and consequently suffered some by cuts on weight.

E. B. Murphy, of Carmel, Ind., who commenced an ad. with the A. P. J. this month, made good winnings at the Indianapolis show. He tied 1st cockerel and won 2nd pen on Barred Rocks. On Buff Rocks he won 1st and 3rd cockerel, 1st and 2nd pullet and 2nd pen. He also has some White Rocks, White Wyandottes and S.-c. Brown Leghorns. Mr. Murphy has been a breeder for fifteen years and has a fine lot of birds for sale.

### MEETING OF THE AMERICAN POULTRY ASSOCIATION.

In the premium list sent out by the management of the Chicago show, under the head of "Club Meetings," is a notice of the meeting of the American Poultry Association. By mistake a few of these premium lists gave the date of the meeting as January 27, 1901. It should have read "January 23, 1901."

The next annual meeting of the American Poultry Association will be held in the Sherman House Club Rooms, corner of Clark and Randolph streets, Chicago, Ill., January 23, 1901, 8 o'clock p. m. Fred L. Kimmey,
Secretary National Fanciers' Association of Chicago.

### THE CHICAGO SHOW.

The Fifth Annual Exhibition of the National Fanciers' Association will be held in the New Coliseum Building, Fifteenth street and Wabash avenue, Chicago, Ill., January 21, 22, 23, 24, 25 and 26, 1901. There will be on exhibition poultry, pigeons, Belgian hares and pet stock of all kinds all of these days. On the 23d, 24th, 25th and 26th there will be on exhibition cats under the superintendence and direction of the Beresford Cat Club; also on the 23d, 24th, 25th and 26th there will be an exhibit of pet dogs. The exhibit of dogs will be under the supervision of the Chicago Pet Dog Club. One admission will admit to all parts of the building.

The entry fees for poultry, Belgian hares, cats and pet stock will be $1 for each specimen; pet dogs, $2, and pigeons, 50 cents each specimen. General cash prizes will range from $7 to 25 cents, according to the variety and the number in the class. A large number of special prizes, too numerous to mention, will be given.

Club meetings will be held as follows: The American Poultry Association, January 23, 8 o'clock p. m.; the National Exhibition Game and Game Bantam Club, January 24, 8 o'clock p. m.; the American Buff Leghorn Club, January 23, 2 o'clock p. m.; the American White Wonder Club, Jan. 22, 2 o'clock p. m.; the American Houdan Club, January 22, 4 o'clock p. m.; the American Buff Plymouth Rock Club, January 23, 2 o'clock p. m.; the Western Wyandotte Club, January 23, 10 o'clock a. m.; the National White Wyandote Club, January 22,, 12:30 p. m.; the American Indian Game Club, January 24, 2:30 p. m.; the Lake View Flying Club, January 26, 10 o'clock a. m.; the American White Plymouth Rock Club, Jan. 24, 10 o'clock a. m.; the American Belgian Hare Association, January 25, 8 o'clock p. m.; the National Bronze Turkey Club of Chicago, January 23, 4 o'clock p. m.; the American Langshan Club, January 23, 8 o'clock p. m.; the Western Tumbler Club, January 22, 7 o'clock p. m.; the American Plymouth Rock Club, January 23, 10 o'clock a. m.

The National Fanciers' Association of Chicago will give a complimentary banquet to all members of the American Poultry Association and all exhibitors at the Fifth Annual Exhibition. The banquet will be at the Sherman House, corner Randolph and Clark streets, Chicago, Ill., Thursday evening, January 24, 1901. Tickets can be obtained of W. W. Hogle, President N. F. A., and Chairman of Banquet Committee.

Messrs. S. Butterfield, E. N. Barker, Theo. Hews, B. N. Pierce, Thomas F. Rigg, L. W. Schimmel, James A. Tucker, Eben Walden, H. A. Bridge, J. H. Drevenstedt, William Plaehn, W. S. Russell, S. H. Taylor, Henry Tieman, F. B. Zimmer and Miss Elizabeth Hurlburt and Mrs. Charles McCloud have been employed as judges to pass upon the different varieties

About five thousand premium lists have been sent out. It has been the intenion to send one to every person in the United States, Canada and Mexico desiring one. If any have been overlooked the omission will be supplied. Address Fred L. Kimmey, Secretary, room 333 Manhattan Building, Chicago.

Fred L. Kimmey,
Secretary.

In a recent issue of the American Poultry Journal a writer under the nom de plume of "Veteran Exhibitor" argues against uniform cooping as follows: "It has become quite the thing for the show management to furnish coops. The Chicago, New York, Boston, St. Louis and other associations at large expense have for a number of years had uniform cooping. In some cases the coops have been rented (Spratt's, Ramsey's or others' patent). In others the association has built and used them year after year. When uniform coops are hired they may be used several times during the season. No doubt those used at Boston and New York are at both places the same year. If owned by the association, it is the practice to rent them to other associations less fortunate. Every exhibitor of experience knows that after they have been used a few times they become infected with diseases and vermin. How often do we hear the remark: "I will not show at —— show. Their coops are full of roup or some other contagious disease or species of vermin."

I wish to say for the Chicago coops that the conditions noted in the above quotation do not exist. The National Fanciers' Association of Chicago owns the wire fronts, galvanized and tinned, and the partitions and tops. Each year new lumber is rented for the bottoms and backs. The partitions are dipped in whitewash and disinfectants, the muslin for tops and drapery is thoroughly laundered and the wire fronts treated to a bath of disinfectants. Each year every coop comes into the showroom either new or thoroughly renovated, and is absolutely safe. This point was kept in view when arrangements were made for the supply. All this was done at great expense.

Fred L. Kimmey, Secretary.

### CHICAGO MARKETS.

Chicago, Dec. 20, 1900.

*American Poultry Journal, 325 Dearborn Street, City.*

Gentlemen: It is now near Christmas and the turkey market is right at its height; in other words, receipts are heavier than they will be at any other time this year. You will observe by referring to our former letters that we predicted a nine-cent market on turkeys for Christmas, and that is what we have been selling at this week.

Other poultry is low. We are selling to-day as follows:

Dressed Poultry.—Turkeys, fancy, 9c; old gobblers, 7½c; poor turkeys, 6 to 8c, according to condition. Chickens, fancy, springs, 7½ to 8c; hens, 6½ to 7c; poor stock, less. Ducks, fancy, 9c; poor to medium, 7 to 8c. Geese, fancy, 8 to 8½c; poor, 6 to 7c.

Live Poultry.—Turkeys, 6½ to 7c. Chickens: Hens and springs, 6½ to 7c. Ducks, 7 to 7½c. Eggs, 20c per dozen.

We advise your readers to ship everything dressed, with the exception of heavy hens, which should be shipped alive to arrive here on Wednesday of each week. For the information of readers who are not familiar with the manner of dressing poultry for our market we have gotten out a little booklet giving instruction for dressing and shipping poultry so it will bring the top of the market, which we will send free to any one asking for it. We will also send market report and shipping tags free. We will be glad to hear from any of your readers when we can be of service to them. Yours truly,

Sprague Commission Co.,
P. H. Sprague, President.

The show that will be held at Milwaukee, Wis., Jan. 28-Feb. 2, 1901, promises to be a hummer. The Milwaukee Association always puts up a good show and every one who attends with a string of birds will have careful attention and it will be a splendid place to make records. For any information regarding it, write to Jno. A. Koenig, 330 Chestnut street, care Clifton House.

Published the first of each month by
GEO. G. BATES, Editor and Proprietor.

FRANK HECK, Associate Editor.

Subscription price 50 cents a year in advance.

When delivered by carrier in Chicago 60 cents a year in advance.

Payment for AMERICAN POULTRY JOURNAL, when sent by mail, should be made by money order, registered letter or stamps.

Write name and address plainly, and if JOURNAL does not come regularly and promptly, write us at once.

In requesting change of address be sure to give the old address as well as the new one. This is important.

Advertising rates will be furnished on application.

The reliability of new advertisers must be ascertained before an insertion of an ad in the columns of AMERICAN POULTRY JOURNAL can be made. This is a business matter, the justice of which is readily seen, as protection to the readers who answer advertisements.

Alway say when writing advertisers, that you saw it in the AMERICAN POULTRY JOURNAL.

All copy for advertising and manuscripts for publication should reach us not later than the 20th of the month preceding the date of issue.

## OUR ADVERTISERS.

The AMERICAN POULTRY JOURNAL points with pride to the representative class of advertisers who patronize its columns. They are breeders who, as far as we know, are without exception honorable business men and women, breeders who are leaders in their respective lines and who produce the best birds that are brought out at the shows each season. No locality is specially represented. The AMERICAN POULTRY JOURNAL is read everywhere and serves the interests of poultrymen generally, regardless of location. Our readers will find every variety of fowls advertised, also poultry appliances of every description. The appearance of a card in these columns is a guarantee of responsibility in so far as careful investigation can make it so. Misunderstanding in trades will occur but cases of this character are easily adjusted and we are pleased at all times to do our part in bringing buyer and seller together. In order to facilitate this work however, all patrons of our advertisers should state when writing, that the advertisement was seen in AMERICAN POULTRY JOURNAL. This course serves a double purpose. It places us under obligations to you in case of an unsatisfactory purchase and it reminds the advertiser of the fact that we are alive to your interests and will expect liberal treatment of you at his hands. It also enables him to trace the source of your inquiry and shows him what returns he is getting by reason of his card appearing in these columns. It is an advantage all round and our readers are respectfully urged to remember to mention AMERICAN POULTRY JOURNAL when communicating with advertisers.

## THE BEST BREED.

There will be thousands of persons visit the poultry shows this month for the first time and who will be seized with a desire to own a few standard bred fowls. One of the first questions to be decided by them is "Which is the best breed." This question has engaged the thought of beginners ever since conditions have been such as to interest them in the business and it is reasonable to assume that the best breed would have been found long ago if there really was one. Each variety of all breeds has its ardent friends and admirers and many are the plausible arguments which have been advanced to prove the claims of this nature made for certain varieties. The question is as far from being settled now as it ever was and to all who are pondering over it now we would say, select the variety that best suits your fancy. If you prefer a white fowl get one of that kind, or if you fancy a black, buff or parti-colored variety get one of them. Some breeds are better for some purposes than others. They are all good and no breed possesses the merits of all others combined. In regard to laying qualities, etc., any variety will be just what you make it and success rarely comes to a breeder who has taken up a variety which is not pleasing to his eye in the matter of shape, plumage and similar characteristics.

## UNREASONABLE CUSTOMERS.

During the next few months thousands of dollars will change hands for stock and while there will be an inevitable number of dissatisfied customers, the number would be materially lessened if purchasers could be induced to consider the conditions surrounding the business and be reasonable in their demands. Many new people take up the breeding of fancy poultry each season and this year is going to be an exceptional one in that respect. For this reason we desire to call the attention of our readers to a few facts which if duly considered would be the means of preventing much disappointment and many accusations of unfair dealing. Intending purchasers when writing to advertisers should carefully describe just what they desire to purchase. Many people write to a breeder and simply say, "Please quote me price on pen of birds," or upon single birds, as the case may be. An inquiry of this kind conveys no idea whatever of the quality wanted and most breeders have neither the time nor inclination to describe all the birds in their yards and quote prices on them. Neither can it be done satsifactorily in a catalogue or circular. Purchasers should give the breeder an idea of what they want the bird or birds to score and ask for price on such birds. If the specimens are to be particularly strong in certain sections these preferences should be explained. It should also be borne in mind that perfection has not yet been attained and it is useless to describe a bird which must practically be a perfect specimen to fit the description. Cases of this kind are the rule, although many buyers perhaps do this unconsciously. Do not expect to buy a bird for less than it is worth, and especially a high grade one. They have fixed values and the demand is always greater than the supply. Do not write to breeders and ask for price on "good breeding birds" and describe prize winners, or after a price has been given, order the birds and say that you hope to get the best, as you want to show them somewhere. Rest assured that you will get just what you ordered in the first place and what your money pays for. It is well to have an explicit understanding beforehand that if stock is not satisfactory it can be returned and money refunded less express charges. If you have a specified amount to spend for birds, a most satisfactory method is to ask the seller to describe what he will send for that amount of money. The buying and selling of birds should be done on a business basis and handled precisely as any other business transaction. The seller also has obligations to fill and the buyer is not always at fault. The good points of birds should not be enlarged upon and mention of defects studiously avoided. A complete and accurate description of the birds should be given and all promises fulfilled to the letter. Shipments should be promptly made or a reasonable explanation offered for failure. Remittances should be promptly acknowledged and disposition to please should be shown after receiving an order as much so as before.

## WHAT WILL THE A. P. A. DO?

The next regular meeting of the American Poultry Association will be held at Chicago in connection with the exhibition of the National Fanciers' Association the fourth week in January, and the question now agitating the minds of a long suffering and indulgent fraternity is "What are they going to do for us?" The great body of poultrymen whose interests are affected surely have a right to ask the question and demand an answer. The association can no longer pursue a do-nothing policy and expect to escape criticism. The poultry industry has reached such proportions as justify and demand an active organization to support and enlarge it along commercial lines. The American Poultry Association has never done anything except to make and unmake the Standard. It has been customary for a dozen or so of the members to get together at the meetings and fill the offices with those who happen to be in favor with the few regardless of their qualification or fitness for the positions. The chief duty of the secretary-treasurer has been to have the minutes of the meeting printed and then sit down and wait a year till the same duty was to be performed again. This criticism is not directed at the secretaries personally, but at the Association as a whole, for not adopting a policy which would prevent these conditions or make it possible for them to exist. The association is not representative of the poultry industry. There are ten capable and successful breeders out of it for each one that is in it. Its recommendations in regard to certain points in awarding premiums at the shows are ignored by probably two-thirds of the poultry associations. The only hold it has upon poultrymen is the Standard description of the various breeds and this hold is maintained for no other reason than that the breeders realize that they must have a Standard and the A. P. A. has no opposition. The mention of a rival association generally brings out a most eloquent defense of the old one which is beautifully sentimental. Sentiment is all right in its place, but the man or body of men who depend upon sentiment entirely to bring success in business will find that they are on the wrong track. It is the hustler who "gets there." Steps should be taken to increase the membership of the association from 500 to about 2,000, which can be done within the next year, but not by charging $10 for membership fee. The income of the association could be made to reach at least $2,000 per year exclusive of that derived from the sale of Standards. The Standard can and should be sold for 50 cents.

The secretary should be paid a decent salary and compelled to earn it. A dozen other things should be done, but it is not for us to suggest them. THE AMERICAN POULTRY JOURNAL is a friend of the association and as such takes interest enough in its welfare to call attention to its faults and urge a remedy. It is a sad case of lost opportunities.

FRANK HECK.

**Traveling Representative and Associate Editor of American Poultry Journal.**

Mr. Frank Heck, in assuming the duties of representative of THE AMERICAN POULTRY JOURNAL, as announced recently in these columns, will in addition become associate editor of this publication During the last few years Mr. Heck has come prominently before the poultrymen of the country in several lines of work, as a breeder of good fowls and as an organizer of exceptional ability. The formation and growth of one of the most prominent specialty clubs is largely due to his efforts and co-operation with its members, and to his untiring zeal, courteous ways and executive ability is universally attributed the permanent establishment of the club and popularity of the variety of fowls he has so successfully bred. His contributions to the poultry press have added largely to his success and have been the means of introducing him to the poultry raisers of America.

So far as his duties will permit, Mr. Heck will continue to visit the poultry fraternity during the year, in their yards and at the shows. While the large number of advertisers represented in THE AMERICAN POULTRY JOURNAL and the fact that this is a pretty big country of ours, precludes the possibility of his visiting every one, still no section of the country will be sligbted in bis efforts to assist in every legitimate way the development of the poultry business of AMERICAN POULTRY JOURNAL patrons.

In this new work his friends will recognize bim through the columns of the AMERICAN POULTRY JOURNAL, and I take sincere pleasure in making this announcement. GEO. G. BATES.

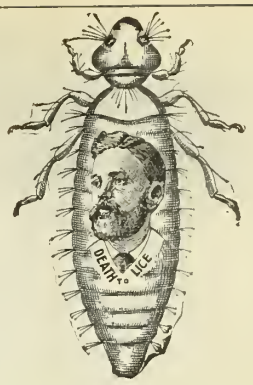
## THE PHILADELPHIA SHOW.

The first of the four great poultry shows of the country was in all respects a splendid success and one that fully came up to the expecations of the management, while the exhibitors and visitors were surprised and delighted over the result of the exhibition, which had been so carefully planned and successfully carried out by the officers

The entries numbered 1,629. This exceeded the number of entries at the Madison Square Garden show of last season and came within 100 entries of equaling the number entered last season at Boston, and is a most creditable showing. Taking these figures as a basis, the proportionate increase in the number of entries at New York, Boston and Chicago at these coming shows will roll up a grand total of entries far in excess of anything ever before accomplished in the showrooms and demonstrating effectually the wonderful growth of the standard bred poultry business.

The quality of the stock exhibited at Philadelphia, as a whole, was exceptionally good. This show is to be a permanent fixture; there is no doubt of this. In number of exhibits the White Wyandottes lead, with the Barred Plymouth Rocks and Leghorns close behind. The Asiatics, although of fine quality, were light in number. All other standard varieties were well represented, and winners of ribbons in any class had to be good specimens.

Mr. Ben S. Myers, the popular judge and Langshan breeder, informs us that the Belleville, Ill., and Bowling Green, Mo., shows were both great successes this season. He officiated as judge at both of them and we understand that he has been engaged for them again next season. Mr. Myers is one of the most careful and painstaking judges in the field, and by reason of his satisfactory work he has created a demand for his services which takes all his time during the show season to fill.



**A Good Exhibitor**

at a poultry show once said to me: "I use Death to Lice Powder on my birds, because it not only destroys the vermin but it removes the grime and smutch from the birds' feathers and causes them to look cleaner and brighter." I know that there are several things that will destroy hen lice, but my Death to Lice Powder is one of the very few things that will do this without injury to the bird in some way.

**A Show Bird**

to look its best, ought to be in the pink of condition, and the most important requisite to this end is to keep it free from vermin. Very frequently we find birds in exhibition pens with lice swarming around their thighs and vents. Sometimes their owners will wonder why they get out of condition every time they are confined or cooped, and why their feathers lose their brightness and lustre, or why they will stand up in a heap the best of the time. Even though you think your birds are not lousy, it is well to look them over every two or three weeks, if only for fun.

**A First Prize**

In any of the popular classes is worth more than the few dollars you would need to invest in Death to Lice Powder to keep your entire flock free from lice all of the season, and aside from the fact that you will make a better showing, your birds will all be larger and healthier in consequence. We do not claim that Death to Lice will make prize winners from culls, or cause inferior specimens to score high, but its use will make good lookers look better, win better, sell better and give better satisfaction all around.

**A Laying Pullet**

will lay more eggs if kept clean and comfortable Lice live on the blood that should go to sustain the vitality of the hen. If you feed lousy birds, you must give extra rations on account of vermin. No flock is infested from its own choice. It is their owners' or keepers' fault.

**Death to Lice Powder**

for dusting large chickens, layers or show birds, 5oz. sample, 10c by mail, 15oz. retails by agents for 25c; 48oz. 50c, 100oz. $1, at agencies or by express, buyer paying express charges from here or from nearest agency. "Special" for mites, 4oz. 10c, 16oz. 40c by mail. "Ointment" for head lice, on children or chickens, 10 and 25c postpaid. A 64-page illustrated book mailed free.

**D. J. LAMBERT, Mfr.,**

**Box 308, Apponaug, R. I.**

The Royal Red Belgian Hare Co. had one of the largest and most attractive exhibits of hares at the recent Battle Creek, Mich., show. This firm is a leader and has a large number of the bigbest grade animals from both imported and domestic stock. They have a very extensive rabbitry at Battle Creek and are enjoying a large trade.

**GARDNER'S BARRED PLYMOUTH ROCKS**

Have won during the past three years at **NEW YORK, BOSTON, ROCHESTER and SYRACUSE,** 17 First prizes out of the 29 competed for, or

**MORE THAN ALL COMPETITORS COMBINED.**

This in competition with the cream of the best eastern yards.

**AT MADISON SQUARE GARDEN,** January, 1900, in the largest class and strongest competition ever seen in **NEW YORK** they won **3** out of the **5 FIRST PRIZES, viz:**

***1st Cock, 1st Cockerel, 2d and 4th Pullets, 1st and 3d Pens,*** and the Fisher's Island Trophy, value

**$100 for the Best Cock, Hen, Cockerel, Pullet and Pen.**

They have also won for my customers in some of the largest shows in the United States and Canada. Free circular gives list of winnings and full description of stock.

**M. S. GARDNER, Philadelphia, Route 1, Jefferson Co., New York.**

# THE FANCIER IN THE POULTRY YARD

THOS. F. RIGG, Iowa Falls, Iowa.

If the month of January this season is as mild in proportion as the earlier part of the winter has been, the handling of the birds will be somewhat different from the usual way. In all parts of the country the season has been very backward and the fowls have not had to be closely confined in winter quarters. This condition of affairs is a fortunate one, because the birds will be better in every way, and late hatched birds have had a most favorable opportunity to reach maturity before the bitter cold weather could effectually stunt them and retard their growth. The late hatched bird is surely with us this year in greater numbers than has been the case for a long time. Reports from all sections state that early hatches were almost a total failure for some unaccountable reason, and the early bird is therefore a comparatively rare quantity. As long as the weather continues favorable the stock should be allowed perfect freedom of the range, but it of course cannot pick up as large a portion of its food as it could during the early fall and should therefore be supplied with sufficient grain, green food, etc. Allowing birds their liberty will make them healthier, more vigorous, and will be beneficial in every way. They should not be confined at any time in the year when the weather will permit of their living outside. Many of us have no doubt put off making necessary repairs to buildings, and this should now be done without further delay. One or two cracks in the side of a house, or a broken window, may give the cold winds a chance to start a cold which will develop into roup and exterminate the flock. If any of the birds are now affected in this manner they should be separated from the well ones and treated for the trouble. Now is also a good time to cull the flocks for the last time. All stunted, undersized specimens should be disposed of. Birds that are not now up to standard weight will not, as a rule, reach it as adult birds, and they will not be worth the feed, room and attention necessary to carry them over. There are also the birds which have for some time shown defects which we have been hoping would disappear. These should not be kept longer, because they will not make desirable breeders even if the objectionable points are overcome. While we are cleaning out we should not forget the bird which is being kept "just to see what he will come to." We all have one or more of this kind. It may be a freak or it may be a bird conspicuously perfect in certain sections but a rank cull in others. There is nothing in them to justify keeping them. The breeder with a notably handsome, uniform flock of birds is the one who is not afraid to use the ax. He is the one who does not find it necessary to apologize for the condition of any of his birds when you call upon him to purchase or admire his flock. The bone cutter should be playing an important part with the poultryman now. They are not expensive, considering the results obtained from green cut bone, and every breeder should have one. Those who contemplate using an incubator this season for the first time should now be ordering it, so that at least one hatch may be taken off as an experiment before the time comes when failure would be costly both in money and time. The birds should be looked over carefully and an idea formed of how they are to be mated later on. Here is where we are intelligently prepared to do business if trap nests or some similar method was used last spring in ascertaining the source of the best birds. Early birds which have reached maturity may be mated this month and the eggs set for the purpose of getting out youngsters which will be in show trim in time for the early fall fairs and to fill the wants of the fellow who always demands standard weight in September. In regard to feed and manner of feeding, the plans for January should hardly vary from those of November and December. A variety of grain should be fed in deep litter, which may be of straw or dried leaves. Clean, fresh water should be given the birds daily, and it should be so arranged that they will have to break the ice in the vessel to get the water. A warm mash of ground grains is undoubtedly the best morning food. Cooked vegetables may be mixed with it. A head of cabbage suspended from the ceiling by a stout string and reaching within two feet of the floor is a good exerciser in that the birds must jump up to get the cabbage. Keep the quarters clean—just as much so as you would in warm weather. Don't overfeed; see that a few birds do not get all the feed and the more timid ones go hungry.

———o———

S. H. Taylor as a poultry judge is giving special satisfaction. Taylor is yet a young man and in his fourth year as a judge. His three years of engagement at the Chicago shows proves his ability as a poultry judge. Taylor will judge at eight shows this winter, including the Chicago show, the Missouri state show, the Illinois state show and Buffalo, N. Y. Arrangements are being made for him to judge the turkey exhibit at New York City, same week of Chicago show. The National Bronze Turkey Club members of the different states consider Taylor the best authority as a turkey judge in the West.

The Home of Mr. and Mrs. S. H. Taylor, Sibley, Ill.

S. H. Taylor, Sibley, Ill.

## PRAIRIE STATE INCUBATORS.

A few years ago the subject over which rival incubator manufacturers contended was "hot water or hot air." Time has proven that the hot air machine was the better, hence it became necessary for something else to be advocated by rival firms. The principles of different views are such that in all walks of life we have an adversity of opinion. In the past it was as before stated, but the important subject to both hot air and hot water advocates was neglected to a more or less degree. In those days very little was said about supplied moisture and self-ventilation; today we are all discussing these important subjects. Like all other grave questions, we have the extremists, those who say that the hatching egg shall be sprinkled, the other who says no moisture at all. Which shall it be? Shall we cling to the old-time ideas or go to the other extreme? Why not take a happy medium, one in which the surroundings, the atmospheric changes, locality and altitude shall govern, and not one whereby all sections of the country are considered alike. The conditions which will rule in one neighborhood would be a detriment in another, hence, it all depends upon the operator whether a machine shall be a success or failure.

The half-tone presented here is one that speaks for itself. This does not mean a practical illustration for every family to allow a child to turn the eggs, for many children are of an inquisitive disposition and would have to break a few eggs to see whether they were good, but the object is to bring forward the fact that the Prairie State Incubator is one of the simplest; one that a child could operate were it necessary. We all know that men of years have made failures and lost thousands of dollars by artificial incubation, hence it is foolish to say that a child can operate an incubator through a hatch, but at the same time this illustration shows to the reader that the principles involved in the construction of the Prairie State Incubator are so simple that if he will follow the directions he will never experience difficulties which are not to be surmounted. The Prairie State Incubator Company was one of the first to advocate hot air. For fourteen years it has moved onward and upward until it now heads the list. 25,000 sales is the record for last year. These machines have gone to every state in the union and nearly every foreign country. From the very first this firm has realized the importance of correctly applied moisture can ventilation. They do not follow either extreme, but cling to the idea of meeting the requirements of the locality, hence every year's sales are increased until the capacity of the factory is taxed to the utmost year in and year out. This factory is by no means a small one; it is the largest of the kind in the world. In order that our readers may be enlightened where part of this product is being used we call their attention to an order from Jos. Breck & Sons, Boston, Mass. A single order from this firm was given for 790 machines. By no means will this supply the requirements of the New England States. When it is considered that an ordinary car holds about 100 machines it would require nearly eight cars to fill this one order. Not only has this firm placed large orders with the company but a dozen other agents have ordered from one to five carloads. When these few simple facts are considered would you not consider it your duty and to your interests to write for a free catalogue to the Prairie State Incubator Company, Homer City, Pa?

## POULTRY INDUSTRY AS WE SEE IT.

What is handsomer than a yard of standard bred fowls, all one breed, where they are healthy, well bred, well matured and an up-to-date flock? And when one is thoroughly interested in them and has made them something of a study, what will soften a man or woman's heart more than the care, study and ownership of fine poultry? A prominent poultry judge said to me recently in answer to the question, "do you not find the poultry industry attracting the attention of a better class of people than formerly?" Yes, poultrymen, I find, are as a rule a royally good lot of fellows, for a person cannot be hard-hearted and become fond of poultry. And how true we find that to be, for while a man can be crooked, if so disposed, in the poultry business, he can hardly be hard-hearted, and I am thankful to say that those inclined to be crooked are in the minority and short lived. Take the breed I handle, for example, the White Wyandotte, and the very color of their plumage is symbolical of purity, their habits are mild and gentle, and one cannot handle them and not be constantly reminded, unconsciously perhaps, of the lesson they teach. Poultry raising is an industry, when properly conducted, that no one, rich or poor, need be ashamed of, and no business with the same amount of capital, care and good business energy, will be more remunerative. But like every other legitimate business it requires time, patience, business ability and pluck to accomplish best results. With these requirements success is sure to come. No one thing is doing so much good for the future of the poultry industry as our leading poultry journals, and as long as they are conducted on the same lines as at present and refuse to countenance and publish the advertisements of irresponsible, so-called poultrymen they will continue to be the helpmate of every true poultryman and fancier. If anyone doubts the fascination attending the breeding of standard bred poultry let one attend a first-class poultry show. Look the birds over, study them carefully, read the journals, buy a trio or pen of good birds, watch and study them, attend the shows again and if one has a fondness whatever for the animal creation and has a good heart in him he is sure to become interested—impossible to be otherwise. Then when one is interested and wants to make a start, let me say, do not do as the average person does, buy *cheap* stock, but get *good* birds from a reliable breeder for your foundation stock and you will save two or three years' time which the one who buys the cheap, poor stock loses, and then it is a satisfaction to yourself to know that you have just as good birds as anybody has; and then again when you have raised a flock of birds from *good* stock you are not ashamed to have your fancier friends come and visit you. I am speaking from experience, for I know what a satisfaction it is to have a true fancier come and visit you when you have a yard full of bang up good birds to show him. Do not start in the poultry business with the idea that a chicken is a chicken, for when you come to raise *good* birds you will find you are mistaken.

F. C. WILCOX,
Breeder of White Wyandottes.
Joliet, Ill.

## HOW THE BUYER CAN KEEP THE BIRDS THEY PURCHASE UP TO STANDARD REQUIREMENTS AND HAVE SATISFACTORY RESULTS.

I will venture to pen a few words which will perhaps assist the readers of the AMERICAN POULTRY JOURNAL and keep up to standard requirements his first investment in poultry.

Above all in keeping poultry look well to your houses—have them built right, not necessarily expensive, but practical, convenient and warm.

Then, most important, see that the surroundings are clean and tidy.

I believe the reason why I rarely have sick fowls is because I strive to keep everything in good condition.

I have been to poultry yards where different things were scattered here, there and all over. It is of great importance to the breeder of good stock to keep houses, yards and premises in order.

Then when visitors call to inspect the poultry everything will be in shape.

Look well to your flocks and see that they have everything necessary for the

Mr. F. C. Wilcox's little four year old girl feeding some of his half grown White Wyandottes, which have since developed into prize winners.

A partial view of Hickory Grove Place, the largest exclusive White Wyandotte plant in the West. Owned by F. C. Wilcox, Joliet, Ill.

A bunch of early hatched White Wyandotte cockerels receiving their breakfast at Hickory Grove Place, F. C. Wilcox, Propr., Joliet, Ill.

best results.

In feeding, endeavor to give them a variety and to supply such food as will produce eggs from hens and growth in young stock.

Especially in raising young stock you cannot be too particular as to feed and care. I have seen chicks hatched in May that would outclass and outweigh March hatched birds, for the reason that the former had everything necessary to produce growth and feather, while the latter were fed on about the same fattening food with very little change.

I believe a great many fail to obtain the best results in mating their birds. They do not make it enough of a study and try to overcome defects. If my females were a little off in shape, I would endeavor to mate a male very strong in that particular point. If my male bird was a little weak in eyes, I would look to have my hens with good bay eyes, and so on through the different sections of the birds.

Each year I watch with interest the results of my matings the previous season, and find the more I study to overcome defects, the more interesting it is to me and better the results obtained. I believe one of the great secrets of success in raising stock is by retaining the male birds and breeding in line; by so doing you will have a more even lot of birds.

If your first cockerel is a fine specimen and you select his sons and grandsons, your stock each year will reproduce itself.

In introducing new blood, do so by all means through the female line, at the same time being particular as to the stock from which they are produced.

C. S. WETMORE.

Lockport, N. Y.

## POULTRY EXHIBIT A SUCCESS.

The Fourth Annual Exhibit of the North Bend (Neb.) Poultry and Pet Stock Association, which closed last Saturday, was a success and the management is well pleased. The number of entries this year was considerably in excess of last year, there being about 400 birds exhibited. These exhibitions have given a great impetus to the raising of high grade poultry, and common stock is not nearly so common as it used to be and high grade stock on the other hand is much more frequently met with than formerly.

## IMPORTED LANGSHANS.

Mr. George S. Duffin, of Hoopeston, Ill., has recently imported some fine Black Langshans from the Croad yards in England. He has one of the largest and finest flocks of this variety in the United States, and this last addition to his flock will give him a lead in Langshans which will not be easily overcome by his competitors. He now has about 300 birds, and scores of them are fit to win in strong competition. His exhibit at the Hoopeston show was the best we have seen this season by one exhibitor, every bird in the lot being grand in shape and color. He has a large number of exhibition birds and breeders for sale now and is disposing of them at prices which make them great bargains. He is also booking orders for eggs, and AMERICAN POULTRY JOURNAL readers who are looking for something exceptionally fine in this line will make no mistake in placing their orders with Mr. Duffin.

FRANK HECK.

At its annual meeting, held in Philadelphia, the America Houdan Club elected officers as follows:

President—George O. Brown, Baltimore, Md.

Vice-President—Rev. C. E. Petersen, Hartland, Me.

Secretary-Treasurer—Thos. F. Rigg, Iowa Falls, Ia.

Executive Committee—J. F. Crangle, Simsbury, Conn.; J. B. Thomas, Jr., New Haven, Conn.; W. P. Lyon, Eden Dale, Cal.; Charles Greenway, Le Mars, Ia.; S. D. Lance, Troy, Ohio; John Kirby, St. Paul, Minn.

Judge Thomas F. Rigg was presented with a beautiful gold and pearl mounted scarfpin by members of the club and Houdan exhibitors at Philadelphia.

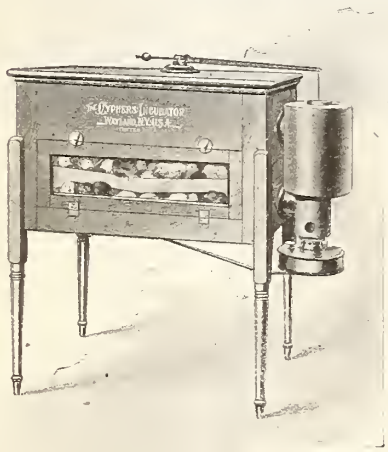
Among these ranches, plants, farms and yards are the following, and the



ERNEST SOMMERFELD'S PLANT, Grunberg, Schl, "The Largest Poultry Plant in Germany"—Three views, including a bird's-eye view.

THE MEADOW BROOK COMBINATION FARM, Dallas, Pa., J. Ford and S. A. Dorrance, proprietors, "America's Largest Poultry Farm," with 175,000 square feet under roof—ten views, including a bird's-eye view.

SPRING LAKE DUCK RANCH, C. A. Stouffer, manager, Harrisburg, Pa., largest output of ducks in the world, 30,280 in 1899 and 37,550 in 1900—five views.

THE MILLVILLE POULTRY FARM, Millville, N. J., J. J. Patterson, Jr., proprietor, "The Largest Broiler Plant in Pennsylvania," capacity 25,000 broilers and 60,000 eggs—five views.

WEBER BROS., DUCK RANCH, Wrenthem, Mass., "Large Duck Farm in the World," comprising 100 acres; annu output over 30,000 green ducks—three views.

ATLANTIC DUCK AND BROILER FARM, Speonk, L. I., Y., A. J. Hallock, Prop ietor, "The Largest Combinati Duck and Broiler Farm in the World," output season 1899-1900, 28,000 ducks and 4,000 broilers—six views.

FOREST LAKE POULTY FARM, Brown's Mills, N. J., C Geo. Pfeiffer, proprietor, "With Largest Incubator Capac of any Poultry Plant in this Country," eighty-three 300-e Cyphers machines—three views.

ELMHURST POULTRY YARDS, Waltham, Mass, Geo. Bowker, proprietor, "The Largest Fancy Poultry Farm New England"—five views.

THE SEELEY DUCK FARM, Cedar Rapids, Ia., Fawcett Richards, proprietors, "The Largest Duck Ranch in Central West"—five views.

THE NORTH SHORE POULTRY FARM, Chicago, Ill., M. K. Babcock, proprietor, "The Largest Broiler, Roa and Egg Farm in the Central West"—eight views.

FISHER'S ISLAND FARM, Fisher's Island, N. Y., E. W. Ferguson, proprietors, "Greatest Land and Water P Plant in this Country"—five views.

ROSELAWN POULTRY FARM, Marlboro, Mass., Arthu Duston, proprietor, "America's Foremost White Wyand Farm"—three views.

## Special Articles o

"PROFITABLE POULTRY KEEPING IN ALL ITS BRANCHES" is what its name implies. Additional to the many poultry plants, with descriptions, it also contains the following special articles, written by experts and PROFUSELY ILLUSTRATED.

PROFITABLE EGG-FARMING, comprising an illustrated description of two large and profit-earning egg farms, where hundreds, yes, thousands, of layers are kept that earn better than $1 per head per year.

GROWING WINTER CHICKENS OR ROASTERS, a fully-illustrated description of four prominent New England farms where the pet theories of office desk poultry writers are set at naught and gilt-edge table fowl, called winter chickens or roasters, are produced by the ton at a profit of 50 cents to $1 per fowl.

PULLETS VS. HENS AS PROFITABLE LAYERS, which demonstrates that pullets greatly excel old hens as money earners, and tells how 1,000 p earned $1,160 per year over cost of their food. Illustrated.

PROFITABLE BROILER RAISING, setting forth which are the best b for broilers, how to hatch and brood, what and how to feed, how to kil dress for market, the prices paid the last three years, etc.

GROWING PEKIN DUCKS FOR MARKET, with full instructions for hot mating, feeding, brooding, care of ducklings, etc., etc.; also, killing, c ing and shipping to market. Illustrated.

THE STANDARD-BRED POULTRY BUSINESS, finely illustrated, explai what is meant by standard-bred, what the so-called lanciers have a plished, and emphasizing the far-reaching importance of this branch industry.

HORACE G. HUEY'S DUCK RANCH, North Woodbury, N. J., where 9,000 to 12,000 green ducks are grown annually on four acres of land—four views.

PICKTON ISLAND POULTRY FARM, Clayton, N. Y., D. E. Howatt, manager, where broilers and eggs are produced by the hundreds of dozens—five views.

MEADOWVALE POULTRY FARM, Lutherville, Md., I. M. Parr, Jr., manager, "The Best Equipped Plant in Maryland"—five views.

AND A LARGE NUMBER OF OTHERS, where one and two views are shown. More large and successful poultry plants are illustrated and described in this book than in ANY OTHER POULTRY WORK EVER PUBLISHED.

## Special Articles of Highest Practical Value:

"PROFITABLE POULTRY KEEPING IN ALL ITS BRANCHES" is what its name implies. Additional to the many poultry plants, with descriptions, it also contains the following special articles, written by experts and PROFUSELY ILLUSTRATED.

PROFITABLE EGG-FARMING, comprising an illustrated description of two large and profit-earning egg farms, where hundreds, yes, thousands, of layers are kept that earn better than $1 per head per year.

GROWING WINTER CHICKENS OR ROASTERS, a fully-illustrated description of four prominent New England farms where the pet theories of office desk poultry writers are set at naught and gilt-edge table fowl, called winter chickens or roasters, are produced by the ton at a profit of 50 cents to $1 per fowl.

PULLETS VS. HENS AS PROFITABLE LAYERS, which demonstrates that pullets greatly excel old hens as money earners, and tells how ... earned $1,100 per year over cost of their food. Illustrated.

PROFITABLE BROILER RAISING, setting forth which are the ... for broilers, how to hatch and brood, what and how to feed, how ... dress for market, the prices paid the last three years, etc.

GROWING PEKIN DUCKS FOR MARKET, with full instructions ... mating, feeding, brooding, care of ducklings, etc., etc.; also, ... ing and shipping to market. Illustrated.

THE STANDARD-BRED POULTRY BUSINESS, finely illustrated, ... what is meant by standard-bred, what the so-called fanciers ... plished, and emphasizing the far-reaching importance of this ... industry.

THE CYPHERS DUCK AND BROILER PLANT, a six-page, profusely-illustrated description of a large, well-equipped, practical duck and broiler plant, showing instructive interior views of brooding houses, telling how and what to feed, and all about results they obtained after three years, experimenting.

TAKEN ALL TOGETHER, the foregoing interesting matter makes a book of unequaled merit; but we have not told it all, NOR WILL WE BE ABLE TO in the space here at our command. Another highly-valuable series of articles is entitled,

***What the Colleges are Doing for Poultry.***

including a specially illustrated description of recent visits made to the poultry plants operated in connection with the

RHODE ISLAND STATE COLLEGE OF AGRICULTURE, Kingston—five views.
THE CONNECTICUT STATE COLLEGE at Storrs—three views.
THE MASSACHUSETTS STATE COLLEGE at Amherst—three views.
THE MAINE STATE COLLEGE at Orono—three views.

THIS DEEPLY INTERESTING SERIES, occupying ten pages of the book, tells what is being attempted, of the success met with, and recites the valuable facts disclosed.

AS A MATTER OF COURSE, THIS BOOK, which is also a complete catalogue of the Cyphers Non-Moisture Incubators and Apartment Brooders, contains a detailed, faithfully-illustrated (photographic) description of the full line of Incubators, Brooders and Poultry Appliances manufactured and offered for sale by the Cyphers Incubator Company.

## This Truly Great Book is Free,

## BUT WE ASK YOU TO SEND 10 CENTS FOR IT.

Which exactly covers the postage. As stated before, the book (224 pages and cover, 8x11 inches size, on heavy paper) weighs one and a quarter pounds, or twenty ounces—hence the cost of mailing. Each and every copy of "Profitable Poultry Keeping in All Its Branches" costs us over twenty-five cents, exclusive of postage. We have issued 60,000 complete copies, and you, reader, are welcome to one, if you will send ten cents in U. S. Stamps of any denomination.

WHEN WRITING TO ADVERTISERS SAY YOU SAW IT IN AMERICAN POULTRY JOURNAL

## 76,061,128.

76,061,128 is the population of the United States and territories on the mainland of North America.

We herewith submit the official certificate of the Hon. Wm. R. Merriam, Director of the Twelfth Census of the United States, showing the total population of the United States and Territories on the mainland of North America for 1900:

DETROIT, MICH., Dec. 17, 1900.

*Hon. Wm. R. Merriam,*

Director of Census, Washington, D. C.

DEAR SIR:—The Press Publishing Association of Detroit, Mich., recently concluded a contest on the population of the United States and Territories on the mainland of North America.

Many publishers are interested in the contest and the Press Publishing Association is anxious to distribute the awards, amounting to $25,000, just as soon as the official announcement can be had. We will, therefore, deem it a special favor if you will kindly furnish us with your certificate, giving us the official figures showing the population of the United States and Territories on the mainland of North America.

Very truly yours,
PRESS PUBLISHING ASSOCIATION,
E. M. Cathro, Ass't Sec.

Dic. E. M. C.

WASHINGTON, D. C., Dec. 19, 1900.

*Mr. E. M. Cathro,*

Press Publishing Ass'n, Detroit, Mich.

DEAR SIR:—In response to your request of Dec. 17, and the further request of your representative who has this day visited the Census Office, I take occasion to inclose herewith a certificate of the Director of the Census, announcing the population of the states and territories of the United States situated on the mainland of North America. Very respectfully.

WM. C. HUNT,
Chief Statistician for Population.

Inclosure.

CENSUS OFFICE, WASHINGTON, D. C.

I, William R. Merriam, Director of the Twelfth Census of the United States, do hereby certify that the total population of the states and territories of the United States, situated on the mainland of North America, is seventy-six million, sixty-one thousand, one hundred and twenty-eight (76,061,128) according to the official count of the returns of said census.

Given under my hand and seal of the Census Office this nineteenth day of December, A. D. 1900.

WILLIAM R. MERRIAM,
Director of Census.

The awards will be made Thursday, Dec. 27, at the Central Savings Bank, Detroit, Mich., by the committee consisting of the Hon. Wm. C. Maybury, mayor of Detroit; Hon. Joseph W. Donovan and Hon. Morse Rohnert, judges of the Wayne Circuit Court.

All publishers are at liberty to be present or to be represented before the committee when the awards are made.

As soon as the result is ascertained all publishers who have used the Census Guessing Contest will be furnished with a list of the successful estimators, giving their names, addresses, estimates and number of certificate.

PRESS PUBLISHING ASSOCIATION.

# Light Brahmas,

## Exclusively.

I won at Cainsville, Nov. 26-27, 1900, in a class of 200 Light Brahmas, with hot competition, 1st cock, tie on 2d; 1st hen, tie on 3d; 1st, 2d, 3d pullet; 1st, 2d, 3d cockerel; 1st, 2d, 3d pen. Also won every special given on Light Brahmas and a grand special for highest ten scoring birds in show. Such records count when you are buying your birds. Write your wants for I have the stock to suit you.

**H. T. ROGERS, Cainsville, Mo.**

## JUVENILE POULTRY RAISERS.

By M. M. Johnson, Inventor of the Sure Hatch Incubator.

As time goes on it becomes more necessary to give our boys and girls practical education. Agricultural colleges are springing up in every state. We are sending our next generation of farmers to these schools now to fit them for battling with close competition on all matters that pertain to successful farming.

These schools of training are commendable, but the large percent of the farmers in the future will come from the farms without the advantage of science as developed at these schools. It therefore stands us in hand to make the best use of our home schools, the farms. Every boy and girl likes to own something and for the educational purposes alone, they should own something. Nothing fills the bill better than an incubator and a flock of poultry. It cultivates a sense of care and business management that would be lacking when they were called on to do business with a competing public. It is in their time of life that impressions are permanent, good or bad. The writer of this was a boy once, raised on a farm; owned every colt—or rather owned a new colt each spring—owned it until it became real valuable, then he had the privilege of trading it for the youngest again and was educated to think the young colt more valuable for a boy than a colt old enough to bring a good price. The result of this line of training and encouragement, he landed in business at twenty-one a regular pumpkin-head to do business. The farm had no attractions for him, he could see nothing in it but plow and harrow and doing without money from crop to crop. Am not blaming Dad, he simply did not know how to educate a boy. Had there been an agricultural college of other school that occurred to him to be a good thing for a boy, money would not have stood in the way. As above stated, he was not aware that he run the best school on earth, right at home among the realities. Of course, we would rather the farmer would buy his boy an incubator, but rather than see the boys grow up without ideas of business care and management, it would certainly pay to really give them a start, even if it was nothing more valuable than a hen and chicks. Boys and girls like to own something; as soon as they are old enough to play marbles or jump the rope they will want to own the marbles and rope at least.

In buying an incubator for the young poultry raiser, it is just as important that he have a good one—one large enough for business and well enough made to do the work properly—as it is that his father has a good implement for his work. Poor tools discourage the users. Give the youngsters a fair chance.

—o—

At the yards of Mr. Danforth we saw a flock of White Wyandottes which we believe will show a larger percent of raised than most breeders would be willing to believe could be found. Mr. Danforth makes a specialty of White Wyandottes and has attained wonderful success in getting birds which will stay white. His plant is run to its full capacity each season and he is now contemplating an addition to his incubator cellar. His increasing business is attributable to fair dealing, reasonable prices and high quality of stock. He has bred his birds in line for several years and now has a strain noted for size and laying qualities as well as show room records.

—o—

Mr. F. C. Brewer, of Jacksonville, Ill., breeder of White and Buff Rocks, informs us that he was never in better position to supply his customers with good birds than he is this season. Mr. Brewer has spared neither time nor expense in bringing his flocks up to their present excellence and by fair dealing and prompt attention to orders he has gained an enviable reputation. He is secretary of the Central (Ill.) Poultry Association, also a member of the White Rock club, and is an enthusiastic fancier of his favorites. He is thoroughly familiar with the points which constitute first-class birds and his customers are assured of satisfactory dealings with him in every way.

# $1.25 SPECIAL $1.25

I have a few

## THE IOWA INCUBATOR CO.'S PLANT.

Our correspondent writes us that some days ago, he was passing the factory of the Iowa Incubator Co., in Des Moines, Ia. Noticing this company's advertising frequently, he improved the opportunity offered and went in to make himself known and to inform the proprietors of the interest he felt in the goods they put upon the market.

The circular incubator manufactured by this company is a novelty that is

View of Office, 524 East Grand ave.

destined to become a standard in the incubator world.

Our correspondent was cordially received and shown over the factory from front door to rear entrance, from dry kiln to shipping room.

The greatest activity was observable in all departments. The company is running the factory to its utmost capacity to meet the demands for its machines which is sure to follow at an early date.

This firm, although a new one, has

View of the Factory, 109-111 East Locust st.

caused the people all over the country to talk about its new machine, and the record it has already made is something of a marvel; and congratulations are in order upon its success.

The Iowa people began the manufacture of their machines in a small room, 22 by 50, and in sixty days found they could not, on account of too little room, get out their goods rapidly enough to supply the demand, so larger quarters were a necessity. A two story building was then secured, which was occupied up to last September. They then bought and took possession of a large plant located at 109-111 East Locust street, where they have all modern machinery and appliances for turning out their goods.

Their employees are carefully chosen for each department—people that are

METAL ROOM.

VIEW OF PORTION OF PAINTING ROOM.

WOOD WORKING DEPARTMENT.

expert in their specialties. They insist on having the very best, holding to the argument that there are abundance of cheap machines in the hands of the people, and that a good machine must be made, of the very best material and workmanship, if we are to expect best results from their operation.

Their new plant is well arranged, first floor being devoted to superintendent's office, finishing room, crating room and general machinery room, and occupying a space 44 by 100 feet. The boiler room and dry kiln are located in the rear of ground floor.

The entire building is heated by steam, electric lighted, and every convenience there to expedite the work. The tanks and heaters are here looked upon as the most important part of the machine.

The metal department is in charge of Mr. E. F. Sprague, brother of the inventor, who is a practical man in handling metal work as well as in operating incubators. He personally examines every tank and heater made, and they must be as they should be, in all respects, or they are turned down.

Men employed in this department are experts in their line, and the man that can only smear solder finds no place here. The same care in the employment of workmen is extended to all the other departments, and that is the reason they build so good a machine.

They use nothing but the very best lumber, and after it is thoroughly kiln dried it is taken into the mill and is there put through the regular machinery adapted to this work.

The different parts are then taken upstairs and assembled; from setting-up room it goes to trimming room, where all metal parts are fitted to their respective places. This work is presided over by an expert incubator operator, who superintends the work.

The machines are then placed upon the elevator and taken to the finishing room, where the work is in charge of skilled finishers and painters, and the finished work is proof positive of their skill. It would be hard to find the equal of this line of goods.

We admire the way these people sell and guarantee their goods. They say it is necessary for every operator to know something about the machine they are operating before they can expect good results, so that, if the second and third hatches fail to be a success and satisfactory to them, the machine may be returned and the full purchase price will be refunded. They say that in order to do this the very best material must be used, and rather than build inferior machines they will retire from the market. The hatches secured in these "no cold corner" incubators, as reported by well known poultrymen in all parts of the country, are remarkable.

The most interesting of the testimonials inspected by our correspondent are those volunteered by parties who have had no previous experience with incubators. These inexperienced operators seem to be amazed at the results obtained in hatching eggs with the Iowa Hot Air Incubators; their remarks regarding the ease of holding a uniform temperature and the absence of crippled chicks indicate the greatest satisfaction.

An experienced operator writes that the greatest trouble he has with the machine is to provide brooder room sufficient for the unexpected large number of chicks hatched.

Other letters tell of the attractive appearance, the substantial construction and excellence of workmanship displayed in the entire makeup of these incubators.

The manufacturers of these machines are determined to make the very best machines in the market, and the product of their factory shows this at all points.

In this issue we reproduce illustrations showing office and factory buildings and the different departments of their recently refitted plant.

They show an equipment sufficient to supply a large demand.

Much ingenuity is displayed in devising appliances used to facilitate the shaping of the various parts, so that this form of incubator may be sold at prices that bring it in close competition with machines not as difficult to construct.

The manufacturers of these incubators consider the honesty of construction of the utmost importance and receives their first consideration.

**300 Barred Ply. Rocks and 60 M. B. Turkeys**

That are strictly first class. My B. R. have been bred in line 17 years. They are grand in shape and up in weight; surface color good, under color better and barred to the skin. I won 1st, 2d and 3d on pullets and had 1st pen at Burlington, Wis., in Jan., 1900, A. B. Shauer judge. My turkeys are monsters and have got the beautiful bronze that is so much looked for. Just stop and think, "it maybe that man is honest, and it might be possible that he has got good stock." Write him and see.

# Specialties for Poultry Raisers

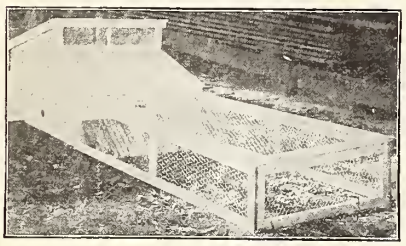
## 20th Century

### *Portable Hen Houses, Roosting Coops, Brood Coops, Outdoor Brooders, Rabbit Hutches.*

These articles are designed for the practical poultry raiser who wants to get the best results with the least fuss and bother. They are practical

**VERMIN PROOF,**

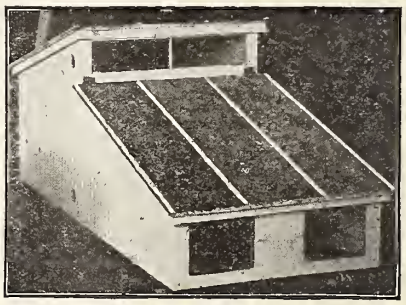
being built so that they leave no places in which vermin can be harbored, and are easily kept clean. By the removal of a few screws they can be taken entirely apart and thoroughly scalded. They are pre eminently the thing for cleanliness and health.



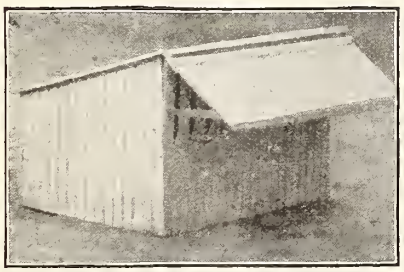
20th Century Brooder No. 1.

Brooder No. 1 is 3x4 feet, with two compartments with different temperatures. It is fireproof, being painted with two coats of asbestos paint. Easily cleaned and ventilated, and with it a perfect system of heating will raise a larger percentage of healthy chickens than any other brooder made.

Brooder No. 2 is 3x6 feet, has three temperatures and allows the chickens to be on the ground and still be in the brooder. Apartments and hover separated by a heavy felt curtain that is slashed so as to allow the chicks to pass in and out. Hover apartments lighted by separate windows.



Brooder No. 2.



20th Century Brood Coop.

The 20th Century Brood Coops will accommodate old Mrs. Biddy during the entire period of incubation and of brooding, keeping her separate so other hens cannot molest her and protecting her from cats and vermin. It is easily kept clean and free from lice and mites. In one of these coops you can wean the chicks from three to four weeks sooner than the hen would naturally do. You can raise the coop from the floor to sweep it off, or take it entirely apart for scalding, in a few moments. Size 2x3 feet.

The 20th Century Roosting Coop, for youngsters too large for the brooder. It is provided with an awning or hood by which you can regulate the sun in the coops and protect the fowls at night. Absolutely no place about it to harbor insects.

## 20th Century Portable Hen House.

20th Century Portable Hen House—Just the thing for the small fancier or the man who does not want to put a permanent house on another man's land. Neatly finished and durably built. Easily taken down and put up. It houses from 12 to 15 birds. Built on the "scratching shed" plan. Size, 5x10 feet and 6 feet high.

This line of brooders, brood coops, roosting coops and hen houses, is the outcome of years of experience. They meet every requirement of the poultryman. Fully guaranteed. Send for photographs, prices and full particulars.

**RIVERHEAD POULTRY FARM, E. W. BROWN, Prop., Old Mystic, Conn.**

## REMARKABLE WINNINGS.

The Egg Harbor Farm, Frank Willing Leach, proprietor, with A. L. Ware manager, made remarkable winnings at Philadelphia during the recent show. They made forty entries and won forty prizes, every bird entered getting a prize. This is a remarkable showing, considering the number of birds entered and the number of varieties represented. They made clean sweeps in White Indian Games, White Minorcas and White Dorkings; and with one exception clean sweeps in Rose Comb White Leghorns and White Langshans, and every bird entered from the other varieties they bred got away with a prize. They won 18 firsts, 18 seconds, 2 thirds and 2 fifths. Their breeding pens last spring were headed by winners at the big shows. At that time they exhibited eight leading varieties of white birds as follows: White Wyandottes, White Plymouth Rocks, White Leghorns, (S-c.), White Leghorns, (R-c.), White Dorkings, White Indian Games, White Minorcas and White Langshans and won nine New Yorks firsts, 1900, two Boston firsts, 1900, two Chicago firsts, 1900, one Hagerstown first, 1899, one Johnstown first, 1898, and one Boston second, 1900. All the young birds they are now offering for sale are the sons and daughters of these big prize winners. The catalogue that the Egg Harbor Farm is putting out is a very fine piece of work and every A. P. J. reader should send for a copy of it. It is nicely illustrated and contains the history of each pen of breeding stock with price on all their varieties.

A. L. Weckler, of Bunker Hill, Ind., at the Indianapolis show won on Buff Rocks 1st and 4th cock, 3rd hen, 4th pullet, 1st and 4th pen. He refused $75 for the first prize cock. He won the silver cup offered by the American Buff Rock Club and made a nice sale of one cockerel in the showroom for $25.

One of the best records made this season on White Wyandottes was made by Miller Bros., of Nashville, Ind., at the Indianapolis show. Their two winning pullets scored 96¼ each. They won 2nd hen score, 96, and 2nd cockerel, 95. This is the kind of evidence that counts when it comes to a decision regarding the quality of a breeder's stock. Messrs. Miller Bros. breed their winners themselves and their patrons get birds which can be counted upon to produce the best results when mated. They have White Wyandottes that are absolutely white and guarantee satisfaction to all customers.

Our readers will find in this issue the announcement of the Indiana Poultry Farm, which is owned by Dr. Jos. Haas, of Indianapolis, and upon which are reared each season some of the finest birds it is possible to produce. The farm has long had a reputation for sending out the winners at some of the largest shows and this season has not been an exception to the rule. Their motto is "The Best is None too Good," and they have no place for an inferior specimen. A poor bird is not sent out at any price and the manager of the farm, Mr. Johnson, gives all shipments his personal attention, which is an assurance that the quality and price are both right. The egg trade with this farm promises

## REV. JOHN HUGHES, Table Grove, Ill.

to be unusually large, as many orders are already booked for future delivery. They have a large number of high grade breeding birds for sale, which will be disposed of during the next thirty days at unusually low prices.

---

J. D. Keyworth, Evanston, Ill., had a fine display of Buff Rocks at the late Indianapolis show and won 1st and 2nd hen and 2nd cock, 2nd cockerel, 3rd pullet and 3rd pen and special for best cock, hen and pullet—more prizes than any other exhibitor of this variety, and in competition with some of the best birds in the West. Mr. Keyworth's birds are capable of winning everywhere, as is proven by his long list of winnings in strongest competition. His birds are strong in color of wings and tail and they have exceptionally good combs. He has a large number of youngsters which show every evidence of being the equal of the parent stock and, considering the quality of his last season's breeders this means a great deal.

---

PHILADELPHIA, N. Y., Dec. 15, 1900.

*Editor American Poultry Journal.*

DEAR SIR: At the Johnstown, N. Y., poultry show Dec. 5, 1900, in the hottest class I ever saw outside of Boston or New York, I won on Barred Rocks as follows: 1st, 2d and 3d cocks, 2d hen, 1st, 2d and 4th cockerels, 1st, 2d, 3d and 4th pullets and the Grand Sweepstakes cup for best twelve birds in the show, any variety.

Judge Bridge, of Ohio, judged Barred Rocks and was very much pleased with the class. He scored my 1st pullet at 94½ points and 1st cockerel at 94, although neither were old enough to show at their best. On score card of 1st cockerel he wrote: "Best wing I ever saw on a Barred Rock, male or female."

Yours truly,

M. S. GARDNER.

*American Fancier* says: "Excepting a drop in Light Brahmas, Black Minorcas and Ornamental Fowl entries, the number of birds in all the other classes exceeded previous exhibits. The quality in the leading classes was the best we have seen at a show held in this city. In fact, some were far superior to any classes we have seen at the best and largest shows. Barred Plymouth Rocks were exceedingly fine, M. S. Gardner's string especially so. It was a case of having the trade mark stamped on every bird. They were line bred. Gardner had the pedigree of all recorded. The evenness of the cockerels, hens and pullets in color and type conclusively proved the statement. The first prize cockerel certainly was a grand bird in color and barring, with the most perfectly barred flights we have yet seen."

---

Joe Farmer, of Flushing, O., writes that trade is good and he still has a fine lot of Barred Plymouth Rocks to dispose of. Not the least important of his letter to us is his statement that he is getting as many inquiries through the AMERICAN POULTRY JOURNAL as any medium he uses except a stock and farm paper, the editor of which has been a very close friend of his for over twenty years.

---

H. V. Shoemaker, Ashley, O., made good winnings on his Houdans at this place. This was but a sample of what his birds have done for the five years past. The second and third cockerel at Ashley show was winner at Ohio State

Fair over a bird owned by Mr. Pinkney which was sold to Mr. Tucker for $25. This was exhibited at Boston last winter, winning second place there in a very large class. He has a number of extra good birds, chicks and yearlings and two-year-olds that he would let go as he needs the room for breeding stock.

Don't count your chickens before they're hatched, for there may be a double-yolked egg in the lot and you'll have more chickens than you've figured on.

Dec. 17, 1900, I scored 123 head of Barred and White Plymouth Rocks, Light Brahmas and Buff Cochins for Mr. James Hankinson, of Maroa, Ill. His stock is above the average found among breeders of these varieties. His thirty-two years of experience as breeder and exhibitor place him among the foremost of fanciers, and those desiring stock of the above-mentioned varieties will do well to correspond with him.

D. T. HEIMLICH.

## SKINNER'S LAYING PARTRIDGE COCHINS.

EVANSTON, WYO., Dec. 11, 1900.

*Mr. O. E. Skinner, Columbus, Kan.*

DEAR SIR: I want a trio of your great laying strain of Partridge Cochins. I can get good Cochins near here, but as you know I have bred and raised your strain for the past seven years, also other strains. But I have never found any strain that could lay eggs to compare with the ones I got from you. I had one Partridge Cochin hen that I actually believe laid over two hundred eggs in a year, keeping right on *during* moulting season.

In moving around I sold out all my birds and now wish to stock up again. Yours respectfully, A. W. PHIPPS.

## A LETTER FROM ONE OF MR. DURYEA'S CUSTOMERS.

AMAGANSETT, N. Y., Dec. 15, 1900.

*R. W. Duryea, Great River, L. I., N. Y.*

DEAR SIR: I think that pullet (Barred Plymouth Rock) is the best I ever saw, on legs and beak. Such a clear, bright yellow. Have you a cockerel, brother to her, with the same color legs and beak? Clear cut bars, dark bay eyes. I wish this pullet was a little darker on eye. If you have a cockerel or the sire to her to sell, please give description and price. I thought I was strong on legs and beaks, but that pullet beats any of mine.

E. B. LEEK.

## THEIR WEIGHT IN SILVER.

Three costly Belgian hares arrived in Battle Creek from Mendon, Mich., to become permanent residents of that city. They were purchased by the Royal Red Belgian Hare Company, from the Wolverine Belgian Hare Company, and all three are youngsters. One is a grandson of the famous imported buck "Sir Leeds," who scored 95¾, and own brother of the four-months buck which scored 95½ and won first prize in that class at the Battle Creek show last week. The second buck in the sale is a son of the prize winner at Denver in 1899, "Banbury Duke," who scores 95¾. The third young buck is the son of Lord Cherry II, who scores 95½, and brother to "Lady Cherry," who scored 95 points and carried off first prize in her class at the Battle Creek show. The three actually cost more than their weight in silver, as they do not average more than 2½ pounds apiece in weight, and sold at, at least, $16 a pound.—*Record.*

## SILVER WYANDOTTES PAR EXCELLENCE.

If there is a larger and better flock of Silver Laced Wyandottes anywhere than the one owned by Mrs. George M. Hanly, of Hoopeston, Ill., we have never been able to find it. Mrs. Hanly has long had an enviable reputation on this variety, and a recent visit to her yards convinced us that she is justly entitled to it. She has one of the most desirable plants in the West and thoroughly understands managing it. Her birds have free range over nineteen acres and the buildings are all substantial and up to date models of convenience. The birds we saw were all high grade specimens, not a poor one in the lot, and there were about 350 in the various yards and on range. Large, blocky cockerels most elegantly marked were to be seen in large numbers, and the females were typical, handsomely laced birds which would be valuable additions to any flock Silver Wyandottes of the right quality are always admired, and Mrs Hanly has the right quality. She has furnished the winners at some of the best Eastern and Western shows this season and still has her best birds left. Her prices, considering quality, are very low, and have brought her a desirable and constantly increasing trade.

FRANK HECK.

**J. E. WHEATLEY, Edinburg, Ind.**

**Blood Meal**
BLOOD MEAL (TRADE MARK)
**Greatest Egg Producer on Earth.**
**Blood Meal** is manufactured by the Summer's Process, and is absolutely odorless. Everyone knows that blood contains all the elements necessary to build flesh, make eggs or to grow anything of an animal nature. Hence, it is nothing strange that blood, after being dried and submitted to a process which makes it odorless, should be the best of all poultry foods.
It is cheaper than most poultry foods, because being so nutritious a small amount will do for a large flock of fowls, as it must be mixed with other food when fed.
Blood Meal contains no ground bone or other cheap adulteration of any kind. It has less than five per cent of moisture, and is the only **Perfectly Dry** poultry food made. Send for circulars and testimonials from those who have used it.

Frank W. McKenzie, of Concord, Mich., won at Michigan Fanciers' Association, Battle Creek, Mich., Dec. 4-7, 1900, as follows on Houdans: 1st cock; 1st cockerel; 1st pen; 1st and 2d pullet; 3d hen, on seven birds entered. Jas. A. Tucker, judge; 7 in Houdan class.

J. A. Babcock, of Goshen, Ind., won at Laporte County P., P. & P. S. Association, Laporte, Ind., Nov. 26-Dec. 1, 1900, as follows on White P. Rocks: 1st, 2d, 3d pullet, 95¼, 95¼, 94¾; 1st and 2d cockerel, 93½, 93¼; 1st peu, 188⅜; also silver cup for highest scoring 6 females and 2 males in American class. On Buff C. Bantams: 1st cock, 93¼; 3d hen, 92½; 2d cockerel, 91; 1st, 2d, 3d, 4th pullet, 95, 94½, 94½, 94¼; 1st pen, 187 13-16; silver cup for highest scoring 6 females and 2 males in Bantam class. Theo. Hewes, judge; 117 in White P. Rock class. At the Northern Indiana P. & P. S. Association, at Goshen, Ind., Jan. 4-7, 1900, on White P. Rocks: 1st and 2d cock, 92, 92; 1st, 2d, 3d hen, 92½, 91¼, 91; 1st and 3d pullet, 95, 93¼; 1st, 2d, 3d cockerel, 93½, 93¼, 93; 1st pen, 187. Buff C. Bantams; 1st cock, 92¾; 1st, 2d hen, 93, 91½; 1st, 3d cockerel, 93½, 91¾; 1st, 2d, 3d pullet, 94¼, 94¼, 94¼; 1st, 2d pen, 187 11-16-186. Jas. A. Tucker, judge.

For a breeder's first exhibition year the following is a remarkable showing and one justly to be proud of: H. P. Mason, of Fayette, Mo., won at Central Missouri Poultry Association, Boouville, Mo., Nov. 20-23, as follows on Buff Rocks: 1st, 2d cockerel; 1st, 2d, 3d pullet; 1st pair; 1st trio; 1st pen; sweepstake in American class, pen scoring 186¾. D. T. Heimlich, judge, stated that these Buff Rocks scored higher than any Buffs he ever judged. The pullets scored 94¾, 94½, 94½, 93½. Judge Heimlich scored another pullet for Mr. Mason (not in show room), 95. At Northeast Missouri Poultry Show, Bowling Green, Mo., Dec. 4-6, Ben S. Myers, judge: 1st cockerel; 1st, 2d, 3d pullet; 1st pen. Judge Myers said he had never judged as fine Buff Rocks before in his career as judge. At Missouri State Show, Fayette, Mo., Dec. 10-14, Savage, Wale and Taylor judges: 4th cock; 4th cockerel; 1st, 2d, 3d (4th tie), 5th pullet, score 95¼, 94½, 94¼, 93½, 93½. Mr. Mason showed only one old bird, the cock, who was badly in molt. The 1st pullet won 1st at all three shows above mentioned. The Buff Rocks are nugget strain, line bred, and are marvelous in Rock shape and rich golden buff color. This is the first year Mr. Mason has exhibited and he is justly proud of his record.

Geo. Westwood, Streator, Ill., won on Partridge Cochins at Mazon, Ill., Nov. 28 to Dec. 1, W. S. Russell, judge: 1st cock, 90½; 3d hen, 91½; 1st cockerel, 94½; 2d, 93; 3d, 93; 4th, 92½; 1st pullet, 94½; 2d, 93½; 3d, 93.

DOOR VILLAGE, IND., Dec. 13, 1900.

*G. G. Bates, Chicago.*

KLONDIKE INCUBATOR

You cannot fail to appreciate the value of Klondike Incubators and Brooders if you examine the principles of their construction and operation. Their simplicity makes them easy to run. Lack of delicate parts makes them durable. Results make them successful. Low prices make them popular. What more do you want? For free illustrated catalogue which gives full descriptions, prices and much information for poultrymen, address KLONDIKE INCUBATOR CO., Box 908, Des Moines, Iowa.

PETS OF ALL KINDS FREE

If you wish any of the animals below, prompt action is necessary on your part: Angora Cats, Belgian Hares, Monkeys, Parrots, Canary Birds, Mocking Birds, Goldfinches, Japanese Robbins, Larks, together with fancy cages. Rabbits, Squirrels, Shetland Ponies, Guinea Pigs, Ferrets, Dogs of all kinds, Aquariums and Fancy Gold Fish.

We have reserved a stock of animals of the finest quality and breeding, which we are about to distribute FREE for the benefit of our business and every person answering this advertisement promptly may secure any of the many animals in which we deal, some of which we mention above for your selection. The stock raised from these animals is to be offered to us, at your lowest cash price, before they are sold. This is a condition of our offer.

**We Start You in a Profitable Business**

This is a great opportunity if taken advantage of at once to start in a paying business without investing a single penny for the animals.

As an illustration of the money to be made in raising animals: Genuine Angora Cats are worth from $25.00 to $100.00 each, and are easy to raise. Belgian Hares may be raised in an attic or cellar, or small city back yard without difficulty. They breed from ten to twelve at a time, six times a year, and sell for seemingly fabulous prices, and service alone from a good buck is worth $25.00. Large profits are easily and quickly made by those who begin now. We want no money with your reply to this advertisement. Simply write us and say what you desire—a pair of animals, birds or aquarium. Give your full address, together with the name of the Express Company to ship by, and say when wanted. We pay express charges. Address

Animal World, Dept. 55 248 W. 23d St., New York.

Superb Black Langshans.

"None but the best" should be the one aim of the true fancier. Need I say more? No more expensive blood exists than flows in the veins of my fowls. They have a record—19 first and 15 second prizes at four leading fairs in 1900. Stock and eggs for sale at all times. Exhibition birds a matter of correspondence.

# BLANCHARD'S WHITE LEGHORNS.

## The Leading Strain of Heavy Layers

Are no experiment, having been carefully selected and bred for over 20 years with results that fully justify the claim that they are **THE GREATEST LAYING STRAIN OF SINGLE-COMB WHITE LEGHORNS IN EXISTENCE.** No labor or expense has been spared in building up this strain, and while the production of large, pure white, fancy market eggs has been the main object, **STANDARD QUALITIES** have not been neglected. They are large, vigorous, active and handsome, unexcelled for introducing new blood or as foundation stock. 1,000 birds for sale. COCKERELS a specialty just now. Illus. circular free

**H. J. BLANCHARD, Box 997, Groton, N. Y.**

Sugar Creek Poultry Association, Beach City, Ohio, Nov. 26-28, 1900, as follows in a class of 225 Barred Rocks: 1st and 2d on hens, 94, 94. He showed three pullets that scored 94 each, but was not good enough to win a fourth prize, so you can see the competition was warm. H. A. Bridge, judge; 225 in Barred Rock class.

List of winnings of R. E. Jones, Flat Rock, Ind., at Indianapolis, Dec. 10-14, 1900: Silver Wyandotte cock, 1st and 2d, 93¼, 93¾; hens, 1st, 2d and 4th, 94¼, 91½, 89¾; cockerels, 1st, 2d, 3d, 93¼, 92¾, 92; pullets, 3d, 93½; pen, 1st, 185⅝. Golden Wyandottes: Cocks, 1st and 2d, 92¾, 92¼; hens 1st, 2d, 3d, 93, 92¾, 91½; cockerels, 1st, 2d, 3d and 4th, 93½, 93¼, 93, 92¼; pullets, 1st, 2d, 3d, 4th, 93, 92½, 92¼, 92; pens, 1st and 2d, 186 5-16. White Wyandotte: Cock, 3d, 93¾; pen, 3d, 188 13-16. Golden Seabright Bantams: Cock, 3d, 91½; hens, 3d and 4th, 93¼, 92; cockerel, 1st, 93¼; pullets, 1st and 2d, 93½, 91¾; pen, 1st, 185⅞. Silver Seabright Bantams: Cock, 1st, 92½; hens, 1st and 3d, 95, 93; cockerels, 1st, 93¾; pullets, 1st, 2d, 93¼, 92½; pen, 1st, 187 3-16. Scotch collie, 3d on bitch, 1st on male puppy.

———o———

GRAFTON, IND., Dec. 7, 1900.

*Mr. F. E. Mow, Union Mills, Ind.*

DEAR SIR: Received three pullets on the 3d. Am well pleased with them. Yes, I think they are well worth the money, and more too. Yours truly,

GEO. J. SEIFERT. 1-1

CLEAR WATER, ARK., Dec. 3.

*Mr. F. E. Mow, Union Mills, Ind.*

DEAR SIR: The trio of Buff Rocks came through in good shape. They are the best i ever saw and more than pleased with them. Will want some of your best eggs in spring. Your way of doing business will surely draw you a large patronage. Respectfully yours, I. DAVIS. 1-1

———o———

McCORKELL'S DUCKS.

ASPEN, COLO., Nov. 25, 1900

*J. L. McCorkell, Akron, Ohio.*

DEAR SIR: In reply to your request that I should answer and let you know in what condition the ducks arrived and what I thought of them, will say the ducks are all that could be expected and are beauties and are the admiration of all who see them. They seem to be at home here, for the high altitude, which is about 8,000 feet above sea level. Thanking you for the excellent trio of ducks and the secure and humane way of shipping, I remain,

Most respectfully yours,

W. R. PHILLIPS.

———o———

GOOD WORDS FROM A GOOD JUDGE.

Editor AMERICAN POULTRY JOURNAL, Chicago, Ill.

DEAR SIR: Enclosed find complete list of my judging dates for season 1900-1901. I have watched the AMERICAN POULTRY JOURNAL in its growth for the past twenty-five or thirty years, and must say it has always worked along the line of the best interests of the poultry industry in all its branches. It has been a friend to the poultry fraternity and is well deserving of the warm place it holds in the hearts of American fanciers, and as one of them I wish it continued success. I am very truly yours,

G. D. HOLDEN.

Judging dates for season 1900-1901 of G. D. Holden, Owatonna, Minn.: Preston, Minn., Nov. 13-16, 1900; Moline, Ill., Nov. 27-Dec. 1, 1900; Nashua, Iowa, Dec. 12-16, 1900; Galena, Ill., Dec. 18-22, 1900; Mankato, Minn., Dec. 24-28, 1900; Tacoma, Wash., Jan. 1-4, 1901; Spokane, Wash., Jan. 6-12, 1901; Cedar Rapids, Iowa, Jan. 14-19, 1901; Zumbroto, Minn., Jan. 19-22, 1901; Sheldon, Iowa, Jan. 22-25, 1901; Milwaukee, Wis., Jan. 28-Feb. 2, 1901; St. Paul, Minn., Feb. 6-12, 1901; Duluth, Minn., Feb. 12-15, 1901.

At the Carlinville, Ill., show, Nov. 28-Dec. 1, 1900, C. H. C. Anderson & Co., of Fairview Farm, Carlinville, Ill., in a class of 35 Lt. Brahmas and showing only old birds, won 2d and 3d cock; 3d hen; 2d breeding pen, and tied for 1st on cock.

———o———

A GOOD RECOMMENDATION.

GUELPH, CANADA.

*George J. Gleason, Elburn, Ill.*

DEAR SIR: The Buff Rock hen arrived here Tuesday, 6 p. m., but we did not get her until Wednesday. The express was $1, making her cost $5, but she is well worth it. She is all you recommended her to be and we are well satisfied with her and think she can hold her own in the show room and will make a fine bird to breed from. We think our young stock next year will be hard to beat. We remain yours,

A. & T. READWIN.

One of the Prize Cups won by W. C. Denny, Rochester, N. Y., on his Buff Plymouth Rocks.

GROWTH OF MAGAZINE ILLUSTRATION.

From 324 illustrations in 1894 to over 1,600 in 1900 are the figures which denote the numerical growth and development of the pictorial features in the *Ladies' Home Journal* in six years. This 400 percent increase in numbers is rather dwarfed by the fact that nearly 1,000 percent more space is now given to pictures than six years ago, and that the quality, or artistic value, of the illustrations has improved beyond computation. A few years ago magazine making was thought by some to have attained a degree of perfection that precluded further advancement, but it seems to have been in its infancy. The reading public now insists upon illustrations, and in meeting that demand it is safe to say that the pictures printed in the *Ladies' Home Journal* in 1900 exceed in number, size, quality and cost those published in all the leading magazines ten years ago.

WHEN WRITING TO ADVERTISERS SAY YOU SAW IT IN AMERICAN POULTRY JOURNAL

# Arnold's Buff Leghorns and Buff Plymouth Rocks

Our Buff Leghorns at Boston, New York, Washington and Hagerstown have made the best record ever made at any of the above shows, and to-day

## *They Stand at the Head in America.*

We shall hereafter **NOT PUT THEM INTO THE SHOW ROOM,** and will give our customers the benefit of our 10 year's experience in mating and breeding this variety.

**BUFF P. ROCKS**—We have as fine a lot of young stock as anyone would wish to look at. Our last year's breeders for which we paid such high prices have brought the answer. We only had this variety on exhibition twice, at Hagerstown and Philadelphia. At the former show we **TIED FOR LARGEST AND BEST COLLECTION;** at the latter show won **MEDAL FOR LARGEST AND BEST COLLECTION.** Now is the time to order, as we get our birds direct from 32 farms where we are having them raised. We have also a lot of

***White and Black Belgian Hares, Imported from Belgium.***

**AUG. D. ARNOLD, Box 77 C, Dillsburg, Pa.**

BLACK Langshans, White P. Rocks, Golden Sebright Bantams, Buff Wyandottes, Mammoth Bronze Turkeys, Toulouse Geese and Duroc-Jersey hogs from our prize-winning strains for sale.
THEO. & LOU WERTH, Strawsburg, Ill.

**LIGHT BRAHMAS, EXCLUSIVELY.**

Bred for utility from noted utility strains. Eggs $1 per 15; $2 per 30.

DANA TWINING, Frankfort Station, Ill.

**BARRED ROCKS**—Winners bred from winners. At Battle Creek, Mich., Dec. 1900, in class of 120 birds and the best the State produces, I won 2d pullet, 2d and 3d pen and tied for 1st hen and 3d pullet. A choice lot of birds for sale. Write for prices. C. L. HOGUE, Battle Creek, Mich.

**Golden Hamburgs.**

Stock and eggs of this beautiful variety for sale. They are unexcelled as layers. I won at Jacksonville, Dec. 1900, 1st, 2d, 3d ckl. 1st, 2d, 3d pullet and 1st pen. Write for prices.
Richard A. Reynolds, Jacksonville, Ill.

**Silver Wyandottes.**

First-class stock only. Eggs $2 per sitting.

R. D. HARRISON, JR., Princeton, Ill.

**Bronze Turkeys**

A few young toms and one 96 point two year old tom yet. Also a few high grade W. Rock cockerels to spare.

BOWLUS BROS., Fremont, O.

**Barred Rocks.**

My birds score as high as 93. Some choice stock in hens, cockerels and pullets for sale. 20 S. L. Wyandottes cheap if taken at once.
J. W. MOLLOY, Ferguson, Iowa.

**PRIZE WINNERS WHEREVER SHOWN**

White H. Turkeys, White P. Rocks, Golden S. Bantams and Poland-China hogs. Nothing but good stock shipped. A. Z. COPELAND, Potomac, Ill.

East Walpole, Mass.
Chicago, Ill.

## SOUTHERN WISCONSIN.

BRODHEAD, WIS., Dec. 18, 1900.

The officers of the Southern Wisconsin Poultry Association propose to make their third annual show to be held at Brodhead January 22 to 26, 1900, the same as last year, the best show in the state. D. T. Heimlich, Jacksonville, Ill., will judge the show. Bring your birds and pick the plums. Premiums paid in full last day of show. Write for premium list. W. H. CLARKE, Secretary.

## TURKEY BREEDERS, ATTENTION!

The Western Turkey Club, a club for the advancement of *all* breeds of turkeys, will hold its next annual meeting January 18 and 19, 1901, commencing at 10 a. m., in Convention hall, Kansas City, during the Kansas City Poultry and Pet Stock Show.

ALL turkey breeders invited to attend, and *members urged* to be present—business matters of importance to be attended to.

Membership fee, 50 cents till the above meeting; fees will then be advanced.

All that are interested in the advancement of the turkey send your fee promptly and increase the club number, getting your name on the list of members before the new catalogue is published, and thereby helping to push the turkey abreast with other fowls of the poultry kingdom. The turkey is both handsome and profitable. What more could be asked?

Club catalogue now in preparation and will be issued soon after the above meeting.

MRS. F. A. HARGROVE,
Secretary-Treasurer, Richmond, Kan.
E. R. KOONTZ, President, Richards, Mo.

## JUDGE LANE SCORES SOME OF FISHEL'S WHITE ROCKS.

HOPE, IND., Dec. 14, 1900.

This is to certify that I have this day scored for Mr. U. R. Fishel, of Hope, Ind., 158 White Plymouth Rocks, as follows:

One pullet 96¾, 3 pullets 96, 1 pullet 96½, 5 pullets 95½, 4 pullets 95, 4 hens 96½, 1 hen 96¼, 3 hens 96, 7 hens 95½, 4 hens 95, 19 hens and pullets from 92 to 94¾.

106 cockerels from 90 to 95¾, all of which were up to and above standard weight. I found one cockerel which it was impossible for me to cut anything on symmetry, as he is the most typical Plymouth Rock I ever saw; in fact, is the only Plymouth Rock I ever passed without a cut on symmetry. This bird is surely a wonder. I scored these birds the same as I would had they been in the show room and every bird was weighed.

Respectfully, S. B. LANE.

The Gem Incubators and Brooders manufactured by J. W. Sauer, Trotwood, Ohio, have stood the test of several years' use, and judging from the many very good testimonials the maker sends with catalogue they certainly are machines of merit.

Mr. Sauer sells direct to the user only, and thus he is enabled to make the very low prices mentioned in his advertisement. His catalogue and testimonials are free for the asking.

The North Dakota and North Minnesota Association will hold their show January 29 to February 2 with F. H. Shellabarger, judge, at Fargo, N. D. S. F. Crabbe, Secretary.

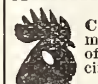
**Grand Trunk Poultry Farm.**

Some fine young and old stock at $5 per trio, in Barred, White, Buff Rocks, Black Langshans and Black Minorcas. Send at once and get your prize winners.
J. D. ROUSE, Charlotte, Mich.

**PARTRIDGE COCHINS Exclusively**

I won at Detroit, Mich., Jan. 8-13, Sharp Butterfield judge, 1, 2, 3 cock, 94¾, 92¾, 91: 1, 2, 3, 4 hens, 93¼, 92¾, 92½, 92¼; 1, 2, 3, 4 ckls., 95¾, 95, 94, 93; 1, 2, 3, 4 puls., 95½, 95¼, 95, 94½; 1, 2 pens 190 5-16, 189. Choice stock for sale. John C. Stellwagen, Wayne, Mich.

**E. M. CORNELL, Box 39, FREDONIA, PA.,**
BREEDER OF
**BUFF PLYMOUTH ROCKS---Exclusively.**
Hawkins strain. Stock and Eggs for sale.



14 YEARS a breeder of SINGLE-COMB BROWN LEGHORNS. To make room for my youngsters will sell some of my breeding hens at $1 a piece. Send for circular.

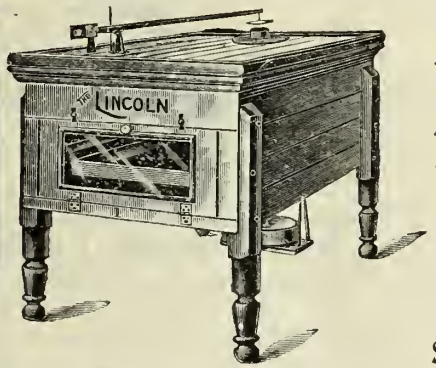
# STAR INCUBATORS

Send for our Catalogue and see what our Customers say about our Incubator.

This is to tell WHY the STAR INCUBATOR hatches more chicks and stronger chicks than any other:

1. Because by our system of heating, every part of egg chamber is uniformly heated; there are no cold corners.
2. Because our system of ventilating so perfectly controls circulation of air that no moisture need be supplied (this is the condition under the sitting hen).
3. Because our system of automatic heat regulating is the best (though, to be candid, it has been this year copied bodily by some other makers).
4. Because our system of turning the eggs is the most satisfactory.
5. Because, in short, the STAR INCUBATOR, is more than a heated box. Every advantage that science has discovered has been turned to account in it. We have not advertised as extensively as many firms in our line. It may be that you never heard of the STAR before; if so, there was *one good thing* you did not know about.



**Our little 60-Egg "Lincoln" is a gem.** (*See cut.*)

**STAR INCUBATOR CO., 14 Church St., Bound Brook, N. J.**

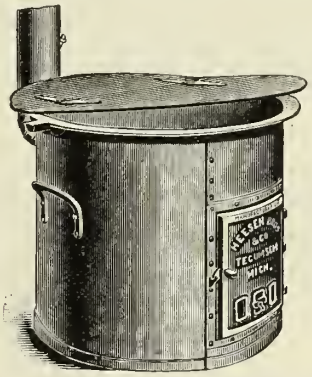
## *PERSONALS.*

### GREEN BONE AS AN EGG MAKER.

At this time of the year the poultryman wants eggs above everything else. If his hens ever have an opportunity of showing what they can do, now is their chance, for eggs mean money during this and next month. It is hardly worth while at this time to go into the necessity of careful and judicious feeding in order to get a supply of eggs. Every poultryman realizes that the hen can lay eggs only when she has the necessary ingredients at her command, and that she must get these ingredients in her food. The leading poultry raisers of the country (we do not know of a single exception) are a unit in saying that of all foods which can be given poultry, none has a better effect on the egg basket at a less expense, than Cut Green Bone. Since the day when the original Bone-Cutter (the Mann) was put on the market, Green Bone has increased in popularity and has doubled the income of many a poultry raiser. The Mann Bone-Cutter was the original, and is still the most largely used. Its popularity is the best indication of its merit. Send to F. W. Mann Co., Milford, Mass., for new catalogue and book on feeding.

### ABOUT COOKED FEED.

A careful canvass of leading feeders of live stock of all kinds shows that the practice of cooking feed is increasing every year. The farmer who will equip himself so that he may properly cook feed for cattle, hogs, sheep, horses or poultry never abandons the practice, for he soon sees that it pays in a saving of both feed and time. It is constructed of the best material, the jacket being made of cold-rolled boiler steel and the kettle of smooth cast iron; the fire-box is so arranged that every particle of heat is utilized, and at the same time it never scorches or burns the food. Anyone



can run it; in fact, it runs itself. In addition to its value as a feed cooker, it will be found of extreme convenience at butchering time; for soup making; for boiling clothes and on any occasion when an abundance of hot water is needed.

One special point on which the Heesen Company have developed their large trade on these goods is *guaranteed capacity*. When they list a cooker for holding a given number of gallons they promise it shall measure up in full if you prove it. Whenever you pay for capacity, be sure that you get it.

Send to Heesen Brothers & Company, Tecumseh, Mich., for their illustrated booklet, describing the cooker and its uses.

### TAKE NOTICE

If you are not interested in Bone Cutters it would be a waste of time to read this, as it is a reading notice pure and simple, and we do not expect you to be deceived by it, for there is nothing which makes the ordinary man so vexed as to start to read an article which proves to be only a reading notice of some advertiser. If you are interested in Bone Cutters we would say that you can probably secure considerable information regarding the poultry business and at the same time learn something about Bone Cutters by sending to W. J. Adam, Joliet, Illinois, for his new catalogue, which is due every subscriber of this paper, and which will be sent upon application.

Egg production—as every poultryman knows—depends very largely upon feeding. A hen can't lay eggs unless we give her the proper material from which to make eggs. Now, while eggs are bringing a good price every reader of the AMERICAN POULTRY JOURNAL should be reaping a harvest. Are you doing it? Are your hens laying? If not something is wrong, and most likely the thing that it wrong is the feeding ration. Hens must have protein to make eggs; chicks and broilers must have protein to make bone and muscle. Feed Protein. We know of no poultry foods containing so high a percentage of protein as those of Darling & Co., Union Stock Yards, Chicago. The foods are fresh and sweet; the fowls like them, and they produce

## LISK'S
## Buff Plymouth Rocks.

If you waut some fine yearling heus at right prices let me hear from you. Also some fine Buff Cochin Bantam cockcrels at from $1,50 to $2 each.

***Box 11, Mansfield, O.***

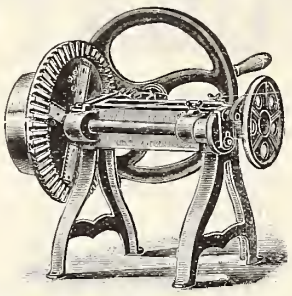
WHEN WRITING TO ADVERTISERS SAY YOU SAW IT IN AMERICAN POULTRY JOURNAL

eggs as nothing else will. Send for free booklet, "Fill the Egg Basket."

### WHY FEED GREEN BONE?

In the first place, because it is the cheapest poultry food you can obtain, as you can usually get all the bone you need for nothing or for a very few cents.

In the second place, because the green one being rich in nitrogen supplies the hens with just the right material for



egg making, taking the place of the bugs and worms she gets in the summer in a large range.

In the third place, because the lime in the bone is one of the most valuable foods for shell making.

In the fourth place, because the particles of bone take the place of grit, but are at the same time digestible.

In the fifth place, because with a good bone cutter like "The Dandy" you can prepare the bone without bother or trouble. Send to The Stratton Mfg. Co., Erie, Pa., for catalogue, prices and full particulars.

Crum & Cram, Carey, Ohio, are booking orders for eggs from their prize winning Rocks and Wyandottes. They have a change ad in this issue. Look it up.

C. M. Davidson, the Brown Leghorn specialist, of Chicago Lawn, Ill, is paving the way to do a larger business with his favorite breed than ever this season. Judging by the wording of his "ad," which appears elsewhere in this issue, he has the stock that will bring him the best of results, and anyone looking for good breeders or show stock, fair treatment with reasonable prices, will make no mistake in writing the gentleman their wants.

BUDD, ILL., Dec. 7, 1900.

*Editor American Poultry Journal.*

DEAR SIR: We were awarded 1st prize and highest honors on the exhibit of our Advance Brooder, at Mayon, Ill. We are having splendid sale on the Advance and they are giving good satisfaction.

Yours truly,
ADVANCE BROODER CO.

As a poultry show hustler and manager Ben S. Myers, of Crawfordsville, Ind., the Black Langshan man and judge, caps the climax. At the corn carnival held at Crawfordsville, Ind., last mouth Mr. Myers got up and managed the largest poultry exhibit ever held in the county. A show of superior quality with every class filled; such as Barred Rocks, 120; White Rocks, 42; Buff Rocks, 40; Black Lagshams, 770; White Langshans, 24; White Wyandottes, 48; Light Brahmas, 60; etc., etc.

H. E. Griffith, Crawfordsville, Ind., breeder of White Wyandottes exclusively, made a large and extra fine display of his pure white birds, winning 1st and

My Barred and Buff Rocks are A. C. Hawkins strain pure. Cockerels, pairs, trios and breeding pens, all from the very best of stock. Am an old breeder of years of experience, but lately in the field as an advertiser. Guarantee my stock to be as represented or your money back.
**PETTIT POULTRY FARM,**
***GEO. HAZLETT, Prop.,***
**Tippecanoe Co.** **Pettit, Ind.**

2d cockerel, 1st and 2d pullet, 2d cock, 2d hen, and 1st exhibition yard and two special. Mr. Griffith has a lot of extra fine birds good enough to go in any show and any one wanting a good breeder or show bird cannot do better than try and get one from him.

Mr. Ben S. Myers, Crawfordsville, Ind., the reliable Black Langshan man, was there with the largest show of Black Langshans ever made in the county, and won the lion's share, as he always does: 1st cock, 1st hen, 1st and 2d cockerel, 1st and 2d pullet, 1st exhibition yard and 1 special. Mr. Myers is extra well fixed for supplying the trade in his line and no Langshan breeder is right unless they have a Myers bird in their yard.

---

A. V. Dykes, Dana, Ill., offers to the public some fine S-c. Brown Leghorn cockerels, winning for him at Mazon, Ill., Nov. 29 to Dec. 1, 2nd, 3d and 4th. Any one in need of S-c. Brown Leghorns or Barred Rocks would do well to write him for prices.

---

At the Sunbury, Ohio show on S. L. Wyandottes, F. D. Bennett, of Galena, Ohio, won 1st hen, 93½; 1st and 2d pullet, 96, 94; 2d cockerel, 93; first pen, 186½. Had no cock birds entered. Had one cockerel not entered that scored 94. On C. I. Games, won 1st cock, 94½; 1st, 2d and 3d hens, 95½, 95, 94½; 1st, 2d and 3d cockerels, 95, 94½ and 94; pullets, 1st and 2d, 94½, 92½ and 1st pen, 187¾. On Houdans, 1st cock, 93½; 1st, 2d hen, 93, 93; 1st, 2d cockerel, 93, 93; 1st, 2d and 3d pullets, 95, 94½ 94; 1st pen, 187⅝. Any one needing first class breeding stock will do well to get his prices. See ad on another page.

---

TAUNTON, MASS., Dec. 5, 1900.
*Editor American Poultry Journal.*

DEAR SIR: My winnings at the Fall River Poultry Show from November 27 to December 1 were ten regular and two special premiums on eleven entries as follows: 1st S-c. Brown Leghorn cockerel; 1st S-c. Brown Leghorn pullet, and two specials; 1st Black Cochin cockerel; 1st Black Cochin pullet; 1st Buff Plymouth Rock cock; 2d Buff Plymouth Rock hen; 2d Buff Plymouth Rock cockerel; 2d Barred Plymouth Rock hen; 2d Barred Plymouth Rock cockerel; 2d Barred Plymouth Rock pullet. Yours respectfully,

ARTHUR W. DAVIS.

---

O. L. King, of Walnut Grove, Ill., in sending in contract for another year's advertising, says business is good, and while he has disposed of a large number of birds he still has some good ones left that will make great January show birds. His Barred Plymouth Rocks are again winners in his own hands and in the hands of his customers.

---

E. F. Pierce, of Port Clinton, Ohio, won at the Hamler, Ohio, poultry show, McClove judge: 1st and 2d cockerel, 1st, 2d and 3d pullets, 1st hen (only one shown), 1st breeding pen, in class of 50 Barred Plymouth Rocks. His first cockerel and pullet scored 93 points, first hen 92½ and pen over 185.

WHEN WRITING TO ADVERTISERS SAY YOU SAW IT IN AMERICAN POULTRY JOURNAL

Judge Keller. Since this was my first exhibition of the season the result makes me feel rather gay, as I hope to have some excellent birds in condition for later shows. My small ad in your classified list brings good returns. Respectfully yours, DR. T. J. LYNE.

W. P. March, of Winamac, Ind., exhibited his Barred Rocks at the Hoosier Poultry and Kennel Show, Logansport, Ind., Dec. 5-12, and feels pretty good, as he won 1st, 2d, 3d cockerel, 1st, 2d, 3, 4th pullet and 1st and 2d breeding pen in a hot class of Rocks. Also three specials for the best pullet, best cockerel and best breeding pen.

A gentleman writing to Darling & Co., says: "We have been feeding your poultry food two years with very satisfactory results. We have grown young Pekin ducks to weigh 6½ to 7 pounds at ten weeks' old by feeding 10 percent of your Beef Scraps. We feed Beef Scraps, Beef Meal and Concentrated Meal to our broilers and never had such strong, healthy chicks without them. It is not difficult to secure eggs in winter when having such foods." The advertisement of Darling's Pure Poultry Foods appears on another page of this issue.

—o—

Paul B. Harshman, of Sullivan, Ill., breeder of White Rocks, won at the Mount Pulaski show, held December 4 to 7, 1900; first cock, first cockerel, second cock, second pullet, second hen, third hen, fourth pullet and first breeding pen in strong competition, there being over fifty in the class. Mr. Harshman is to be congratulated on his winnings, for the competition at Mount Pulaski was very keen and it took good birds to land the ribbons.

The trade the Cleveland Poultry Co., of Plattsburg, N. Y., have had in their cut clover this season has been so large that they are compelled to withdraw their ads. till next season, but they still continue to make the poultrymen happy by their low prices and superior quality of their C. O. Shells, Grit and French Lice Powder and Disinfectant, which is superior to any domestic article known. Better try a package. 30c brings 12-oz. postpaid.

James Christopher has at the Kicapoo Poultry Yard, Heyworth, Ill., an unusually fine lot of cockerels now ready for shipment, both white and barred Plymouth Rocks. Mr. Christopher makes a specialty of these two varieties; his strains have proved prize winners at leading shows, having a long list of trophies to their credit. We can recommend both Mr. Christopher and his birds.

LAUREL, IA., Dec. 8, 1900.

EDITOR AMERICAN POULTRY JOURNAL:

DEAR SIR: Mr. Rigg, poultry judge of Iowa Falls, was here on Nov. 22 and 23 and scored 194 Barred, Buff and White Plymouth Rocks for me. We have been breeding fancy poultry for about four years. About four years ago we got interested in the poultry business and sent to W. S. Russell, of Ottumwa, Ia., and got two settings of Barred Plymouth Rock eggs from his best pen and have been line breeding them ever since. The result is we have some of the best birds in the country. Judge Rigg scored 19 of my Barred Plymouth Rock cockerels up to 92 or better, 13 up

## Silver Wyandottes and B. P. Rocks

Bred to the highest standard of excelleuce; 100 S. W. ckls. bred from 1st ckl. Illinois State Show, which are laced beyond all expectations, and will be WINNERS. Lots of fine B. Rock ckls., yearling stock, cheap. Send for fine catalogue; it contains much to your interest.

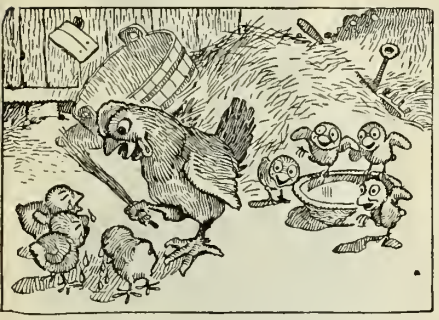
## The Best Are None too Good.

Get some of my Barred Plymouth Rocks and have the best. I have for sale one 1-year-old cock, 15 1-year-old hens, 35 cockerels and 75 pullets.

**F. A. CHANDLER, Preston, Wis.**

to 92½, 10 up to 93 or better, 6 up to 93½, 4 up to 94, and 1 up to 95. The 95-point cockerel is the best shaped Barred Plymouth Rock cockerel I ever saw. He was not cut on typical carriage or comb. Barred pullets went up to 93½. Out of 27 Buff Plymouth Rock pullets but three fell below 92, and several went up to 94½. Judge Rigg said we have the best lot of buff pullets he ever saw. Buff cockerels scored up to 94½. White Plymouth Rock cockerels and pullets both went up to 95. Our White Rocks are extra large, having several cockerels weighing nine lbs. In our white birds we are strong in good eyes, good comb and extra white feathers.

J. T. MOLLOY, Laurel, Ia., Box 20.



CAUSE FOR GRATITUDE.

Chicks in the Background—"Look! the Leghorn chicks are going to get licked! Ain't we glad our mother was a Wooden Hen?"

By the way, have you heard of the new 200-egg Wooden Hen? This new incubator is an enlargement of the famous 50-egg hatcher, favorably known the world over, and is made by Geo. H. Stahl, Quincy, Ill. The price is only $12. A first class 200-egg incubator for $12 is a surprise—a great surprise when we have the assurance that it is thoroughly well made; a marvel of simplicity; and so perfect in its workings that it hatches every healthy, fertile egg. Mr. Stahl's handsome new catalogue printed in several colors is a beauty, and will be sent free of all charges. Better send for one at once.

Clark E. Adams, Racine, Wis., is offering seventy-five of those famous Black Prince strain Dark Brahmas at living prices. They are bred right; they are raised right; they are priced right; consequence: they will give satisfaction.

Ira C. Keller, of Prospect, Ohio, in a personal letter to the editor writes as follows: "We have a very fine lot of White and Golden Wyandottes and Golden and Silver Sebrights to spare. In fact, the best lot we have ever had to offer to the trade. We raised the largest number this year that we ever raised. The trade has opened up stronger with us this fall and winter than ever, and our books show more sales by double for November and December than any previous year. The AMERICAN POULTRY JOURNAL is doing its share and more, too. Orders are coming in from your readers from all over the country. We have been advertising in your paper for over fifteen years."

C. H. Latham, of Lancaster, Mass., has again made a big winning at Philadelphia on his Barred Plymouth Rocks; he won first, second, third and fourth

DUSTON'S

White Wyandottes

have been

WINNERS

in all the big shows in the country for years. My customers not only win with birds bought *direct,* but raise winners from stock and eggs purchased from me. Isn't this just what you want? If so, write me and I will take care of you at right prices.

## A Rare Chance to Buy Winners.

**I Have Decided not to Exhibit**

## Silver Wyandottes

This winter and I will sell the cream of my flock for any of the large shows. I can furnish you birds that are good enough to show in the fastest company and at prices within the reach of all. REMEMBER, I have won more prizes at

**Indiana State, Illinois State, and Chicago Shows.**

in the past four years, than any Wyandotte breeder in this country. Can furnish birds now with score cards by HEWES,

**MRS. GEO. M. HANLY,**
**Hoopeston, Illinois.**

Mention American Poultry Journal.

## McClave's

Barred, White and Buff Rocks, White and Silver Wyandottes, Brown and White Leghorns, Black Minorcas,, Buff Cochins, big Bronze and White Turkeys, large Toulouse, Embden, White and Brown China Geese, prize Rouen, Pekin and Muscovy Ducks.

## 1,500 Birds to Select From.

The finest lot ever bred at Linwood Farm. Now is the time to place your order for show birds and breeding stock. Don't waste time and money buying cheap or inferior birds, but write at once to McClave, the largest breeder in OHIO. Over 2,000 prizes won by my birds at the leading shows. Valuable catalogue free. Write for prices and description of birds.

**CHAS. McCLAVE,**
**Box R, New London, O.**

WHEN WRITING TO ADVERTISERS SAY YOU SAW IT IN AMERICAN POULTRY JOURNAL

on hens in a class of twenty-nine; second pullets; first and third exhibition yards, fourteen yards competing; also the Champion Barred Plymouth Rock female, 115 birds competing, and eight special prizes. In quality of birds shown the Philadelphia show of 1900 stands as one of the hottest ever held. Mr. Latham's grand record is made entirely on birds bred and raised on his farm and they have won on their merits at the Philadelphia show, as they have at many of the big shows before this.

R. M. KELLOGG, Three Rivers, Mich.
The Newly Elected President of the Michigan State Horticultural Society.

With the recent election by unanimous vote of R. M. Kellogg, of Three Rivers, Mich., to the presidency of the Michigan State Horticultural Society, the society has taken one of the longest strides toward the advancement of horticulture along scientific principles, which has ever been accomplished. The good results which are to be obtained by state societies in general, as well as horticulture on a whole, by the selection for the different offices of men eminently fitted for the place, cannot be estimated. These offices too often are parceled out as honors to different parties who, while perfectly conscientious in their work, are not fitted for the position and in the handling of the same, which is entirely foreign to them, co-operation among the better class of fruit growers for more scientific rules governing the production of fruit, receives another blow directly from the source intended for its advancement. R. M. Kellogg is a horticulturist in the true sense of the term. He has devoted seventeen years to the study of plants and plant life, as well as to the improvement of the same by selection and with a view to elevating Michigan horticulture to a higher standard, while at his home is to be found the largest and most perfectly equipped experimental garden in the country. The selection of Mr. Kellogg for this position is both timely and judicious, and AMERICAN POULTRY JOURNAL bespeaks a bright future for the society under his suggestions and guidance.

### SHELLABARGER'S BARRED ROCK AND LIGHT BRAHMAS.

Mr. F. H. Shellabarger, of West Liberty, Ia., announces in his advertisement this month that he is prepared to furnish some good birds of his varieties at reasonable prices. Mr. Shellabarger

This offer can not be continued long, so send order at once to

**ALLEN & CO.,** 321 V Dearborn St., Chicago, Ill.

is the well known judge and breeder and our readers can depend upon any stock he may send or any representations he may make. At Cedar Rapids last January he won the grand $50 sweepstakes silver cup offered by the American Poultry Association for best cock, cockerel, four hens and four pullets in the American class and won it on his Barred Rocks. He also won a similar cup on his Light Brahmas over all competitors and over the other varieties in the Asiatic class. He has had twenty years experience in breeding and this, as he says, is worth something to those who want the best it is possible to get.

F. C. Bailey, of Reading, Mich., is a new advertiser in AMERICAN POULTRY JOURNAL who comes well recommended. His ad. shows him to be a Buff Rock winner and a breeder of Belgian Hares.

J. M. Holt, Marshalltown, Iowa, sent ten of his Barred Plymouth Rocks to the Upper Iowa Poultry Association, held at Mason City, Iowa, winning first, second and third on cockerels; first and second on pullets, and first on pen—which again demonstrates the kind of bird he breeds, and he has a fine line of cockerels of same line breeding for sale as these winners. There were 124 Barred Plymouth Rocks entered for competition.

Mr. George J. Gleason, of Elburn, Ill., a Barred P. R. breeder and a member of the American Plymouth Rock Club, renews his advertising with us for another year and wishes us to state to AMERICAN POULTRY JOURNAL readers that his business is starting very good, he having sold some stock in California and Canada, as well as other localities during the month. His stock will sell easy, as he has better value than ever before.

C. C. Shoemaker, box 106, Freeport, Ill., is one of the best known and most enterprising poultrymen on the continent, and has published a poultry book and an almanac for 1901, which contains 160 pages, and over 100 illustrations of fowls, incubators, brooders, poultry houses, etc., and gives full information how to raise chickens successfully. Read his advertisement, and if you desire further particulars, inclose him 15 cents for his now book.

American Poultry Remedy Co., Department B., Bo 2165, New York City, advertises in an increased space their splendid Roup Cure. This is very simple and can be used by simply putting it in the drinking water. The fowls will, as long as they can see, drink, and, in this way, take their own medicine. One box of this will make 20 gallons of medicine. Every poultryman should have some on hand. It is sent postpaid at 25c per box.

D. H. Foster, Gowanda, New York, writes that, owing to unavoidable circumstances, he will be unable to exhibit this season, and consequently has a fine show-string of Buff Rocks to dispose of.

Geo. W. Hamm, Battle Creek, Mich., who will be recognized by former readers of AMERICAN POULTRY JOURNAL as one of our former advertisers, commences again a yearly ad. Old readers need no introduction to Mr. Hamm, but to the new readers we would say he has long been recognized as one of the best breeders of Buff Plymouth Rocks and was in-

JOHN A. SALZER SEED CO. LACROSSE WIS.

strumental in forming the first Plymouth Rock organization.

F. R. Simmons, Casstown, Ohio., writes that he has some cockerels as fine as any he has ever seen and much better than he had last year. Mr. Simmons is a breeder of White and Buff Wyandottes and has gained an enviable reputation with his birds.

R. S. Franklin, of Urbana, Ill., is now breeding Black Cochin and Black Cochin Bantams exclusively, but has a fine lot of S. C. W. Leghorns to sell off. A S. C. W. Leghorn cock scored 95¾, had his comb frozen a little since; two hens, 95½, 95, by Pierce; one hen 96, by Russell; two fine cockerels with fine combs, and six pullets. The cock is as white as snow and stays white the year round. He will take $25 for the lot—well worth $50.

J. B. Clark, 312 Evanston avenue, Chicago, won 1st on Buff Cochin cock and 1st on Buff Cochin hen at Indianapolis. Mr. Clark only entered these two birds. The shipment Mr. Clark made to St. Petersburg, Russia, of two exhibition pairs were chicks from this mating.

F. R. Simmons, of Casstown, Iowa, is a breeder of White and Buff Wyandottes and writes that he has eight pullets that score from 95 to 96. He has great success in securing White Wyandottes that stay white.

Dr. H. F. Ballard, of Chenoa, Ill., is now breeding Buff Black and Partridge Cochins. He has decided to keep but one variety and will therefore sell off any two varieties, retaining but one. Dr. Ballard has been breeding Cochins for years and here is a chance to get a good lot of stock that has been bred right.

A letter from the Fairacres Farm says: "The Fairacres Farm at Joliet, Ill., is preparing for a busy year. Orders for 15,000 Pekin duck eggs are already booked and more coming in every mail. They are extending their pigeon houses, and besides raising the birds by the thousand are among the largest buyers of live pigeons in the country, carrying 10,000 birds in stock at all times. A large millinery house in New York has contracted with the Fairacres Farm for 35,000 pure white pigeons to be used in ornamenting ladies' hats and the big trap shooting clubs are contracting for 50,000 more dark colored birds, which will keep the pigeon department busy for six months to come."

C. S. Wetmore, of Lockport, N. Y., has had J. Y. Bicknell at his place giving a score to every one of his White Wyandottes.

E. C. Brattain, Connersville, Ind., breeders of S-c. Brown Leghorns, won at Indianapolis Fancier's Association, Indianapolis, Ind., as follows: Tied 1st cockerel 94½, tied second cock 94, third hen 93, second pullet 94, fourth 93½. Did not enter a pen. There were 38 Sc. Brown Leghorns in the class.

W. R. Wooden, of Battle Creek, Mich., was elected secretary and treasurer of the American Buff Wyandotte Club held Feb. 12 in combination with the Philadelphia show. It was also decided to hold the next annual show in the West.

**$6,000 POULTRY CATALOGUE FREE!**

# Poultry Show Notes

## YORKVILLE'S SUCCESSFUL SHOW.

The exhibition given by the Yorkville, Ill., Association was well attended by both exhibitors and visitors and was a success in every way. They were fortunate in having an ideal hall in which to hold the show and this, in connection with the uniform cooping of the birds, made an attractive exhibit such as is seldom seen except at the metropolitan shows.

Messrs. A. & E. Tarbox, of Yorkville, broke the record by making a clean sweep on their Silver Laced and Buff Wyandottes. Their birds were in the finest show condition and were fit to win anywhere. This firm has a national reputation which has been earned strictly upon the merits of their stock. They probably produce more high grade Silver Wyandottes each season than any other breeders in the country.

W. H. Arundale, Newark, Ill., showed that his Buff Rocks are still in the front by winning the lion's share of the prizes, consisting of 1st cock, 1st, 2nd and 3rd hen, 3rd cockerel, 1st pullet and 1st pen.

Nichols Bros., of Yorkville, surprised their competitors by winning on their White Wyandottes as follows: 1st and 2nd hens, 2nd and 3rd pullets, 1st and 2nd cock, 1st, 2nd and 3rd cockerel and 1st pen. Their birds were far above the average show specimens and were entitled to all they received.

R. A. McClelland, Yorkville, showed some White Rocks that were as near perfection as we believe it possible to get them. His birds are constantly entitled to a place at the front. He won 1st cock, 1st hen, 1st, 2nd and 3rd pullet, 1st, 2nd and 3rd cockerel, winning every 1st prize for which he competed. We inspected his flocks at his yards and found birds there which we confidently believe have no superior anywhere. He has combined shape, color and size to a remarkable degree, and has a large number of birds for sale now that are going to win for those who purchase them.

## MAZON'S SECOND SHOW.

The most noticeable thing about the Mazon, Ill., show this season was the high quality of the stock in all varieties. Some of the most prominent breeders in Illinois sent their birds to this show and the prizes won are doubly valuable on that account. Many of the winning birds will be seen later at the Chicago show.

Dr. O. P. Bennett, of Mazon, was in it as usual with his Buff Rocks and won 1st and 2nd cock, score 92-92; 1st, 2nd, 3rd and 4th hen, 94, 92½, 92½, 92; 1st, 2nd and 3rd cockerel, 94, 92¾, 91½; 1st, 2nd, 4th pullet, 93½, 93, 93; 1st, 2nd pen, 187⅜, 185¼. Also $25 silver cup for best display. We have seen some of the best Buff Rocks this season both east and west and must frankly admit that we have seen none anywhere that were superior to those found on Dr. Bennett's place. His birds are the proper shade of buff to suit the best judges, and the stock he sends to customers wins for them the same as it does for him.

Jos. F. Misener, of Mazon, breeder of White Wyandottes, exhibited some very choice specimens and won 1st and 3rd cockerel and 4th pullet. He has a large number of young birds that will be

# FREE EGG MAKER AND LICE KILLER.

During the early part of 1901 we will distribute free, at least 5,000 full size packages each of **Lee's Lice Killer** and **Lee's Egg Maker** at towns where we are not yet represented by a local dealer.

**Lee's Lice Killer** actually kills lice and mites on chickens and hogs without handling fowls or animals. Simply sprinkle on roosts for poultry; on rubbing posts or bedding for hogs. Quart, 35 cents; gallon, $1.00.

**Lee's Egg Maker and Chicken Medicine** is the biggest value ever offered to poultry raisers. A big 42 ounce package of condensed medicated meat food for poultry for 25 cents or a 25 lb. pail for $2.00. It supplies all meat food necessary for poultry. It brings the eggs when all else fails. It makes healthy, profitable fowls and quick growing, vigorous chicks. It cures roup, cholera, leg weakness, indigestion, etc.

A few packages of either, in actual use in a community, will bring us more trade than the same amount spent in other advertising. That is why we offer a trial free.

Write at once, as this offer is for immediate acceptance only.

**GEO. H. LEE COMPANY, OMAHA, NEB.**

**EGG HARBOR FARM.** *A. L. WARE, Mgr.,* TUCKERTON, Ocean Co., N. J.

# FOR SALE. FOR SALE. FOR SALE.

Owing to our changing the location of our farm we will make a special price on birds from our 1900 yards and 1900 hatched birds for the next thirty (30) days, of the following varieties:

White Cochins,
White Wyandottes,
Black Langshans,
Buff Cochins,
Barred Rocks,
Pekin Ducks, B. Turkeys.

March 1st, 1901, we will be in position to fill all orders promptly in any of the foregoing varieties, as we are more than doubling our facilities. I also have a very neat Short-Horn bull (yearling) for sale. If you need him write for particulars.

***R. D. BURNHAM, Champaign, Ill.***

WHEN WRITING TO ADVERTISERS SAY YOU SAW IT IN AMERICAN POULTRY JOURNAL

"ripe" for the January shows and is in position to make matters interesting for those who place their orders with him. He informed us that he has never failed to win first on cockerel wherever he has exhibited.

B. N. Thomas, of Mazon, breeder of White Rocks and S. C. Brown Leghorns, maintained his past record on these varieties and won 1st pen, 2nd and 3rd cockerel, 2nd and 4th pullet in the White Rock class, and 1st pen, 1st cockerel and 1st hen in the Brown Leghorn class. His birds of both varieties are above the average in quality and he will be heard from again at later shows. He has a surplus of show birds and for a short time will sell a number of them at prices which will make them real bargains.

Mr. Wm. Webb, of Joliet, Ill., had the pleasure of winning more prizes than any other exhibitor, and he certainly has cause for feeling proud of his record, considering the strong competition which he met. In Barred Rocks he won 1st and 4th cockerels, 92½-91; 1st and 2nd hen, 92½-92½; 1st and 3rd pullet, 93½-92½; 1st and 4th pen, 188½-184⅝. In Buff Cochins he won 1st cock, 94; 1st and 2nd hen, 94½-94½; 1st and 2nd pullet, 95-94; 1st pen, 188½. Buff Cochin Bantams, 1st cock, 94; 1st and 3rd pullet, 93½-92½; 1st, 2nd, 3rd and 4th hen, 93-92½-92-91½, and 1st pen, 184⅞. Mr. Webb's 1st cockerel and 1st pullet in Barred Rocks were bred from Chicago Boy, which won 1st for him at Chicago, 1900. He can supply his customers with birds from their doubel or single matings, as he practices both and produces prizewinners from both. He has a model farm, largely devoted to the rearing of his specialties, and he belongs to that class of breeders who conduct their business understandingly and supply their patrons with birds that can be depended upon to produce their like in the greatest possible degree. He uses no haphazard methods and when he mates his birds it is done intelligently and with a well defined purpose in view. His phenomenal success in some of the largest shows is the result of knowledge gained by years of practical experience, and he takes pleasure in giving his patrons the benefit of his ideas both in the stock he sends out and the information they may desire relative to mating, etc. We know of no one who is in better position to satisfy customers than Mr. Webb.

Mr. F. C. Wilcox, the well-known White Wyandotte specialist of Joliet, came to Mazon "loaded for bear" and had things pretty much his own way. He won 1st, 2nd and 3rd cock, scores 93½-92½-91; 1st, 2nd, 3rd and 4th hen, 95-94½-94½-94; 1st pullet, 95; 1st and 4th pens, 188¼-187. His birds were not in the best show condition, as unfortunately Mr. Wilcox in this instance was compelled to leave them to the "tender mercies of the hired man" and they suffered accordingly. He had birds that could have reached 96 points under favorable circumstances. He has 150 cockerels and 300 pullets now ready to ship and many of them have been bred from Boston winners. He has birds as white as they grow, with shape and size in a remarkable degree. If we were breeding White Wyandottes and had his birds we would not hesitate to show them anywhere and would have full confidence of winning the most desirable prizes.

The Advance Brooder Co., W. H. McCormick, manager, Budd, Ill., had their brooders on exhibition and in operation and gave a practical demonstration of

the superiority of their goods. These brooders are cheap and can be depended upon when a brooder is most needed. Their illustrated catalogue will be sent free to all applicants.

GOSHEN, IND.

The Goshen show this season was larger and better in every respect than the one held last year. The classes were well filled and the winning birds were much finer specimens than are usually found at the smaller shows. There were 400 birds in the coops and the show was well attended.

J. B. Babcock & Son, of Goshen, made almost a clean sweep on White Rocks, winning 1st and 2d cock, 1st, 2d and 3rd hen, 1st, 2nd and 3rd cockerels, 1st and 3rd pullets, and 1st pen.

Their birds were in excellent show condition and the scores ranged from 93 to 95 points.

H. G. Leedy, breeder of Barred Rocks, had an unusually fine exhibit, but his birds were not in best condition and his winnings do not do him justice. He won 1st pullet, 3rd hen and 3rd pen.

Mr. John M. Rogers, of South Bend, came down with a string of his prize winners and won 1st cock, 1st and 2nd hen, 3rd pullet and 2nd pen. At the South Bend show this season he won 2nd cock, 1st, 2nd and 3rd hen, 1st, 2nd and 3rd pullet and 2nd pen. He has had several years' experience in mating and exhibiting Barred Rocks, and is willing at all times to give his customers the benefit of his experience in the way of instruction relative to raising winners. His birds have an enviable record in the hands of his customers.

Mr. Jacob F. Wagner, of South Bend, exhibited some Buff Rocks that attracts the attention of all fanciers of this variety. He has given the color problem much study and the result is that for color we can truthfully say that he is entitled to a place at the top. He won at South Bend this season 1st, 2nd and 3rd cock, 1st, 2nd and 3rd hen, 1st and 2nd pullet, and 1st pen, no cockerels entered. At Goshen he won 1st cock, 2nd and 3rd hen, 2nd and 3rd pullet, 1st pen. These winnings are of more than ordinary value, as competition was very strong.

JACKSONVILLE, ILL.

The Jacksonville show this year was an improvement in all respects over former ones. The exhibits were large and of unusual quality. This was especially true of the White and Barred Rock classes and is accounted for by the fact that the two special clubs representing these varieties held their state meetings at Jacksonville. Much credit for the success of the show is due to the efforts of Mr. F. C. Brewer, the competent and energetic secretary of the association, who has been untiring in his work.

Mr. Frank H. Thomas, of Jacksonville, won on Cornish Indian Games as follows: 1st cock, 1st hen, 1st, 2nd and 3rd cockerel; 1st, 2nd and 3rd pullet, and 1st pen, a clean sweep of every first prize offered. Mr. Thomas thoroughly understands how to produce prize winning Cornish Indian Games. He has won more prizes in the last three years at the great Illinois State Fair than all other breeders and exhibitors combined. Out of thirty-six prizes offered on this variety, he has won nineteen, winning

# A Land Slide!

**At the Big Indianapolis Show, Dec. 10 to 15, 1900.**

## White Plymouth Rocks,

In a big class of choice birds, winning as follows; Cocks, 1st, 2d, and 3d, 96¼, 95¼, 95¼; hens, 1st, 2d and 4th, tie third, 96, 95½, 95¼; other hens 95, 95, 95, 94¾· Cockerels, 3d and 4th, tie 2d, 95¾, 95¼. Pullets, 1st, 2d, 3d and 4th, 96¼, 96¼, 96¼, 96. Pens 1st and 2d, 192 7-16, 191 5-16, the highest scoring pens ever shown. Who has ever made such a record in such a show?

## White Wyandottes.

Cocks, 1st and 2d, 94¾, 93¾. Hens. 1st, 96½; one hen tieing for 2d at 96, losing on weight. Cockerel, 1st, 95. Pullet, 4th, 96¼, we owning two pullets out of five tieing for 1st, losing on weight. Pen, 1st, 191¼.

## Buff Wyandottes.

Cocks, 1st and 2d, 94½, 93. Hens, 1s, 2d, 3d and 4th, 94¼, 94¼, 94¼, 93½' Cockerels, 1st and 2d, 92½, 92. Pullets, 1st, 2d, 3d and 4th, 94, 93¾, 93, 93. Pens, 1st and 2d, 186 5-16, 184 9-16. We won $15 cash special for largest and best display, all varieties competing, and silver cup for best display in American classes.

## 600 Birds For Sale.

Egg circular will be out Jan, 1st, with matings. Stock raised on three farms.

**W. C. PIERCE,**

**B. N. Pierce, W. C. Pierce. Office, 55 Vir. Ave. Indianapolis, Ind.**

twice as many first and second prizes as all other, which is probably an unequaled record and one of which any breeder can well feel proud. He also won at Central Illinois Poultry show, Palmyra and Kansas City last season, with specimens scoring in each show 94, 94½ and 95 by Heimlich, Hewes and Felch.

J. E. Lamphere, of Ponemah, Ill., again proved the quality of his White Rocks by winning 1st and 3rd cockerel; 1st hen, 1st, 2nd and 3rd pullet, and 1st pen. His first prize pullet won with the remarkable score of 96¾ and she deserved every fraction of a point of it. He also won the diploma offered by the American White Plymouth Rock Club to be competed for by the Illinois members. In Buff Cochins he won 1st and 2nd hen; 3rd cockerel, and 2nd pen, with only six birds entered.

Mr. M. L. Edson, of Jacksonville, had as nice a display of Barred Rocks as we have seen in a long time and his 1st price cock bird was especially fine. Mr. Edson has been breeding Barred Rocks for years and is a recognized authority on mating and breeding this variety. He always exhibits where competition is the strongest and never fails to win his share of the prizes.

Mr. H. J. Hammond, of Jacksonville, exhibited a few of his favorites and won 2nd pullet and 2nd pen in the S-c. Brown Leghorn class, which was one of the strongest in the show. He also won 1st and 2nd hen in the Buff Rock class. There is no question about the quality of Mr. Hammond's stock and those who intend purchasing birds of either of his varieties will not make a mistake in placing their order with him.

Mr. Richard Reynolds, another of Jacksonville's enterprising breeders, who makes a specialty of Golden Spangled Hamburgs, had some beautiful specimens winning 1st, 2nd and 3rd cockerel; 1st, 2nd and 3rd pullet, and 1st pen. He had the best birds of this variety without exception, which we have seen at any of the shows this season.

## BATTLE CREEK, MICH.

The Battle Creek show was a grand success and surprised even its promoters. There were about 1,000 birds on exhibition which for quality could not be beaten by any display of equal size which we have seen. Probably the strongest competition was in the Buff Rock and Buff Wyandotte classes and the winning birds were remarkable specimens. The fanciers in and around Battle Creek are men who are in the habit of making a success of their undertakings and this show was not an exception to the rule. Visiting poultrymen were handsomely entertained. Two banquets were given in their honor, one by Mr. George S. Barnes, editor and publisher of the *Michigan Poultry Breeder*, and one by Mr. W. R. Wooden, the Buff Wyandotte specialist.

James A. Tucker placed the awards and is entitled to special commendation for his accurate and satisfactory work. Mr. Tucker is one of the judges who is fully competent to pass upon all standard varieties and his popularity as a judge is based upon merit. Mr. Barnes as secretary handled his part of the work in a prompt and efficient manner and his re-election as secretary will insure the success of the show next year. AMERICAN POULTRY JOURNAL advertisers won as follows:

B. H. White, proprietor White's Feath-

ered Stock Farm, Battle Creek, Mich.:

Barred Rocks—1st cock, 1st cockerel, 1st pullet, 1st hen and 1st pen, 3d pullet, 3d cock and 3d hen.

Houdans—1st and 2d hens, 3d cock, 2d cock, 2d cockerel, 3d pullet and 2d pen.

It will be noted that Mr. White made a clean sweep of all first prizes on Barred Rocks and this in a class of 120 birds from the yards of the best breeders in Michigan. This record is a truly remarkable one considering the character of the competition and is a better recommendation for Mr. White's stock than anything we might say in its favor. We had the pleasure, however, of visiting his plant and found it well filled with large, handsomely barred birds which will undoubtedly win the prizes for his customers all over the country. AMERICAN POULTRY JOURNAL readers will remember Mr. White as being at Peoria, Ill., formerly. He has always shown his birds in the strongest competition both at home and abroad. His best Barred Rock cockerel at Indianapolis last season scored 93½ and pullet 94½. He had six pullets at this show scoring from 93½ to 94. These are the kind of birds he uses as breeders and his customers are assured of this same high quality.

In Houdans he won at Battle Creek 1st and 2d hen, 2d cock, 2d cockerel, 3d pullet, 3d cock and 2d pen. At Indianapolis last season he won 1st cock, score 96, 1st hen, 96½, in addition to 1st pen, 190½, and several seconds and thirds. This is certainly quality high enough to satisfy anyone and comment is unnecessary.

C. L. Hogue, of Battle Creek, Mich., one of Michigan's oldest breeders, was on hand as usual with a fine string of Barred Rocks, Silver Wyandottes and Dark Brahmas, winning some of the best prizes in each class. Mr. Hogue is particularly strong in Barred Rocks. He has always won his share of the premiums. At Detroit, '99, he secured the grand sweepstakes special of a $25 silver set for the twenty highest scoring birds in the American class. In 1900 he won 1st cock, tie for 1st hen, 2d and 3d pullet and four of the best specials offered.

G. W. Hamm, of Battle Creek, who has made a specialty of Buff Rocks for several years, won 1st and 3d hen, 1st, 2d and 3d pullet, 1st and 3d pen, 3d cock and 3d cockerel. Mr. Hamm has a national reputation on Buff Rocks and has always won the lion's share of the prizes, but his stock this season is better than ever before if such a thing be possible, and his birds will surely surprise the Buff Rock breeders at the large shows yet to be held. His first, second and third prize pullets are the three best colored birds we have ever seen in the hands of one breeder and his two best hens are nearly the equal of the pullets. His best cockerel is of one even buff color throughout and was a marvel but was not sufficiently matured to show to good advantage.

H. R. Kingman, of Battle Creek, exhibited a number of Buff Rocks which won the admiration of all fanciers of this variety. His 1st prize cockerel is a well stationed bird, particularly strong in under color, a bird that is fit to win in the strongest competition and really in a class by himself. Mr. Kingman also won 1st on cock with a good sized bird, strong of bone, well shaped in all sections and with an evenness of color throughout which is seldom seen. He

***W. R. WOODEN,***

***Battle Creek, Mich.***

WHEN WRITING TO ADVERTISERS SAY YOU SAW IT IN AMERICAN POULTRY JOURNAL

also won 2d cockerel and 2d pen, in addition to gold special for the five highest scoring Buff Rock cockerels in the show, any one of which would be a valuable addition to any flock of this variety. Mr. Kingman has a line of male birds which makes his flock a leader in this respect. He has been unusually successful this season in his matings and his customers are getting birds which will not disappoint them.

W. R. Wooden, who is one of Battle Creek's most enthusiastic and successful fanciers, made almost a clean sweep on his "Royal" strain of Buff Wyandottes, winning over imported birds purchased at long prices. He had 1st cock, 1st, 2d and 3d hen, 1st, 2d and 3d pullet, 1st, 2d and 3d cockerel, 1st and 2d pen. The importance of this record cannot be fully appreciated without an inspection of the birds competing in this class. Mr. Wooden has quality in Buff Wyandottes which many breeders have heretofore claimed it was impossible to get in this variety. He has by systematic and intelligent line breeding procured a strain of birds which can be depended upon to produce their like in a remarkable degree and for this reason he has things practically his own way wherever he exhibits. He is a true facier, one of Battle Creek's most prominent and successful business men, and AMERICAN POULTRY JOURNAL readers can rely absolutely upon any statements he makes regarding his stock.

W. H. Abbott, of Reading, Mich., had a small exhibit of Buff Rocks, winning 2nd cock and 2nd hen, tying for 1st. He is a prominent member of the American Buff Plymouth Rock Club and has about 200 birds for sale which he guarantees to be high grade and which will give entire satisfaction to customers.

M. Bliss Dewey, of Concord, Mich., had a very creditable display of Barred Rocks, some of the individual specimens showing the clear distinct barring for which Mr. Dewey's birds are noted. He has furnished the winners at some of the prominent shows in the past and will undoubtedly be heard from at the later shows this season.

E. C. Hunferford, of Concord, Mich., breeder of Silver Laced Wyandottes, made a clean sweep on this variety except in the cock bird class, where he did not compete. He certainly understands his business in mating and breeding his favorites, and some of the best flocks in the country have had new blood from his birds introduced into them. He has an unusually large number of exhibition cockerels this season and can furnish customers with just what they may want in this line.

Grover & Grover, the well known White Rock breeders of Concord, Mich., had the largest and best display of White Rocks and won most of the desirable premiums. Their strain of birds is noted for a combination of size, color and shape that is found in very few flocks. They have always exhibited where competition was hottest and have had the winners at shows like Chicago and Detroit. Mr. John A. Grover, of this firm, is the secretary of the Michigan State Poultry Association and member of the Executive Committee of the American White Plymouth Rock Club. Grover's White Rocks are the popular kind and are bred to win.

Frank W. McKenzie, Concord, Mich., pres. of the American Houdan Club, had some of the birds at Battle Creek which have made him famous as a breeder of Houdans. Among his winnings were

1st cock, 1st cockerel and 1st pen. Mr. McKenzie is a recognized authority on his favorites and has as good a flock as it is possible to produce. Birds of his strain are in great demand, which is not confined to the United States alone but extends into several foreign countries. He is in better position this season than ever before to furnish the highest quality at the lowest price. Mr. McKenzie's services are in demand as a judge of all varieties and his engagements this season are fitting testimonials of his qualifications. He assisted in the work at Battle Creek and succeeded in pleasing all exhibitors, which is generally a difficult thing to accomplish.

## ANNUAL MEETING OF THE AMERICAN BUFF LEGHORN CLUB AT CHICAGO.

The annual meeting of this club will be held at Chicago, Ill., Wednesday, Jan. 23. 1901, at the Chicago Coliseum, Wabash avenue and Seventy-fifth street, and the hour of meeting will be 2 o'clock p. m.

It is earnestly requested that all members be present, as there are many interesting matters to be brought before the club at this meeting. The club proposes to be one of the largest (if not the largest) in 1901. The annual dues of $1 are now due, and the secretary will be only too glad to receive them. Every breeder of Buff Leghorns is earnestly requested to join this club. The National Fanciers' Association will offer the following on Buff Leghorns: $2.50 in gold for the best cock, hen, cockerel and pullet each. Also $20 in gold for the best display of Buff Leghorns; $10 in gold for the second best display.

The American Buff Leghorn Club will offer a fine silver cup valued at $20 to the club member showing the best cock, hen, cockerel, pullet and pen. Geo. S. Barnes, president; E. G. Marquardt, secretary.

## AMERICAN INDIAN GAME CLUB.

Jan. 21-26, 1901, the National Fanciers' Association will hold their annual show in Chicago. This will be a grand rallying of the poultry fanciers of America, and the birds that wear the blue from this exhibition will be considered worthy of double honors. As an expression of interest, and to emphasize an invitation for the Indian Game fanciers to appear with a strong class over $250 have been offered in the way of regular and special premiums. Both Cornish and White Indians will compete for these important prizes, and it is hoped that the fanciers of this breed will not be found wanting "when the general roll is called." If you have superior stock let the world know it, and seize this opportunity to take premiums in silver and gold and other valuable offerings. If you are not already a member of the American Indian Game Club send in your application at once. $1 is the initiation fee. Address W. S. Templeton, secretary-treasurer, Dakota, Ill.

The annual club meeting will be held during the show in Chicago, at 2 o'clock, p. m., Thursday, Jan. 24, 1901. Madison Square Garden, New York, will be the next great show, and Indian Game breeders must not think of folding their hands when they represent the peer of any breed on the face of the earth. Chicago and New York are the great rallying centers for the fanciers of America,

# Roger's Barred Ply. Rocks.

Are line bred. Have been winners for six years. Won at South Bend, Ind., Nov. 26 to Dec. 1, 1900, 1, 2, 3 hen, 1, 2, 3 pullet, 2 cock, 2 pen. At Goshen, Ind., Dec. 4-7, 1900, 1 cock, 1, 2 hen, 3 pullet, 2 pen. If you want winners write me.

JOHN M. ROGERS, Box 365, South Bend, Ind.

JACOB F. WAGNER,

—BREEDER OF—

# Buff Plymouth Rocks

Stock and Eggs in Season.

Won at South Bend, Nov. 26, 1900, as follows: 1st cock, 1st, 2d and 3d hen, 1st and 2d pullet and 1st pen. At Goshen, Ind., Dec. 4-7, 1900, 1st cock, 2d and 3d hen, 2d and 3d pullet and 1st pen. No cockerel entered.

*510 S. Michigan st., South Bend, Ind.*

LARGER and BETTER

# Bronze Turkeys

THAN EVER.

31 first premiums and 2 specials won at six poultry exhibits in 1900. Breeding and exhibition stock for sale. I have also a fine lot of Standard bred S. L. Wyandottes and B. P. Rocks that are fine. I keep nothing but the best. Score cards by D. T. Helmlich.

*Woodlawn Poultry Yards,* *MRS. HENRY GAISER, Charleston, Ill.*

# Smith's Buff Wyandottes.

I have for sale 100 cockerels and 150 pullets all sired by my Chicago and Detroit winners. They are strong, farm-bred birds and were selected from a flock of 500 chickens. My strain has proved itself to be equal to any by its winnings over its competitors. Send for booklet describing my strain and their winnings.

BEN HAZELTON SMITH,

Smith's Buff Wyandotte Farm. Coldwater, Mich.

# *Buff Cochin Pullets and Breeding Cockerels.*

Having sold my Minorcas and all my exhibition Buff Cochin cockerels I have a few fine Buff pullets and a few good breeding cockerels that I will sell at prices that will astonish people wanting breeders. Remember I offer nothing for sale that will not score 90 points or better.

L. E. DOVE,

Proprietor of the South Side Poultry Yards,

Shelby, Ohio.

# *A Chance of a Lifetime!*

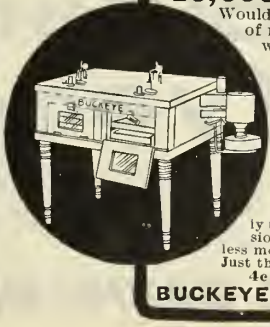
Are you thinking of starting in the poultry business? If so you will make no mistake if you will start with the best and most popular strain of Black Minorcas in the country to-day. The Northup strain is acknowledged by breeders and in the show ring all over the country as the best. My black Minorcas are direct from the yards of Mr. Northup, and having decided to make a specialty of Brown Leghorns I will close out my Black Minorcas at half price. I have at present 12 hens, 6 cockerels and 8 pullets. Cockerels and pullets hatched from eggs of Northup's best pens, which I will sell for $50; and 1 cock and 14 Rose-comb Black Minorcas which I will sell for $35 if taken this month. Satisfaction guaranteed.

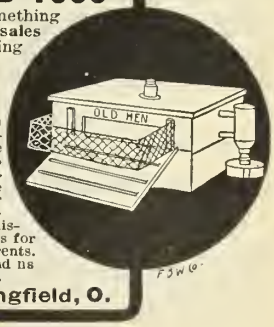
*J. F. E. OSTER, Borodino, N. Y.*

20,000 SOLD IN 1899 AND 1900

Would not this fact seem to indicate something of merit? Well, it does, but a million sales would not prove such a convincing argument to a buyer as our

30 DAYS ON FREE TRIAL.





We offer any machine we make without regard to size or price on these terms. We sell incubators as low as $5 and brooders as low as $3—everything on 30 days trial. We have NO AGENTS. Remember this. Our prices are absolutely the same to all and having no commissions to pay, we can sell better machines for less money than can those who employ agents. Just think about these things and then send us 4c in stamps for our catalogue No. 2.

BUCKEYE INCUBATOR CO., Springfield, O.

WHEN WRITING TO ADVERTISERS SAY YOU SAW IT IN AMERICAN POULTRY JOURNAL

and if you can exhibit at both shows do so, but I certainly urge that we present a strong class at Chicago, Jan. 21-26, 1901. Carl C. Moore, Hopkinsville, Ky., assistant secretary.

## THE PARTRIDGE WYANDOTTE CLUB OF AMERICA.

It is with great pleasure that I introduce to the poultry fraternity "The Partridge Wyandotte Club of America," the newest specialty club but one which has already begun its good work for this new and beautiful variety of Wyandottes who are worthy of the highest praise and should occupy a place in the first rank.

It has always been the object of all true fanciers to encourage the breeding of fancy poultry, and our object is to establish their proper name, and then they will push themselves to the front and into the Standard. For surely no breed can be more beautiful to look at, nor a better all-round fowl than the Partridge Wyandotte, and I may safely say that I have yet to find their equal as egg producers, and I have bred both the Rose Comb White and Brown Leghorns. All they need is just a short time to make them enjoy the same popularity that the White Wyandotte enjoys at present. So with this object in view we have organized the Partridge Wyandotte Club, and we hope that every breeder of Partridge Wyandottes will give us his or her support, so let our watchword be better Partridge Wyandottes and more of them.

The following officers will manage the affairs of the club for the opening year, and all inquiries will be cheerfully answered by the secretary: W. A. Doolittle, president, Sabetha, Kans.; E. O. Thiem, first vice president, Denison, Iowa; C. C. Loring, second vice president, Dedham, Mass.; C. F. Early, third vice president, East Palestine, Ohio; Theo. Haight, Jr., secretary and treasurer, No. 44 Temple street, Astoria, L. I., New York.

Yours respectfully,
THEO HAIGHT, JR.,
Secretary and Treasurer.

## MID-WEST COMBINATION SHOW.

The official premium list of the second annual exhibition of the Ohio State Poultry Association is now ready to mail to breeders throughout the country.

The show will be held at Wooster, Ohio, Jan. 17-22, 1901, in connection with the Central Ohio Association. The cash premiums aggregate a total of over $2,200. Our state show last winter was the largest ever seen in Ohio. All obligations were paid in full and we expect a larger one in 1901.

Leading breeders cannot afford to miss this great exhibition. Ohio is the great poultry state. Has more shows than any other two states, and all eyes will be turned on Ohio when awards are made at Wooster, Jan. 17-22, 1901. For premium lists, blanks and all other information about this exhibition, write

CHAS. MCCLAVE,
Secretary and Treasurer.
New London, Ohio.

## KANSAS CITY FOR FINAL VICTORY.

The secretary of the convention hall show, to be held in Kansas City, Jan. 17-22, 1901, is receiving many communications from breeders of the West stating their intention of attending their

# White Wyandottes,

EXCLUSIVELY.

Our birds at the late Indianapolis Show scored from 95¼ to 96¼ by Hewes. Our winning pen reached the high score of 191. Our birds are all our own breeding. We can sell you winners and eggs from stock which will produce winners. If you want stock or eggs from this class of birds, address

MILLER BROS., Box 18, Nashville. Ind.

# Keyworth's Golden Buff Rocks.

I am devoting most of my time to breeding **BUFF ROCKS, my specialty.** I have spared no expense in perfecting my strain and have bred them in line in a practical and scientific way for years. They are **GOLDEN BUFF** and as near **SOLID BUFF** as has ever been produced. They are noted for their size, shape and color.

**THEY WIN.**

At the Indianapolis Show said by all present to be as good a class as was ever gotten together. I won 2d cock, 1st and 2d hen, 2d cockerel, 3d pullet, 3d pen and special for best cock, hen, cockerel and pullet, and at the Illinois State Fair they beat all comers to a standstill. They also won last year at Chicago. **Write for prices.**

J. D. KEYWORTH, 1332 Forrest ave., Evanston, Ill.

# Phelps' White Plymouth Rocks,

ARE PRIZE WINNERS.

Size. Shape. Color.

I hold the White Plymouth Rock Club diploma for best pen in the state, won at Club meeting, Columbus, Ohio, Jan., 1900. I have the best strain of line-bred White Rocks in the United States. Have never been beaten. Show birds that will win. Breeders that will breed right. Old and young stock. Prices right. Write.

FRED J. PHELPS, Bucyrus, Ohio.

I have sold the winners at the largest shows. They win for me; they will for you. Try them.

# TIBBETT'S BARRED PLY. ROCKS

## Winners

At Chicago Joint Show, Illinois State Show, Quincy, Princeton, Ill., Cedar Rapids, Ia., largest shows in the West. Grand lot of stock bred from above winners for sale that are bound to please. A limited number with score cards by Judge Shellabarger. Do not fail to write me and let me figure with you on what you want to buy. I can save you money. Circular and show record free, Mention A. P. J.

H. TIBBETTS,
Neponset, Ill.

# Clean Sweep

Of all 1st prizes on Barred Plymouth Rocks in a class of 120 birds at Battle Creek, Mich., Dec., 1900, defeating some of the best birds raised in the state and establishing a record which is unprecedented. We have

## 300 BIRDS

which are fit to win in the strongest competition, and you can buy some of them at a fair price. We can surprise you both in quality and price. Our Houdans captured seven 1st, 2d and 3d prizes in competition with America's best birds. At the Indiana State Show, Indianapolis, Dec. 10-15, we entered one pen of Barred Plymouth Rocks and one pen of Houdans, 10 birds in all, and won 10 ribbons. Houdans—1st cock, 1st, 2d and 3d hens and 1st pen. Barred Plymouth Rocks—3d cockerel, 1st and 2d pullet, 4th hen and 2d pen. If you want to win, write to

WHITE'S FEATHERED STOCK FARM,
B. H. WHITE Prop., Battle Creek, Mich.

# Golden Wyandottes

My birds have kept their reputation good again this season. At Aurora, Ill., Dec. 6-12, 1900, Heimlich and Shellabarger, judges, won 1st cock, 2d and 4th hen, 1st, 2d, 3d and 4th cockerel, 1st, 2d and 3d pullet, 1st breeding pen and every special in the class. If you are wanting cockerels to go into shows with, I can furnish you with such, or if you are wanting to mate your females with a good breeding cockerel, write me and let me know your wants. Can spare no exhibition females.

A. W. DAVIS, Big Rock, Ill.

WHEN WRITING TO ADVERTISERS SAY YOU SAW IT IN AMERICAN POULTRY JOURNAL

state and country shows, and then taking their best to the big January show as a final test of their value in the large classes, which are to be found annually in Kansas City.

The premiums, as listed in their handsome catalogue, form an attraction not to be overlooked; offerings of sweepstake prizes reaching from $10 to $50 and over eighty valuable specials, are in the list. Kansas City pays premiums on the last day of the show, and is easily accessible from all parts of the West. The entries close a few days before the opening date, therefore intending exhibitors should lose no time in sending a postal for premium list, in order that they may be in good time, to the secretary, C. T. Wortman, 512 Hall Bldg., Kansas City, Mo.

## UNITED FANCIERS' POULTRY AND PET STOCK ASSOCIATION.

The fourth annual exhibition of the United Fanciers' Poultry and Pet Stock Association, held at Red Oak, Nov. 19-23, was one of the most successful shows ever held in southwest Iowa, notwithstanding the inclemency of the weather.

The class of stock shown was considerably above the average, and Judge L. P. Harris, of Palmyra, Neb., was very much surprised at the magnitude of the exhibition.

All classes were pretty well represented, the Wyandottes slightly taking the lead, followed by Plymouth Rocks, Black Langshans, Buff Cochins and Light Brahmas. The exhibit consisted of 710 fowls and 24 Belgian hares, for competition, and 93 fowls arriving too late for competition, making 827 in all.

Rain, snow and a cold north wind the first two days no doubt cost the show several exhibits.

There were many exhibits of poultry quite worthy of a place but on account of the warm competition received nothing. Among the most worthy I note the following: Wm. Dodd, Red Oak, breeder of C. I. Games; Ed Alden, Red Oak, Ia., breeder Barred Plymouth Rocks; John H. Bain, Red Oak, Light Brahmas; W. H. Evans, Red Oak, Light Brahmas; C. F. Weaver, Council Bluffs, Ia., Buff P. Rocks; Mrs. W. D. Lamb, Randolph, Ia., Barred P. Rocks and W. Wyandottes; Roberts Bros., Farragut, Ia., S. L. Wyandottes; J. S. Woodburn, Red Oak, Ia., Barred P. Rocks; R. C. Morford, Red Oak, Ia., S. L. Wyandottes and White Wyandottes; A. E. Slothower, Malvern, Ia., S. L. Wyandottes; Mrs. S. L. Porter, Malvern, Ia., Bronze turkeys.

The association was reorganized with the following officers: J. E. Thompson, president, Malvern; J. C. Swallow, vice president, Villisca, Ia.; J. M. Scott, secretary, Red Oak, Ia.; H. R. McLean, assistant secretary, Red Oak, Ia.; A. W. Harding, treasurer, Red Oak, Ia.; D. B. Butler, superintendent, Red Oak, Ia.

The fifth show will be held at Red Oak, Ia., the last week in November, 1901.

## AMERICAN WHITE WONDER CLUB.

The American White Wonder Club will hold its annual meeting in connection with the National Fanciers' show of Chicago, Jan. 21-26. A splendid list of specials amounting to about $75 have been placed and the outlook is favorable for a large display. Breeders of this variety who are not members of the club are requested to join. A. L. Merrill, Sec'y, Auburn, Maine.

Pekin Ducks and W. Wyandottes.
My Pekins have a show record unequalled by any breeder in the West. My Wyandottes are noted for their true Wyandotte shape, splendid combs, size and color, and have always
Won Their Share of the Premiums wherever shown.
Every bird is guaranteed. Your money back if I don't please you.
J. L. McCORKELL, Akron, Iowa.

ROUP CURE GUARANTEED, ROUP
CONKEY'S ROUP CURE is the only positively known remedy that will cure roup in all its forms as long as the fowl can see to drink. Simply put the cure in drinking water and the fowl takes its own medicine. For Canker, especially in pigeons, it excels all others. One 50 ct, package makes 25 gallons of medicine. Directions with every package. If it fails to cure, we refund the money. Postpaid, small size 50c; large size $1.00.
Conkey's Louse Killer never fails to kill. Try it; 25c per package and 15c extra for postage.
CONKEY'S POULTRY TONIC will keep your fowls in perfect health and make your hens lay eggs in winter. 25c per package and 15c extra for postage.

## THE TORRINGTON, CONN., POULTRY ASSOCIATION.

TORRINGTON, CONN., Dec. 5, 1900.

*Editor American Poultry Journal.*

DEAR SIR: There were about 700 birds entered in competition and the show was a grand success in every way. There were over forty exhibitors from outside of Torrington and more than twenty from this town. D. J. Lambert, of Apponaug, R. I., placed the ribbons, and gave universal satisfaction.

White and Barred Rocks were the strongest classes, the competition being warmest in the White alley, which contained some of the blue ribbon winners at Hagerstown and Danbury. The Barred variety was of superb quality, however, and the ribbons were well distributed. Buff Rocks and White and Buff Wyandottes were other strong classes, the fine color of the Buffs in both breeds being frequently remarked upon, while the Whites were a grand lot. Asiatics were not strong, except Black and White Langshans and Dark Brahmas, some crackerjacks, however, being shown in these classes. Mediterraneans were out in force, the competition being warm in several of the Leghorn varieties and Andalusians. Bantams were a decided feature of the show, the quality being high, particularly in the Sebrights and Games. The association is already planning for another and if possible an even better show next season.

Yours very truly,
C. E. YOUNG,
Secretary Torrington Poultry Assn.

## THE DAYTON, O., SHOW.

As the time draws near for the second annual exhibition of the Gem City Poultry Association, to be held at Dayton, O., January 9-14, 1901, the prospects for holding one of the best shows in the state are very bright. Every mail brings inquiries regarding our show, and breeders of prominence have promised to exhibit with us. Exhibitors who attended our last exhibition are fully aware of the fact that Dayton is one of the best cities in the country for disposing of birds at fancy prices. With a population of 90,000 inhabitants, will insure a large attendance, a thing that is looked after by every exhibitor. We guarantee fair and honest treatment. So prepare your best birds and exhibit at the big "Dayton Show" and be benefited thereby. Judge D. T. Heimlich, of Jacksonville, Ill., will place the awards. Our premium list is now ready for mailing. A copy will cheerfully be sent to all requesting same by addressing Theo. Faultstich, secretary, Dayton, Ohio.

## MINNESOTA STATE POULTRY SHOW.

The Minnesota State Poultry Association will hold their fifteenth annual show, commencing Wednesday, February 6, and continue until February 11, 1901. Good cash premiums are offered on single birds, pens and displays; also three elegant silver cups, and we expect two additional cups to be offered. Premiums were all paid in full and promptly at the last show, and the same will be done this year. More money was paid in premiums than received as entry fee at the last show, which can be said of but few shows. The judges are Sharp Butterfield, Geo. W. Holden and Jas. A. Tucker for the poultry, and R.

W. Wales as pigeon judge. Judges for Belgian hare and cat departments have not yet been selected. The fanciers of this association are very desirous of having some of the larger eastern exhibitors come to our show, and if they can take premiums away from our exhibitors it will certainly be a good advertisement for them, as our shows have always been among the few largest and quality of birds as good as the best. Come and let us show you what we have got. Premium list ready about December 20. Address H. F. Huelster, secretary, St. Paul, Minn.

## ANNUAL MEETING OF THE AMERICAN WHITE MINORCA CLUB.

Our annual meeting will be held in connection with the New York show at Madison Square Garden, January 23 to 26, 1901, as New York received the majority of votes. A handsome cup will be offered by the club to be competed for by members only. All breeders of White Minorcas wishing to contest for the club prizes may do so by joining the club at once. Members are urgently requested to attend the meeting, as this will insure a grand display of fine birds. If unable to attend in person be sure and send your birds.

WILLIAM SAPPER, Sec'y.
Erie, Pa.

## MEETING OF WESTERN WYANDOTTE CLUB.

The Western Wyandotte Club will hold its first meeting at Chicago, Jan. 23, 1901, at 8 p. m.

All members are earnestly requested to be present. The object of the meeting in the re-election of officers and discussions of important matters of business and to make plans to further advance the interests in this grand breed.

J. D. W. HALL, Sec.-Treas.

Lieut. C. A. Penny, Bary, Ill., president; W. A. Jenkins, Rock Falls, Ill., first vice president; Henry Steimeisch, St. Louis, second vice president.

## NATIONAL BRONZE TURKEY CLUB MEETING.

The National Bronze Turkey Club will hold its fourth annual meeting at Chicago on Wednesday, Jan. 23, 1901. The meeting will be held in the new Coliseum building, as at that time the big show of the National Fanciers' Association will be in progress there. At this show will be offered the regular $25.00 silver cup given by the club for the best male and two females of Bronze turkeys. The winning of this cup is considered the highest honor to be won on Bronze Turkeys in the west this year.

Competition open to club members only. Any one who wishes to compete for this cup and is not a member of the club may become one by sending $1.00 to the secretary at Otterbein, Ind.

As this is the regular meeting for the election of officers and the transaction of other important business a full attendance of members is desired.

W. A. MOON, Secretary.

AKRON, OHIO, Dec. 24, 1900.

*Editor American Poultry Journal.*

DEAR SIR: As the time approaches for the great Akron show the outlook continues to brighten until now we feel assured that, although our neighbor to the north of us is making great preparations for a comparison show to be held

**Bennett's Buff Rocks.**

**Are Still Winning.**

Mazon, Nov. 29th to Dec. 1, 1900—W. S. Russell, judge—1, 2d, cock, 92, 92, 1, 2, 3, 4 hens, 94, 92½, 92½, 92; 1, 2, 3 ckls, 94, 92¾, 91½; 1, 2, 4 pullets, 93½, 93, 93; 1, 2 pens, 187⅞, 185⅝. 40 ckls, and 40 pullets, same breeding as these, at $2 to $5 each. Send for free circular.

Burdick's "Nuggets," Pure. DR. O. P. BENNETT, Mazon, Grundy Co., Ill.

**Buff Wyandottes & Buff Leghorns.**

Score cards with every bird after Jan. 1st. Give me a chance to price you a first-class bird from as good blood as can be found. Stock as represented; your money back if not. No more Leghorns for sale. Can furnish eggs any time after Jan. 1st. Fifteen years in the fancy.

B. J. LUCAS,
1002 Robison st., Danville, Ill.

**Stay White, White Wyandottes.**

At the recent Elmira, N. Y. Show I won on my Wyandottes 1st cock, 1st and 2d hen, 1st and 2d cockerel, 1st and 2d pullet and silver cup for best display (by points) in American class. Some fine cocks and cockerels for sale. My entire stock of Black Langshans and Light Brahmas for sale at a bargain. Some grand birds in the lot. Also stock in Houdans and American Dominiques. Watch for my show record at the coming shows. For prices write

H. D. THOMPSON, Wheeler, N. Y.

**BARRED ROCKS, BUFF COCHINS.**

Winners in strongest competition. Space here is too limited to give a list of their winnings. Write me your wants and mention American Poultry Journal. My customers are winning with birds bought of me, and I still have a lot of early hatched birds from Chicago Boy (1st Barred Rock cockerel at Chicago last season) that are going to do some one a lot of good. You might as well have a few. You can buy them right. My Buff Cochins are acknowledged leaders.

WM. WEBB, Box 1920, Joliet, Ill.

**White Wyandottes Exclusively,**

And as good as it is possible to produce. My birds are absolutely in the front rank, as is proven by their records at the largest shows. Prices are right and satisfaction guaranteed. It will pay you to write me before placing your order. My last Chicago record was four prizes on six entries, and I have young stock for sale bred in line from these winners.

CHAS. H. DANFORTH, Batavia, Ill.

**S. C. B. Leghorns.**

A fine lot of healthy, vigorous, farm-raised cockerels for sale. Good, honest, breeding cockerels, $1 to $2 each. Only a few more females left.

G. W. NEWKIRK, Lebanon, Mo.

**Buff Wyandottes.**

Now is the time to buy your breeders for the coming season. I have a nice lot of them and can sell you a single bird or mate you up a pair, trio or breeding pen. Write your wants.

V. CRABTREE, Tiffin, Ohio.

WORLD BEATERS IN
**Barred, Buff and White Plymouth Rocks.**

Barred cockerels, scoring 90 to 95; Barred pullets scoring 88 to 93½; Buff ckls. scoring 88 to 95; Buff pullets scoring 90 to 94½; White ckls. scoring 90 to 95; White pullets scoring 90 to 95. The birds were scored by Thos. Rigg, of Iowa Falls, Iowa, a judge of national reputation. I have Fox Terrier Dogs for sale.

J. T. MOLLOY, Box 20, Laurel, Iowa.

**Closing Out Sale,**

**Barred Ply. Rocks and Light Brahmas.**

One cock, 4 hens or 4 pullets, $8.00; 1 cock, 4 hens, $7.00; 1 cockerel, 3 pullets, $5.00; 1 cockerel, 6 pullets, $10.00; 1 Light Brahma cock and 6 hens, $10.00. First come, first served.

In the future I will breed line-bred Buff Plymouth Rocks. Eggs for sale from prize winners. Won 3d on Buff cockerel at Chicago Show, 1900. Won at Yorkville, Ill., Nov. 26-30, 1900, 1st on cock, 1st, 2d and 3d on hen, 3d cockerel, 1st pullet and 1st pen. I also bought 2d and 3d pullet. Shellabarger judge. Will sell a few sittings of eggs at $2.50 per 15; $4.00 per 30.

W. H. ARUNDALE,
Rural Route No. 2, Newark, Ill.
Breeder of BUFF PLYMOUTH ROCKS.

## Tobin's White Leghorns,

Bred in line and exhibited for 22 years. I guarantee satisfaction and can send you the best at fair prices. Don't fail to write me. Correspondence promptly answered.

Wm. TOBIN, 301 West Morris st., Indianapolis, Ind.

AMERICAN PLYMOUTH ROCK CLUB. MEMBER.

## Everybody Expects a Little More

For the money these times, and they aren't disappointed when they buy their stock of us. We have Barred Rocks of true quality; also Buff Rocks at rock prices, and S. L. Wyandottes with the laced wing bar. When looking for stock remember me.

GEO. J. GLEASON,

Eighth Year of Successful Introduction.

For Sale by Sprague Com. Co., Darling & Co., wholesale dealers in Chicago.

## HECK'S

### WHITE PLYMOUTH ROCKS

*Am Getting Lots of Orders From Other People.*

*What Does it Take to Get Yours?*

I HAVE THE RECORDS. More prizes at more large shows than any other breeder in America. I CAN FURNISH YOU WITH WINNERS. This is proven by the winnings of myself and my customers. I KNOW A GOOD BIRD FROM A BAD ONE. Am competent to pick out just the kind of a bird you want. THE PRICE IS ALWAYS RIGHT. I will guarantee to furnish the highest quality at the lowest price.

***What More Do You Want?***

***What More Is It Possible to Get?***

It looks to me like an unprejudiced consideration of these facts ought to settle the matter in my favor. Let me send you a circular.

FRANK HECK, Box 12, New Albany, Ind.

Sec'y. and Treas. American White Plymouth Rock Club.

the same week as our own—and we wish her abundant success—the Akron show will in no wise be affected. There is a great diversity of opinion among fanciers as to which is the better, comparison or score card, and the poultry journals have been filled with apparently convincing arguments from champions of both methods of scoring. But we have come to the conclusion that what most of the fanciers in this "neck of the woods" desire is a score card from a reliable judge, and we have planned to furnish it, and to have it signed by one of the very best in the business, Mr. F. B. Zimmer. We also expect to coop our show free of charge, so that fanciers who may not have the regulation coops need not stay away on that account, and also in order that all birds may have the benefit of being shown in the same class of coops. Our superintendent, Mr. Julius Frank, will see to it that all birds are properly fed and watered, and our officers and members will exert themselves to make all our exhibitors feel at home and see that they have a good time. Just mark the date, Jan. 6-13, and drop us a postal for a premium list, which our secretary will be glad to mail as soon as it is issued, which we hope will be early in December.

Very truly yours,

THE AKRON POULTRY AND PET S. C.,
J. Asa Palmer, Cor. Sec.

---

The Racine Poultry, Pigeon and Pet Stock Association will give their second annual show at the Antorium, the largest building in Racine, Jan. 29 to Feb. 2, and will offer cash prizes and many valuable specials to exhibitors. Judge Shanes will judge poultry and Judge Tieman will judge pigeons. The officers of the Association are, President, P. E. Kimpel; vice president, A. F. Pahl; treasurer, William E. Brach; secretary, Charles R. Jorgensen. Any one wishing premium list can have one by writing Charles R. Jorgensen, Sec'y, 922 Forest St., Racine, Wis.

---

The Partridge Wyandotte Club will offer four special club ribbons at Chicago, to be awarded as follows, and to be competed for by members only: Ribbon for best shaped Partridge Wyandotte male; ribbon for best shaped Partridge Wyandotte female; ribbon for best colored Partridge Wyandotte male; ribbon for best colored Partridge Wyandotte female.

---

Minutes of the meeting of the Board of Directors of the American Black Minorca Club, held in Room 7, at 1267 Broadway, New York City, November 24, 1900, at 2:30 p. m.:

Present: C. J. Andrus, president; Rowland Story, secretary-treasurer; Mrs. Geo. E. Munroe (by proxy), H. W. Billard, T. F. McGrew.

The president in the chair.

Pursuant to a letter from Mr. Arthur Tretheway, dated July 10, 1900, this meeting was called. The following resolution was offered:

"Whereas, The judge in the Minorca classes at New York in 1898 has awarded the cup to Messrs. Santee & Cunningham, they having received the highest number of points, and the same judge having disqualified the only cockerel entered by Mr. Arthur Tretheway, this fact debarred him from competing for the trophy. For these reasons, be it

"Resolved, That it is the sense of this Board of Directors that the award of the

trophy made by the judge to Messrs. Santee & Cunningham shall be sustained." Carried unanimously. The vote for judge and the time for holding the annual meeting on Thursday, January 24, 1901, was also unanimously approved.

ROWLAND STORY,
Secretary.

The Illinois State Buff Plymouth Rock Club cup will be competed for at Chicago, to he given for hest display to consist of at least one cock, hen, cockerel, pullet and pen.

The Fanciers' Cluh, of Sharon, Pa., will hold its second annual show, January 17-19, 1901. It will he one of the largest and most complete exhihitions of poultry, pigcons and pet stock ever held in this section. F. B. Zimmer, of Gloversville, N. Y., has been secured as judge. The cluh will furnish coops for poultry, and Ashton's hall, where the show will be held, is the largest in the city. A large list of special premiums will he offered and the regular premiums will he distributed on the percentage plan and ribbons. Intending exhibitors should not fail to secure the premium list by dropping a card to J. E. Campbell, secretary, Sharon, Pa.

The Jewell County Poultry and Pet Stock Association held their first show at Burr Oak, Kan., on the 27th, 28th, 29th and 30th of Novemher, 1900, with a large variety of hirds and Belgian hares on exhihition. The B. P. Rocks were strongest in competition, followed by S. Wyandottes and R. C. B. Leghorns. The S. S. Hamhurgs were the attraction of many admirers. There was a W. C. B. Polish Pullet that scored 93 and an S. C. W. Leghorn that scored 93½. Judge C. H. Rhodes gave universal satisfaction, and cut the birds to where they belonged. He stated that there were very few disqualifications for the first show. The Belgian hare was well represented with some fine specimens. The people of the town were liberal with their finances and patronage and appeared to be well pleased with the outcome. The association was enahled to meet all liahilities and has money left in the treasury.

The Barton County Poultry and Pet Stock Association of Great Bend, Kans., will hold their third annual exhibition Jan. 23-26, 1901, with F. H. Shellabarger, judge. They will also have a Belgian hare exhibition with M. B. Slack, judge.

The Princeton, Ill., show, although much smaller than previous years, was excellent in quality in popular classes. There were nearly 500 entries. Barred Plymouth Rocks lead and White and Silver Wyandottes coming next and Black Langshans a close third.

The exhibition of the Terre Haute (Ind.) Fanciers' Association will be held January 27 to Februaary 2, inclusive. The date was definitely set upon receipt of a letter from George Ewald, the well-known poultry and pet stock judge, stating that he would be ahle to judge the show.

Mr. Ewald will judge the poultry, pigeon and pet stock departments, and the services of another expert will be secured to choose the winners in the dog department. A large exhihit of hunting and other breeds of dogs is promised.

**Johnson's Light Brahmas**

Won every prize at the St. Louis Fair, 1899, a record no other Light Brahma breeder has ever made. Winners for sale. 200 elegant birds for sale at prices that will move them.

**FRANK P. JOHNSON Box A, Howlands, Ind.**

**Harshman's White Rocks**

**are Up with the Best.**

I have a fine lot for sale and am sure to please, and can furnish early hatched ones that will make fine show birds. I guarantee all stock to be just as represented. Correspondence solicited. Mention A. P. J. Address,

**PAUL B. HARSHMAN, Box 117, Sullivan, Ill.**

**Kegley's Barred Rocks.**

JOURNAL readers desiring something extra choice in early hatched exhibition Barred Plymouth Rocks, should write **DR. A. E. KEGLEY, Cedar Rapids, Iowa,** president of the American Poultry Association, for prices, as he is prepared to furnish extra early hatched, well matured cockerels or pullets; also a few yearling cocks and hens that are strictly first-class. Judge Russell, who recently visited his yards, pronounced them one of the most even lots of Barred Plymouth Rocks he had visited this fall. At the great Cedar Rapids show, in a class of 243 birds, Mr. Kegley won the grand special of $25 for best ten; special for best five pullets and five best cockerels; special for best cock, cockerel, two hens and two pullets; also 1st cockerel, 92; 1st hen, 93; 1st pen, 184 7-16; 2d, 4th and 5th pullets, 92½, 92 and 92; 4th hen, 92¼. All scores given by Judge Lambert who is pronounced as one of the most critical Barred Plymouth Rock judges in America.

**Barred and White Plymouth Rocks, Buff Cochin Bantams.**

Winners at Chicago, Detriot, Toledo, Saginaw, Lansing, Columbia City, South Bend and many other leading shows. We have some grand young birds for sale. Prices right. Satisfaction guaranteed.

For Barred Ply. Rocks write, **H. G. LEEDY, Goshen, Ind.**

For White Rocks and Bantams write **J. A. BABCOCK & SON, Goshen, Ind.**

# ARE YOUR HENS LAYING? 200 EGGS A YEAR?

A little OVAMEAD in the food once a day will start them to laying in a very short time. One egg now is worth two in the spring. Thousands now use it, and it is from their yards fresh eggs are gathered the winter through. Enough for 10 fowls for 3 months, 50 cts. postpaid; trial size 25 cts postpaid.

**OVAMEAD MFG. CO., Box 44, Rochester, N. Y.**

Also for sale by Chas. C. Clark & Co., St. Louis, Mo., R. A. Pike, Minneapolis, Minn., Cyphers Incubator Co., Chicago, Ill., C. H. Rover & Son, Detroit, Mich., Longdale & Co., Racine, Wis., and others.

# *CHAMPIONS of the SOUTH!*

## *Honestly and Truly,*

We have the choicest and most noted exhibition and breeding stock in Dixie.

## Just Think of it!

At the great Arkansas State Show, one of the very largest and best ever held in the South, we entered 50 birds and 42 proved winners against the pick of a dozen States. Won 1st prizes in every variety we breed. For years we have been telling you the high quality of our stock, and surely the above most remarkable and unheard of record ought to be convincing.

***Yes, Still Giving Away Bargains.***

**1000** Grand, line-bred Exhibition and Breeding Stock to select from. **1000**

Barred Rocks, I. Games, S. Wyandottes, Lt. Brahmas, Buff Cochins, Pit Games, Pekin Ducks, Wild and Bronze Turkeys. A trial is all we ask. So for your own sake, try us, for we will please or it costs you nothing.

## Sweet Sixteen...

The Reliable Incubators and Brooders are just "Sweet Sixteen," with a record of sixteen years of practical, successful work behind them.

The Reliable has hatched more chicks and given better satisfaction to more people than any other incubator made.

**It's a way the Reliable has.**

## The Chick's Mamma...

We don't know how much credit belongs to the hen who lays the egg, or to the girl who feeds the chicks, but

We do know that thousands and thousands of successful poultry raisers credit the Reliable Incubators with "the best hatches we ever heard of."

**It's a way the Reliable has.**

# Reliable Incubators
## AND BROODERS

are the kind that never disappoint. Why run any risk with untried machines when you can get one (for the same money) which you **know** will work. There is no guess work about the Reliable. It is always sure? **It's a way the Reliable has.** Its perfect construction and common sense plan of operation are fully explained in our elaborate

### Second Edition, 20th Century Poultry Book.

It discusses every phase of the poultry question, containing chapters on Poultry Raising on the Farm, Feeding for Eggs, Raising Broilers, Capons for Profit, Pekin Duck Industry, etc. It will be sent free on receipt of 10c to pay postage.

**Our Poultry Yards.**—We give our personal attention to breeding extra fine fowls of the Standard Varieties, Eggs and Prize Winning Birds in season. Described in our 20th Century Poultry Book. Address

**RELIABLE INCUBATOR & BROODER CO., Box A-1, Quincy, Ills.**

## Welles' Invincible Strain of

# Barred Plymouth Rocks

That have been bred for years in line of the New York winners. Never fail to win in the strongest competition. I do not advertise on birds of my breeding that win in the hands of my customers, but on my own honors.

RECORD AT

## Madison Sq. Garden, N. Y., '99:

**1st and 2d HENS, 1st and 2d COCKS, 1st, 2d, and 3d PULLETS, 2d, 3d, 4th and 5th COCKERELS, 1st, 2d and 4th BREEDING PENS**

**and ALL SPECIALS, including the**

**PRESIDENT'S CUP,** VALUE $100, FOR BEST Cock, Hen, Cockerel and Pullet. **Also the**

**Silver Challenge Trophy Cup, Value $100,**

for best cock, hen, cockerel, pullet and yard, and **Gold Special for best bird shown in '99**

This (to say nothing of my past winning at New York) is a record which has never been equalled or approached by any breeder, and stands good to-day. A grand lot of choice breeders for sale. Circulars free.

# "Profitable Poultry Keeping In All its Branches"

This is the title of the new and elegant catalogue issued by The Cyphers Incubator Co. for 1901. It contains 224 pages, 8 x 11 inches in size, over 200 fine new half-tone illustrations and a wealth of interesting, down to date matter, covering the subject of **Poultry for Profit** in all its branches.

## THIS IS A BRAND NEW BOOK,

### Not a Re-hash of Old Ones.

It contains special articles written by experts, and illustrates and describes over fifty of America's largest and most successful duck, broiler, roaster and egg farms. It also contains the endorsements of over one hundred of the foremost breeders of this country—men and women who are using the Cyphers Incubators—and shows **Photographic Views** of many of their poultry plants and **Favorite Poultry Houses.**

## This Book Weighs a Pound and a Quarter.

The cost to mail it is exactly 10 cents. **The book itself is free to you,** provided you will pay the postage. We count this book worth $2.00 or $3.00 of any person's money who is really interested in making money out of poultry. We have crowded into it every item of value possible to make it worth several dollars to you.

Of course it contains (additional to all of the above) a fully illustrated description and explanation of the Cyphers Latest Improved, Non-moisture, Self-ventilating, Self-regulating Incubators, and Cyphers Double and Triple Apartment Safety Brooders; also the full line of poultry appliances we manufacture.

**Write for a Copy To-day,** enclosing 10c in stamps. Ask for Book 5. Address nearest office.

## You Can't Raise Prize Winners

Unless you have the blood. My birds have it. Never fail to win in hottest competition. **WHITE WYANDOTTE** pen No. 1, headed by large, magnificent, snowy white cock, that won first prize as cockerel at Chicago in '99, scoring 95 by Russell, and pronounced by expert judges to be the best Wyandotte they ever saw. Mated with females scoring 94½ to 96. Eggs from this pen $5 per 15. Eggs from pen 2, $2.50; pen 3, $2. My **WHITE PLYMOUTH ROCKS** and **SINGLE-COMB WHITE LEGHORNS** are also first prize winners, scoring 93½ to 96 by Bridge, McClave, Keller and Kohll. Eggs from these pens $1.50 to $3. All my breeders are heavy layers. You get what you buy. Send for circular; it's free. Reference on application.

**C. E. DETTER, Van Wert, Ohio.**

**Learn to Grow Flowers and Let Their Fragrance Bless Your Home.**

**Home and Flowers** is devoted to the world beautiful. Its colnmns tell you how to grow flowers, Nature's sweetest gift to man. This splendid magazine is the only publication of the kind. It gives the fullest information in regard to home floriculture in all its phases—tells you exactly what to do, when to do it and how to do it in order to make flowers grow and bloom. Every article published is the record of the actual experience of some one who grows flowers successfully. By reading it you learn that which it would take you years to acquire through your own experiments. The best varieties, the time to plant, how to plant, the best fertilizers, the amount of water and heat needed, how and when to prune, and similar topics are fully treated. Especial attention is paid to the proper planting of lawns and home grounds, and to the arrangement of flowers. **Home and Flowers** is the recognized organ and exponent of the movement for town, village and neighborhood improvement, and its pages contain much valuable information about the wide-spread development of civic beauty.

**A Rose Plant Given Away with Every Trial Subscription.**

We aim to help make the world better through the fragrance of flowers, and desire our friends not only to read about flowers, but to grow them. The rose is acknowledged "Queen of Flowers," and largely this is true because of its easy culture. Every person who sends us ten cents for a three-months' trial subscription for **Home and Flowers** will be given free a choice rose plant. This rose will be of a variety especially adapted to your climate, and could not be bought for less than ten cents—many florists charge twenty-five cents for such plants. When requested, the rose will be held for shipment until May 1. Unless definite request to hold it until that date has been made, the plant will be shipped at once. Postage prepaid.

***Your Own Magazine and Plant Free—Get Your Neighbors to Join You.***

Get five of your friends to accept the above offer, send us their names and addresses, accompanied by fifty cents, and we will send you **Home and Flowers** and the rose plant free of all cost. Remember, our magazine three months on trial for ten cents, and a choice rose plant free to every subscriber. Address

"Dewey's are Right."

# PLYMOUTH ROCKS,

**Barred and Buff.**

*Victory Again.*

**Poultry Supplies, Star Incubators**

At the big Battle Creek Show in a class of 117 Barred Rocks, I won 2d cock (losing 1st by weight; the bird is now to Staudard weight), 2d, 3d and 4th cockerel. At Lansing, Mich., Dec., 1900, in a class of 92 Barred Rocks, I won 1st cockerel, 2d cock. Three years in succession I have won 1st pullet at Michigan State Show, and two years won 1st hen in Barred Rocks. My Buffs won at Michigan and Ohio State Fairs, '99; Jackson, Mich., Dec., '99. Special bargains in Barred Rock cockerels, 100 to select from. Satisfaction or your money Back.

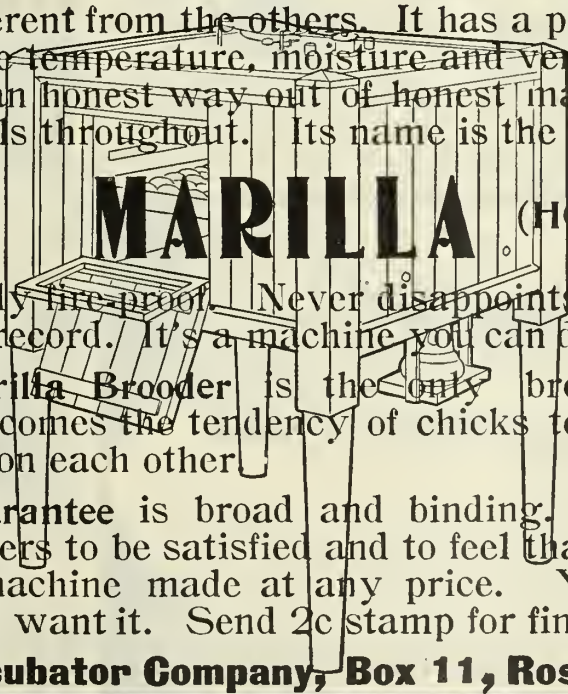
**M. BLISS DEWEY,**

**Concord, Mich.**

# There is One Incubator

that is different from the others. It has a positive regulation of the temperature, moisture and ventilation. It is built in an honest way out of honest material, with double walls throughout. Its name is the

(HOT AIR) **MARILLA** (HOT WATER)



Absolutely fire-proof. Never disappoints. 12 years successful record. It's a machine you can depend upon.

The **Marilla Brooder** is the only brooder made which overcomes the tendency of chicks to crowd and trample upon each other.

**Our Guarantee** is broad and binding. We want our customers to be satisfied and to feel that they have the best machine made at any price. Your money back if you want it. Send 2c stamp for fine catalogue.

**Marilla Incubator Company, Box 11, Rose Hill, N. Y.**

**COCKERELS. PULLETS.** Black Langshan, Barred Rock and Silver Wyandotte. High class stock at prices that are right. A few Belgian Hares for sale.

## Always Win Lions Share of Prizes.

First Prize Pullet, Cleveland, O., Show, December, scored 94½ by L. G. Jarvis, Guelph, Canada.

If you do not believe it **SEND AND GET HIS CATALOGUE** and it will tell you who scored his birds. He stands in front, with highest scores by leading judges. I. K. Felch gave one of his cockerels score of 95 points, and wrote across score card, every doubt given against this noble big fellow; weight, 11 lbs. H. A. Bridge gave one of his birds score 95 points. B. N. Pierce cut one of his cockerels one-half in color. L. G. Jarvis, Guelph, Canada, scored 4 birds 94½. J. Y. Bicknell scored cockerel 94½. Charles McClave, 93½ scores of birds. I have exhibited 30 times in past 8 years and won 29 times on cockerel, and tie the other one score. Sharp Butterfield scored 3 cockerels in one show 93½. Send for my catalogue and see my winnings and scores, and who scored them, and you will say he leads the procession in winnings.

## Never Lost on Breeding Pen

in any score-card show, nor any pullet where they were weighed and weighed correctly. Eggs $3 per sitting. Only lost once on first cock. I won all prizes at Springfield, O., Aug. 21-24, 1900, all prizes offered. My strain won all prizes at Urbana, O., Aug. 14-17, 1900, this season making 30 times I have exhibited in 8 years. No breeder ever made such record.

## Ten Times I Have Won Every Money Prize Offered. Eggs $3 per sitting.

500 cockerels—choice ones—for sale, and pullets in any number. I have a grand lot of show birds for winter shows. They never fail to win for me, and they will win for my customers. Residence, 363 South Fountain ave. Farm one-half mile from city. 265 acres.

***GEO. M. LEFFEL, Springfield, Ohio.***

# TWO RECORD BREAKERS

## At Elgin, Ill., Show, Dec. 24-28, 1900.

## Raised in the Natural Hen Brooder.

If you want to win in the show room hatch them **early** and **raise them** in the **NATURAL HEN BROODER.** Birds must be matured up to weight to win. Last month at Elgin Show, with B. N. Pierce judge, and with 1,300 fowls in the show, from the East and the West, and from 50 to 115 in a class, of all varieties, I won on Black Langshan pullets—1st, 96½, cut one-half on color; 2d, 95½, not cut on color; 3d, 94½, cut one-half on color **SPECIAL** for the highest scoring pullet in the show, and I claim 1st prize pullet is the highest-scoring pullet in the **United States,** and 2d prize pullet, not cut for color, is a record breaker. The Judge looked this bird over twice and could not find **purple** or any other defect on color. Other prizes won, on only five Langshans shown and four prizes won, and on pen.

## These Fowls Were Raised in a Natural Hen Brooder.

This brooder is the nearest known imitation of **Nature's natural heat,** not a **hot, dry heat.**

## 50 Scored Cockerels and Pullets For Sale.

A score card goes with every bird. 89 to 94½ points $3 to $5 each. White and Barred Plymouth Rocks, and Black Langshans. 30 Buff Wyandottes, cockerels 89 to 91½ points, go at $5 to $8 each. Best known strain—Mrs. Denison's.

**75 BELGIAN HARES,** 5 months to 1 year old, 4 to 9 pounds each, ready to breed, $50.00 for the lot. Send 10 cents for catalogue, half-tone cuts, etc., of poultry, ducks, etc. A fortune catalogue.

# If You Knew

***That You Would Get Just What You Wanted Would You***

# Send Me Your Order?

I make a specialty of pleasing people who have failed to get satisfaction elsewhere. I have the kind of stock and eggs that are bound to please, and I therefore guarantee to give absolute satisfaction. My varieties are Barred and White Plymouth Rocks, White Wyandottes and Houdans. They have a long string of victories to their credit in the show room—both in my hands and in the hands of my customers. Eggs from choicest matings now for sale at prices which will justify you in placing yonr order with me.

***A. J. BARGAHISER,***
***Rockford, Ohio.***

# A Good Time

To buy breeding stock for this coming season is now. We have a very choice lot of Barred Plymouth Rocks, Light Brahmas and Buff Cochins to offer, and can furnish you something good at reasonable prices if you will write me and say just how many and the variety. Do not forget this as it is very important; also describe what you want, as in this way I can better tell how to please you, which I am always very anxious to do. Twenty years of experience should be worth something if you wish to buy stock that is bred right. Our 19th annual circular is free.

***F. H. SHELLABARGER, West Liberty, Iowa.***

# Get Them From Brown.

Drop me a few lines about that order you intend to place for stock or eggs. You, of course, want the best to be had for the money, and furnishing this is one of my strong points. You get your money's worth or your money back, and that means just what it says.

## White Wyandottes, White Plymouth Rocks.

Birds bred in line from the best stock the country produces. Winners at Cleveland, O., 1901. The most coveted prize in the White Wyandotte class (1st pen) was won by my birds. White Rock and Light Brahma winners also. **Have some fine breeding birds for sale and can furnish a limited number of eggs which will produce WINNERS.** Am closing out my Light Brahmas, including winners at Cleveland. Also some elegant Barred Rocks from stock direct from E. B. Thompson. It will be to your interest to write me.

***GEO. G. BROWN,***

# March's Barred Rocks

## . . . Made a Clean Sweep

At the Hoosier Poultry and Kennel Show, Logansport, Ind., Dec. 5 to 12, 1900, winning 1st, 2d and 3d cockerel, 1st, 2d, 3d and 4th pullet, 1st and 2d breeding pen and three specials for best cockerel, pullet and pen. Fifty pullets that score 90 to 91 for sale as breeders, for $2 to $3 each. Judge Greer's score card with each bird. Satisfaction guaranteed. Write your wants. Eggs in season, $2 50 per 15.

**W. P. MARCH, Winamac, Ind.**

# 300 Barred Ply. Rocks and 60 M. B. Turkeys

That are strictly first class. My B. R. have been bred in line 17 years. They are grand in shape and up in weight; surface color good, under color better and barred to the skin. I won 1st, 2d and 3d on pullets and had 1st pen at Burlington, Wis., in Jan., 1900, A. B. Shauer judge. My turkeys are mousters and have got the beautiful bronze that is so much looked for. Just stop and think, "It maybe that man is honest, and it might be possible that he has got good stock." Write him and see.

At a reduced price until all gone. 3 Silver ckls. at $2 each; 10 pullets at $2 each; 12 White ckls. at $2 and $3 each; 15 Golden ckls. $2, $3 and $5 each. Eggs in season at $1.50 per 15.

**BROWNING POULTRY YARDS, Portland, Mich.**

"No Cochins Like Hanchett's."

## Buff Cochins--Winners!

That superb shape—beautiful color and massive feathering prove invincible. At the great Detroit Show, Jan. 1901, tied for 1st ckl; also won 4th ckl., 2d pen, 3d cock, 4th hen. At the big Battle Creek show I won more 1st, 2d and 3d prizes than all competitors combined. Elegant ckls. to head your breeding yards. Booklet free.

**H. N. HANCHETT, Box A, Jackson, Mich.**

# ..FACTS..

Prove that Hall owns and breeds the best White Wyandottes in the West. His show record at the last Iowa State Show stands unequalled in the annals of the Association. At Williamsburg, Ia., Dec. 26-29, 1900, he won 1st and 4th cocks, 1st and 5th cockerels, 1st, 2d and 3d pullets, 1st, 2d, 4th and 5th hens, 1st and 2d pens; also 13 specials, including a grand Loving Cup for American class At Iowa State Fair, 1st cock, 2d cockerel, 1st pen, At Cedar Rapids, 1900, 1st, 2d, and 4th pullets, 3d cockerel, 2d cock, 1st pen and numerous specials—grand sweepstakes for American class, also for best 10 Wyandottes. At Quincy State Show, 1900, 1st, 3d and 4th pullets, 1st cockerel and 1st pen.

Facts? Sure! A few GOOD breeders for sale, also 50 promising cockerels. We are sacrificing 50 B. P. Rock hens, 200 pullets, 50 cockerels and a few grand cocks; 150 head of W. P. Rock cocks, hens, cockerels and pullets. Single birds $1 up; pens $3 up, scoring 90 to 95½ by Russell and Shellaharger. We ship on approval and guarantee satisfaction. We are booking egg orders from our fine exhibition White Wyandotte pens, $3 per 13; $5 per 26.

# Specialties for Poultry Raisers

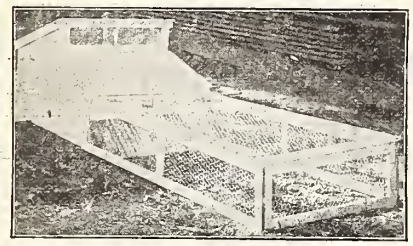
## 20th Century

### *Portable Hen Houses, Roosting Coops, Brood Coops, Outdoor Brooders,*

These articles are designed for the practical poultry raiser who wants to get the best results with the least fuss and bother. They are practical

**VERMIN PROOF,**

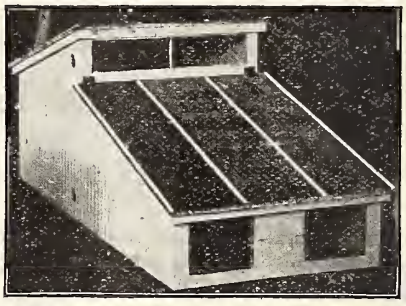
being built so that they leave no places in which vermin can be harbored, and are easily kept clean. By the removal of a few screws they can be taken entirely apart and thoroughly scalded. They are pre-eminently the thing for cleanliness and health.



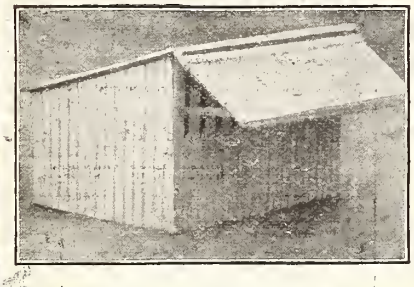
20th Century Brooder No. 1.

Brooder No. 1 is 3x4 feet, with two compartments with different temperatures. It is fireproof, being painted with two coats of asbestos paint. Easily cleaned and ventilated, and with it a perfect system of heating will raise a larger percentage of healthy chickens than any other brooder made.

Brooder No. 2 is 3x6 feet, has three temperatures and allows the chickens to be on the ground and still be in the brooder. Apartments and hover separated by a heavy felt curtain that is slashed so as to allow the chicks to pass in and out. Hover apartments lighted by separate windows.



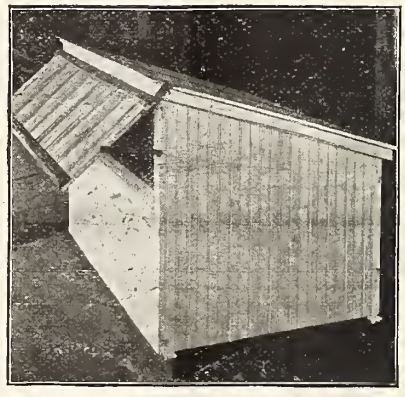
Brooder No. 2.



20th Century Brood Coop.

The 20th Century Brood Coops will accommodate old Mrs. Biddy during the entire period of incubation and of brooding, keeping her separate so other hens cannot molest her and protecting her from cats and vermin. It is easily kept clean and free from lice and mites. In one of these coops you can wean the chicks from three to four weeks sooner than the hen would naturally do. You can raise the coop from the floor to sweep it off, or take it entirely apart for scalding, in a few moments. Size 2x3 feet.

The 20th Century Roosting Coop, for youngsters too large for the brooder. It is provided with an awning or hood by which you can regulate the sun in the coops and protect the fowls at night. Absolutely no place about it to harbor insects.



Roosting Coop.

## 20th Century Portable Hen House.

20th Century Portable Hen House—Just the thing for the small fancier or the man who does not want to put a permanent house on another man's land. Neatly finished and durably built. Easily taken down and put up. It houses from 12 to 15 birds. Built on the "scratching shed" plan. Size, 5x10 feet and 6 feet high.

This line of brooders, brood coops, roosting coops and hen houses, is the outcome of years of experience. They meet every requirement of the poultryman. Fully guaranteed. Send stamps for photographs, prices and full particulars.

**EGGS** FROM PRIZE MATINGS.
1 Sitting, $5. 3 Sittings, $10.
2 Sittings, $8. 5 Sittings, $15.
Per 100, $20.00.

Have won more Prizes at the Leading Shows of America and England than all others. My matings for 1900 are the best I ever owned.

At the Great National Show, WASHINGTON, D.C., in hot competition with over 300 birds of these varieties, the best that could be found regardless of price, I won 45 Regular and Special Prizes on 39 Entries, including First Prize on Breeding-Pen in each variety, Special for Best Display in the American Class, Special for Best Exhibit of Plymouth Rocks, Sweepstakes Special for Best Cockerel in the show (Bantams excluded), and this on my First Prize Barred P. Rock Cockerel. My winning White Wyandotte cock was pronounced by the judges to be the best they had ever seen. I won twice as many first prizes as all other exhibitors of these varieties. My BUFF ROCKS, at BOSTON, 1899, in hot competition, won more first and special prizes than all others. My customers are winning all over the country. If you want the BEST, write me. Hundreds of Choice Exhibition and Breeding Birds at honest prices. Catalogue of America's finest Plymouth Rocks and Wyandottes free.

# The Leghorn Family.

A General Description of One of the Most Widely Known and Generally Admired Breeds of Fowls—The Bird that is Probably the Type of Chicken in the Minds of the Non-Professional—Comments Regarding the Usefulness and Beauty of this Group—By Morgan Bates.

LEGHORNS are birds with decided characteristics. They have the outward beauties of feathered pets and the inward qualities of a strictly business institution. They look the party of show birds and they act like the manager of a money-making concern. There is no tendency to idleness in a truly good Leghorn. They are known as the poultryman's friend and the showman's delight. They are the typical combination fowl. If you were to ask a novice to draw a picture of a "rooster," the chances are ten to one that he would make something—it might not be much of a picture—that looks like a Leghorn. That is because the salient features of a Leghorn cock are the comb, the tail and the proud carriage of body.

A Leghorn isn't so very big, but he is full of virility. A Leghorn hen is so completely filled with embryo eggs that she has to lay them in order to feel at all comfortable.

The American Standard of Perfection puts the Mediterranean class third in the order of importance; and the Leghorns about monopolize the class. There are the Ancona, the Minorca, the Andalusian and the Spanish; but the Leghorn lead the list with seven varieties. The Brown and the White differ in comb—single or rose; and then come the Black, Buff and Silver Duckwing.

There are fanciers who claim some point of superiority for each of these variations, but the most numerous faction holds steadily to the Brown and the White. It is chiefly a matter of taste in plumage after we decide on the comb. If a rose-comb is preferred, on account of cold climate (although some breeders laugh at this idea) then there remains only the question of taste in color. If you like a white bird, that settles it; but if you like to experiment in pigments the Brown Leghorn will give you all the diversion you require.

The bird comes honestly by his pride of manner and gorgeousness of dress. He owns Leghorn as his place of nativity; and as every one knows this is the seaport most sought after by the pompous Florentine and the dignified Roman. The bird took his fashions long before Lorenzo the Magnificent wore a jeweled robe, and even before the Cæsars tramped over the land, eating chicken and dragging captives at their chariot wheels. Probably the uplifted attitude of the bird comes from his gazing westward over the Mediterranean, watching for the ship he knew must some day come to carry him over to America and enroll him in the Standard of Perfection.

With all due respect to the queen's excellent English, we say he is "a bird." Take the adjustment of his parts, if you doubt this, and see how the Standard declares he shall appear.

His head, a reddish bay, is short but deep, with a value of only four out of 100; his horn-colored beak must have just a little curve and his face mustn't have any wrinkles. The eyes, like the face, must be bright red.

But his comb must rise in a firm and even mass, without the least sign of twists or side-sprigs, upright and straight. It must be able to carry its weight up and back, with five deep indentations and five fine points, ending in a nearly straight line to the rear point, and then sweeping in large, graceful curve, under to the base of the crown. The comb must be bright red.

Thin, pendulous, rounded red wattles must hang at the throat.

The ear-lobes are a distinctive feature. Close to the head, they are egg-shaped in outline, but flat and free from wrinkles; a white or creamy white.

The arched neck is covered with a mass of hackle-feathers, flowing in abundance well down over the shoulders. The main color is a brilliant red, but each hackle has a distinct black stripe down the center, tapering to a point near the end. There must be no mingling of red and black.

The breast is a glossy black, which brings out the red of the neck in striking contrast. In shape, it is protruding, rounded in outline, carried forward like a soldier's.

There is only a medium back in a male Leghorn, and the saddle comes up in a short concave sweep to the root of the tail. The saddle-feathers are sweeping and long, striped like the hackle; while the back color is a very brilliant and rich red.

The body, thighs and fluff are black. The undercolor is either black or dark slate. The shanks are a bright yellow, but the toes are usually a dusky yellow.

The wings show a variety of colorings in black and red. The bows, tucked under the black breast feathers in front, are bright red, the front edge black. The primaries are mainly black, but the lower web has an edge of brown. The black secondaries, with a wide brown edging on the lower web, give a wing-bay of brown; while the coverts are greenish black, making a wing-bar across the folded wing. The general aspect of the wing is that of a snugly tucked section, both the upper and lower ends being well covered by breast, hackle and saddle.

The tail is black in the under main feathers, with long sickles and coverts of greenish gloss. The carriage of the tail is not upright, but well up, at about an angle of 45 degrees. The group of coverts must be abundant.

The female is about as unlike the male as can well be imagined. She is longer in the back, and her full comb lops modestly. Her neck feathers are a rich orange, with a broad black stripe down the center, coming to a point; but they are broader and shorter than the males; and end in trim points on the shoulder.

The ear-lobe is small and laid on almost horizontal. The wattles and comb, red in color, are pronounced in size, but moderate when compared with the males.

The back plumage, a light brown, is finely penciled with a darker shade of brown, but the light is most in evidence. The shafting is not in sight. The under part of these feathers is a brown, shading into slate on the fluffy portion.

A rich salmon on the breast brightens the effect, particularly as it shades into lighter as it runs under the body.

The general tone of body color may be termed light brown and the fluff an ashy brown.

There is a slate-brown on the primaries with a lighter penciling on the outer

edges. The secondaries are brown, with an edge-penciling in lighter shade. The wing-covers correspond to the back in color effect.

The tail, like the undertail in the male, is carried at an angle of 45 degrees. The color is dull black, excepting the two highest main feathers. These have a penciled marking, in light brown. The thighs are ashy brown.

In respect to color of eyes, face, comb, lobes and shanks, the two sexes are alike.

The hen is modest, nervous and active. She belongs to the non-sitting breeds, but is sometimes found in a maternal mood. We once had a beautiful little Leghorn hen which was very charming in her gentle friendliness. She seemed to enjoy being made a pet, quite unlike most of her breed. One day she disappeared and no trace of her could be found. But a week or so later she bobbed up serenely and opened her wings, gave a saucy word or two, picked a little food, and vanished. We hunted for that little creature day after day. She was too smart to be caught. Finally down she came from the hay mow and invited us to see a few things worth seeing. Some one climbed up after her, and there, down a tunnel, under the hay—which she had very kindly uncovered, now that she knew the hunt was abandoned—we found a nestful of the prettiest little youngsters that ever tried to relish breakfast food. There was an even dozen of them, and the little mother remarked that she expected to do better next time.

Now, we believe she was a Leghorn right from Leghornville, but probably some of you critical fanciers will say she wasn't pure-bred May he not; but if your record, gentle critic, is as clear in every respect as that little hen's, you needn't have any fear concerning your final entry on the eternal register. Why, she was as near to being a thoroughbred as any hen on earth could be—and yet she had the true maternal spirit. Is that a blemish or a virtue?

But, speaking of thoroughbreds, the Leghorn is decidedly a fancier's fowl. It has reached so near the line of perfection that the American Poultry Association must either handicap it with some new quirk or it will stand soon on that magical 100 and crow itself into glory.

# Here's to the Single Comb Brown Leghorn.

By C. A. Damon, 2470 Monroe st., Chicago, Ill.

SO many writers have told us that the Brown, like the White Leghorns are natives of Italy and that their name is derived from Leghorn, an Italian seaport in the Mediterranean that it has almost become an accepted fact.

This statement is probably correct so far as the Whites are concerned, but some of our best authorities claim the Browns as an American production, some stating that they are a cross between a game and a White Leghorn, and others hold different opinions.

As the writer's name did not appear in the family Bible at the time these events are supposed to have taken place, I am not prepared to take sides and have only mentioned these facts to show that possibly some of the white feathers that crop out occasionally in some strains may be traced back to the original cross.

This is not intended to cover the white caused by improper care or feed and in some cases injured feather cells.

I started as a breeder of Barred Plymouth Rocks exclusively, but was persuaded by one enthusiastic breeder to add the "Little Brownies" and I can truthfully say that I have never regretted taking the step.

They are at once the most active, greatest laying, nattiest appearing and most beautifully feathered fowls bred to-day.

Those were my reasons for taking them on. A rose comb on a Brown Leghorn strikes me as being about as tasty a combination as a dress suit and a "Scotch" cap.

I don't wish to say one word against any breed or breeds, but it is my opinion that the claims made by rose comb breeders that they are frost proof are not well founded.

It has been my experience that when a Leghorn was exposed to the cold the first thing to freeze was the wattles. Of course this does not apply to the females.

A great many breeders seem to think that the standard calls for a comb as large as your hand on a male and enough comb on the female to make them look very much like a boy with the toothache with his head wrapped in flannel.

This is all a mistake and not only goes against the fowl in the show room but increases the danger from freezing. With proper protection there is no need of having your fowls freeze in the very coldest weather.

My Leghorn house is made as follows: For ends and sides matched boards nailed on both sides of 2x4 uprights, which gives an air space of four inches. These boards are covered on the outside with paper. Roof made of matched boards, one thickness, covered with paper and then shingled. I have a floor in my houses because it is so much easier to keep clean and is therefore healthier.

Each pen is provided with two fair sized windows near the floor on the front or south side and one small one near the roof which makes it comfortable summer nights and provides sufficient light for the extra cockerel coops that are built on the back side, the floors of same being about thirty inches below the roof of house. Two feet below the floor of these coops are the removable roosts and six inches lower the dropping boards which are also removable. During severe weather we hang curtains from the floor of these cockerel coops that reach down to the dropping boards and makes a snug little place about thirty by thirty inches and eight feet long in which the fowls roost.

My yards are made of 30 inch wire over a 30 inch base board to keep fowls from fighting or watching over another which is bound to make them nervous and will surely show in lack of future eggs.

These runs are entirely covered with wire which is the only sure way to prevent "mixing the breed."

Each of these yards have a door leading out to a free range of five acres and each flock is allowed two hours' run.

Let me say right here that it is a mistake to think that Leghorns need more room than larger breeds. It is just the reverse. A Leghorn will get more exercise in a dry goods box than some breeds can on a quarter section.

They will cover all the ground allotted to them and a little more but when confined they don't seem to get down-hearted and mope around all day but are scratching, digging and rooting around from morning until night and how they will turn out the eggs and furthermore how those eggs will hatch, and inside of six months or before you can hardly realize it the second generation is up to the very same trick.

There is no waiting four or five years for the orchard to grow while your cash keeps getting into circulation. They bear fruit the first season when hatched early.

As the publisher of this journal has seen fit to ask me to contribute my "mite," feeling, I suppose, that my long list of winnings on this variety in the strongest competition would indicate that I have acquired the knack of breeding these beautiful birds up to the highest state of perfection I will tell how I mate for best results.

Supposing of course that you are striving to reach the top notch as a breeder or fancier, my first question would be, Are you going into this as a business or only to have a few for your own amusement?

This may strike you as being a strange question, but it is not. Let me explain. The new standard requires what is almost impossible; that is, to get males and females of the highest quality from a single mating.

Therefore if you are going to have but one pen I would suggest that you breed for pullets. If more than one breed part for pullets and part cockerels.

This is what is called the double mating system. You will discover before you get through that the standard of perfection is not on the order of a "Ready Reckoner" or "Cooking Made Easy" but "Poultry breeding made hard" and about the time you think things are coming your way they hold a meeting and decide to "raise the standard." Then after thinking it over for a while you start in under the new conditions.

Under these circumstances I claim it is foolishness for breeders of certain varieties to say: "Stick to it long enough and you can get show birds of both sexes from the same mating."

Before you "see light" a change will be made that will throw you out of the running and your work has all gone for naught.

Better adopt a system that is up to date, is practiced by the most successful breeders and will bring the desired results at once. Such is the double mating.

The standard calls for a "brilliant red" hackle in male and "orange yellow" in females. I should like to have some single mating advocate tell me how you

PAIR IDEAL SINGLE COMB BROWN LEGHORNS By Sewell,

can mate an exhibition male with such a hackle, nicely striped from head to tail and with a good wing bow to a soft brown female with yellow hackle and not have 50 percent of the offsprings unfit for breeding purposes.

I claim the result will be a lot of cockerels, showing defects as follows: Lemon hackle, poor striping, red on breast and too little red in wing. On the other hand quite a percentage of the females from such a mating would show up with hackles too dark, backs very shafty, breasts entirely brown or smoky and bricky wings. This, of course, only covers part of the color defects and you will find others in the shape section. Of what account are all of these defective birds to the single mating breeder? He can't use them and the defects are such that others can't.

While I don't claim that the double mating system is a "cure all" it certainly brings out more specimens of the very highest class and the number of unusable ones is reduced to the minimum. Let us mate up a pen for cockerels. We will take the finest show bird we can get—this means, of course, that he is very strong in all sections.

To get the best results use a cock bird and his offsprings.

If from an extreme mating they will be rather dark throughout, hackles will border on the reddish, breasts may not show perfectly clear but they will produce cockerels of the highest type and that's what you want. The females from this mating will be just what you require to make the same mating the following year.

Our present pen must be composed of females of the finest show quality, light in color and showing as little shafting as possible.

Bricky color in wing and anything but nice clear breasts must be avoided. Mate with these their own sire or at least a bird with light lemon hackle, well striped, no stripe in back and if breast should show a little red it will do no harm.

You may expect from this mating a large percentage of pullets of the highest quality and males suitable to go into a pen mated for the same purpose the following year. I suppose you see now why I advise the small fancies to breed for pullets. His flock will always look uniform and when he wants to introduce new blood he is not obliged to buy a show bird as a male such as he requires can be bought very reasonable. I don't suppose my single mating friends will fall in with my ideas very readily but it gives me a great deal of satisfaction to note that not all of them are living up to the "faith."

Putting both dark and light females in the same pen and various tricks of this sort to evade the "law" are resorted to but prove quite expensive experiments as the results are far from being satisfactory, and you will generally find the experimenters hunting around for some good birds about show time.

# The S. C. Brown Leghorn Illustration.

Described and Analyzed by its Artist, Franklane L. Sewell, New Troy, Mich.

NEW TROY, MICH., Dec. 12, 1900.

*Mr. George G. Bates.*

MY DEAR SIR: I am sending the drawing of Brown Leghorns.

These portray faithfully such types of the breed as are in popular favor among judges at our leading eastern shows.

The male shows that firm, clearly outlined body, full of nervy style and alert action—head and comb of defined character, true to the Leghorn idea of "firmness." In this pose he shows his full length of limb and neck, far from the squatty or dumpy type which the Leghorn idealists have striven for some years past to avoid. He in no way suggests the little lumpy Leghorn, but the up to date, show, American style, free of action, high of bearing, over-running with energy and spirit—a type of pent-up utility such as few birds can equal.

The Leghorns have never lost their well earned reputation as egg producers. It has been for many years established by standard breeding in the yards of the best breeders.

In the female, here illustrated, the pose is more moderate, though we have seen this bird when in extreme attitudes appear quite as high and sharp in outline, for a female, as this study of the male appears, for one of his sex. This was the first Boston pullet of last year, bred in a section of the country where people are overstocked with "utility" ideas, and where the breeders find very little encouragement for showing a specimen which does not equally combine the practical with the fancy requirements. We have noticed that many farmers near the towns in our own section keep good-sized flocks of Leghorn fowls. One can easily fancy that these active birds have proven their worth to the wives who often pay for most of their groceries in eggs. Small size does not always mean small profits; even to the contrary, sometimes, when the demand is for eggs, which the active Leghorns seem seldom to fail in producing. On some of the large poultry farms where fancy egg production is the one object the Leghorns are proving very profitable, returning more than a good living to their enterprising owners, who cater to the best hotel trade and receive considerably above the top market price.

These jaunty hens of the Mediterranean side of Europe have an equal reputation on that continent for egg production. Large numbers of them are sent from sunny Italy to the poultry yards of Holland and Belgium, where they are especially valued for their ability to fill the egg baskets.

FRANKLANE L. SEWELL.

# The Brown Leghorn

A Short Description and Reminiscences by Geo. H. Burgott, Lawton's Station, N. Y.

MY OWN personal history in the Brown Leghorn only dating back twenty-two years, I do not feel competent of telling much about them previous to that.

However, the records of the temple tell us, as many have said, that the first Leghorns came from the port of Leghorn, Italy, to Boston, Mass., in 1853. Hence we must take our hat off to old Boston as being the first soil upon which the Leghorn was first landed.

They evidently weighed about 3 pounds each and were real Brown Reds, not Black Reds; the breasts of the males were dark brown, spotted with a lighter brown; hackle light brown striped with black; the hens about like the poorer ones of those we see today. Some had red and others had white lobes. History tells us that Mr. A. M. Halsted, of Rye, N. Y., did much for their early improvement. He tells us that they had combs like our present Minorcas. The Browns were larger than the first Whites that came to this continent and had yellow skin. It seems that the first Whites that came in had white legs and beaks. The Browns were shorter in leg than the Whites.

I remember well the first Browns I ever owned, which was the fall of 1879. These birds were hatched from eggs I purchased of C. H. Keefer, of Sterling, Ill., then a popular breeder. I attended my first show at Buffalo in 1879 and there saw some Browns and at once had a severe attack of that well-known disease, hen fever, which caused the purchase of these eggs mentioned. The two cockerels I raised from the setting, one was a dark colored bird with a fair comb, splaced breast, faint stripe in hackle, no stripe in saddle, very short in shank, about 3¾ to 4 pounds in weight.

The other cockerel was a very much lighter colored bird, white in nearly every section of his undercolor, a fair comb and lobe, faint stripe in neck, none in back, good yellow legs and a good length of shank for those days. I mated this cockerel to two of the pullets, and the darker cockerel to the other two pullets, as I raised four pullets and two cockerels from the setting, but of course did not know what pullets should be. From these matings I produced some fair birds, some with gray in plumage, but some birds that I won with in 1881 at Springville, N. Y. The following spring I purchased some eggs from Thos. W. Pottage, who still lives in Indianapolis, making a direct out-cross and with good results for cockerels, so that I showed at Scholarie, N. Y., and Lancaster, Pa., the following year, winning my share of prizes and where the 1st old hen Nina was shown, but very little was said of size and striping in hackle and saddle until 1890, when it was first brought to light and the past masters must resume the breeding of soft light brown pointed females and larger size, and males with the more prominent stripe in hackle and saddle. Previous to this our females were a very dark brown, some of them coarsely penciled and some of them finer. The shafting and brick was an ob-

jection from 85 to 90, as it is today, but the light shade of back and wing. Shoulder was not required, while on shape most of our judges were very severe all the while, not cutting for the slope of leg on a short shanked bird. It is sincerely my wish that I might have the exhibit of Browns that were shown in the old Madison Square Garden in the year 1885, which was a score card show and to place it beside the exhibit at the Garden in February, 1900, our present breeders would not believe the progress in fourteen years. I am referring to two score cards in particular at the 1885 show, where a brown cockerel scored 95½ and a pullet 96½, and while speaking of this have a clipping taken from a recent issue of the Philadelphia *Ledger*, which says particularly that comparison judging has killed shows. Let me say that not in the history of chickendom were there as many shows as the season just passed. Let me say that nothing has had so much to do with the evolution of Leghorns as comparison judging has, and also that never in the history of poultry has there been such a demand for poultry of any sort, whether for market or for breeding, as there is today, particularly Brown Leghorns. G. H. BURGOTT.

# *The* WHITE LEGHORN.

## For Business and Beauty, by Henry M. Ladd, Proprietor of the Crescent Farm, Cleveland, Ohio.

THIS is a practical age in which we live. The question which confronts every proposition is: "What is there in it?" Utility is largely to the front. But when business and beauty combine, when fancy and fad unite, the proposition is simply irresistible. This is true of the White Leghorn, when bred true to type. I know of no other breed of which it is so true. Justly indeed has this beautiful bird been named "The Business Hen of America." We may lay emphasis first upon the utility side of the subject. It is a simple question of eggs. Egg farming is a rapidly growing industry. Good, fresh eggs are always in demand, and prices year by year are rising rather than falling, showing that the supply nowhere equals the demand. If it is true that five millions of dollars' worth of eggs are imported every year into this country, then somebody not far away is going to get into the business. They are getting into the business. New egg firms are being started east and west, north and south. One new firm is preparing to produce 450,000 eggs for market each year, and there are others. Yet so great and growing is the demand that it seems well nigh impossible to overdo the business. Naturally the first question to to be considered in contemplating such a business is, what breed of fowls will produce the most, the largest and the best eggs? All the Mediterranean class of birds are great layers, and each breed has its ardent advocates. The American fowls are also great layers, especially of winter eggs, and they, too, have their earnest champions. But after a careful estimate of the merits of all these breeds it has come to be generally admitted that taking the year through, with proper care and housing, the Leghorns as a class will out-lay them all. The egg farmer will select a Leghorn about nine times out of ten, and after a little experience will settle finally upon the White Leghorn to do the business. Why? Because the White Leghorn will lay as many if not more eggs than any other Leghorn; will lay larger eggs and better eggs; will not eat so much, and is quieter and more easily handled. The White Leghorn, as a non-sitter, spends her time attending strictly to the business of an egg machine. She begins that business long before other breeds, and while they are thinking about it and getting ready she has paid for herself and is putting money in her keeper's pocket. But in this case, as in all others, much depends upon proper breeding as well as feeding. Our experience is that the truer to type the bird is bred the larger and better the egg yield. The difficulty almost invariably with the White Leghorn has been that it has not been bred true to type. The ideals among most breeders have been wrong. The ideal Leghorn is not a small, dumpy bird, close to the ground and squatty. The ideal Leghorn is large and rangy, superb in carriage, high in station, proud and noble in bearing, a veritable cavalier among birds. Such Leghorns produce large eggs and lots of them. Two pounds is a common weight for a dozen of their eggs. The Minorcas, usually supposed to lay the largest egg, have to look well to their laurels when a high-toned, well-bred, aristocratic, blue-blooded Leghorn is around. Then, too, when such Leghorns have finally yielded up their fruits of increase, and after two years of such noble service find their way to the market, instead of an insignificant morsel which most people expect, there is a fine, good-sized carcass, which when sold is so much clear gain added to the already unrivaled profits.

But turning from the utilitarian aspect of the proposition, where is there a more beautiful bird, viewed simply from the aesthetic and artistic standpoint? When bred as a White Leghorn ought to be, tall and upright, with the lines all in graceful curves, there is nothing in feathers that will stand comparison with it in my humble estimation. Snow-white in plumage, with clean, bright, yellow legs, crimson comb and wattles and smooth ivory ear lobes, watch this bright, active, energetic, yet proud and stately king of birds. There's a picture for you if you love the beautiful, and have the artist's eye. Utility and beauty have met and mingled, and given us the shining glory of the feathered world, the true White Leghorn.

PAIR SINGLE COMB WHITE LEGHORNS.

# Success With Turkeys.

## How to Secure this—Described by S. B. Johnston, Boggstown, Indiana.

Mr. Johnston, who is undoubtedly one of America's best authorities on Turkey raising, will each month furnish results of his long experience with Turkeys, and will answer questions and suggest methods of overcoming the difficulties that arise in their management. Questions should be sent to his address.

FEBRUARY is the month that all breeders should have their stock mated up for the season. It is one of the very busiest months of the year for the poultryman. Those raising turkeys should not fail to order their stock this month, and to look out for eggs if they intend to buy any during the season, and know just where they are going to get the eggs and at what time, so that they will not be disappointed in their hatches when it comes to the season of setting. A great many wait until time to set before they order their eggs, and then oftentimes they are disappointed in not getting them by return express. If one orders them now the breeder can arrange to ship them when desired, as a general rule. In this way delay is saved and money is made by having hatches come off early.

I have an inquiry from a lady in New Jersey who has been having trouble with her turkeys. She says they die after they are four to six weeks old with something like cholera or dysentery. She feeds them baker's bread, rice and milk but cannot get them to live. I am under the impression that she has fed them too heavily and not let them range out from the house to get their living. Birds affected this way should be put in a pen by themselves and fed very sparingly on corn and given but little water or milk. A good remedy for this disease is: Hyposulphite of soda, lump about the size of a big hazelnut. Give to bad cases morning and night until better. Another good remedy is six drops of laudanum in a teaspoonful of water several times a day or about the same proportion in their drinking water. Turks should be fed away from other fowls and especially away from geese and ducks, as they create so much filth. This lady also says her other poultry had a disease that affected their heads, which became very hot. They could not hold their heads up; also seemed to turn blind, and had some thing like dysentery. I have never had any experience in this line and could not answer her question, "What was the name of the disease and treatment of same?" and would be glad to hear from any of the readers of the AMERICAN POULTRY JOURNAL who could tell me the name and treatment of this disease. This lady says that she is glad to know that I am going to write for the AMERICAN POULTRY JOURNAL, for which I am very thankful, for I am glad to know that readers appreciate my efforts.

I have a question from a lady in this state, who desires to know which is the cheapest way to start in the turkey business, which I believe I have answered several times in the past. I will endeavor to give my reasons again for what I believe to be the cheapest way to start. In the long run there are really two cheap ways to start, but I believe that the cheapest way is the way that you can make the most money out of your investment. You can take $20 and buy a fine trio of turkeys, properly mated, and they will lay a goodly number of eggs, say on an average they would lay 35 eggs to the hen and would hatch off 100 turkeys. You should raise at least 85 of them to maturity. You could sell them on the market at $1.50 per head, which would be $127.50, and then have your trio left for another year. These would be better for breeding the second year than the first. I have known breeders raising from one trio—I sold them—in one season 122 turkeys. Then on the other hand take $20 and buy eggs from a breeder of first class stock. You would probably get about 50 eggs. If you raise 45 of them you do well, so for my part I would always buy the stock in preference to eggs, if I can get them from a good breeder and one that will send me what he agrees to.

Another inquiry is from a gentleman in Wisconsin. His first question in regard to symptoms of cholera I have answered previously in this article. He also states that there is a lump on the wattle of his turkey hen that hangs down below the bill about the size of a duck egg. I have never had anything of this kind in my turkeys, but do know that roup or canker will cause lumps about the head and neck. I would advise cutting this lump out, but if the hen is not an extra fine one it would be safer to take off her head. If it is roup that has caused this she is not fit to breed from another year anyhow. I have another from a lady in Missouri. She asks if there should be any brown between the white and black of the main tail feathers—that is, on the end of the feathers. I have also stated before, many times, that this is a serious objection, but I believe that there is not one judge in twenty, or at least who has come under my notice, that would cut for this defect. The Standard says there should not be any; but it seems that this is sadly overlooked. This is the reason that there are so many turkeys that have this defect, as the breeders have never been educated to watch and guard against this when they mate up their pens.

S. B. JOHNSTON.

"QUEEN OF THE EAST."

# WHAT FRANK HECK SAYS

## Regarding American Poultry Journal Advertisers whom he has Seen and Visited; and Poultry Shows that he has Attended.

### A VISIT TO LINWOOD POULTRY YARDS, NEW LONDON, OHIO.

WHILE on our way to the Boston show we had the pleasure of stopping off a day at New London, Ohio, as the guest of Mr. McClave, and we believe we are safe in saying that the plant has few if any equals. Just why Mr. McClave calls his plant the Linwood Poultry Yards we do not know. We think that calling it Linwood Poultry Farms would be more suitable, for there are 165 acres of land devoted entirely to poultry. We got off the B. & O. fast flyer at a station called Hereford, which is about three-quarters of a mile from the farm, and after reaching his place it seemed to us that there were as many buildings and as much signs of life on the farm as there were in the town. Good-sized, substantial barns and poultry houses were scattered all over the place in addition to the homes for the manager and his help. In a place of about 20 acres of woodland we saw more than 300 big Bronze turkeys, which were enjoying life under natural conditions and showed the effects of proper feed and care which they certainly get at Mr. McClave's. Scores of big, handsomely marked toms were running around which would delight the eye of any turkey fancier. The lot of 300 would no doubt sell readily for $2,000, some of the individual specimens being very fine show birds. There were also about 100 heavy weight White Holland turkeys on another part of the farm reserved for them. In waterfowl Mr. McClave has long been the acknowledged leader for a combination of quality and variety. He has in the geese family the Embden, Toulouse, Brown Chinese, White Chinese and the wild variety. In ducks he has the Pekin, Aylesbury, Rouen, Black Cayugas, White and Colored Muscoveys, Gray Call and Indian Runners. Mr. McClave has a large trade in supplying public parks, cemeteries, etc., with rare and ornamental waterfowl and during the World's Columbian Exposition at Chicago in 1893 he had full charge as superintendent of the waterfowl department and furnished the fowls that ornamented the lakes, lagoons and waterways. On this farm are also to be found prize winning birds of several standard breeds of chickens, Plymouth Rocks, Wyandottes, Leghorns, Cochins, Brahmas, Minorcas, etc. Each variety is kept in yards made for it alone. There are over fifty thousand feet of fence on the place and the stock now being wintered consumes 25 bushels of grain per day in addition to other feed. This gives some idea of the magnitude of the plant. We did not count the houses, but there must be nearly 50. Mr. McClave has been breeding fancy poultry for 27 years and for 20 consecutive years has exhibited at the great Ohio State Fair, and each time won more than his share of the prizes. We doubt if there is a breeder in America with an equal show record. He has actually exhibited and won prizes at nine-tenths of the big shows all over the United States and we saw in one collection in his office 12 silver cups and numerous medals won as special prizes in addition to regular premiums. He has a large 30-page catalogue which may be had free by addressing him at New London, Ohio, Box 746.

WHITE HOLLAND TURKEYS.
A Flock of White Holland Turkeys on the farm of Charles McClave, New London, Ohio.

### PILE'S WHITE WYANDOTTES WIN.

Fred E. Pile, of Cleveland, Ohio, may well feel proud of his winnings at the Cleveland show this season. He won 1st and 4th cockerel, 1st and 3d pullet, 1st, 2d and 5th hen, 3d cock, 2d and 5th pen. Also the magnificent silver cup valued at $100 for the best pair White Wyandottes, silver cup for best pullet, special for best cockerel and $10 gold special for best exhibit of White Wyandottes in the show. These winnings added to his past excellent record place him in the front rank of breeders of this variety. His birds are raised on his farm near Cleveland and he has large, vigorous stock and the kind that will please his customers. Mr. Pile is enlarging his plant greatly this season in order to take care of his constantly increasing trade and will have several pens of high grade show birds mated from which to sell eggs for hatching. He gives his customers the same kind of eggs he uses himself and those who send to him can feel assured that they are getting the best he has in his yards. His advertisement may be found elsewhere in this number of A. P. J.

### GET THEM FROM BROWN.

This is the way Mr. Geo. G. Brown, of East Cleveland, Ohio, calls attention to his stock in his card in our advertising columns, and we are safe in assuring our readers that it is sound advice. Mr. Brown's specialty is White Wyandottes, although he breeds White Rocks, Barred Rocks and Light Brahmas. He has decided to close out his Brahmas and Barred Rocks in order that he may take better care of his trade in White Wy-

## *What Frank Heck Says, Continued.*

andottes. The birds he wishes to dispose of are of the best strains in the country and are bargains for whoever purchases them. He exhibited a few birds at Cleveland this season and won 2d and 4th pullet and 3d cockerel on Brahmas, 2d pullet and 3d hen on White Rocks and 1st pen and 2d pullet on White Wyandottes. His first prize pen of White Wyandottes were easily the best in the show. The cockerel which headed the pen would in a score card show go close to the 96 point mark. It is from birds of this quality that he will breed this season and judging from his past success in mating we predict that he and his egg customers will be found in the winning classes at the next season's shows. Mr. Brown is not one of the "coming poultrymen." He is already here and has come to stay. His competitors will find it worth their while to keep their eye on him, for he knows what good birds are and he is the kind of a breeder who wants the best and will have it regardless of time and expense. He has only a limited number of birds and eggs to spare this season, but what he does send out will be of the very best quality.

### WAGNER'S REMARKABLE RECORD.

Twenty-nine regular and ten special prizes, making a total of thirty-nine premiums on thirty-three birds, is a record which is very seldom duplicated, and one which places Mr. Paul Wagner, of Louisville, Ky., on a par with the most successful breeders all over the country. These winnings were made at New Albany, Ind., in strong competition and the birds were scored by Mr. I. K. Felch. Mr. Wagner won on S. C. Brown Leghorns 1st and 3d hen, 2d pullet, 2d cock, 1st and 3d pen. Black Minorcas, 1st cockerel, 2d pullet, 1st cock, 1st, 2d and 3d hen and 1st pen. Houdans, 1st cockerel, 2d cock, 1st and 2d hen, 1st pullet, 1st pen. Buff Cochin Bantams, 2d cockerel, 1st and 3d hen, 2d pen. Black Cochin Bantams, 1st cockerel, 1st, 2d pullet, 1st and 2d hen, 1st pen. His first prize Black Cochin Bantam pullet scored 96½ and was the highest scoring bird in the show, all varieties competing. Mr. Wagner has been breeding for years and is one of the largest winners each season at the Kentucky State Poultry Show, Louisville. He pays more attention perhaps to his Brown Leghorns than to either of his other varieties, but they are all leaders in their class. We have seen his stock in the show room time and time again and it always has the lion's share of the prizes. Some of the finest saddles we have ever seen on Brown Leghorn males we saw on some of Mr. Wagner's birds and many of his females will pass without a cut for color of breast or back. A. P. J. readers who are thinking of purchasing stock or eggs of either of Mr. Wagner's varieties will find it to their advantage to write him for catalogue and prices. We take pleasure in recommending Mr. Wagner and his birds, for we know personally that both are all right.

### 121 PRIZES AT NINE SHOWS.

Messrs. Clark and Troll, of St. Clairsville, Ohio, were winners at the Cleveland show this season, which adds another victory to their long list. They also won at the Ohio State Fair in White Leghorns, 1st and 2d cockerel, 1st cock, 1st and 3d pullet and 2d pen. The Ohio State Fair is always very large and competition is strong, which facts make these winnings important ones. Their varieties are Single Comb White Leghorns and White Wyandottes and at the last nine shows which they have attended they have won 121 class prizes and 48 of them were firsts. It seems useless to comment upon the quality of birds that can win like this. The records speak for the stock and this is the kind of recommendation that buyers prize the most. This firm has a reputation for sending out good stock at reasonable prices and our readers will find them right in every respect. They issue an illustrated 12-page circular which will be sent free to all who apply for it and mention this journal.

### CRESCENT FARM STILL LEADS.

We are pleased to note the success of the Crescent Farm, Kent, Ohio, at the Cleveland show last month. In the Single Comb White Leghorn class they won 1st and 2d pens, in addition to other regular prizes. The ten birds in these two pens were by far the ten best White Leghorns in the class. These people have a national reputation on this variety and have proven that utility and fancy points may both be bred in the same birds. Their stock has always figured prominently at the shows and at the Boston show they won first in the egg class for best dozen white shelled eggs. This record is the more valuable for having been made at Boston in competition with eggs from the most noted egg farms in the East, where the "woods are full" of market poultry plants. In the Buff Cochin class they won 1st and 3d cock, defeating the first prize bird at the late Philadelphia show. Also 2d and 5th hen, 3d pullet, 3d and 4th cockerel, 1st and 2d pens. These birds attracted special attention of the judges and exhibitors and were entirely worthy of the praise bestowed upon them. Their first prize cock bird was a remarkable specimen. On Thursday of the show week the general public were given tickets at the door and asked to note the best and most attractive bird in the show and bird won by a large majority. Crescent Farm is owned by Dr. Henry M. Ladd, of Cleveland, and is managed by Mr. E. T. Blood, of Kent, Ohio, where the farm is located and where all communications should be addressed. Both these gentlemen are true farciers of long experience in breeding and have reached the top with their favorite varieties.

### A. J. BARGAHISER'S CLEAN SWEEP.

A. J. Bargahiser, Rockford, Ohio, breeder of White Wyandottes and Barred Rocks and Houdans, made a clean sweep on Houdans at the Van Wert (O.) show, winning first, second and third on cock, cockerel, hen and pullet, and first and second on pen. In the Barred Rock class he won 2d and 3d cockerel, 3d cock and 3d pullet. In the White Wyandotte class he won 2d and 3d cock, 2d and 3d pullet, 2d hen and 2d pen. Mr. Bargahiser is a thoroughly conscientious breeder, who has had much experience in handling his favorite varieties. He raises several hundred birds each season and now has a large number of fine breeding birds for sale, principally Barred Rocks and White Wyandottes. His stock all has farm range and is

BARRED PLYMOUTH ROCK.

Winning Barred Plymouth Rock cockerel at Battle Creek, Mich., 1900. Owned and bred by B. H. White, Battle Creek, Mich.

## *What Frank Heck Says, Continued.*

hardy and vigorous. He has some elegantly marked Barred Rock cockerels fit to head pens to produce winners and he is disposing of these at a low price. His White Wyandottes are great in shape and size and he has birds as white as it is possible to get them. All shipments of stock and eggs have his personal attention and he guarantees to please his customers.

### C. H. DANFORTH, BATAVIA, ILL.

At the yards of Mr. Danforth we saw a flock of White Wyandottes which we believe will show a larger per cent of raised than most breeders would be willing to believe could be found. Mr. Danforth makes a specialty of White Wyandottes and has attained wonderful success in getting birds which will stay white. His plant is run to its full capacity each season and he is now contemplating an addition to his incubator cellar. His increasing business is attributable to fair dealing, reasonable prices and high quality of stock. He has bred his birds in line for several years and now has a strain noted for size and laying qualities as well as show room records.

Mr. Danforth breeds White Wyandottes exclusively, and as good as it is possible to produce. His birds are absolutely in the front rank, as is proven by their records at the largest shows. Prices are right and satisfaction guaranteed. It will pay you to write him before placing your order. His last Chicago record was four prizes on six entries, and he has young stock for sale bred in line from these winners.

### JUDGE D. J. KOHLI, BLUFFTON, O.

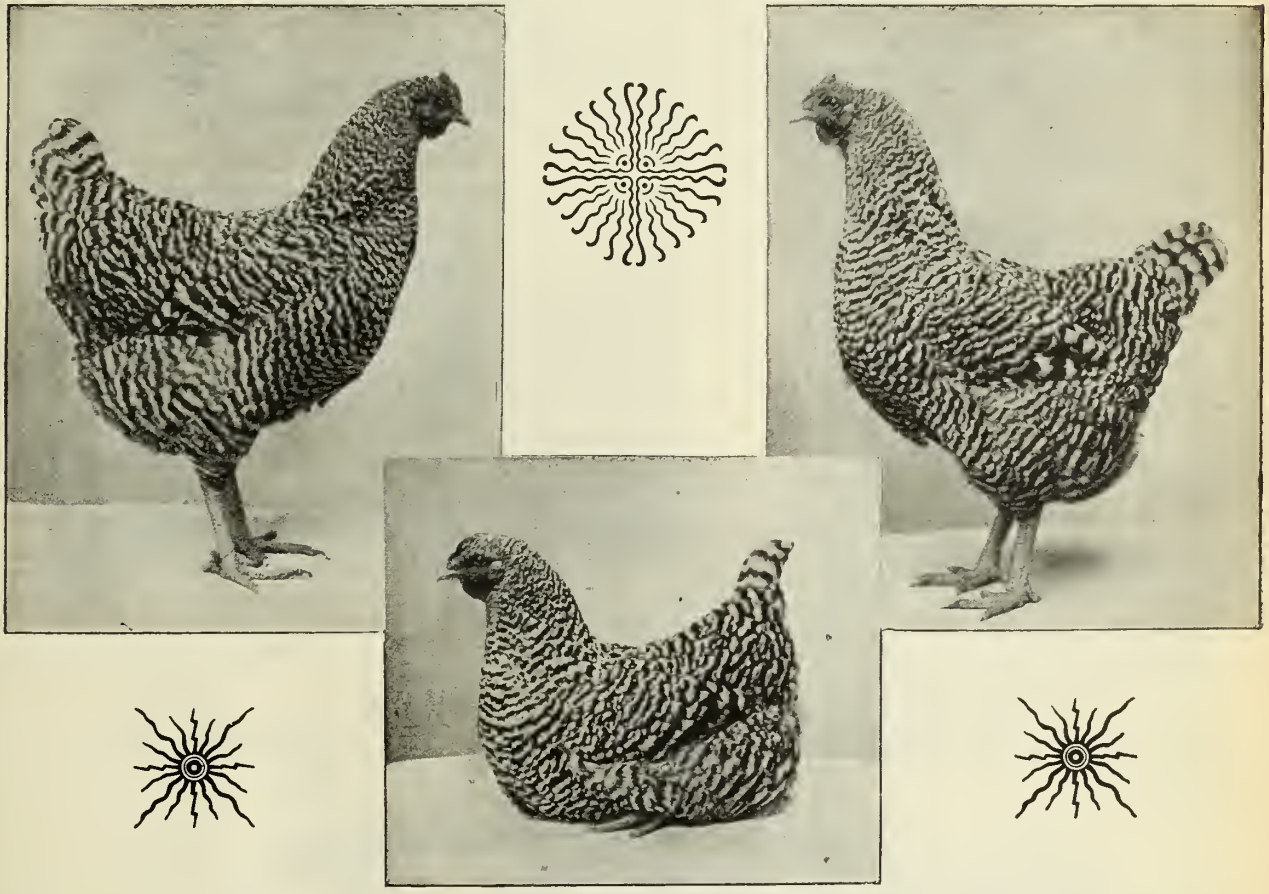
We call the attention of our readers to the advertisement elsewhere in this issue of Mr. D. J. Kohli, of Bluffton, Ohio, who is one of Ohio's most successful breeders, as well as a popular judge. His judging engagements are mostly in his home state, but we note that he is accepting offers now from all parts of the country and he will no doubt become as popular abroad as he is at home. We are informed that his work at the late Van Wert (O.) show was most favorably commented upon and in some of the classes the competition was so strong as to demand the best judgment in placing the awards. Mr. Kohli has been a breeder and exhibitor of standard bred fowls for many years. He has a reputation for sending out the best in stock and eggs and he pleases his customers.

### SPECIAL SALE OF COCKERELS.

Ira T. Matteson, Upper Sandusky, Ohio, proprietor of the Wyandotte Breeding Farm, offers some special bargains in his advertisement this month. Mr. Matteson has a very extensive plant and handles Leghorns, Wyandottes, Plymouth Rocks, Cochins, Bantams and Ducks. He is a heavy winner at the shows each season. At the Carey (O.) show he was the largest exhibitor and won the most premiums. He had 105 entries. He has also won this year at Upper Sandusky, Bucyrus and Sycamore, Ohio. Some of his many winning birds are for sale and he can mate up pairs, trios or pens to suit his customers. He is one of the poultrymen who can successfully handle large flocks and keep them up to a high grade of excellence.

### S. M. WILLIAMS' EMPIRE STRAIN OF WHITE AND BARRED ROCKS STILL WINNING.

The veteran White and Barred Rock breeder, S. M. Williams, of Monroeville, Ind., won at the late Cincinnati show as follows: On White Rocks, 1st and 2d cocks, 1st and 2d hens, 2d and 3d cockerels, 1st and 2d pullets, 1st pen. On Barred Rocks, 1st cock, 1st hen, 1st and 3d pullets, 1st pen. In each variety he won four out of five firsts and at a show such as is held at Cincinnati the record counts for something. At Van Wert, Ohio, he won on White Rocks, 1st hen, 2d and 3d cockerel, 3d cock and 2d pen. On Barred Rocks, 1st pullet, 1st hen and 1st pen. His first prize pullet scored 95½, which is the highest score we have noticed this season on a Barred Rock. Mr. Williams has been breeding for thirty



First, second and third prize Barred Plymouth Rock Pullets at New York, 1899. Owned and bred by C. H. Welles, Stratford, Conn. These birds represent year of labor and Mr. Welles has lots of stock for sale from them. The Welleslea Barred Plymouth Rock Farm at Stratford, Conn., is the home of a fine breeding and exhibition strain of birds.

## What Heck Says, Continued.

years and was one of the originators of the White Rock twenty-five years ago. He has no doubt raised and sold more good White Rocks than any other breeder in America.

—o—

DETTER'S FINE RECORD.

Mr. C. E. Detter, of Van Wert, Ohio, is justly proud of his record at the late Van Wert show. On White Rocks he won 1st cock, 2d hen and 1st and 2d pullet, 95½ each. On White Wyandottes, 1st cock, 1st cockerel, 1st and 3d hen, 1st pullet, 1st pen. S. C. White Leghorns, 1st, 2d, 3d cockerel, pullet and hen, 1st and 2d cock and 1st and 2d pen. This is the kind of a record you read about, but don't often see. Mr. Detter is one of the kind who are satisfied with only the best and he has the advantage of knowing how to mate his birds for best results. He breeds for quality rather than quantity and will not send out stock or eggs which are not strictly high grade. There is nothing small about Mr. Detter or his birds except his prices.

—o—

White Wyandottes that win are the kind that are bred by T. L. Williams, the White Wyandotte specialist at New Albany, Ind. Mr. Williams certainly understands how to produce good birds of this variety. He does not boast of quantity, but he justly claims as good as the best in quality. At Corydon, Ind., in December he exhibited one pen, winning among other prizes 1st hen, score 96. At New Albany he won 1st and 3d cockerel, 1st and 2d hen, 2d pullet and 1st pen. He has won 1st pen at New Albany four years in succession and has competed against birds purchased at long prices. He has very little stock left for sale, but can furnish eggs for hatching which will produce winners.

C. A. Porter, of Flat Rock, Ind., won 1st pullet, 2d cockerel, 2d hen, 3d cock, 3d pen on his Barred Rocks at the exhibition of the Indiana Poultry Association at New Albany in December. His 1st pullet scored 94½ by Felch and was a beauty. Mr. Porter has one of the best flocks of Barred Rocks in the West and wins his share of the premiums wherever he exhibits. He has an extensive trade among the class of breeders who want the best and are willing to pay a fair price for it.

Mr. O. P. Nesmith, of Bluford, Ill., is better prepared this season than ever before to please his customers with Buff and Barred Rock, Buff Leghorns and Silver Laced Wyandottes. He guarantees satisfaction and his prices are right. He has an excellent show record to substantiate his claims. At Owensville, Ind., last season he made a clean sweep on Silver Wyandottes.

One of our new advertisers this month is Mrs. B. F. Jackson, of Eminence, Ky., who is well and favorably known as one of the most prominent and successful breeders in the South. She is admirably situated so as to handle her favorite varieties and she has given them much study. Her stock has scored from 90 to 98 points by a dozen different judges and during the season of 1899-1900 she won 229 premiums at seven shows. At New Albany, Ind., last month she won 1st cockerel, 1st, 2d, 3d hen, 2d cock, 2d pullet, 1st pen on Cornish Indian Games; 1st cock, 3d hen Light Brahmas; 2d cock, 2d and 3d hen Black Langshans; 1st Pekin drake; 2d hen, 2d pen Buff Leghorns; 1st pullet, 2d and 3d pen Buff Cochins. In Bronze Turkeys she won 1st tom, 1st hen and special for best pair. Mrs. Jackson has young stock of these varieties for sale and guarantees satisfaction.

Mr. H. H. Chess, of Leesville, Ind., gave the Rose Comb Brown Leghorn breeders a surprise at the exhibition of the Indiana Poultry Association at New Albany last month. The class, as usual, was a warm one, but the usual equitable distribution of premiums did not take place. Mr. Chess won four of the five firsts—1st cock, 1st hen, 1st pullet, 1st pen, 2d pullet, 3d cockerel and 3d hen, with scores reaching 94½ by Felch. This record places Mr. Chess right at the top in R. C. Brown Leghorns. He is now booking orders for eggs from these and other winners.

Mr. John H. Good, of Louisville, Ky., informs us that his S. C. Brown Leghorns and Barred Rocks are as good if not better this season than usual and he still has a few fine breeding birds to dispose of. His winnings at such shows as the Kentucky State Show prove the quality of his stock. Mr. Good is thoroughly reliable and can be depended upon to give full value for any money sent him.

Mr. Grant W. Kinley, breeder of White Plymouth Rocks, Upper Sandusky, Ohio, won 1st hen, 2d pullet and 2d pen at the show recently held there. At Carey, Ohio, in unusually strong competition, he won 1st cock, 1st hen, 1st pullet, 1st pen, 2d cockerel, 3d and 4th pullets. Mr. Kinley never fails to win his share of the prizes in the White Rock class, as his record will show, and he exhibits where competition is always strong. Those who are looking for good White Rocks or eggs for hatching should not fail to look up Mr. Kinley's advertisement and write him.

J. C. Brown & Co., of Campbellsburg, Ind., made their first exhibit this season at New Albany and won as follows: Buff Rocks, 1st, 2d hen, 1st, 2d, 3d pullet, 2d cockerel, 3d cock, 1st, 2d pen; Buff Wyandottes, 1st cock, 1st, 2d pullet, 1st pen; Buff Cochin Bantams, 1st and 3d cockerel, 3d cock, 1st, 2d and 3d pullet,

# What Heck Says, Continued.

2d hen and 1st pen. These winnings are very important, as the competition was unusually strong. This firm has a most enviable record at former shows at New Albany and elsewhere and their flocks are so large that they are able to supply customers with almost any number of high-scoring birds.

The Columbia City, Ind., show, which is one of Indiana's best shows was a success this year as usual. There were about 800 birds entered and competition was strong in all the popular classes. This association is a unique one in some respects and their plans of conducting a show may be of benefit to those who contemplate organizing an association or possibly to some association already organized. They have twenty-five members, each of whom pays twenty-five cents per month dues and one dollar additional at the time the show is held. This places a fund of $100 in the treasury at the end of the year with which to pay the expenses of the show. Members of the association are allowed to enter as many birds as they please without payment of any entry fees and the regular fee is charged to non-members Cash premiums are offered on all varieties, according to their popularity. The more popular varieties have fixed premiums of $1.50 for first and 75 cents for second and the classes which are not usually well filled are taken care of on the percent plan of 40 percent of the entry fees for first premium and 30 percent for second. The association under this management has held four successful shows and last season after all expenses had been paid they were able to pay each member $5 as his proportion of the profits.

W. F. Rossman, another of Columbia City's ardent fanciers, won his share of the premiums on his Golden Lustre strain of Buff Wyandottes. He had fourteen birds scoring 90 points and better with an average score which is away up for this variety. He won 1st cock, 2nd cockerel, 2nd and 3rd hen, 3rd pullet and 2nd pen. He also exhibited this season at Goshen, Ind., and won 1st cockerel, 1st, 2nd and 3rd pullet and 1st pen. His stock is far above the average and he has a show room record of which he may well feel proud. He will have several pens of choice birds mated this season and will be able to send out eggs which will produce some very fine specimens.

First pen Buff Wyandottes at New Albany, Ind., Show, Dec. 24-29, 1900. Also 1st cock, 1st and 2d pullet. Bred and owned by J. C. Brown & Co., Campbellsburg, Ind.

Mr. C. F. Avey, breeder of Partridge Wyandottes, Columbia City, Ind., had the best display of this variety which we have seen this season. His birds are typical Wyandottes and are better in markings than a majority of the partridge cochins found at the shows. He has a truly remarkable lot of birds and if they had been in best show condition would have made a clean sweep. He won 1st cock, 1st hen, 2nd cockerel, 2nd hen, 3rd pullet and 2nd pen. Mr. Avey makes a specialty of Partridge Wyandottes and we can recommend him and his stock.

First pen Buff Rocks, New Albany, Ind., Show, Dec. 24-29, 1900. Also 1st cockerel, 1st and 2d hens, 1st and 2d pullets. Bred and owned by J. C. Brown & Co., Campbellsburg, Ind.

J. A. Babcock & Son, of Goshen, Ind., exhibited a fine lot of White Plymouth Rocks and Buff Cochin Bantams, winning as follows, 1st and 2nd cockerel, 1st hen, 1st, 2nd and 3rd pullet and 1st pen in the White Rock class, and on Buff Cochin Bantams. Messrs. Babcock and son have been winning at the prominent shows for years and have built up a large and profitable business. Their customers can depend upon liberal treatment and full value for the money spent with them. We have seen some of the stock shipped by them and it has in each case been better than could be expected at the price. Their White Rocks have scored as high as 96¼ in competition in the show room and their egg customers get eggs from their best birds.

Mr. Frank Anderson, of South Whitley, Ind., bad things his own way in the Black Minorca class, winning four first prizes, four seconds and three thirds, with scores ranging from 92¾ to 95¼. The competition was strong but Mr. Anderson has been breeding Minorcas for years and has gotten together a flock which for size and quality is hard to beat and he usually carries away the best premiums at the shows. He had upon exhibition a dozen eggs to show what kind of layers his birds are. They were chalk white and of such size that we, out of curiosity, had them weighed. The dozen weighed two pounds and three ounces. They were nearly as

First pen Buff Cochin Bantams, New Albany, Ind., Show, Dec. 24-29, 1900. Also 1st cockerel, 1st, 2d and 3d pullet and 2d hen. Bred and owned by J. C. Brown & Co., Campbellsburg, Ind.

## What Heck Says, Continued.

large as duck egggs and some of them measured six and one-half inches round.

R. T. Helblig, of Columbia City, made a record at Columbia City this season, which is seldom equaled. He won 2nd cock, 1st and 2nd cockerel, 1st and 2nd hen, 1st and 2nd pullet and 1st and 2nd pen. These prizes were won on his Barred Rocks and he exhibits birds which were clearly entitled to the ribbons. His matings last season have produced some grand specimens and he will have no trouble in satisfying customers who want good Barred Rocks or eggs which will produce high grade specimens. He also breeds Buff Rocks and Pekin Ducks of as high quality as his Barred Rocks and he had winners in each class.

Mr. Joseph R. Harrison, of Columbia City, the efficient recording secretary of the association, won four firsts, three seconds and three thirds on his Buff Orphingtons and three first, three seconds and three thirds on his White Cochins. His stock is all right and so are his prices and AMERICAN POULTRY JOURNAL readers who desire stock or eggs of his varieties will go a long way before finding as good a place to spend their money as with Mr. Harrison. We do not say this because he advertises in the AMERICAN POULTRY JOURNAL, but because it is a favor to those who wish to place an order for stock or eggs of these varieties.

Mr. John Rittenbouse, of Larwill, Ind., won on Light Brabmas 1st cock, 2nd cockerel, 3rd cockerel and 2nd pen. He also had some Barred Rocks of exceptional merit but in both varieties his birds did not show up as well as they would at the later shows for the reason that they were not fully matured. He will be able to supply customers with excellent breeding stock and will bave some choice eggs for sale from his winners at Columbia City and elsewhere.

S. E. Lantzer of Columbia City, breeder of White Wyandottes exclusively, won 2nd and 3rd pullet, 2nd hen and 2nd and 3rd pen. His birds scored as high as 94½ and he has quite a number of birds of this high quality. We examined his stock and feel safe in saying that Mr. Lantzer can send out young stock that will stay white. He will spare a few eggs this season from his choicest matings and he guarantees satisfaction.

The largest exhibitor at Columbia City was Mr. A. J. Webster, manager of the Webster Poultry yards. He had seventy-five birds entered and won as follows. White Wyandottes, 1st cock, 1st, 2nd and 3rd cockerel, 3rd hen and 1st pen; Barred Rocks, 1st cock; Light Brahmas, 1st and 3rd pullet, 1st and 2nd hen, 3rd cock and 3rd pen; Rose Comb Brown Leghorns, two seconds and one third. This firm has one of the best plants in nortbern Indiana and have not only been in business for a long time but they are in it to stay and they endeavor to treat all customers in such a manner as to gain their trade regularly each season. Their foundation stock was the best that money could buy and by intelligent and systematic breeding Mr. Webster has maintained this high standard. Heavyweight Pekin ducks are a specialty with tbese people and they are prepared this season to supply a large demand for both stock and eggs.

D. D. Haines, of Painesville, Ohio, won 1st pullet, 1st cockerel and 3rd hen at the Cleveland show last month. Capturing the two best first prizes in competition of this kind is quite a record.

Crum & Cram of Carey, Ohio, have made records this season at Carey, Upper Sandusky and Cleveland. They breed Buff and White Rocks, Buff, White and Silver Wyandottes.

Mr. John Landis of Edinburg, Ind., now has several pens of his high scoring prize winning White Rocks mated and is booking orders for eggs. Mr. Landis' record in strongest competition proves the claims he makes for his birds.

Taken from life at four months old; produced from double mating. Winner of 3d at Mazon, Ill., Nov. 30, 1900; scored by W. S. Russell 92½ after being cut ½ for wing not full at six months old, dam Laurabell 1st, score 94½ as a pullet at Joliet, Ill., Jan. 1900, winning 1st and sweepstakes, my 1st prize pullet at Mazon, score 93¼ at six months old; was bred by Chicago Boy, my first prize Chicago cockerel 1900. Owned and bred by Wm. Webb, Box 1920, Joliet, Ill.

Taken from life at four and one-half months old. Produced from single mating. In my first prize pen at Mazon, Ill., Nov. 30, 1900, at six and one-half months old; scored by W. S. Russell 92 after being cut ½ for broken wing feathers and 1 for tail not full. Sire Chicago Boy, my first prize Chicago cockerel 1900, dam, Webb's Ideal 2d, scored at five years old 93 by B. N. Pierce. As a pullet by C. McClare 93¼. Owned and bred by William Webb, Joliet, Ill.

### GREENE'S WHITE ROCKS.

Mr. W. A. Greene, of New Albany, Ind., who for the past few years has been surprising his competitors in the show room by carrying off the creamy prizes, has this season a flock of birds better in quality than be has ever raised before. Tbis might not mean much in some cases, but when Mr. Greene's past record is taken into consideration the statement tbat his birds are better this season means that he has reached the point in breeding White Plymouth Rocks where further improvement could hardly be expected. We have had occasion to inspect his flocks at his yards and bave also seen his birds in the show room and can conscientiously say that for quality we do not believe there are any White Rocks anywhere superior to Mr. Greene's best exhibition birds and breeders. He has given tbe problem of mating a great deal of study and as a result his birds are exceptionally strong in all desirable points. His customers can depend upon getting all tbat he promises them.

### MR. J. F. CRANGLE NOW WITH VALLEY FARM, SIMSBURY, CONN.

Mr. J. F. Crangle has assumed charge of the Valley Farm, owned by Mr. J. B. Thomas, of Simsbury, Conn. These two fanciers will make a combination which will be hard to beat and we predict that the already great reputation which this farm has for producing winners will not only be maintained but it will become more widely known. Our readers will remember Mr. Crangle as the efficient manager of Fisher's Island Farm, in which capacity he built up one of the best paying plants in the East and established a reputation which will bring much business to him in his present position. The varieties bred at Valley Farm are Barred Rocks, White Rocks, Houdans and Bronze Turkeys. Mr. Crangle informs us that they will be in position to send customers some special bargains in breeding stock and will have eggs to spare from their very finest matings. We can assure our readers that any stock or eggs purchased from Valley Farm will be just as represented and will be as good of the kind as can be obtained anywhere.

### POLLARD'S POULTRY FARM.

Our readers will find in this number of AMERICAN POULTRY JOURNAL the announcement of Pollard's Poultry Farm, South Attleboro, Mass., which is one of the best equipped poultry farms in the East. The product of this farm in White Plymouth Rocks, White Wyandottes and Pekin Ducks has for several years been up to a high standard of excellence and has won prizes in some of the largest shows in competition with the very best birds. Their last record was at Philadelphia, as will be seen by referring to their card, and it is especially valuable on account of the unusually strong competition met with at this show. Mr. George H. Pollard, of this firm, has been prominently connected with the market branch of the business for many years,

## What Heck Says, Continued.

and in building up their strain of prize winners he has not lost sight of utility points in the stock and birds from this farm are therefore in great demand.

### STEINMESCH'S SILVER WYANDOTTES AGAIN VICTORIOUS.

Silver Wyandotte breeders everywhere are familiar with the records and strong points of the Steinmesch strain of Silver Wyandottes hred hy Mr. Henry Steinmesch, of St. Louis, Mo. They have for years held an enviable position in the front rank and their winnings this season give them a firmer hold at the top. At Cincinnati, O., they won 1st and 2nd hen, 1st, 2nd and 3rd pullet and 3rd and 4th cockerel. At St. Louis they won 1st and 3rd cock, 1st, 2nd and 3rd cockerel, 1st and 2nd hen, 1st and 2nd pullet and 1st pen. It will be seen by the size and character of these shows that the records are important ones and they substantiate the claims of superiority which Mr. Steinmesch makes for his stock. He has heen breeding this variety for the past thirteen years and during that time has made some phenomenal winnings. He is a true fancier, one of the kind who know what a good bird should he and who will be satisfied with nothing short of the best it is possible to produce. This desire together with an understanding of the principles of mating have hrought success to Mr. Steinmesch and his customers have a great advantage in that they get stock which has been bred in line and consequently throws fewer culls and low grade specimens. One of the hardest and most desirable things to get in Silver Wyandottes is the laced wing bars on male hirds and his strain is especially noted for this strong point. Mr. Steinmesch is one of our oldest advertisers and his past reputation for satisfying customers is such that we feel no hesitancy in heartily recommending him to those who may be intending to purchase stock or eggs of his variety.

"NORWOOD."

Photographed Sept. 24, 1900. The propertyof Henry Steinmesch, St. Louis, Mo. In Nov., '99, Mr. Theo. Hewes pronounced Norwood as probably the best Silver Laced Wyandotte cock in America. This bird is now 4 years old and is the foundation of Steinmesch's strain of Laced Wing-Bar Silver Wyandottes.

### A RECORD THAT IS A RECORD.

George's White Plymouth Rocks Set the Pace.

There is a flock of White Plymouth Rocks at Groveland, Mass., which for quality we believe is unexcelled anywhere. It is owned by E. H. & S. H. George. Mr. E. H. George is the well known ex-president of the American White Plymouth Rock Club. We met both Mr. George and his birds at the late Boston show and found that there was no discount on either. During the past three years Mr. George has won the lion's share of the prizes at Boston, where the very hest birds are brought together. His record three years ago was 15 prizes on 11 entries. Last year it was 21 prizes on 11 entries, which was double the number of prizes won by any other exhibitor. This year he won twice as many first prizes as any other exhibitor, three times as many seconds as all others combined and as many thirds as all others and there were 26 exhihitors and 136 birds, the cream of New England. This makes a record of 62 ribbons at Boston in the past three years. At Haverhill, Mass., this season, which is one of the largest shows outside of Boston, this firm made a clean sweep of all first, second and third prizes except third on pen. It is useless to attempt to comment on a record like this. It speaks for itself and fairly and squarely places E. H. & S. H. George right at the top. If there are any hetter birds in the East they have never been hrought to the Boston show. This strain of White Rocks has been intelligently and systematically bred and some of the individual specimens which we saw at the

W. A. GREENE,
New Albany, Ind. White Plymouth Rock Specialist.

Boston show are about as near perfection as we ever expect to see in White Rocks. Two of the most noticeable characteristics of the strain are the evenly serrated low combs and large size of the birds, two points which all hreeders know are most difficult of attainment. This firm now has a large numher of breeding birds for sale and have mated up their pens from which egg customers are assured of getting something unusually fine.

### BRIGHT'S BARRED ROCKS AND BROWN LEGHORNS.

Mr. William Ellery Bright, proprietor of the Grove Hill Poultry Yards at Waltham, Mass., has again met and downed competition in a manner that must certainly be gratifying to him. At Philadelphia he won 43 regular and special prizes, including five first prizes and specials for best display in both classes. At Boston this season also he won three out of five firsts on Barred Rocks, also specials for best display, hest cock, best cockerel, best collection, best exhibition yard, best cock and two hens and best cockerel and four pullets. He did not exhibit in the Leghorn class at Boston. Too much importance cannot be attached to these winnings when the size of the shows and the popularity of the varieties are taken into consideration. Mr. Bright wins year after year and seeks the hottest competition it is possible to find. In all the years he has heen breeding these varieties his constant aim has been to breed the hest and to accomplish this end he has spent time, money and skill without limit. He is a true fancier and one with whom the financial returns from the business is a secondary consideration but as a business man he naturally conducts his plant in such a manner as must necessarily bring him a large and profitahle husiness. Mr. A. C. Smith, the superintendent of this plant, is one of the oldest and most experienced poultrymen in the country and Mr. Bright is to be congratulated upon having so valuable an assistant. These remarks relative to Mr. Bright and Mr. Smith are not simply compliments to them. The circumstances are mentioned because they are an assurance to patrons of the Grove Hill Poultry Yards that all

## What Heck Says, Continued.

stock and eggs purchased by them can be relied upon as being the best that skill and experience can produce. While at this plant recently inspecting it with Mr. Smith we could not fail to notice the careful attention which he gave to details and the vigilance he exercised in seeing that everything was properly looked after by the help employed for that purpose. These items all count in the quality of stock produced as well as in the economical management of the business and it is not to be wondered at that the stock is all vigorous, healthy specimens that are valuable additions to any flock.

The above cut is a likeness of Mr. M. L. Edson, of Jacksonville, Ill., who is the proprietor of the Peach Grove Poultry Yards, where some of the best in Barred Rocks is annually produced. Mr. Edson has been breeding Standard bred poultry for the past 25 years and for 19 years he has made a specialty of the Barred Rocks. The many premiums won by him are evidence of the high quality of his stock and his large number of satisfied customers is an excellent testimonial of his fair dealing. He has been using trap nests in his breeding yards for several years and by careful selection in this manner he has established a strain of his own and can supply customers with line bred birds properly mated and without any danger of the drawbacks resulting from inbreeding.

### MR. A. C. HAWKINS, LANCASTER, MASS.

If there is a man, woman or child interested in Standard bred poultry who is not familiar with the name of Hawkins they must certainly be recruits who have never seen a poultry journal. This is simply a testimonial to the popularity of Mr. Hawkins' strain of Plymouth Rocks and Wyandottes. We believe that it will be conceded by all that he breeds more birds and sells more stock and eggs than any other breeder in America which it seems may be considered as ample evidence that he not only has all he claims in the way of quality but that he has it in sufficient quantity to supply an almost unlimited demand. His strains have become somewhat of a standard as will be noted by the number of advertisers who draw trade by reason of their claims to be breeding stock from his yards. He has been doing a constantly increasing business for the past twenty years until it now extends into every state in the Union and has reached such proportions as require several farms devoted to poultry alone in order to produce enough birds to fill his orders. He furnishes the winners each season at scores of shows all over the land, including the very largest and best. This is a strong statement and one which may at first appear as an exaggeration, but it has one redeeming feature and that is, it is the truth. In order to not compete against his customers he has not shown his birds anywhere this season but at the Boston show he had a display of Barred Rocks, Buff Rocks and White Wyandottes for exhibition only and the interest centered in them and the attention given them by judges and breeders could but impress all who admired them with the thought that had they been entered in competition there would have been a different story told by the awards. Mr. Hawkins specialties are barred White and Buff Rocks and White and Buff Wyandottes.

### THE LEADERS IN RHODE ISLAND REDS.

House Rock Poultry Farm, Wollaston, Mass.

The Rhode Island Reds are increasing in popularity all the time and particularly in the East, where they have been extensively bred for many years. They are undoubtedly one of the best fowls for market purposes, as they are of medium size, resembling the Plymouth Rocks and Wyandottes in shape and are heavy layers of a rich brown egg. In many cases they have made phenomenal records in this line and have been taken up exclusively by many breeders who have thoroughly investigated the good points of other breeds with a view to getting the most suitable for fancy and market purposes. At the late Boston show the entries exceeded in number those of Plymouth Rocks and other popular varieties. It was here in one of the largest classes ever shown that the House Rock Poultry Farm of Wollaston, Mass., justly won the lion's share of the prizes and again demonstrated that their birds are the leaders. In the Single comb class they won in addition to 15 regular prizes the silver trophy for best display at the show, also $20 in gold offered by the Rhode Island Red Club for the best exhibit by any member. Other specials were for best cock and four hens, best two cocks, hens, cockerels and pullets, best cock and four hens, best cockerel and four pullets and a number of other equally important ones. In the Rose comb class they won 14 regular premiums and specials for best display, best two cocks, hens, cockerels and pullets, best exhibition yard, second best cock and four hens, best cockerel and four pullets and a number of others. At Philadelphia this season they won nine first prizes and nine second prizes out of a possible ten each. They won 42 prizes on 36 entries and $50 gold special for best display in the Single comb variety and $25 in gold for best display in the Rose comb variety. These are the kind of records which count, as they practically sweep aside all competition and place the House Rock Poultry Farm where even its competitors must acknowledge it to be the leader. The farm consists of 150 acres and there are now on the place more than a thousand birds which will be shipped to their many customers during the coming breeding season. Our readers who would like to get a start in these handsome and useful birds will not make a mistake in placing their order with these people.

First prize cock, cockerel, hen and pullet at the Cainsville, Mo., Show, where H. T. Rogers, breeder of the Mammoth strain Light Brahmas, made a clean sweep against 200 birds.

### ELM POULTRY YARDS, HARTFORD, CONN.

One of our new advertisers this month who is worthy of the special attention of our readers is the Elm Poultry Yards of Hartford, Conn., owned by the veteran breeder Mr. F. O. Groesbeck. This is one of the largest eastern plants and now contains 3,000 birds, consisting of White Leghorns, Black Minorcas, Barred and White Rocks and White Wyandottes. It is Mr. Groesbeck's policy to make large

# What Heck Says, Continued.

exhibits each season and thereby prove to intending purchasers that tbe stock is constantly improved and kept to Standard requirements to the greatest degree. He has won this season at Boston, Philadelphia, Hagerstown, Hartford, Danbury and Waterbury and will also show at New York and Chicago. At Madison Square, New York, last season he won the President's cup, valued at $100, for the best cock, cockerel, hen and pullet in the Leghorn class, all varieties competing. This was won by his White Leghorns. The prize is one of the most valuable and desirable ones offered at the New York show. At Philadelpbia this season he won the special offered for best display of White Leghorns. At Boston the record on this variety was 19 regular and special prizes on 17 entries, winning more firsts, seconds and thirds than any other exhibitor and tbe American Leghorn Club's cup for best exhibit. On Black Minorcas, 13 prizes on 10 entries, including three firsts out of four competed for and special for best display. On White Rocks 4 prizes on 4 entries, including first cockerel. These yards are scattered over tbree farms where for the past twelve years prize winners in large numbers bave been produced each season. Mr. L. C. Bonfoey, tbe well known breeder of Barred and Wbite Rocks, formerly of Higganum, Conn., is now superintendent of this extensive plant and his experience is such tbat he will surely keep up the bigh quality of this stock and make an improvement, if such a thing be possible. He will have about 50 breeding pens mated for the egg trade this season and we predict that customers of the Elm Poultry Yards will carry away the blue ribbons at many of tbe shows next winter.

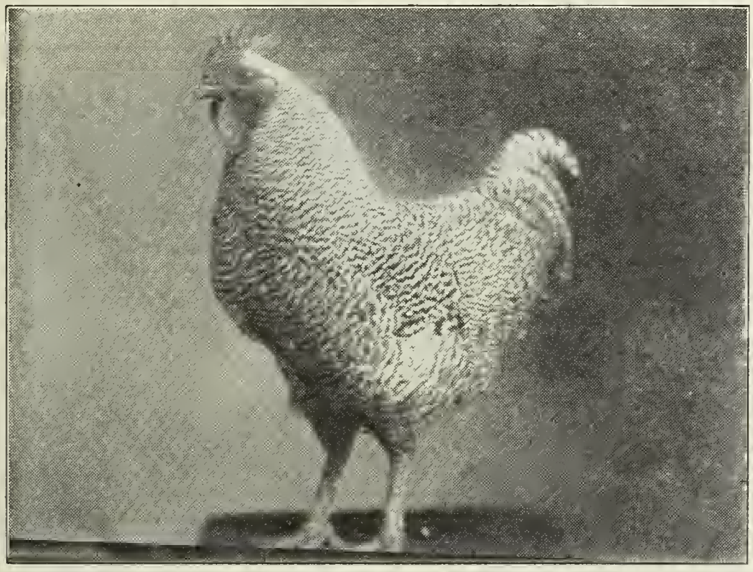
SHOVE'S RHODE I[illegible]D REDS.

This variety of fowls, both Single and Rose comb, are bred very extensively in the New England states and one of the most popular strains is that of Mr. Daniel P. Shove, of Fall River, Mass. Mr. Shove has quite a record on these birds, he having won many firsts and specials at the great Brockton, Mass., fair, Poughkeepsie, N. Y., Philadelphia and Boston. He has the finest flock this season which he has ever raised and is selling eggs at priccs wbich make them bargains, as will be noted by referring to his advertisement. He also breeds prize winning Houdans, Barred Rocks and Golden Sebright and Buff Pekin Bantams. Our readers should write Mr. Shove for one of his circulars, which will be sent free.

DENNY'S BUFF ROCKS.

We are pleased to note that Mr. W. C. Denny is preparing to engage more extensively in the breeding of Buff Plymouth Rocks. He has always been right at the top as far as quality is concerned as his many winnings in strong competition show. He is one of the oldest of the prominent breeders of this variety, having been interested in tbem since their admission to the Standard in 1893. He was first prominent as secretary and treasurer of the American Buff Plymouth Rock Club which he founded, and which position he has held continuously ever since. This has cnabled him to push the breed to the front and it is largely due to his efforts that the Buff Rocks are as popular today as tbey are. Among his winnings last season was the cup at Madison Square Garden, New York, for best cock, hen, cockerel and pullet shown by one exhibitor. At Elmira, N. Y., December, 1899, he won three gold specials, all firsts but one, and ten prizes on eleven birds, also the club cup competed for by state members for best cock, cockerel, hen, pullet and pen.

At Boston, 1901, he won first hen, second cock and third cockerel, also special for best cock and two hens and special for best surface colored male. This record at Boston is evidence that he is keeping his stock up to his past higb standard.



BARRED ROCK COCKEREL.
As bred and owned by Cherry Grove Poultry Farm, Ed. Isley, Proprietor. Mr. Isley also breeds high class Black Langshans and Bronze Turkeys, and has won many leading prizes at some of the largest shows of Indiana, Ohio and Kentucky.

M. J. TEMKOVITS,
Brooklyn, Ohio, breeder of Barred Plymouth Rocks.

A GREAT RECORD.

FENTON, MICH., Jan. 6, 1901.
*Mr. W. R. Wooden, Battle Creek, Mich.*
DEAR SIR: I made tclean sweep at our show against strong competition with the chicks hatched from the one setting of eggs purchased from you last summer. The chicks were hatched June 18, and the first pullet weighed 5 pounds and scored 93¾.

*I was fool enough to sell her for $15.* l got first and second cockerel, 90¾; 90¼; first, second and third pullet, 93¾, 92½, 92¼, 90¼. Tbis is a pretty good record for your stock; fifteen chicks hatched from one setting of eggs, and six of them scoring better than 90. I have two more pullets from the same hatch that I am confident will score better tban 90.

Judge Tucker said that the first pullet was the best for her age that he ever scored.

Book me for more eggs next year.
Respectfully,
J. N. PAGE.

The above testimonial shows tbe kind of eggs sent out by Mr. W. R. Wooden the Buff Wyandotte specialist of Battle Creek, Mich. Judging from Mr. Wooden's excellent record in the show room it would seem that he would have no trouble in pleasing all his egg customers about as well as he has Mr. Page. He wins more than his share of the prizes wherever be exhibits.

Mr. H. D. Hopkins, of Montpelier, Vt., is now booking orders for eggs from his Wbite Plymouth Rocks. His record this season shows that bis birds are all rigbt and we are informed by one of the judges who has seen Mr. Hopkins' birds that eggs from them will surely produce some prize winners. He exhibited one pen at Boston and won 4th in competition with nine pens. At Woodstock, Vt., he won 1st pen and at Montpelier, Vt., 1st cockerel, 1st, 2nd, 3rd and 4th pullet, 4th hen, 1st and 3rd pen. He is a prominent member of the American Wbite Plymouth Rock Club and guarantees to please his customers.

Mr. Oscar E. Brooks of Edison Park, Ill., has an advertisement in this number and is offering eggs from his White Plymouth Rocks at $2 per setting. He has some excellent stock of this variety and guarantees satisfaction to his customers. Mr. Brooks is a member of the White Rock Club and is a careful, painstaking breeder who breeds for quality rather than quantity.

# Boston Show---General Description of the Classes.

## AMERICA'S GREAT SHOW AGAIN BREAKS THE RECORD.

Boston is a great town. Boston is almost as great as New York, and New York is almost as great as Chicago, but in some respects Boston has both places blotted clear off the map. If there is a street in the town long enough or straight enough for one to stand in the middle of it and see six blocks ahead, we failed to find it, and we think we traversed most of them in our efforts to locate the exhibition hall. Boston is laid out in spots, as it were, something on the spider web plan, but when it comes to holding a poultry show Boston is entitled to first prize and several specials. The show, as usual, was cooped by Spratt's Patent and the feeding of the birds was entrusted to them. The total number of entries as shown by the catalogue was 5,196. This inclules poultry, pigeons, Belgian hares, cats, dressed poultry and miscellaneous entries. In the poultry department there were 2,070 specimens in the open classes and 815 in the 163 exhibition yards, making a total of 2,885 birds. White Wyandottes were the largest class, with 354 specimens; Light Brahmas, 217; Rhode Island Reds, 172; White Plymouth Rocks, 145; Barred Plymouth Rocks, 136. Other classes ranged from 100 down. Exhibitors from eighteen states and Canada sent birds to Boston, and thirty judges placed the awards, each of whom was a specialist in his line. A most enjoyable banquet was given Tuesday evening of show week and was attended by 100 of the most prominent breeders and judges. It was an entirely informal affair, arranged solely and exclusively for the purpose of having a good time, and the desired result was certainly accomplished. The consensus of opinion was that the only criticism which could be made of the Boston show was that it did not come often enough. The hall in Mechanic's building, where the show was held, was handsomely decorated and has a floor space of about two and a half acres, all of which was occupied with exhibits. Incubators, brooders and all kinds of poultry supplies and appliances were displayed in liberal quantities. An English fattening or cramming machine, the operation of which should be prevented by the Society for the Prevention of Cruelty to Animals, was being worked upon a lot of half grown Brahma cockerels which were more dead than alive. The management of the show was as near perfect as it is possible to handle an enterprise of this kind, and the New England breeders are to be congratulated upon having an association with as capable a lot of officers as those now in charge of the Boston association. All premiums were fully and promptly paid, and a handsome reserve fund left in the treasury. The expenses of conducting the Boston show this season were nearly $12,000, or an average of about $2,000 per day.

### BARRED PLYMOUTH ROCKS.

Cocks; (13) First, large, well formed bird; in fine condition; nice, even color; wing-bow barring very good; fails somewhat in beak color; poor in legs; large comb, slightly dished. Second cock: First cock at Boston, 1900, and third at New York, 1900; a very rangy bird; only fair in comb; nice legs and beak; wing barring grand; surface color of back a little mosey; grand good under color throughout. Third cock: a dark, close barred bird; flights and secondaries simply grand; comb dished. Fourth cock: A good bird throughout; thought by many of the Rock men to be best bird in class.

Hens (15). Remarkably good as to surface color, and well carried down; splendid wing; nice beak, eyes and legs; too large comb; neck color mosey; poor shape of back and tail. Second hen: Not clear in color; stripe in back of beak; comb too high in back; poor tail. Third hen: Coarse in head, stripe in back; poor in legs; good neck and wing-bow barring; good flights; a good bird, but better ones not placed. Fourth hen: A clear, sharp barred bird; nice in shape, fine in breast; good legs; flights a little ——— in barring; wings excellent. Fifth hen: Not as good all-round bird as sixth, we thought; poor in shape! poor wing and back. Sixth hen: Large, shapely bird; rather light in color, but even and barred to skin; nice eyes, beak and comb; comb low.

Cockerels (34). First: Quite a shapely bird; nice beak, eyes and comb; good legs; nicely barred all over, but a little dark on back; wing-barring and under color good. Second cockerel: A large, broad breasted bird; grand in legs, beak, comb and eyes; little short in breast; needs filling a little in back and tail; surface color must have given him his place. Third cockerel: Nice shaped bird, with good length of body; little off in legs; good comb. Fourth cockerel: Three birds have this award; all strong, narrow barred birds.

Pullets (30). First: Even and fine in barring; the width of black and light bar very evenly balanced; off in shape, being narrow in body and back; shape of head poor; high comb. Second pullet: Rather light, opened barred bird; a little on the Wyandotte shape; a little mosey on back; poor in wings. Third pullet: Nice shaped bird; good legs, beak, eyes and comb; a very clear colored bird. Fourth and fifth: Fairly good specimens.

Pens (8).—First pen. Male bird one of best in show; fine eyes, beak and legs; little weak in comb; rather short in body; otherwise fine specimen. Females, all large birds; deep blue and strongly barred; weak points being in head and dark color of necks. Second pen: Much the same type as first. Third pen: Even colored, well matched lot of birds; neat heads with small combs on females; male bird a little past best show condition; comb trifle large.

Here we find a good illustration of the "ups and downs" of the exhibitors. The first pullet at Philadelphia gets nothing here—not a mention. A pullet that got no mention at Philadelphia gets fourth here. The first prize cock here was not in the winning at all at Philadelphia.

WHITE WYANDOTTE.
White Wyandotte cockerel, raised this year by C. S. Wetmore, Lockport, N, Y.

### WHITE PLYMOUTH ROCKS.

A most wonderful class; more Whites shown here than Barred birds, and a truly magnificent lot. The showing made here by "George, of Groveland" (E. H. and S. H.), excited the admiration of all breeders.

Cocks (15).—First cock: A very blocky bird; very good comb; most even in pure color throughout; a truly grand, good bird. Second cock: A bird which as a cockerel scored 95 by May; little off in comb; excellent legs and feet; wide, properly shaped tail; deep breast; fine color. Third, fourth and fifth, birds of rare good merit.

Cockerels (29).—First: A grand, good bird, in pink of condition; exceptionably good in color; breast a mar-

velously good one; rather large comb; somewhat pinched in tail. Second cockerel: A late batched bird, undeveloped, but one of exceptional merit; a bird that will certainly make a leader; great breadth of body; full brother to first pullet; look out for this bird, later. Third cockerel: Too high on legs; nice comb. Fourth cockerel: Best bird but for new feathers which show cream color; magnificent in shape; nearly perfect comb, best comb in class.

Hens (20).—First hen: Best P. R. shape in class; perfect comb; all over pure white; a wonderfully good specimen. Second hen: A bird that it is hard to find fault with. Third hen: Has won at Boston 1st three years in succession. This tells the whole story as to her great worth.

Pullets (41).—First pullet: Won on superior shape and color; off in comb. Remainder of winning pullets followed one another closely; all good birds.

Pens (9).—So closely were the winners in quality that it would not do to here draw the distinction. A great showing of superior birds.

WHITE PLYMOUTH ROCKS.

By Massachusetts Society—For best display, E. H. & S. H. George, Groveland, Mass.; for best cock and two hens, E. H. & S. H. George; for best cockerel and four pullets, E. H. and S. H. George.

By a friend—For best two cocks, two hens, two cockerels and two pullets, E. H. & S. H. George.

By New England Plymouth Rock Club—For best cock, E. H. & S. H. George; for second best, Nolan Bros., Milford; for best hen, E. H. & S. H. George; for second best, E. H. and S. H. George; for best cockerel, E. H. & S. H. George; for second best, E. H. & S. H. George; for best pullet, E. H. & S. H. George; for second best, E. H. & S. H. George; for best collection of one cock, two hens, two cockerels and four pullets, E. H. & S. H. George.

BUFF ROCKS.

Cocks, 2; hens, 4; cockerels, 11; pullets, 8; pens, 3.

Not at all a strong class; but few specimens of more than ordinary merit. There were some nice pullets and cockerels, and outside of these the quality was only fair. First cock, the winner at Cleveland the week before, a grand fellow in color, but with very poor comb.

SILVER WYANDOTTES.

This display ought to do a great deal to keep the S. L. Wyandotte moving along, and to convince breeders that the variety is being improved. Here we found the pure white and black, brought out properly, in the most difficult mixture the Standard makers have asked breeders to compound. The females shown by John C. Jodrey are certainly far in advance of the breed, as usually found, even in the best shows. It affords me genuine pleasure to here testify to this man's ability as a breeder of this most excellent variety. In the winning list the birds closely following the leaders were of rare worth. Females were, of course, superior to the males in clearness of lacing, the best females I have so far seen.

GOLDEN WYANDOTTES.

Cocks, 6; hens, 7; cockerels, 7; pullets, 9; pens, 2.

Some very fine specimens. The evidence of any particular advance in breed was not forthcoming, but here we found some of the best Goldens so far shown.

BUFF WYANDOTTES.

Cocks, 10; hens, 9; cockerels, 13; pullets, 10; pens, 5.

Here we have further evidence that Buff Wyandotte Breeders have and are leading the Buff Rock breeder as to color markings. This class contained a few birds that were far and away better buff color, throughout, than the best Buff Rocks exhibited this season. First cockerel and first hen are truly wonders as to color. First pen was the admiration of all buff admirers. While this showing of Buff Wyandottes was not a large one it contained extra choice quality, and while the winners were exceptional birds, the exhibitors down the line need not feel badly as to the worth of their stock. A winning hen was a great triumph, and this carries with it the recommendation of those birds who proudly "stood just outside."

PARTRIDGE WYANDOTTES.

Catalogued as "Partridge, or Golden Penciled Wyandottes. (This is a direct pointer as what eastern breeders desire as to name. Carefully note the significance of this show thus cataloguing this variety.)

Cocks, 5; hens, 6; cockerels, 6; pullets, 6; pens, 1.

It is a fact that the new variety is to become quite popular. They are very handsome birds. I learn that two of the most prominent eastern breeders, men who have gained a national reputation as leaders in their chosen breeds, have been working on this variety (and Silver Penciled ) for several years and will put them on the market just as soon as the name is officially adopted. The birds here shown were strongly Wyandottes in character and free from any false markings.

WHITE WYANDOTTES.

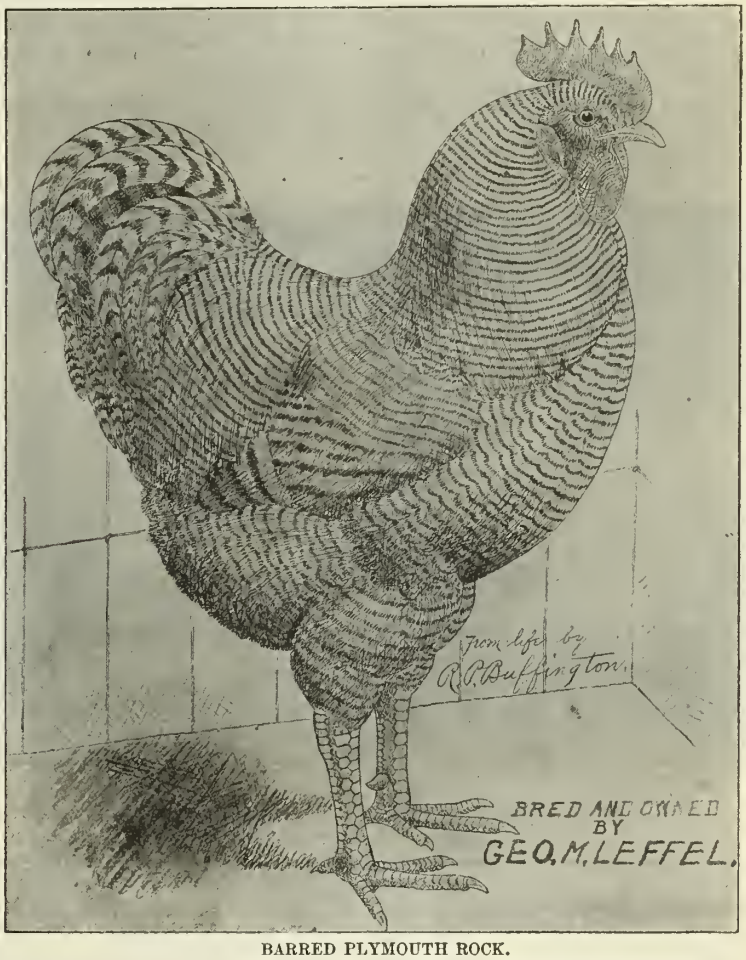
The undisputed leaders of this great show. A total of 409, with 228 in open class, and 35 pens. Here several uncrowned kings battled for the best honors—Durston, Cheston, Smith, et al. We will not attempt to describe in detail the winners. It is evident that they were, of necessity, specimens of great worth. The following detailed report of winnings will bring to view the fellows who stand upon the ramparts, but tells not of the gallant birds which went down, but not to other than defeat in which there is honor:

By Massachusetts Society—For best display, James Cheston, Jr., Chestnut Hill, Pa.; for second best display, W. R. Graves, Auburndale; for best exhibition yard, James Cheston, Jr.

By Boston show—For best cock and four hens, Arthur G. Duston, Marlboro; for best cockerel and four pullets, James Cheston, Jr.; for third best exhibition yard, A. G. Duston; for fourth best exhibition yard, C. A. Briggs, Taunton; for fifth best exhibition yard, Holton & Wilson, Melrose.

By Eastern White Wyandotte Club—For best cock, Arthur G. Duston; for best hen, W. R. Graves; for best cockerel, James Cheston, Jr.; for best pullet, James Cheston, Jr.; for best pen composed of birds owned and raised by exhibitor, James Cheston, Jr.; for second best, W. R. Graves; for best display, Highland Poultry Yards, West Roxbury; for four best cockerels owned and raised by exhibitor, Arthur G. Duston; for best two cocks, Arthur G. Duston; for best two hens, W. R. Graves; for best shaped pullet, James Cheston, Jr.; for best shaped cockerel, W. E. Mack, West Woodstock, Vt.

American Stock Keeper silver cup—For best cock and two of his get, owned by the exhibitor, James Cheston, Jr.



BARRED PLYMOUTH ROCK.

Champion Son the 4th that scored 94½ by L. G. Jarvis, Guelph, Canada. Owned and bred by Geo. M. Leffel, Springfield, Ohio.

LIGHT BRAHMAS.

As usual this grand old breed came

out in strong numbers.

Cocks, 19; hens, 35; cockerels, 44; pullets, 48; pens, 15.

Most all birds of the distinctive eastern type. When a western man examines the winners he doubts "where he is at" as to Light Brahmas. If we take the awards here as reflecting eastern ideas of L. Brahmas we find that the east and west are very far apart. In the cockerel class, in particular, this was strongly illustrated. The bird that was given C. was in our opinion the ideal type and the best L. B. cockerel we have ever seen. In this we are sustained by nearly every breeder present, and upon this bird all agreed.

The classes throughout contained birds of rare merit. The following are the awards:

The Governor Greenhalge cup for largest and best display, J. W. Shaw, Brockton.

By New England Light Brahma Club—First prize cock, H. B. Bumford, Waltham; second, J. W. Shaw, Brockton. First prize hen, J. W. Shaw, Brockton; second, L. R. Whittaker, Brighton. First prize cockerel, J. W. Shaw, Brockton; second, same. First prize pullet, J. W. Shaw, Brockton; second, L. R. Whittaker, Brighton. Best cock and four hens, J. W. Shaw; second, H. B. Bumford. Best cockerel and four pullets, J. W. Shaw; second, Rollins Bros., Woodville.

By Massachusetts Society—For best display, J. W. Shaw; second, H. B. Bumford.

By Boston show — For best exhibition yard, J. W. Shaw; second best, J. P. Keating, Westboro.

DARK BRAHMAS.

Rare good specimens. A total of 58 birds.

BUFF COCHINS.

Total of 32 in the classes and one pen, all property of Oakland Farm, and in a class all their own. Most magnificent Buff Cochins.

PARTRIDGE COCHINS.

A very warm class throughout. Here we found very superior quality. It was a class throughout where the quality was high. A feature of the exhibit was a string of birds sent from the west by S. A. Noftzger. That prince of good fellows and royal fancier, Mr. Fred E. Baldwin, was present with his string and won the praise of the eastern exhibitors and breeders. Beyond all question the Noftzger hen, No. 243, given third, was the best hen in the class. This is conceded by every P. Cochin breeder present, almost. There were 59 in open classes, besides. Len and Baylies wore most firsts, being pushed hard by Noftzger.

OTHER BREEDS.

Best Black Cochins ever shown at Boston. Remarkably fine birds, and large class. Whites, a small lot of superior birds; Langshans, good throughout; moles exceptionally good. The West needs some of these birds.

Leghorns, a grand lot, the Whites leading in quality.

Houdans, small entry. Winners in cock and hen class good. First hen and first cock remarkably good birds. Display pen contained a lot of even and correct colored birds. but they were feathered on legs and toes.

Polish Hamburgs and like varieties well represented.

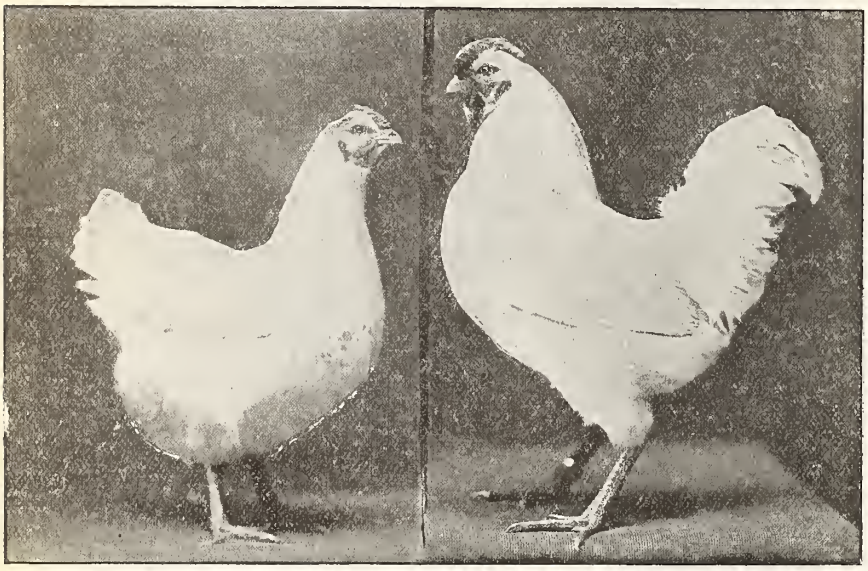
Indian Tames a poor class. Nothing worthy of special mention.

Rhode Island Red, a large class. We were told by several exhibitors that there were "some fine ones."

Best Blue Andalusians ever shown Rare, beautiful birds.

In Bantams the showing was a superior one, as it always is here, in most classes. A few of Barred Rock Bantams, imported from England, were shown. They are very crude, and lack woefully in Rock characteristics.

THOS. F. RIGG.



PAIR WHITE WYANDOTTES

Prince, a New York winner, scored 96½ by Bridge. Beauty, 1st hen at Chicago, scored 96 by Bridge. Owned and exhibited by Ira C. Keller, Prospect, Ohio.

## AMERICAN BUFF WYANDOTTE CLUB.

At the annual meeting held in Philadelphia, December 12th, 1900, the following officers were elected: President, L. C. Piser, Shushan, N. Y.; vice president, A. P. Groves, Chestnut Hill, Philadelphia, Pa.; secretary and treasurer, W. R. Wooden, Battle Creek, Mich.

Executive committee, L. C. Piser, A. P. Groves, L. L. Doolittle, C. S. Mattison and W. R. Wooden.

The club voted in favor of holding the next annual meeting in the West, and also instructed the secretary to prepare and issue a club catalogue at once.

The club is in a prosperous condition, and arrangements are being made to insure the most aggressive efforts to further the interests of the club and variety represented.

A large meeting with liberal specials is assured for the West next year.

It is the duty, and to the interest of every breeder of Buff Wyandottes, to unite with the club. Join before the catalogue is issued, and be included with the published list of breeders of this grand variety. Write to W. R. Wooden, secretary, Battle Creek, Mich., and he will do the rest. *Send in your dollar when you write, as he will keep after you until he gets it, anyway.*

## BLUE ANDALUSIANS.

It is proposed to form a club composed of persons engaged in the breeding or interested in the welfare of the Blue Andalusian Fowl. It is hoped in this way to advance the interests of this breed and to bring it into public notice. The annual dues will be trifling, probably one or two dollars. A meeting for organization and choice of officers was held during the Boston show in January, 1901.

Until the organization in January, 1901, the following served as officers:

E. L. C. Morse, Chicago, Ill., president pro tem; Newton Cosh, London, Canada, vice president pro tem; R. W. Lovett, Boston, Mass., secretary pro tem.

There will be no initiation fee and no expenses until after the organization of the club in January.

Breeders of Blue Andalusians are invited to become members, also to suggest at once to the undersigned any persons of their acquaintance whom they think should be invited.

ROBERT W. LOVETT,
Secretary Pro tem.

Boston, Dec. 19, 1900.

## THE AMERICAN POLISH CLUB.

The annual meeting of this club will be held in old city hall, Market street, Pittsburg, Pa., on Thursday, Feb. 21st, 1901, at 10 a. m., in connection with the great Pittsburg show. All members are requested to join this club. Send in your Polish and Polish Bantams are urgently requested to poin this club. Send in your application and fee, which is $1, and become a member of this growing and popular club at once. All breeders are requested to send an exhibit of Polish to the Pittsburg show. The prizes are large and a special Polish judge has been secured to place the ribbons. Are you with us? We earnestly hope so. For any information regarding the club address M. V. Caldwell, secretary and treasurer, Route No. 2, Leetonia, Ohio.

## HENRY STEINMESCH'S CHICK FOOD.

This article of food for chicks, manufactured by Mr. Steinmesch, is the result of the experience of years of experimenting by a fancier who knows how to raise good birds right. It is a mixture of cracked grain and small seeds, to be fed from the time the chicks are hatched until they are ten weeks old. Every AMERICAN POULTRY JOURNAL reader who is raising chicks should send an order to Steinmesch & Co., St. Louis, Mo.

# Meeting of American Poultry Association.

Synopsis of the Proceedings of the Twenty-Fifth Annual Session, Held at Chicago, Ill., January, 23d, 1901.

The Chicago meeting of the American Poultry Association was one of the largest and most enthusiastic held for many years. It was called to order at the Sherman House by President Kegley, whose address was replete with valuable suggestions and was attentively listened to by all present. He paid high tribute to the Chicago association and called attention to the truly national character of its exhibitions. He spoke at length upon the objects of the American Poultry Association and deprecated the many rumors of the possibility of the organization of a rival association. Among the suggestions offered was one that the association should take immediate action relative to the increased express rates being charged persons buying fancy poultry and eggs, also that some steps should be taken toward getting the judges to work in greater harmony and that the various specialty clubs should be more closely affiliated with the association. The report of the secretary-treasurer showed a cash balance on hand of $2,184.

New members were received as follows: D. T. Heimlich, Jacksonville, Ill.; J. M. Johnson, Clay Center, Neb.; Miller Purvis, Chicago Lawn, Ill.; J. W. Miller, Freeport, Ill.; W. J. Adam, Joliet, Ill.; J. Lewis Draper, Oak Park, Ill.; H. V. Norton, Oak Park, Ill.; R. E. Jones, Flat Rock, Ind.; H. R. Kingman, Battle Creek, Mich.; W. A. Doolittle, Sahetha, Kan.; E. A. Saunders, Chicago, Ill.; W. R. Wooden, Battle Creek, Mich.; W. F. Worth, Wheatland, Wis.; George P. Rose, Shawneetown, Ill.; Dr. A. W. Bell, Toronto, Ont.; J. C. Stelwagen, Wayne, Mich.

The next order of business was the election of officers and Mr. George T. Pitkin, of Chicago, was nominated for president. He declined to accept the honor and placed in nomination Mr. Fred L. Kimmey. The nomination was seconded by Mr. Frank B. White, who gave seven good and sufficient reasons why Mr. Kimmey should be honored with the position. He stated that he possessed executive ability, a pleasing personality, capability, and had ample time at his disposal, was a true fancier and that his identifications with poultry organizations peculiarly fitted him for the position. By a unanimous vote of the association the secretary was instructed to cast its vote for Mr. Kimmey for president. Mr. Kimmey thanked the members in a few well chosen words and took occasion to mildly censure the critics of the association. Mr. H. A. Bridge was nominated for secretary-treasurer and a motion was made and carried authorizing the president to cast the vote of the association for Mr. Bridge. A committee of five was appointed for the purpose of making nominations for minor offices. The committee consisted of Theo. Hewes, T. E. Orr, Sid Conger, George T. Pitkin and Henry Steinmesch. Their recommendations were unanimously accepted. Mr. Grant M. Curtis, formerly of Quincy, Ill., now of Wayland, N. Y., was elected as a member of the executive committee from that state.

Messrs. Zimmer, Pierce and Hewes were appointed a committee to describe the under color of Partridge Cochins and the color of legs, eyes and beak of Buff Wyandottes, the Standard description being deficient in these points. The report was accepted, which provided that in Buff Wyandottes the beak be rich yellow, eyes bright hay, face bright red, comb bright red, wattles and lobes bright red shanks yellow. In the Standard description of under color for Partridge Cochins, after the words "reddish brown" insert "dark slate under color."

The Standard description of Black Minorcas was changed to read 6 points instead of 5.

Motion was carried which provided that changes in Standard might be proposed as late as June 3, 1901, for action by the association at the next annual meeting and that the secretary have all proposed changes published in at least twelve poultry journals.

FRED L. KIMMEY, Morgan Park, Ill.
Pres.-elect American Poultry Association.

The constitution was amended to read as follows: "The term of office of the president and secretary shall begin upon the first day of July following their election and shall expire at the close of the last day of the following June." This change affects only the office of president at this time, which allows Dr. Kegley to hold over till June 30, 1901.

The secretary was authorized to destroy 322 copies of the Standard, of the 1894 edition.

Motion was carried that a committee be appointed to edit the constitution and other matter sent out by the association and that it consist of two Eastern judges, two Western judges and a fifth member of known editorial ability, they to meet at the Pan-American Exposition to be held at Buffalo. The chair appointed Messrs. Drevenstedt, Zimmer, Pierce, Russell and Sewell.

A committee composed of Messrs. Curtis, Conger and Hewes was appointed to confer with the proper representatives of the express companies with a view to obtaining a reduction in the rates now charged on shipments of fancy poultry.

Authority was given to Mr. James Forsyth, ex-president of the association, and one other member to go before the United States Board of Agriculture and ask that the American Poultry Association be given proper recognition by that body.

A committee of five, composed of Mr. F. L. Kimmey, C. A. Sweet, J. Y. Bicknell, G. T. Williams and Grant M. Curtis, was appointed for the purpose of protesting to the management of the Live Stock Department of the Pan-American Exposition against the excessive entry fees to be charged exhibitors in the poultry-department.

A petition signed by fourteen breeders of Partridge Wyandottes urging the admittance of the breed to the Standard was presented and favorably received. The Partridge Wyandottes are now a Standard variety. The description of color is the same as for Partridge Cochins and that of shape the same as for Wyandottes.

The following resolution was offered by Mr. W. R. Wooden, of Battle Creek, Mich., secretary of the American Buff Wyandotte Club: "Resolved, That this association by a majority of its members here present, elect a commission to consist of three members of this association to take under consideration the possibility and advisability of establishing a league of poultry associations to the end that all exhibitions held under the auspices of such league may be confined to uniform rules governing such exhibitions, their exhibitors and judges; such league to be composed of individual local associations, each of which shall conform to the rules of the association and each of which shall be entitled to representation in this association. Such commission shall report at the next annual meeting of this association and if such scheme be by it deemed advisable shall prepare and present a plan for the adoption or organization of such league with full and minute details as a part of its report to this association."

This resolution was adopted and Messrs. Wooden, Kimmey and Hewes were selected as the committee.

Mr. Wooden explained in a brief manner the possible advantages to be derived from action of this kind and every statement made by him relative to the matter was undisputably correct. He did more in five minutes toward arousing the American Poultry Association from the lethargic state into which it has fallen and placing it in the position it should occupy than has been done in the past fifteen years and in making this statement we do not exaggerate in the slightest degree.

312 EVANSTON AVE., CHICAGO,
January 2, 1901.

*Ed. American Poultry Journal, Chicago.*

DEAR SIR: In addition to the many orders and inquiries I receive from all parts of this country, from parties who state they saw my ad. in the AMERICAN POULTRY JOURNAL, I have received an order from St. Petershurg, Russia, for two pairs of Buff Cochins which will go on exhibition there.

As an advertising medium there can be none superior to your excellent AMERICAN POULTRY JOURNAL. Yours truly,

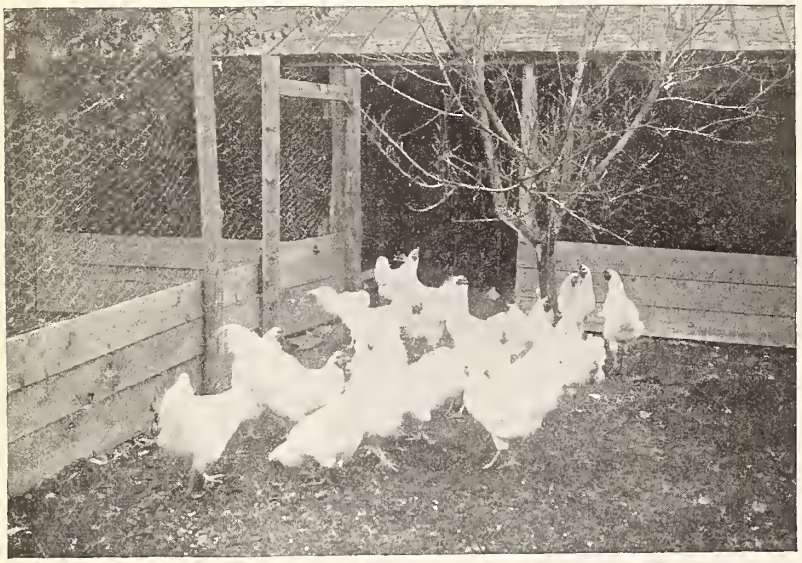
J. B. CLARK.

Good stock, good houses and yards and good care mean something, and so does the contrary. Reader, which course will you pursue? Always choose the right way; what is worth doing at all is worth doing well.

# America's Foremost Breeder of White Wyandottes.

ARTHUR G. DUSTON, MARLBORO, MASS.

We believe we are safe in saying that Arthur G. Duston hreeds and sells more prize winning White Wyandottes than any other hreeder of this variety. While at his farm recently we saw about two thousand big white hirds such as have made him famous. There were cocks, cockerels, hens and pullets hy the score as he has in the past. He has sold prize winners at Philadelphia, Hagerstown, Cleveland and scores of smaller shows this season and he still has a thousand birds to spare. The illustration shown here are object lessons to poultry raisers and these views are but samples of the many opportunities presented on his



Large pen of White Wyandotte cockerels, owned and bred by Artbur G. Duston, Marlboro, Mass.

which would reach the very limit of excellence in the show room and judging by the way orders were coming in there are a lot of people who know the quality of Mr. Duston's stock and his reputation for sending his customers full value for their money. Much of his success is the result of these conditions. We wish we were at liberty to give the amount of his sales for the last month. We believe it would open the eyes of many poultrymen and would he an incentive to push their husiness all the more. We will say, however, that it would take four figures to make the amount in dollars. He informed us that he had more orders for eggs booked than ever hefore at this season of the year and we congratulate all those who have decided to place their order with him. We can do this hecause we have seen the breeding stock which will produce the eggs. When his pens are all mated he will have about thirty of them and every hird in the lot will he capahle of winning a first prize in strong competition. He has gotten together a remarkahle flock of hreeders, many of which would score 96½ points under some judges. Some of the best combs we ever saw on White Wyandottes are on his hirds and he has shape almost to perfection. As for color, he has birds which could not he cut in any section. This may all sound like a fairy tale hut it is the actual truth as may he ascertained hy anvone visiting Mr. Duston's yards. If his birds were not of the high quality he could not have won over his competitors in the show room place for the camera to picture the splendid care Mr. Duston takes to hring his hirds to such form and condition as will fit them for competition with the best in the land and carry off the desirahle prizes. The huildings show the painstaking and intelligent care that is put upon them to afford the best possihle development of the stock. The protection of shade, the benefit of free range, the application of the colony house system, the selection and mating of pens, the sanitary precautions and the well appointed housing of the flocks, all go to make the foundation of a strain of fowls that has made the name of "Duston" the standard hy which White Wyandottes are measured all over the country. To start well is to start with Duston's White Wyandottes.

FRANK HECK.

Scene on Rose Lawn Poultry Farm, Artbur G. Duston, Proprietor. Specialist breeder of White Wyandottes.

## WISE SAYINGS.

The pleasures of poultry keeping are many. The occupation is honorable, ennohling, entertaining and healthful. Pleasant, light work out doors and in, diversion and remuneration. What more can we ask? What more do we want? Reader, a kind providence has given us these things to enjoy. Let us be thankful for them.

* * *

How the true fancier does enjoy a "poultry chat" with some one of the same mind—talks upon the past, present and future of fowl-raising. It is with great pleasure that we note its onward move.

* * *

Oats are one of our favorite feeds for fowls. Hayseed, chaff, etc., are excellent articles for bedding pens; fowls love to scratch in the litter, and the fresh, sweet scent is healthful and agreeable.

* * *

Clean up the yards, rake up the rubhish and thus add greatly to the good looks of your place. Appearances are not everything, hut they have their effects.

Freeport, Ill. JOHN M. WISE.

C. Bricault, of Bricault Poultry Farm, Lawrence, Mass., is the new manager of J. Foster Rhodes' Maplewood Farm at Woodstock, Vt. Mr. Rhodes, while a Chicago man and a memher of the hoard of trustees of the National Fanciers' Association of Chicago, has a beautiful place at Woodstock, Vt., where he makes a specialty of his poultry. On this farm are raised Light Brahmas, Buff and White Wyandottes, Buff and Barred Plymouth Rocks, Pekin Ducks; only the best strains hred of prize winners and prolific layers.

## EGG HARBOR FARM OF TUCKERTON, N. J., MAKES VALUABLE PURCHASE.

We produce below certificates of sale wbich tell a story of great value to tbe owners. In announcing this tbe proprietors of Egg Harbor Farm say tbey have now tbe largest and finest lot of white Indian Games in America.

This is no idle boast, for among their famous birds are the first cock at New York, 1900; first cockerel at New York, 1900; first cock at Hagerstown, 1900; also tbe first hen, first cockerel and first pullet at tbe same place, as well as first and second cock, first and second hen, first and second cockerel, and first and second pullet at Philadelphia, 1900.

As Mr. Orr already had a fine lot of prize-winning Wyandottes on bis farm, he is now in possession of as fine a lot of birds as any establishment in America, and tbat is saying a good deal.

Tbe Egg Harbor Farm won 40 prizes on 40 entries at Philadelpbia at tbe late show—a wonderful record, tbat sbows their white birds head the list.

THE ELLIOT FARM.

ORR'S MILLS, N. Y., Jan. 11, 1901.

This is to certify that I have sold to the Egg Harbor Farm, Tuckerton, N. J., my entire stock of White Indian Games, known as the "Mohican Tribe of White Indians," including all my winners, among them the cockerel and pullet that won first each at Hagerstown, Md., 1900. In procuring this flock I believe that the above mentioned farm has the very best blood in America, and I heartily recommend the above farm to all who really wish to get *blue blood*, as I know it is there.

(Signed) D. LINCOLN ORR,
Proprietor The Elliot Farm.

EGG HARBOR FARM.

TUCKERTON, N. J., Jan. 7, 1901.

This is to certify that we have sold to D. Lincoln Orr, Orr's Mills, N. Y., all of our White Wyandotte stock, including the first prize cock at Madison Square Garden, New York, 1900; the second prize cockerel at Boston, 1900, and all of our other prize winners. These birds, added to what he already has on The Elliot Farm, including winners at Madison Square Garden and other big shows, put him in the front rank of breeders of the White Wyandotte.

(Signed) EGG HARBOR FARM,
A. L. WARE, Manager.

## JEFFERSON'S WINNINGS.

J. L. Jefferson, of Des Plaines, Ill., an AMERICAN POULTRY JOURNAL advertiser, has a record at Chicago show to be proud of on White Rocks. The complete record is as follows: first white Rock hen, tbird White Rock hen, fourtb White Rock cock, fourth Wbite Rock pullet, fourth White Rock pen, second White Rock best display, first White Rock hen (best) display. Russell and Tucker, judges. Here is a record to be proud of in a class so uniformly strong and excellent, and Mr. Jefferson is to be congratulated.

## A NEW SPECIALTY CLUB.

The American Single Comb Brown Leghorn Club was born into being at tbe Fifth Annual Poultry Sbow in Chicago.

Breeders interested in this variety of fowls were called togetber, tbe result being a large and entbusiastic meeting. The object of this specialty club will be to enlarge the interest in tbis breed, and already plans are laid to offer valuable cups, as well as cash prizes, at the leading shows next year. Tbe following officers were elected:

C. A. Damon, president.
Ed. A. Suender, vice president.
C. M. Davidson, secretary.
F. Cunningham, treasurer.

## A NEW ONE.

Tbe Draper Publishing and Supply Co., of Cbicago, now publisb *Wool Markets and Sheep* and *Dairy and Creamery*, to which they now add *Commercial Poultry*, a combination of four other poultry papers which tbey bougbt for this purpose. Tbe new poultry paper is a semi-monthly and starts out witb volume 10, No. 1. The initial number is nicely gotten up under the editorsbip of Miller Purvis, and we wish the new venture abundant success.

## SHOW REPORTS.

We have received a very large number of excellent show reports from secretaries and members of various associations and while they are largely of local interest only, still we would be glad to publish tbem were it not for tbe fact tbat so very much matter of greater importance bas crowded them out. To publish awards and reports of all shows would require more space tban any publication can devote to tbe matter and we cannot consistently show any partiality. We are always glad to notice in abbreviated form all sbows wbicb are brougbt to our attention by the secretaries of tbe associations.

## U. R. FISHEL AT HIS OLD TRICKS.

That is, more than pleasing his customers, as the following letters he has sent us explain:

WEST BROWNSVILLE, PA., Oct. 29, 1900.
*Mr. U. R. Fishel, Hope, Ind.*

DEAR SIR: The White Rocks to hand safe and in good condition. I am well pleased with pen; they far exceed anything in our neighborhood. Thanking you for your courteous and prompt treatment, I remain,
Yours truly, MISS ANNIE L. WOODFILL.

HUNTINGTON, W. VA., Nov. 27, 1900.
*Mr. U. R. Fishel, Hope, Ind.*

DEAR SIR: The pullet came along in fine shape. I think her a beauty. This is my third dealing with you and must say I got all I was looking for. Shall want more stock and you are the man I shall buy it from. You may rest assured I will recommend you whenever I can. You may refer anyone you may see fit to me as to your dealings. Hoping I may be of service to you. I remain, Respectfully yours,
F. A. BUNDLE.

WAYNESVILLE, N. C., Nov. 28, 1900.
*Mr. U. R. Fishel, Hope, Ind.*

DEAR SIR: The White Rock cockerel came safely to hand and in fine condition, none the worse for his trip. I consider him a very fine bird, and is just what I wanted. When in need of fresh blood again, you will hear from me. Thanking you for your kind treatment, I am, Yours truly,
BROODSIDE POULTRY FARM,
W. H. Hardin, Proprietor.

ASHTABULA, OHIO, Oct. 14, 1900.
*Mr. U. R. Fishel, Hope, Ind.*

DEAR SIR: I received the cockerel all O. K. and was much pleased with him. He is a dandy and no mistake. If anybody wants to buy A No. 1 White Rocks, I will recommend you to them. Thanking you for prompt attention, I remain, Respectfully yours,
2-1 A. R. BELKNAP.

BARRED PLYMOUTH ROCK COCKEREL.

First prize cockerel at Kalamazoo, Dec. 24-28, 1899, scored 92½ by J. A. Tucker. This cockerel was cut for broken feathers in wing ½ point. Pullet was also scored 92 by Rusgell; cut ½ point for weight. Owned and exhibited by E. W. Wheeler, Cedar Springs, Mich.

Mr. A. F. Cooper, of the Prairie State Incubator Co., Homer City, Pa., while traveling tbrough tbe west in the interest of tbe company he so ably represents, spent some time in Chicago, and called on the editor of the AMERICAN POULTRY JOURNAL. We are pleased to inform our readers tbat Mr. Cooper secured the Vaugban Seed Co., 84-86 Randolpb street, as western agent for the famous Prairie State incubators and brooders. The increased amount of business enjoyed by tbis company goes to prove their superiority over tbe general run of incubators and brooders. The Vaughan Seed Co. will give particular attention to this line of goods in the future, and we assure our readers tbat tbeir orders will be promptly cared for if placed in their bands.

J. N. Hutton & Son, of La Porte, Ind., won at Kalamazoo, Mich., as follows: Black Langshans, 1st pullet, 1st cockerel; White Plymouth Rocks, 1st cock, 1st hen.

THE AMERICAN POULTRY JOURNAL

Published the first of each month by
GEO. G. BATES, Editor and Proprietor.

FRANK HECK, Associate Editor.

Subscription price 50 cents a year in advance.

When delivered by carrier in Chicago 60 cents a year in advance.

Payment for AMERICAN POULTRY JOURNAL, when sent by mail, should be made by money order, registered letter or stamps.

Write name and address plainly, and if JOURNAL does not come regularly and promptly, write us at once

In requesting change of address, be sure to give the old address as well as the new one. This is important.

Advertising rates will be furnished on application.

The reliability of new advertisers must be ascertained before an insertion of an ad in the columns of AMERICAN POULTRY JOURNAL can be made. This is a business matter, the justice of which is readily seen, as proteetion to the readers who answer advertisements.

Alway say when writing advertisers, that you saw it in the AMERICAN POULTRY JOURNAL.

All copy for advertising and manuscripts for publication should reach us not later than the 20th of the month preceding the date of issue.

## A PHENOMENAL SEASON.

We believe that present indications justify the assertion that this season will prove to he the most profitable one which poultrymen have ever enjoyed. There is and has been a phenomenal demand for stock of all the popular varieties and many hreeders have been unahle to supply it. New advertisers are coming in hy the score and old ones are increasing their space. The trade in eggs for hatching will undouhtedly be large. Many hreeders report a larger numher of orders booked than ever before this early in the season. What we need is more poultrymen who can furnish high grade stock and eggs. There is plenty of room at the top.

## HOW TO ADVERTISE.

We do not propose to tell in a few lines how to successfully advertise. It could not he done any more than complete instructions for success with poultry could he given in the same space. Volumes have been written upon the subject and still new ideas are advanced each day. There is just one point we wish to impress upon the heginner. Some one has said that one or two insertions of an advertisemerrt will not in every case hring satisfactory returns and cannot in any case demonstrate the true value of a publication as an advertising medium. It is consecutive, continuous, persistent efforts that win in advertising as in all other affairs of business. The twelfth advertisement carries part of the weight of each of the preceding eleven and the twentieth is worth ten times the first. The first is simply an introduction and few people remember an introduction unless suhsequent meetings serve to impress it upon them. Friendship ripens slowly. This is true in social life, in husiness and in advertising. No one hreeder has the hest birds. Don't forget that some other fellow has some as good as yours and if you get the most trade you must gain the greatest confidence of the huyers. Every reader of the AMERICAN POULTRY JOURNAL who has a surplus of stock and eggs should be interested in advertisirg. There is not a prominent and successful poultryman in America today who did not hecome so through advertising and if there was any other way to accomplish this result, some one would have learned of it long ago. This is worthy of the consideration of those breeders who have a desire to reach the top. One more point. Some folks are making money out of standard hred poultry with practically a few hirds in a back yard. Some of them get from $5 to $50 for a single specimen. They hreed for quality rather than quantity, and quality will hring the price no matter in whose hands it may be found but it will not hring the price if the man who wants it does not know where to find it. Some people ridicule the idea of paying $50 for a chicken and denounce a man as a fool who will pay such a price. Who is the higger fool—the man who is willing to pay it or the one who refuses to supply the demand.

## DIFFERENCE OF OPINON AMONG JUDGES.

It is now that the judges come in for much criticism and while some of it is merited, much of it is not. We never expect to see the time when they will all agree and to expect this is probahly unreasonahle, hut we believe it possible for exhibitors to receive hetter service than they are now getting. There is frequently a difference of a point in certain sections as cut hy two judges when there can he no question as to the section heing presented in the same condition to both men. It is simply a case where one man and possihly both do not know their husiness. There is nothing to he gained by hiding these matters and they should be brought to light and an effort made to equitably adjust them. If the judges themselves would start the ball rolling we helieve it would be greatly to their advantage and would assuredly show to the fraternity that there was a desire upon their part to fairly and consistently place a value upon the specimens placed hefore them. This means much to exhibitors both in the knowledge to he gained from expert opinion of the quality of the birds and the influence the opinions have in determining the financial value of the stock. As ahove stated we do not helieve that all criticism directed at the judges is merited and in fact we know that it is not. There is much argument for both sides and it seems that the time has arrived when hoth exhibitors and judges should make an effort to get together for the henefit of all concerned and the advancement of the husiness in general. Here is an excellent opportunity also for the American Poultry Association to show its hand and do something to indicate that it is alive to the needs of the fraternity.

## OVERWEIGHT BIRDS.

There seems to he a greater demand than usual this season for birds that shall he ahove standard weights and it is questionahle whether or not this demand is a reasonahle one or whether it should be encouragegd. We all know that the over fat bird is always lacking in shape and suffers accordingly at the hands of the judge. It is also acknowledged that the over fat bird is always an undesirable one in the hreeding yards. If it he a female, the eggs will he below the normal supply in number and will be lacking in fertility. Right here is where the trouhle lies in lots of cases where we hear the complaint that "eggs won't hatch." An overfat male is just as undesirahle as the female and both are liahle to he found dead under the perch at any time. The specimen which is overweight and not overfat and is a high grade show specimen is a rare article. They are not found in flocks and are no more to be expected than hirds possessing any other perfect section. The standard weight is supposed to he perfection the same as any other section of the hird described. The weight has been placed at the highest limit and is supposed to be difficult of attainment and this should be taken into consideration. Which is the most desirable, the bird cut one point on weight or the one cut one point on shape of breast all other things being equal? They both score the same hut we venture to say that the majority of customers would prefer the former. The experienced breeder shows that the hest birds are not always the heaviest ones and we douht if there is a hreeder anywhere who wins at the largest shows who does not have some light weight hirds in his breeding pens. Many of them have openly commented upon the matter and condemned the policy of encouraging the beginner in his prejudice against all specimens that are not up to and above weight. Others have remained silent for fear of creating the impression amongst this class of buyers that their birds were largely underweight specimens and that this was their true reason for favoring the smaller birds. Now is the season of the year when this question affects trade the most and the columns of the AMERICAN POULTRY JOURNAL are open to those who wish to discuss it.

## GET AN INCUBATOR.

The poultryman who pretends to raise many birds is very apt to be considered behind the times if he does not operate one or more incubators. After one hecomes experienced in running a machine it is possible to get as large a number of chicks from a given number of fertile eggs as can be gotten from hens and there are other advantages in using an incubator. It will not trample the chicks to death neither will it cover them with lice. It is ready for husiness whenever you are and it will not forsake the eggs in the middle of the hatch. It requires a certain amount of care we will admit and it is not merely child's play to run it, but we notice that even setting hens need more or less attention if hest results are secured. In this numher of the AMERICAN POULTRY JOURNAL there are twenty-three different makes of machines advertised and the purchaser ought certainly to find one to suit. Don't put off huying one till you are ready to use it. This action upon the part of many purchasers each season causes some manufacturers to get behind with their orders and delays shipments.

## SCORE CARD VS. COMPARISON.

American poultrymen were the inventors of that method of judging by which an arhitrary value is placed upon the different sections, making perfection 100, and deducting from each section as many points as in the opinion of the judges

it lacked of reaching the ideal perfection described in the Standard.

The advantages of such a system were so apparent that breeders of other classes of stock adopted the score card system, and now it has been carried still further, and for corn, as well as fruits, a recognized standard of perfection has been adopted.

Most of us are willing to admit that it is pretty hard to make two scores exactly alike. This is especially true if there is the least prejudice in the mind of the judge, but with all its defects the system is hetter than the ancient one of comparison.

In judging by comparison the judge has no criterion to go by except the Standard description. He cannot go beyond that, hut it may happen that he may fall much helow. The weak judge who knows his own weakness is the one who will favor comparison judging, as this gives him a chance to do some guessing without compelling him to publish his decision to the world so definitely that his weak point may he discovered.

Comparison shows are open to the criticism that the man who does not get a prize gets nothing. His hirds are within the prize winning limit or they are of douhtful value. Where judging is done by the score card the prize winner may be only one-half a point hetter than the next best one, and the score of one is almost as valuable when it comes to selling the hird as the other. When judged by comparison the loser may be very good or very had, but there is no chance to know which.

## CHICAGO, BOSTON AND NEW YORK.

A complete list of awards made at America's three greatest shows—Chicago, Boston and New York—will appear in the March issue of the AMERICAN POULTRY JOURNAL. On account of the late date at which the Chicago and New York shows were held it would be impossible to do them justice in reports for the February numher and have it reach our readers on time. Ordinarily this could be accomplished but the issuing of so large a puhlication as the AMERICAN POULTRY JOURNAL and have it reach its readers promptly requires that the forms he closed several days previous to the date of issue.

In the January issue in a reading notice we called attention to F. R. Simons, the White Wyandotte breeder. We made a mistake in his address. Mr. Simons is at Casstown, Ohio, and we take the opportunity now to set him right.

Geo. W. Hillson, the Light Brahma breeder of Amenia, N. Y., is offering eggs for sale.

**Hens Will Set**

and do their level best when given the right kind of a nest, the right number of eggs, the right kind of food, the right kind of care and dusted with the right kind of insect powder. For this latter purpose Lambert's Death to Lice fills all of the requirements.

**Eggs Will Hatch**

when the breeders are kept free from lice, and when they have daily out door or scratching shed exercise. Under these conditions eggs from healthy birds are usually well fertilized. Lousy fowls are rarely healthy ones. When good eggs fail to hatch the trouble is often outside of the eggs. Lambert's Death to Lice Powder never injures the fertility of eggs for hatchlug, the sitter at any stage of the sittiug fever or the little chickeus should they hatch lu a handful of it.

**Chicks Will Grow**

wheu started free from vermin and kept so from the shell up. If allowed to become lousy they lose strength and vitality, which will stunt them in growth or cause au early demise. More chickens die every year from this cause than any other, while a little Death to Lice Oiutment would save their lives.

**Death to Lice Remedies:**

Death to Lice Powder for dusting layers and sitters—5 oz. sample, 10c postpaid; 48 oz., 50; 100 oz., $1.00, from here or nearest agency to yon by express. Death to Lice Ointmeut for head lice on children or chickens also scaley shanks on fowls, 10c and 25c postpaid.. Death to Lice Special, for making a liquid louse or mite killer and for mixing with the regular powder for fleas on dogs, moths, etc., 4 oz., 10c; 16 oz., 40c by mail postpaid. Death to Lice Lice Liquid for spraying poultry houses, painting roosts, etc., (already prepared) 1 qt., 35c; 2 qts., 60c; 4 qts., $1.00, f. o. b. here. Book and "How Best to Set a Hen" sent free.

**D. J. LAMBERT, Box 308, Apponaug, R. I.**

***We Can Tell You Why We Won at Philadelphia on White P. Rocks.***

Our birds have beeu bred for years from stock which cannot be beaten. We have several hundred breeders, not less than 400, most of the time. They are white, have yellow legs and the correct shape. We conld duplicate 10 times over the pullets which won 1st, 3d and 4th at this show, and besides 1st cock and 4th cockerel, we have a line of males that cannot be duplicated on any farm in the country.

***We Breed and Raise all our Prize Winners on our Home Farm.***

We have a poultry farm in every sense, and when you buy stock of us it means that we raised it, and not that we hustled arouud and bought it scmewhere else.

***Our White Wyandottes and Pekin Ducks are of the Same High Quality.***

We have hundreds of the same line of blood as the hen which won 1st and special for best White Wyandotte heu at Philadelphia in the hottest White Wyandotte show ever held. We have several hundred cockerels for sale at low prices. A few Pekiu Drakes aud Ducks. Circular free. Mention this journal.

**POLLARD'S POULTRY FARM, South Attleboro, Mass.** F. M. POLLARD. GEO. H. POLLARD.

**GARDNER'S BARRED PLYMOUTH ROCKS**

Have won during the past three years at **NEW YORK, BOSTON, ROCHESTER and SYRACUSE,** 17 First prizes out of the 29 competed for, or

**MORE THAN ALL COMPETITORS COMBINED.**

This in competition with the cream of the best eastern yards.

**AT MADISON SQUARE GARDEN,** January, 1900, in the largest class and strongest competition ever seen in **NEW YORK** they won **3** out of the **5 FIRST PRIZES, viz:**

***1st Cock, 1st Cockerel, 2d and 4th Pullets, 1st and 3d Pens,*** and the Fisher's Island Trophy, value

**$100 for the Best Cock, Hen, Cockerel, Pullet and Pen.**

They have also won for my customers in some of the largest shows in the United States and Canada. Free circular gives list of winnings and full description of stock.

**M. S. GARDNER, Philadelphia, Route 1, Jefferson Co., New York.**

# THE FANCIER IN THE POULTRY YARD

THOS. F. RIGG, Iowa Falls, Iowa.

SINCE the publication in the November and December issues of the AMERICAN POULTRY JOURNAL of the article on Line-Breeding, I have received a very large number of letters from fanciers in every section of the country. Each and every one of these letters have voiced the approval of the writer thereof. It is most gratifying to me personally to be thus assured that I have been instrumental in giving some aid to those fanciers and breeders whose aim is to follow scientific and correct lines in their breeding operations.

This system of line-breeding is a subject of which I never tire of advocating. It is an absolute certainty that in no other way can a fancier build up and maintain a yard of extra choice birds. This is a fact which to-day no one disputes.

In the articles heretofore appearing in this department of the AMERICAN POULTRY JOURNAL it has been the aim to wipe from the minds of breeders that line-breeding means in-breeding to such an extent that vitality of stock is weakened. I think that any man who still confounds line-breeding with in-breeding will easily see his error by a careful study of the November and December articles. We refer to this at this time because we are just in receipt of a published article in which line-breeding is denounced and characterized as "in-breeding." We have personally referred our correspondent to said articles, and will not attempt here to again cover the ground as to this matter.

We have time and time again given positive proof that line-breeding, when properly pursued enables a fancier to increase the size of his stock, to strengthen constitution and to positively fix standard markings in plumage, and to establish desired shape. Let us here give an illustration which came under our personal observation at the Philadelphia show last month. In a most magnificent and large class of Barred Rock hens Mr. C. H. Latham won first, second, third and fourth hens. Now, fix the idea firmly in your mind right here, as we start this story, that such a winning class and quality combined is a remarkable one. *These four birds were line-bred birds.*

Hen No. 180 not only won first but also the prize as the champion female in a class of 115 females, pullets included. This hen was second as pullet in Boston last year.

Her mother was the second pullet at Boston the year before and her grandmother was first pullet in Boston in 1898, the latter bird winning the champion female honor in Boston that same year. The second hen, mother of first hen, won third in Boston last year and second as pullet there the year before. The third hen at Philadelphia is a half-sister to first hen, and granddaughter of first pullet (bird above referred to) at Boston in 1898. Fourth hen, half sister to second hen. Now, my reader, consider well the facts in this true story here so briefly related. Note, now, that the males producing these extraordinary specimens carried, in a degree, the blood of the dams of these hens; in other words that males and females used in the production of these birds were quite closely related. Such an argument in favor of line-breeding cannot be successfully demolished. Let every man who is seeking to breed winning birds carefully study these facts and results. To the thoughtful, earnest fancier they contain more than can be gotten out of all the *theories* ever advanced. Let it be further stated that the first and third pens at Philadelphia contained birds from these same line-bred matings.

PEN OF HOUDANS.

The above half-tone, direct from photograph, shows a pen of line-bred Houdans, the property of Judge Thomas F. Rigg, Iowa Falls, Iowa. Note great size of these birds—the long backs, full and wide and deep breasts; immense crests and beards. This pen last season produced magnificent stock, and so far this season the pullets and cockerels from this pen have won wherever shown by Mr. Rigg's customers. It is a telling illustration of the merit of line-breeding.

Another illustration: At Philadelphia in the Houdan class, Rev. C. E. Petersen's unbeaten cock bird, "Danbury," not only secured first place but had to her credit first and second cockerels, all the winners in pullets down to fourth, and that these were line-bred birds, the first hen in the class and "Danbury" birds related to one another, produced these winning youngsters.

We cite these two cases because they are recent illustrations of the truth of line-breeding and because they furnish

positive proof of the virtue of line-breeding, when practiced by skillful fanciers.

We could go on and fill pages of just such facts.

During this month (February) breeding pens will be mated by fanciers and breeders generally. I do hope that these matings will be along the lines here and heretofore laid down. In no other way can we bring success—and this means pleasure and profit—to ourselves as breeders.

To the amateur who will this season mate his first pen of birds I advise careful consideration. If he will but secure a pair in trio of stock which has been line-bred he will, at the very beginning, start in where it will take him several years to arrive at if he goes into the business with birds of conflicting blood lines.

This year, 1901, is going to be an eventful year in standard-bred poultry circles. There will be a greater demand for stock than ever before, because there are more people and more money demanding stock. Bear in mind that in the sale of ordinary to good stock there is a world of competition, and that the men who will produce extra choice, the very best stock, will be, and in the very nature of things must be, comparatively few; that they can command the large prices; *that they will make the money* and reap the pleasure—the pleasure and satisfaction which always comes with success.

To which class are you, my reader, going to be found numbered?

To the hundreds of men and women whose acquaintance I have formed, in these columns, to all breeders everywhere, to every living man, woman and child, I wish a happy and prosperous new year—and many of them. May your opportunities be fully appreciated by each and every one, and may success crown your every effort.

THOS. F. RIGG.

### GROW RICH, MR. FARMER.

Every farmer is ambitious to put by a snug sum for the later years. Well, that is just right; but why not grow rich double quick? You can do it. How? By planting a plenty of John A. Salzer Seed Company's La Crosse (Wis.) grown seeds. You see, Salzer breeds his seeds up to big yields, as the farmer breeds his cattle to their highest point of merit. The result is, Salzer's seeds sprout, grow and produce enormously. We know of many a farmer whose granaries had to be built larger and whose barns needed additions put on, on account of sowing Salzer's seeds; that is good, prosperous news.

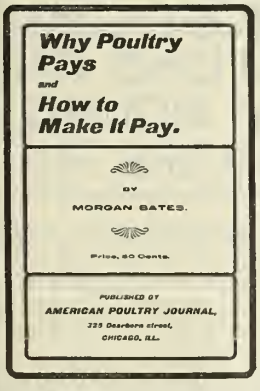
### WHITE WYANDOTTE COCKERELS.

A. M. Jettner, of New Carlisle, Ind., has an unusually nice lot of White Wyandotte cockerels, of Knapp and Duston prize winning strains, for sale. They are June hatched, weighing from 7½ to 8½ pounds. Here is an excellent opportunity at a reasonable rate to get good stock. Mr. Jettner is a breeder of White Japanese Bantams also. During the egg season he has eggs for sale from both varieties.

# CORNELL'S LEGHORNS, Buff & White.

My Buffs will all be sold without reserve to make room for Pencilled Wyandottes. These birds have been bred in line for ten years and are to-day the finest in this country. My yards contain more noted prize winners than those of any other breeder. At last Boston show I won four times as many first prizes as all competitors combined. Besides this I have won 1st on breeding pen for more consecutive years at the New York Show than any other breeder, i. e., 1st on pen at New York in 1897, 1898, 1899, and 1900 at Boston. My White Leghorns have been well known winners for years, and to-day lead as layers and winners all other strains. Send for catalogue.

**EZRA CORNELL, Ithaca, N. Y.**



# The Short Route to Success

Our new book "Why Poultry Pays and How to Make It Pay," will tell you what you want to know and what you must know if you succeed with poultry. The book was written by Morgan Bates, who was for 14 years editor of **American Poultry Journal.** It is the newest book of the kind and has been pronounced by expert poultrymen to be the

**MOST COMPLETE AND THOROUGH TREATISE ON THE POULTRY BUSINESS**

which has thus far appeared. Chapters are devoted to various subjects, and just the points you desire to know are easily found. It tells how to start and how to keep going right after you have started. It instructs its readers in the methods of feeding and the best foods for layers, breeders and exhibition birds. It has chapters on "Diseases of Poultry," "Poultry Houses and Fixtures," "Success With Incubators," "Success With Brooders," and, in fact, covers every phase of the question. It is a complete and practical guide and directory to the best methods which have brought success to thousands of poultrymen. **It is a school for the amateur and a help to the expert.**

**GRAND SPECIAL OFFER** The regular price of this book is 50 cents. We will send it to you and give you a 15 months' subscription to American Poultry Journal for 75 cents, or the book will be given free for four subscriptions at the regular price of 50 cents.

Address **AMERICAN POULTRY JOURNAL, 325 Dearborn Street, CHICAGO, ILL.**

"MAKE HENS LAY."

Such is the caption of an advertisement that appears not only in the local but many leading agricultural papers, and which suggest the propriety of a few thoughts upon the subject. It may be laid down as a rule that most people indulge in raising poultry not for the pleasure it gives, but for the profit that is realized from the same, which must come from young chicks or eggs, and since the chicks must come from the eggs, the real profit may be traced to egg production, so the advice given in these words is of vital consequence to the poultry raisers. "The advertisement referred to recommends Sheridan's Condition Powder to make hens lay, and so do we," says Mr. A. F. Hunter, poultry editor of Farm-Poultry. "A hen to lay prolifically must be in perfect health, must be in condition, and here is based the true theory of the value of Sheridan's Condition Powder—it promotes the general good health of the fowl, gently quickening digestion, and stimulating all the various organs of the body as well as the ovaries, to perform their functions." At this season of the year the use of Sheridan's Condition Powder is very valuable for laying hens and young pullets. By its use now they will get to laying earlier when the price for eggs is very high. I. S. Johnson & Co., Boston, Mass., the only makers of Sheridan's Powder, will send for 50 cents two 25-cent packs, five packs for $1; or for $1.20 one large two-pound can of Powder, postpaid; six cans $5, express prepaid. Sample copy of the best poultry magazine sent free.

The ad of Mrs. Clara V. Beardsley, Buckingham, Ill., was left out of our classified ads in January but appears again in February. She wishes to dispose of her Barred Plymouth Rocks at quick sale, as she will move to Rolfe, Iowa, after Feb. 10, and must sell them all before leaving. This stock has been bred in line for years and we can recommend it as first class.

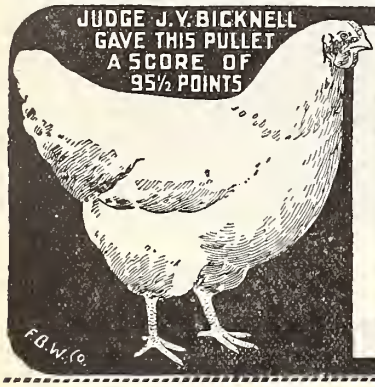
W. T. Wilkinson, proprietor of Rosedale Poultry Farm, Des Moines, Iowa, writes: "My farm consists of ten acres; not a small town lot. There is no finer stock in the country than that found in the pens at Rosedale Farm. Pen No. 1 was bred and mated by R. W. Duryea, of Long Island, N. Y., and the cock at head is as fine as can be found for money."

C. J. Stewart, of Monmouth, Ill., has had his birds scored, with the result that his Light Brahma cockerels scored from 90 to 90½. His White Wyandotte cockerels scored from 90 to 91½ and his White Wyandotte cocks 91½.

Before the complete list of awards was published at Bloomington, Ill., Mr. John Coolidge won on his White Wyandottes as follows: First cock 95, first cockerel 94¾, fourth cockerel 94, first pullet 96½, third hen 95, and first pen 190 3-16.

J. Q. Vandermast, of Monroe, Iowa, breeder of Barred Buff and Pea Comb Plymouth Rocks, writes: "We have sold all of our surplus stock and are now booking orders for eggs. We have five pens of Rocks this year and are selling eggs at prices that are within the reach of all. Our Pea Combs are dandies. We would like to hear from all who are intending purchasing eggs.

R. C. Reynolds, of Jacksonville, Ill., won the sweepstakes in the Hamburg class at Kansas City in 1900.



**Majestic Strain**

**White Wyandottes.**

There are no handsomer, more profitable birds in the world than the White Wyandottes. My stock is bred from prize winners at the Eastern shows. I now have yearling stock for shipment—a limited number of pullets and plenty of cockerels. **Score Cards by Judge J. Y. Bicknell. Eggs for Hatching** from stock scoring 93½ to 96½ points. One sitting, $5.00; two sittings, $8. A trio of Pedigreed Belgain Hares for sale.

**C. S. WETMORE,**
**Box 377, Lockport, N. Y.**

***How to Build Poultry ..Houses..***

THE NEWEST, BEST AND MOST COMPLETE BOOK OF INSTRUCTIONS ON HOW TO BUILD POULTRY HOUSES, FIXTURES, INCUBATOR HOUSES, Etc.

Half the success with poultry is in proper housing. Any old thing with a roof will not bring best results. Many people fail for this reason and wonder why it is. This book does away with all experimenting. You don't have to guess at anything. You get the results of years of experience and thousands of dollars spent in trying different plans of houses. There is no worrying, no scheming, no doubt, about the proper amount of space and interior arrangement. Everything is illustrated and thoroughly explained. The value of this book cannot be appreciated without a perusal of it. **It is of great value to the small breeder with a few fowls, and to the large breeder with his hundreds.** No time or expense has been spared to make it complete. Price 50 cents, postage paid.

This book will be given with a 15 months' subscription to American Poultry Journal for 75c, or will be given free for four subscriptions.

Address AMERICAN POULTRY JOURNAL, - - 325 Dearborn Street, CHICAGO, ILL.

## BAILEY'S BUFF ROCKS PLEASE.

UNSOLICITED LETTERS.

Jan. 7, 1901.

*F. C. Bailey, Reading, Mich.*

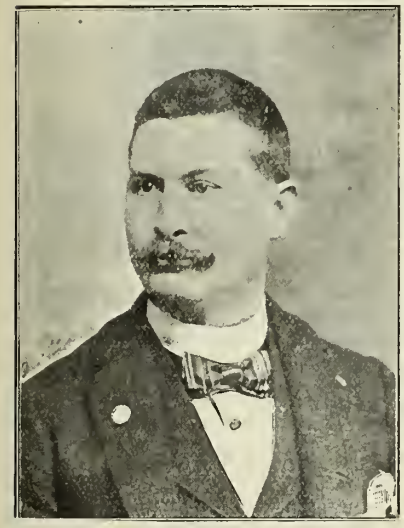
Dear Sir: I came out better than I expected with the birds you sent me. Won 1st and 2d cockerel, 2d 3d and 4th pullets, in good competition. I have some customers who will get eggs from you. I thank you for the way you used me. With compliments of the season, yours truly, ARTHUR J. BERTRAND.

Owosso, Mich.

EVANSVILLE, ILL., Jan. 12, 1901.

*F. C. Bailey, Esq., Reading, Mich.*

Dear Sir: Inclosed find money order for the cockerel and two settings of eggs. Now, Mr. Bailey, I hope you will do as well with me as you did before. Yours truly, JOHN V. THUMMEL.



W. E. Russell, of Danville, made a wonderful show record on Buff Plymouth Rocks at that place January 1-4, 1901, winning about all there was to be won on this variety. Chas. McClave, who judged the show, said he had as fine a lot of Buffs as he had ever seen. A. P. J. readers will find Mr. Russell's ad. right along in every issue, through which he says he has made many sales. Mr. Russell is a Buff Plymouth specialist.

## Too Late to Classify.

FOX TERRIERS—For the next 30 days will cut prices on dogs. Enclose stamp for illustrated catalogue and price list. J. O. Walton, Chelsea, Iowa. 2-3

BARRED ROCKS—Both sex, Leffel strain, rose comb White Leghorn cockerels, Forsythe strain, $1 to $2 each, from pens scoring 92½ to 95; thhe above scores guaranteed. F. C. Fishbaugh, Moffitt, Ohio.

SINGLE COMB BROWN LEGHORN exclusively; eggs 50c for 13, $3 per 100; satisfaction guaranteed. Send for circular that will explain all about prizes and many other things. E. V. Lane, Lacon, Ill. 2-6.

POLISH (all varieties); also Black Spanish and Rhode Island Reds for sale; no birds go out of my yards scoring less than 90; score 90 to 95. Exhibition birds a specialty. 2-3.

ROSE COMB BUFF LEGHORNS and Buff Plymouth Rocks; circular free; tells all about them and their winnings. L. B. Hanna, Columbus Junction, Iowa. 2-3.

Rev. C. E. Petersen, Hartland, Me., at Boston and Philadelphia, 1900, was awarded on Houdans 42 regular and special prizes and three silver cups. Eggs in season from small pens of scientifically mated prize winners.

R. C. BROWN LEGHORNS—Good ones; pens headed by 94 point birds, with females of equal quality; eggs $2 per setting; some good stock for sale; my winnings are large. A. J. Blanchard, Meadville, Pa. 2-3

## BIG WIN AT INDIANA POULTRY SHOW.

We give below a list of winnings of C. A. Porter, Flat Rock, Ind., on his Blue Barred Rocks at New Albany, Ind., Dec. 24-29, 1900.

Mr. Porter breeds Barred Rocks exclusively and has exhibited some as high scoring specimens as the country produces. His first prize pullet at New Albany was a phenomenal bird, scoring 94½, under Felch, a bird grand in shape and color, with *perfect* comb, Felch saying that "she was one of the two best Barred Rocks that he has handled this season."

His second cockerel was also a grand specimen, being the true Rock shape and grand in undercolor, a fine, low comb, evenly serrated, with clear yellow beak and legs. This bird was not fully matured, or would have been an easy first. As usual, Mr. Porter was strong on hens, showing some high scoring birds, under as hard a cutter as Mr. Felch. His average score of females was 92⅝. This is a good showing and one to feel proud of under the sharp hatchet of Mr. Felch.

Following is a list of his winnings at New Albany: 1st pullet, 94½; 2d cockerel, 92; 2d hen, 92½; 3d cockerel, 3d pen—in the hottest class of B. P. Rocks that meet in any show.

Mr. Porter has 1,000 head of fine exhibition and breeding birds for sale and can furnish you birds with score cards by all the principal judges in the country. If you want line bred stock that will produce winners he can fit you out. Look up his ad on another page and write him. He guarantees satisfaction.

## THIS LETTER TELLS ITS OWN STORY.

New York City, Dec. 24, 1900.

Editor AMERICAN POULTRY JOURNAL, Chicago, Ill.

DEAR SIR:—We beg to inform you that during the month of November, in which we had our annual sale of Banner Egg Food and Tonic, we sold about 2,500 cans, which goes to show that we have the best egg producer and health preserver on the market.

The number of testimonials we are daily receiving from those who are using it, testify that they never had such healthy flocks of chickens and never received so many eggs at this time of the year as they are now receiving.

When you take into consideration that when we first made the now famous Banner Egg Food and Tonic we sold less than 100 pounds the first year, and during the year 1899 we sold over 5,000 pounds, and it has only been on the market a little over seven years. It must be its great merit that has so wonderfully increased its sales.

Yours respectfully,
EXCELSIOR WIRE & POULTRY SUPPLY CO.

## W. J. LINCOLN, MT. PULASKI, ILL.

A pleased customer of W. J. Lincoln whose ad can be found in the American and from which ad the sale was made:

WARREN, PA., Dec. 26, 1900.

*Mr. W. J. Lincoln, Mt. Pulaski, Ill.*

DEAR SIR: I received the trio of Game Bantams all right and am very much pleased with them. They are fine birds. I have visitors every day to see them. I could not have been better pleased had I selected birds myself. You have shown yourself to be a breeder who does not misrepresent stock. If you wish to use this letter you have my permission to do so. I am,

Respectfully yours, W. H. WHEELER.

## VICTOR INCUBATOR CATALOGUE.

The new copyrighted catalogue of the George Ertel Co., of Quincy, Ill., is as complete a piece of work as it has been our fortune to examine in many years. What it don't tell about incubating and poultry would be easier told than what it does, it is so full of good things. You can have one free by sending six cents postage and mentioning AMERICAN POULTRY JOURNAL.

Clarion, Pa., Dec. 22, 1900.

Mr. J. S. Hoffman, Sharon, Pa.

DEAR SIR:—The cockerel came last evening. I think he is a grand bird and am pleased with him. Thanks for your prompt and courteous treatment.

Yours truly,
2-1 S. A. WILHELM.

# ROYAL BLUE

Was undoubtedly the **best Barred Rock that ever lived.** He won **two blue ribbons** at **New York.** His sons and grandsons have won **more prizes at America's greatest shows than all others combined.** Those who are breeding up-to-date Barred Rocks have the

### GAISER'S BRONZE TURKEYS.

Mrs. Henry Gaiser, of Charleston, Ill., brings her famous Tippecanoe strain of Mammoth Bronze Turkeys to the notice of our readers. This strain is directly descended from the famous tom, Champion, 97½ score, 43 pound weight, first prize at Indiana State show in 1897. Mrs. Gaiser's birds are remarkable for their size, brilliant plumage and high scores. She offers grand young toms weighing as high as 30 pounds and scoring 98 to 96½, from $4 to $8, and pullets $2.50 to $5. Those in search of the best to be found will do well to place their order with Mrs. Gaiser at an early date.

See ad in other columns.

### "EGGS-KUM" BUSINESS CHANGES HANDS.

A short time ago the ownership of "Eggs-Kum," the condition powder which, since its recent introduction, has met with phenomenal success in almost every portion of the country, changed hands, the Reliable Remedy Company, of 497 Third avenue, New York City, having purchased the business, which was formerly conducted at Bayonne, N. J. The Reliable people declare it to be their intention to push this excellent article, and in line with their avowed policy, the first advertisement of a series appears in this issue of the AMERICAN POULTRY JOURNAL. In addition to Eggs-Kum, the Reliable Remedy Company manufactures Roupino, a cure for roup which is sold under a positive guarantee, and Scahicide, which the company has so much confidence in that it will refund the money if it fails to cure a case of chicken pox, head-warts or scaly legs, provided it is used strictly in accordance with the directions. The Cyphers Incuhator Co., of Wayland, N. Y., Chicago, Ill., Boston, Mass., and New York City, are the general agents of Eggs-Kum, and all applications for agencies must be addressed to their New York office.

### GREAT PRIZE RECORD WON WITH "RINGLETS,".

JACKSONVILLE, ILL., Dec. 17, 1900.

*Mr. E. B. Thompson, Amenia, N. Y.*

DEAR SIR: I take pleasure in informing you of my success at our show of "Central Illinois Poultry Association," Dec. 10 to 15, 1900, at Jacksonville, Ill., with stock purchased from you and raised hy me from your stock "the Ringlets."

I won the "P. R. Club Silver Cup," valued at $25, for hest cock, cockerel, hen and pullet, also 1st cockerel, 1st and 3d pullets, 1st and 3d hens, 3d cock, 1st pen, and special for best cockerel.

To say that I am well pleased with your "Ringlet" stock, and the results ohtained, is putting it mild, and if you should ever need any reference from me to anybody in this great West, I shall be only too glad to furnish such testimonial, as I am pretty well known all over these western states. Yours truly,

2-1 J. R. STICE.

### CERTIFICATE OF SALE.

This is to certify that I have sold to Mr. A. F. Ackley, of Woodstock, Ill., all my White Rocks, hoth Empire and Hazlewood strains. It includes all the hest of my this year's breeding hirds, scoring from 92½ to 95 points, hy Judge Hewes. My good will also accompanies the hirds, as I shall hreed hereafter exclusively White and Buff Wyandottes. Any one looking for good "stay white" Rocks and low combs I would gladly recommend Mr. A. F. Ackley, of Woodstock, Ill., who understands his business perfectly.

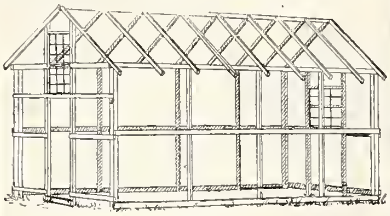
# THE BELGIAN HARE.

## HOUSES AND HUTCHES.

This article is an extract from the chapter on Houses and Hutches in the Belgian Hare Guide, published by Inland Poultry Journal Company, Indianapolis, Ind., and published by special permission. The complete book costs 25 cents and can be ordered from our office.

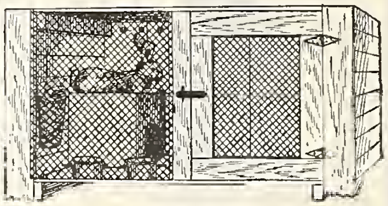
One of the first steps to be considered by all beginners in the handling of Belgian hares, is where to put them. Have you the building, or the ground on which to build? Some writers state that all you need is a good sized dry goods box, placed in a shady place in the back yard, and while this might do in some climates or for temporary use, we would not recommend the plan for permanent use, as great care must be taken to protect your hares from draughts. dampness and direct heat of the sun in summer. Being a fur bearing animal, they can stand almost any amount of cold, if protected from direct draughts and dampness, but heat must be avoided as much as possible. The hare is a very cleanly little animal and you will notice they devote much time to their toilet, thus it is very important that you keep their surroundings clean and wholesome and to aid you in doing this careful attention should be given to the construction of your hutches and houses. If you have only a few hares and do not intend to go into the business to any greater extent, it is not necessary that you build a rabbitry, as hutches may be made of large boxes, or after the plan given in this chapter, and placed in a barn or some other building that is suitable.



No. 1.

Proper housing and hutching are responsible for the health and condition of your hares, probably to a greater degree than anything else. A slight cold will if not checked in time lead to the snuffles, while dampness always breeds disease. Too much heat, whether from the direct rays of the sun or from any other source, is dangerous to their health and often fine hares are lost on this account, and not only this but the effect will injure the little ones, often making them lop-eared and of a tired disposition, inclined to huddle in the corner and look as if they were very sick; not bright and lively as they ought to be, with their little front paws as high in the wire front of their hutch as they can stretch and showing their little white empty stomachs at feeding time. Keep your hares bright and lively and proper quarters are one of the chief factors in promoting these qualities.

In selecting the location for our house we must keep off of damp and soggy ground and choose a location that is dry and drains well, and one that is removed from any objectionable features, such as a stable, closet, cess pool or anything that has an offensive odor to it; a place that is easily accessible and at the same time safe from marauders. The size and style of your building will depend entirely upon your needs and means, but we would advise a frame structure, as brick holds too much dampness, and the following is given as an illustration of a low cost and practical house that will comfortably accommodate about thirty hares, allowing each one a compartment. We will make it



No, 2.

12x16 feet, with sides eight feet to the roof plate and roof one-third pitch. Instead of laying the sills first, let us set 4x4 inch corner posts about three feet in the ground and build our frame work to them which will give us a more substantial building. The posts, however, may be set on stones to prevent them from rotting, if you prefer. For the balance of the frame 2x4 scantling may be used and put together either by mortising or with spikes. Our diagram No. 1

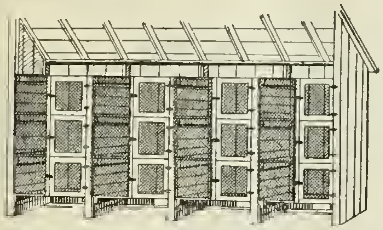
# BELGIAN HARES.

To make room for my latest importation I will sell some gilt edged stock at prices that are right. The popular strains of blood, such as Lord Banbury, Ch. Yukon, Lord Britain, Ch. Edinboro, etc., etc. If you want a good buck to head your rabbitry or some good does bred or unbred, see what I have. Don't ask for 94 to 98 point hares for $5.00. I am not selling score cards: but have some good stock and the prices are honest.

**No Scrubs. No Job Lots. No Fire Sales.**

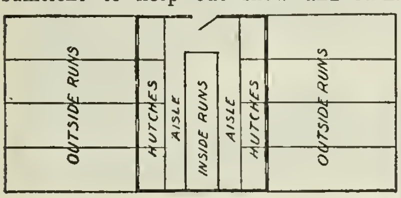
**W. T. GALLAWAY, 496 LaSalle Ave., Chicago, Ill.**

shows the skeleton or frame work complete ready for the casing and for which we will use yellow pine sixteen feet long, twelve inches wide and one inch thick, dressed on one side and cut once in the middle, together with common O. G. batts. In roofing it will be about as economical



No. 3.

to use shingles. If a double roof is desired to aid in ventilation, leave space same width as door, raise frame one foot and roof over with extending eaves sufficient to keep out snow and rain.



No. 4.

The ventilation may be better controlled by leaving the eaves of the main building open and placing a window, about 2x3 feet in the center of each gable, covering them with coarse wire that the windows may be left open with safety during the night. The door, which should be placed in the least exposed end of the building, windows and hardware for hanging them will now complete the building.

(To be Continued.)

---

The United States Belgian Hare Co. (Dunham & Houston, owners), with their breeding farm (seven acres) at Marshall, Mich., and Chicago office at 1597 W. Madison street, are rapidly gaining prominence in Belgian hare circles as the breeders of some of the most valuable Belgians in America. At Michigan Fanciers' Association, held at Battle Creek Dec. 4-7, they had the first two prize winning bucks, Major Fashoda (score 96) and Lord Lipton 2nd (score 95¾). Also the first two prize winning does, Duchess Lipton (score 95½) and Countess Powell (score 95¼). Scoring by Ira H. Chapman, Chicago. Nearly 200 of the very finest specimens were in the exhibit and for the United States Belgian Hare Co. to capture the "whole cake" was certainly a most remarkable showing. Dunham & Houston were also the winners of three special prizes, one of them being a "Snuffler," manufactured by "The Snuffler Co.," Albion, Mich., and awarded for the five highest scoring hares (score 477¼). Mature and immature stock now for sale. Send on your does to be bred.

---

The Central Belgian Hare Association, Westville, Ind., have placed in their hutches the best blood money could buy. They positively guarantee satisfaction or money refunded without question. We are advised they have some grand bargains, as they are working on the principle of quick sales and small profits. Their stud buck, Lord Edinboro, Jr., is an extra fine animal and can be depended on. Their ad. appears in this issue.

---

In our reference to Mr. S. H. Taylor, of Sibley, Ill., in the January number, the impression was conveyed that he was a judge of turkeys only. He is well qualified to pass upon all standard varieties of fowls and has some important engagements each season. A comparison of his score cards with those of other judges shows marked similarity. A pen of Single Comb White Leghorns, scored by Judge Pierce 188 points, scored 188¼ under Mr. Taylor two weeks later. At Hoopeston, Ill., he gave the same scores to a Silver Wyandotte cockerel and two partridge Cochin cockerels that were given the birds by Theo. Hewes, and at the Missouri State show he scored a Black Langshan 95¼ and a pullet 95 which had previously received the same scores by D. T. Heimlich.

**If in need of**

# RABBITS

The only low-cost book on the Rabbit ever published to our knowledge, is "The Rabbit: How to Select, Breed and Manage the Rabbit and Belgian Hare, for Pleasure or Profit," by W. N. Richardson, a man of long experience with Rabbits. Third edition now ready, nicely illustrated, enlarged and much improved with breeders' directory. Price 25 cts. or with AMERICAN POULTRY ADVOCATE one year 40 cts.
CLARENCE C. DEPUY, Publisher, Syracuse, N. Y.

## BLAIR, NEB.

The Washington County Poultry Association held their second annual exhibition at this place January 7, 8 and 9.

John E. Skinner, president; Charles E. McComb, secretary. Neither time nor energy was spared to make the show a success.

There were over 250 fowls shown and about 30 Belgian hares.

Competition was strong in the Barred Plymouth Rock class, they heading the exhibit in numbers.

The officers of the association are to be congratulated for their wise selection of the judge, F. H. Shellabarger, of West Liberty, Ia., who is one of the most careful and least impartial judges that has ever scored in this district.

The Washington County Board of Supervisors were in session and visited the show in a body and were so well pleased with the exhibit that they appropriated $100 to help run next year's show.

C. E. McComb.

## A GRAND VICTORY.

On January 2 the Reliable Incubator & Brooder Co., of Quincy, Ill., received official notice that the case, having been fought with another incubator manufacturer, had been decided in favor of the Reliable Incubator & Brooder Co., and all costs were taxed against the other concern. This is a grand victory for the Reliable Incubator & Brooder Co. This shows plainly that their incubators and brooders are not an infringement upon any one else, but are made substantially on the merits and the supervisions of their own patents.

E. J. Horton, of Alida, Ind., starts an ad in this issue. His first prize Barred Rock Cockerel, scoring 93, by Hewes, at La Porte, speaks for the quality of his stock. He has equally good S. C. White Leghorns. He comes to us recommended very highly.

WHITE WYANDOTTES.

Two groups of White Wyandotte pullets on Highland Poultry Farm of C. S. Wetmore, Lockport, N. Y.

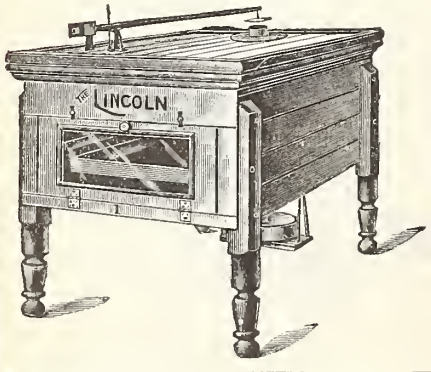
Send for our Catalogue and see what our Customers say about our Incubator.

STAR INCUBATORS

Send for our Catalogue and see what our Customers say about our Incubator.

This is to tell WHY the STAR INCUBATOR hatches more chicks and stronger chicks than any other:

1. Because by our system of heating, every part of egg chamber is uniformly heated; there are no cold corners.
2. Because our system of ventilating so perfectly controls circulation of air that no moisture need be supplied (this is the condition under the sitting hen).
3. Because our system of automatic heat regulating is the best (though, to be candid, it has been this year copied bodily by some other makers).
4. Because our system of turning the eggs is the most satisfactory.
5. Because, in short, the STAR INCUBATOR, is more than a heated box. Every advantage that science has discovered has been turned to account in it. We have not advertised as extensively as many firms in our line. It may be that you never heard of the STAR before; if so, there was *one good thing* you did not know about.



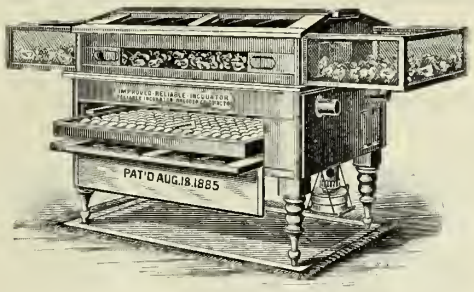
**Our little 60-Egg "Lincoln" is a gem.** (*See cut.*)

STAR INCUBATOR CO., 14 Church St., Bound Brook, N. J.

## A BRIEF DESCRIPTION OF THE RELIABLE SELF-REGULATING INCUBATORS MANUFACTURED BY THE RELIABLE INCUBATOR & BROODER CO., QUINCY, ILL.

This company offers to the public this year a line of incubators and brooders that has all the latest improvements manufactured under their late patents, combined with the patents that they formerly owned.

The Reliable line of incubators are made under scientific principle; the company having sixteen years of continual experience testing different modes of artificial incubation, puts them in a position to know what constitutes a good machine.



### THE CASE AND WOODWORK.

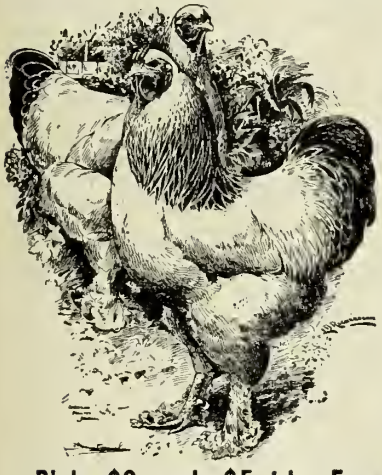
Great care is exercised by this company in selecting and buying the best material. The Reliable Incubator when completed compares favorably with any piece of cabinet work. The sides and back of the case consists of double walls, lined with double thicknesses of compact, double X, red resin cardboard, with one-inch warm air space between. Both the outside and inside casings are the solid lumber, not pieced out.

### TANK AND METHOD OF HEATING.

The hot water Reliable is equipped with a tank of the largest water capacity of any egg machine made and this tank covers the entire upper surface of the hatching chamber. The material used for making these tanks are 12 and 14 ounce cold rolled, builders' copper, 24 ounces of this costly material being required for one 200-egg machine. The interor of these hot-water tanks consists of what is believed to be the best heating system yet devised. No less than 10 feet of copper tuhing, 2 inches in diameter, is used in the 200-egg machine. This tubing crosses and recrosses the tank four times. Each boiler, or tank, regardless of the size of machine, is 3 inches deep and this interior arrangement of tuhing laying near the hottom of tank is constantly covered with water. The hot air is brought into this tuhing direct from the heat-receiver which covers the upper portion of the lamp like a chimney. At the top of the lamp, flue radiation takes place, and as the air becomes hot it is carried to every part of the tuhing alike. All surplus heat is exhausted at the far end of the outlet pipes. In order to still further equalize the heat, the first section of tubing, or the part nearest the source of heat, is made of double thickness. Every portion of the tank, or the egg-chamher underneath the tank, will show the same degree of temperature. There is a double radiation in these tanks as follows: First, from the outer surface of the hot-air tubes or heat coil whereby heat is imparted hy the water in the tank. Second, from the hottom surface of the tank wherehy the egg chamber is heated. Heat distributes itself quickly in water and the ten feet of coiled pipe soon heats the hody of water to a uniform temperature; therefore when the second radiation takes place, namely from the bottom surface of the tank, a positive uniform temperature is secured throughout the hatching chamber.

### THERMO REGULATING DEVICE.

This late Thermo Regulator that this company is now using was patented Feb. 7, 1899. This regulator is unequaled for its accurate and positive regulation of heat in Incubators and Brooders; simple in construction; permanent in adjustment; durable and easily attached. The main points of merit of this Thermo Regulator are: Simplicity in every detail of construction. Second: positive and accurate operation. Third: Durahility and permanent adjustment. Fourth: The temperature of the egg chamher can he determined by the position of the mercury in cylinder, making it unnecessary to continually open the egg chamber to consult the thermometer; in fact, the thermometer could



DO YOU KNOW

# Scott Deaner?

If not you had better get acquainted with him and his prices for poultry and eggs for **1901.**

## Please Read Carefully.

The prices quoted for stock and eggs are as low as I can afford to make them and send you birds and eggs from first-class thoroughbred stock. Any breeder who offers to sell at a less price must either furnish you with inferior stock and eggs or lose money. I have birds in my yards that are hard to duplicate for quality. They are premium winners. I showed at Rockford, Ill., (F. H. Shallaharger, judge,) 24 birds and received 17 firsts, 4 seconds and 3 thirds. At Freeport, Ill., I showed 30 birds and received 25 firsts and 5 seconds. My guarantee on eggs are 7 chicks from each sitting or duplicate same at half price. I replace broken eggs free of charge.

### Can You Ask for Anything Better Than This?

You may order of different varieties if you wish to make up one, two or three sittings. Order direct from this ad and get what you want at prices that cannot be duplicated for the quality of the stock. **Remember I guarantee everything I ship and refund the money if not exactly as represented.** I have bred fancy poultry for thirty years, and will send a score card with each bird if desired.

**Mating and Scoring Birds a Specialty. Terms within Reach of All.**

# *TALK ABOUT QUALITY!*

At the Indiana Poultry Association Show, at New Albany, Ind., Jan. 8-13, in a class of 141 White Plymouth Rocks, the cream of Indiana's production and the largest class ever exhibited at any show in the State, with only 12 birds entered, winning four out of five possible firsts and all cash specials but one. These prond winners are the result of seven years of careful selection, scientific mating and systematic line breeding—the only method by which any breed can be brought to perfection. My customers will get eggs from a pen headed by a 95 1-2 point male bird mated to females scoring 94 1-2, 94 1-2, 94 1-2, 95, 95, 95, 95¾ by Pierce and Helmlich, at New Albany, Ind., and Bridge and McClave at Louisville, Ky.

actually be dispensed with after the regulator is set. Fifth: The adjustment of the regulator is a simple and easy matter. Its action is in no way impaired by the chickens sitting or pressing against the bulb as in the case when they are hatching in the Incubator or where the regulator is used in a Brooder; thus it regulates to a fraction of a degree and runs without further attention after being once accurately adjusted. The material in this regulator consists of the same material as a thermometer is made of and works exactly on the same principle and shows a positive and accurate temperature at all times.

INCUBATOR WITH BROODER COMBINED.

The Brooder combined upon the incubator is one of the most novel and best features ever known of in artificial incubating and brooding, making a saving of one lamp. All surplus heat that is not utilized for heating the egg chamber in the incubator is carried to the brooder and used to heat the brooder, thus giving sufficient heat for both incubator and brooder with the aid of only one lamp. You can brood the chickens in the brooder and hatch the eggs in the incubator at the same time with just one-half the general cost. This great invention is patented and the patent is owned by the Reliable Incubator & Brooder Co. They own and control six different patents and these are used in constructing their incubators and brooders, which places them in the highest ranks of standard machines.

This company manufactures both incubator and brooder combined, and incubator and brooder separate, in both the hot-air and hot-water style, also an indoor and outdoor brooder. The Reliable Incubator & Brooder Co. made the largest and most complete incubator and brooder exhibit ever known in the world, at the Paris Exposition, having constructed their own pavilion, and where hundreds of thousands were entertained. A register of visitors is one of the treasured souvenirs of the great exposition, and on the pages are preserved the autographs of the kings and the farmers, the noble and the tradesman, all mixed in the most conventional manner, proving that there are times when one "look" at the Reliable makes all men kin. From Russia comes His Excellency the Grand Duke Alexander, and probable czar. Europe's most genial king, Leopold of the Belgians, the Shah of Persia and King George of Greece. While that fine white-haired gentleman of the old school, King Oscar of Sweden, went off tickled at the sight of the little chicks coming out of their shells. The Marquis de Tayal operates a "Reliable" personally and should he ever sit on the Portugal throne that country will have blue blooded stock to burn (or fry). The charming Baronne de Turkheim has become an enthusiast over the new goose, whose golden eggs will replenish the baronial coffers. While the directors of the government's experimental farms from Russia, Germany and Spain are now framing plans for nearly thirty-four additional experimental stations, where the Reliable incubators and brooders will teach Mr. Farmer and Mr. Poultryman the new way.

This company was awarded the grand prize in competition with the world over all other exhibitors at the Paris Ex-

## S. C. Brown Leghorns.

Orders for eggs for spring delivery booked now. My pens will be headed by the following winuers: 1st cock at New York State Fair, 1900, at Syracuse. Cockerel from first pen at Syracuse, N. Y., 1900; 1st cock at Elmira, N. Y., Nov. 26, 1900 and others of equal merit. Prices ou application.

**JAMES CHRISTOPHER,**

**Kickapoo Poultry Yards, Heyworth, Ill.**

position, and the following is a letter of commendation received from the high officials of the Paris Exposition, which explains itself:

"Paris, Nov. 9, 1900.

"The Reliable Incubator & Brooder Co., Quincy, Ill., U. S. A.

"Gentlemen:—I have the honor to remit your certificate of admission to the Paris Exposition of 1900, and take this opportunity to compliment you upon your successful attainments at the Paris exposition. Your unique, interesting and instructive exhibit in its handsome pavilion has entertained hundreds of thousands of visitors, whose unanimous appreciation and active interest manifestly declares you to be the head and front of the poultry industry in the United States.

"(Signed.)

C. DE RUFFE D'AUXION,
"Inspector General.

"Issued under the authorization of His Excellency Delawney Belleville, Director General."

The above letter is only one of the many commentations that they have received from the Paris officials, and also from royal families, having sold a number of their machines in the royal families.

This company publishes a book treating on Magnitude of the Poultry Industry, Poultry Raising on the Farm, Feeding for Eggs, Raising Broilers for Market, Characteristics of Breeds, Marketing, Successful Egg Farming, Capons for Profit and the Pekin Duck Industry. You may travel the world over and you will not find a book as valuable as this large catalogue and guide. It is worth $1 in gold, but you can secure it *free* by sending ten cents to pay postage. Address Reliable Incubator & Brooder Co., Quincy, Ill., U. S. A., Box A. 1.

———o———

Those active hustlers for trade, the Rippley Hardware Co., of Grafton, Ill., report a large and constantly increasing demand for their goods in this section. Their ad. appears elsewhere in this issue, calling attention of our readers to one of their popular patterns of feed cookers. These they commenced making in a small way a few years ago, but they proved so popular that their factory has several times been enlarged to keep pace with the demand. They believe in keeping up their advertising, and are willing at any time to make further increase in the factory.

The cooker, it will be noticed, is adapted also for doing family washing. Its construction is such that the contents cannot be scorched or burned while being boiled, and at the same time there is such a rapid and strong circulation of the water that the feed is quickly and evenly cooked and the garments are thoroughly cleansed without hand rubbing. It is remarkably efficient with a minimum of fuel and burns anything—chips, cobs, wood or coal.

The Rippley Hardware Co. make a great variety of goods for farmers, fruit growers, poultry breeders, etc., and any reader will be interested in their catalogue and circulars. Write for them and please mention this paper.

———o———

H. N. Hanchett, of Jackson, Mich., at the big Battle Creek show in December won first and medal on Buff Cochin pullet; second, cock; second and third, cockerels. He did not show hen or pen.

## O. P. NESMITH, Bluford, Ill.,

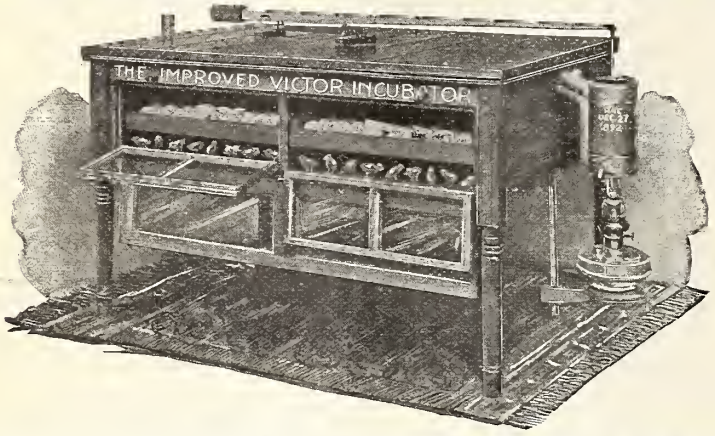
**W. G. SMITH, Box 11, Mansfield, Ohio.**

## Victor Incubator Manufactured by Geo. Ertel Co., Quincy, Ill.

All raisers of poultry are deeply interested in incubators and brooders, as they have proven the greatest factors in placing this industry on a much more profitable basis than was ever possible before they were obtainable. It is true that the raising of poultry and matching the egg by artificial methods is as old almost as the first authentic accounts of anything historical, but the arrangements of this method into machines of comparatively small capacity is a modern invention, and their general adoption of still more modern custom. We might say the incubator and brooder were hardly known twenty years ago, and not until within the past ten years have the general public accepted them as means of increasing their flocks, reducing the amount of work necessary to be done, and making their profits limited only by the extent to which they have gone into the business.



Most of you know, certainly all poultrymen know, there is no other enterprise to which a piece of ground can be devoted, whether large or small, that will prove so remunerative as the raising of poultry, whether for high scoring fowls of the fancier or for the market. A great many industries have sprung up from year to year with wonderful possibilities, some of them appearing very feasible as a competitor with this business, but all have soon died out, usually as a result of the markets becoming overstocked, and prices reduced below the cost of raising. Then they would become a drug on your hands. This condition, if it even did really occur with poultry, was of very short duration, for poultry, like wheat, always has a market, and that market is such as to pay a profit.

If this is true, a shrewd investment would be the purchase of one or more incubators and brooders. If you are a beginner we would advise starting slow; buy only one outfit, familiarize yourself with the work, and then if you are careful and have the room increase your plant.

When purchasing these machines you should take into consideration durability, ease of management, simplicity, standing of the manufacturers, the success of their machines and their methods have obtained not only in the hands of the expert and those who have specially arranged incubating cellars, where the eggs would almost hatch themselves, but in the hands of the amateur who never ran a machine before and who operates them in the most convenient place at hand. That should be the kind of a machine to purchase, and you will find this is just what is offered you in the machines we have used to illustrate this article, The Victor Incubators, and also in the Victor Brooders, made by one of the oldest firms not only in the city, but in the country. Their existence dates back to 1867, and no firm or

# Geo. Stahl, Pioneer Manufacturer of Incubators and Brooders, Quincy, Ill.

Geo. H. Stahl, proprietor of the Excelsior Incubator and Brooder, is deserving of that bigh measure of success which nowadays attends the efforts of inventors in practical lines. He entered this field years ago and was a pioneer in the business of making incubators. As a pioneer, who encountered bardships, difficulties and opposition, to finally overcome tbese trials, he should be recognized now by the public.

The Excelsior Incubator was first brougbt to the public notice in 1884. Up to that time repeated attempts had been made by Frencb and English inventors for the past one hundred years to produce a successful macbine, one tbat could be relied upon under all circumstances, but every attempt had been more or less of a failure until the Excelsior made its appearance. The principle on wbicb this incubator was built and the necessary requisites are:

1. To obtain a perfect heating apparatus and a perfectly uniform distribution of tbe beat in all parts of the egg cbamber.

2. A uniform system of ventilation by which the atmosphere of the egg chamber could be kept as pure as tbe outside air.

3. A proper system of applying moisture to conform to the natural principle.

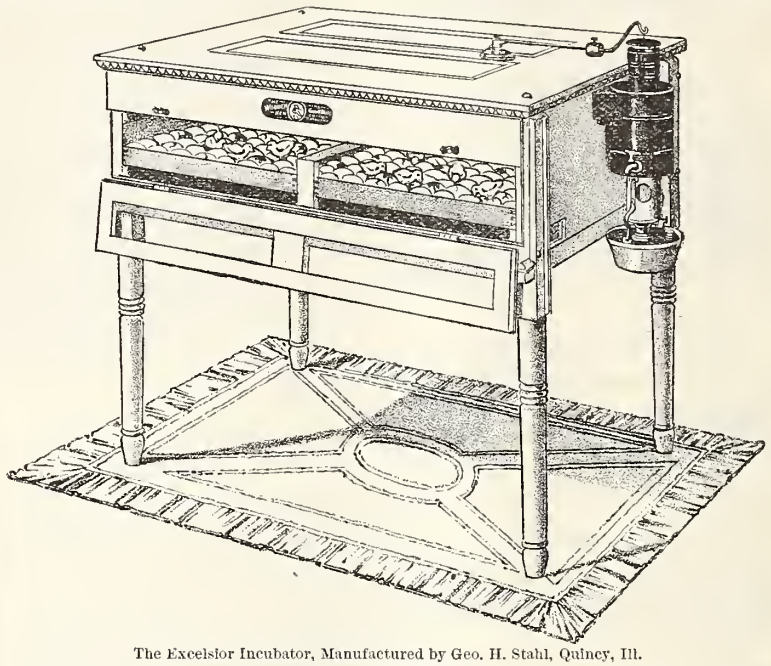
4. And the real vital and important point, a perfectly automatic control of the temperature, one that could be left under all changes of temperature.

All these points were accomplished by Excelsior, and as a result artificial incubation at once became a recognized success. The fame of the Excelsior spread rapidly — its reputation became world-wide. They were sbipped to every civilized country in the world. Over 100,000 of them bave been sold.

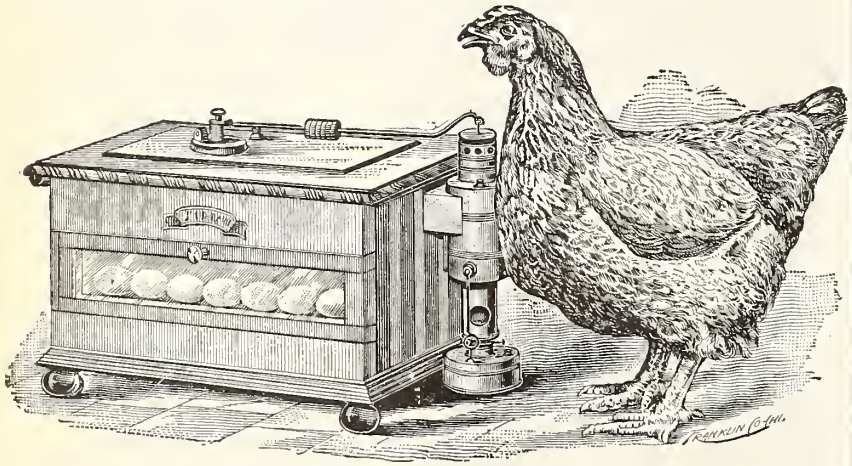
The Excelsior factory building is said to be tbe most complete manufactory in the country devoted exclusively to the manufacture of incubators and brooders. It is certainly by far tbe most extensive, baving more floor space than all otber incubator manufactories combined, the cost of erection, including interior fittings, being nearly $40,000.

The building is situated in the center of the city, Nos. 114, 116, 118, 120 and 122 Sixtb Avenue South, Quincy, Ill., the lot being 65 feet by 100 feet. The building is five stories in heigbt, also basement, making six floors with a total floor space of nearly 40,000 square feet.

There is an enormous demand for incubators in this country and Europe, and hundreds of people are turning their attention to the poultry business as a means of getting a good living; but a person on entering the business should carefully select tbe proper kind of appliances to use he will never succeed. Tbe business is a very profitable one, and being easy to manage and ligbt work, is adapted for women and cbildren as well as men, and oftentimes tbey succeed even better.



The Excelsior Incubator, Manufactured by Geo. H. Stahl, Quincy, Ill.



The Wooden Hen, Manufactured by Geo. H. Stahl, Quincy.

Among tbe points of advantage claimed for the Excelsior Incubator may be named the following:

An equal beat in all parts of the brood floor.

A perfect ventilation without draft on tbe cbicks.

Entire freedom from cbick crowding.

Freedom from all danger of fire—a point to be considered.

First as to simplicity.

First as to self-regulating qualities.

First as to mecbanical construction.

First as to elegance of finish and design.

First as to percentage of hatch.

First as to vigor and strength of the chicks hatched, and

First as to cbeapness, taking into consideration durability and quality of material.

A personal visit of tbe editor of this publication to the Excelsior Incubator factory was an event of especial interest, confirming all the statements so frankly and positively made by Mr. Stahl in all his dealings witb poultry men.

Tbe principal products of tbis concern are tbe Excelsior Incubator, Excelsior Brooder, the Wooden Hen and tbe Hen Brooder, and the catalogue contains a complete illustrated list of every appliance that the poultryman uses in bis yards or in connection with artificial incubation.

Mr. Stabl warrants his machines to be exactly as represented in this catalogue, He claims that his machines are tbe simplest, tberefore the easiest to understand and manage; tbat tbey are positively self-regulating under all reasonable cbanges of outside temperature; tbat they will hatch out a larger percentage of strong, healthy cbicks, free from deformity, and tberefore more likely to live and tbrive, than any otber machine in the world.

A reputation wbicb endures and increases witb the progress of time, and, after a lapse of years is more widely and firmly established tban ever before, can only be founded upon superior merit. Tbis is briefly tbe bistory of the Excelsior Incubator.

No other testimony can be so convincing in tbis regard as tbe acts and words of tbe users of incubators. Tbey are judges of whose competency tbere can be no doubt, and the successful operation of hatching machines in tbeir hands under all conditions and circumstances has elicited such praise as nothing but the bigbest degree of excellence could command.

## A MODEL POULTRY FARM.

It affords us pleasure to illustrate in this issue a halftone bridseye view of the Norton-Fuller farm, located near the great city of Chicago. The postoffice address of this concern is Oak Park, Ill.

Our representative recently visited this farm and reports that the natural advantages are ideal. Located on knolls bordering a beautiful lake affording abundant water privileges and natural drainage, which goes a long way toward insuring healthy stock; a beautiful grove with abundant shade, together with grass and fields giving freedom and exercise. On this beautiful spot are located several modern poultry houses fitted up in a manner to afford conveniences such as are only found in first-class establishments. On this farm are to be found White Wyandottes, that great American strain of fowls that are topping the market in almost every locality, Pekin ducks in large number and of very excellent quality and strain, Bronze turkeys, some of them prize winners at the great Chicago show last winter; and there are to be found a goodly number of very fine specimens browsing over the hills on the Norton-Fuller farm at this time.

Poultrymen are finding it to their advantage in buying stock to look well, to the question of health, and poultry, ducks and turkeys bred on a farm of this kind must be vigorous and healthy if proper care has been given. The management of the Norton-Fuller farm is first-class. We have not seen cleaner or better kept houses or premises than are to be found there. A good lot of stock, young and old, is now offered for sale, and our advice is to put yourself in early communication with these people and see if they have not exactly what you want.

ROBERT J. the Second 58601.

The above half-tone is of the handsome Scotch Collie dog Robert J. the Second, 58601, bred and owned by Johnson Lowe, of St. Charles, Ill. Robert is a rich golden sable and perfect white markings. He has a beautiful coat of good texture, nice head, and ears well carried, and teems with true Collie character, where many of our present day Collies fail. Other good ones are in Mr. Lowe's kennels in Handsome Harry and the crack bitch Brandane Dollie, which is said to be one of the best in America. She has a fine litter by the world's champion Alton Monty, all of which are sold. Brandane Beautiful, a litter sister of Dollie, is now in the east to be mated to Alton Monty, and Mr. Lowe is also expecting to buy another of great merit in England, bred to the crack Collie dog of England, Kirkdab Patrick.

AMERICAN POULTRY JOURNAL readers are invited to visit Mapleleaf kennels, which are located on the electric street car line between Geneva and St. Charles, Ill.; these cars connect with the Northwestern railroad at Geneva and with the Great Western at St. Charles, and a 5-cent fare will take you to the kennels from either place.

**WETZEL'S BLUE BUFF RIBBON ROCKS.**

Win highest honors wherever shown, including Cleveland, O., Jan., 1901—1st cock, 1st, 2d and 3d cockerel, 1st pullet, 1st pen, Buff Rock Club's Silver Cup for best male and female, any age. At Middletown, O., Jan., 1901—1st cockerel, 1st, 2d and 3d pullet, 1st hen, 1st pen and specials, 61 head competing. Geneva, O., Dec., 1900, 1st and 2d cockerel, 1st and 2d pullet, 1st and 2d hen, 1st pen and all specials, 35 competing. Painesville, O., Jan., 1901—1st cock, 1st cockerel, 1st and 2d pullet, 1st pen and special silver cup for ten highest-scoring Plymouth Rocks, all varieties competing. At Columbus, O., Jan. 18-23, the Ohio State Show, in hottest competition, my Buffs again proved their superiority, winning the remarkable scores of 92¾ to 94 and 95½, by Judges Marshall and Bridge. Also 1st and 2d at Pittsburg, Pa. At Genava, O., 1899—every first prize in a class of 43 Buffs competing; also the grand sweepstakes silver cup for best pen and highest-scoring male in show of 600 head. Eggs, $5 per 14 straight. My pens will be headed by the Cleveland winners, 1st cock, Golden Perfection, and 1st, 2d and 3d cockerels. Please mention this paper.

## DES MOINES INCUBATOR CO.

It was a happy thought years ago that suggested the name "Successful" to the Des Moines Incubator Company for their standard machine—a name fully deserved by the large trade they had built up on this pattern. The career of the Des Moines Incubator Company has been one of constant progress. From time to time necessary additions have been made to their factory, but this past year a step has been taken which materially increases the ease and dispatch with which they can handle this immense business. For greater convenience in shipping, as well as to permit their accumulating a large stock in advance of the season from which all early orders can be filled, a large storage warehouse has been added, which we are pleased to illustrate herewith. It will be seen that this is most advantageously situated, as there are railroad tracks immediately alongside of the building, into which shipments can be directly loaded. At the time the photograph was taken from which this engraving was made the company was loading shipments in the partial filling of two noteworthy orders. Close examination will show that one of these cars is being loaded to O. Rolland, Montreal, agent for the Dominion of Canada. The other one is even of greater interest, as it is consigned to F. Lassetter & Co., Sydney, Australia. Thus it will be seen that even in far off and remote antipodean countries the "Successful" is succeeding in winning its way to a marked degree. This is only one instance of the large foreign trade enjoyed by the Des Moines Incubator Company, and which has necessitated the printing of their catalogue in five different foreign languages. So far as we know, they are the only manufacturers of incubators that have done this. The Des Moines company has always been in faithful attendance at the various large poultry shows. Readers of this publication of a year ago will remember the very remarkable hatches made by the Des Moines people at New York and Boston, the incubation being started at Des Moines and timed so that the hatches occurred during the exhibit. In the meantime, of course, the machines with their precious contents were shipped almost 1,500 miles by express; were twice or three times transferred in open wagons from one line to another in Chicago, at New York and Boston, and it could not be seen by any diminution in the percentage hatched that the eggs had suffered in consequence. The only explanation of this is found in the superior hatching qualities of the "Successful" machine. We are not advised what new surprises the Des Moines people have in store for our readers this winter, but we may depend upon it that they will not fall behind the achievements of former years. No expense is spared in constructing these machines to make them absolutely perfect. It would appear unwise to risk losing an expensive hatch for the sake of saving a few dollars on the first cost of the machine, when an absolutely dependable incubator like the "Successful" can be had at moderate cost. The expense of operating the "Successful" is no greater than that of running the cheapest machine on the market—if as much. If our readers will kindly refer to the ad of the Des Moines Incubator Company elsewhere in this issue they will note what the company has to say regarding its catalogue and the conditions under which it is mailed? It is a very complete book and one which cost a great deal of money to compile, but they are very liberal with them. In writing please mention having seen their ad and notice in this publication.

## THE TRAP NEST.

F. O. Wellcome, of Yarmouth, Me., says in the *New England Homestead:*

The trap nest is an individual nest. It should be so constructed as to be inviting to the laying hen and yet exclude the non-layer. The laying hen loves to spend considerable time on the nest, undisturbed by her mates or the attendant, hence an individual nest is in perfect accord with nature.

As the hen remains on the nest until removed by the attendant, an accurate record of her product is obtained and we are able to weed out the drones and perpetuate the best by breeding from the prolific layers.

At least one-third of the hens of an average flock do not lay eggs enough in one year to pay for their food. The good layers are undervalued, while the poor layers are given undeserved credit. They may lay fairly well in the spring, yet do little or nothing the rest of the year.

By the use of trap nests we learn the egg value of each hen in the flock and are enabled to handle the layers frequently, thus taming them and keeping constantly informed as to their individual condition and requirements.

Beginning a number of years ago as a fad, the individual nest system has gradually developed until now its adoption presents a practical business proposition to the market poultryman and the farmer, as well as to the fancier and pedigree breeder. The practical, simple, inexpensive yet scientific trap nest enables every poultry keeper to adopt the individual system.

## 76,061,128.

The population of the United States and territories on the mainland of North America is 76,061,128. Below is a list of the winners of the grand prize in the guessing contest:

First prize, $15,000, Geo. Mohn, Jr., Pittsburg, Pa.; No. Certificate, 49701C; Guess, 76,061,126.

Second price, 5,000, W. A. McLaughlin, Detroit, Mich.; 44087C; 76,061,131.

Third prize, $1,000, W. J. Harrison, Tuscola, Mich.; 41403B; 76,061,120.

Fourth prize, $500, August Bierbaum, Femme Osage, Mo.; 5793B; 76,061,117.

Fifth prize, $300, A. F. Newton, Lawndale, N. C.; 50610B; 76,060,976.

Sixth prize, $200, Miss D. E. LeDoux, Glen Falls, N. Y.; 31517B; 76,061,312.

Seventh prize, $100, J. W. Dorsey, Rutherford, N. C.; 54515B; 76,060,934.

Eighth prize, $90, W. P. Johnson, Gadsden, Ala.; 65463B; 76,061,391.

Ninth prize, $80, N. Simons, Hetland, S. D.; 37534C; 76,060,760.

Tenth prize, $75, Leroy Monroe, Darien, Conn.; 82709B; 76,060,750.

Eleventh prize, $60, L. A. Guthrie, Muncie, Ind.; 42954C; 76,061,573.

Twelfth prize, $50, Alson Brubaker, Fargo, N. D.; 18418C; 76,061,608.

Thirteenth prize, $40 Eben Stock, Douglass, Kan.; 27228C; 76,061,623.

Fourteenth prize, $35, Geo. W. Holmes, Cincinnati, O.; 5151B; 76,061,654.

Fifteenth prize, $30, J. D. Rhodes, Knoxwood, Ala.; 63667B; 76,060,560.

Sixteenth prize, $25, J. F. Fogelsong, St. Edwards, Neb.; 89088B; 76,060,550.

Seventeenth prize, $20, C. M. Smith, Cheyenne, Wyo.; 9522B; 76,060,430.

Eighteenth prize, $15, S. A. Floren, Lakota, N. D.; 35964B; 76,061,827.

Nineteenth prize, $15, A. J. Harris, Fordsville, Ky.; 14760B; 76,061,851.

Twentieth prize, $15, O. L. Jones, Maywood, Ky.; 10274C; 76,060,400.

The $5, $4, $2.50, $2 and $1 prizes were won by the successful estimators who guessed within the figures 76,036,735 and 76,085,533.

## 26,400 PHOTOGRAPHS SENT TO ONE MAGAZINE WITHIN THREE MONTHS.

Some six months ago *The Ladies' Home Journal* offered a series of cash prizes for the best outdoor photographs taken by amateur photographers during the summer. The returns almost swamped the Philadelphia postoffice, which in three months delivered 26,400 photographs to the magazine. The photographs make perhaps the largest single collection ever sent to one particular quarter. It will require nearly a month's work on the part of the magazine's entire staff to assort the pictures and make the awards.

# Winnings of American Poultry Journal's Advertisers at Recent Shows.

Henry T. Reed, Camp Point, Ill., won at McDonough County Poultry Association show, Macomb, Ill., Dec. 24-29, 1900, as follows: L. V. Brahmas, 5 shown, 2d cock, 91¾; 1st pullet, 91½, 1st hen, 93; 1st pen, 182½. S. L.. Wyandottes, 3 shown, 1st pullet, 92¾. Chas. McClave, judge.

J. B. Clark, of 312 Evanston ave., Chicago, won at St. Louis Poultry Show, St. Louis, Mo., Jan. 7 to 14, as follows: Buff Cochins, 1st cock, 1st hen, 1st cockerel, 3d pullet. He only exhibited those four birds. Sharp Butterfield, judge.

J. S. Hoffman, of Sharon, Pa., won at Meadville Fanciers' Club, Meadville, Pa., Dec. 10 to 14, as follows: White Plymouth Rock, 1st and 2d cockerel, 1st and 2d hen, 1st pen, 2d and 3d pullet. Geo. H. Burgett, judge.

C. S. Wetmore, of Lockport, N. Y., won at Rochester, N. Y., five first prizes on White Wyandottes, as follows: 1st cock, 1st and 2d hen, 1st and 5th cockerel, 1st pullet, and 1st pen in a class of 75. Sharp Butterfield, judge.

G. W. Brown, of Camden, Ark., won at Memphis, Tenn., 18 prizes in regulars, besides many specials. On B. P. Rocks won 1st, 2d cockerels, 2d pullet, 1st pen, and only entered 7 Rocks.

Annie Lembke, of Griswold, Ia., won at Southwestern Iowa Poultry Show, Clarinda, Ia., Dec. 11 to 15, as follows: 1st cock, 91½; 1st hen, 94¼; 1st pullet, 93½; 1st cockerel, 91; also won 3d cock, 2d and 3d cockerel, 3d pullet, 1st and 3d pen, and all specials on Light Brahmas, 1st cockerel and 1st pullet, 2d pen Golden Sebright Bantams; 1st prize young pair Toulouse Geese; 1st prize old pair. A. B. Shaner, judge.

C. M. Davidson, of Chicago Lawn, Ill., won at Elgin, Ill., show, Dec. 24 to 28, as follows on S. C. B. Leghorns: 1st cock; 1st, 2d and 3d hens; 1st and 2d cockerels; 1st, 2d and 3d pullets; 1st pen. N. B. Pierce, judge. On 12 entries won ten prizes.

B. J. Lucas, of Danville, Ill., won at Vermilion County Poultry Association, Danville, Ill., Jan. 1, 1901, as follows: On Buff Leghorns, hens, 1st, 94½; 2d, 94; 4th, 92½; 5th, 92½; 2d pen, losing first by ⅛ point. Cockerel scored 91, cut 2 points for wing being cropped; Buff Wyandottes scored, hens, 93½, 92½, 92, 92; pullets, 94, 93½, 93, 92; cockerel, 92½. Chas. McClave, judge.

Rev. H. B. Green, of Aurelia, Ia., won at Aurelia, Ia., as follows: W. Wyandottes—2d and 3d cock, 89½, 88¾; 1st, 2d, 3d hen, 92¾, 97¼, 92¼; 2d, 3d cockerel, 93¾, 93¼; 1st, 3d pullets, 95½, 95; 1st, 3d pen, 189, 185¾. Rhode I. Red—1st cock, 88¼; 1st, 2d, 3d pullet, 93¼, 92¾, 92¾; 1st, 2d cockerel, 94½, 90½; 1st, 2d, pen, 187, 181¼. Belgian Hares, 1st buck, 1st doe.

C. L. Washburn & Son, of Battle Creek, Mich., won at Michigan Fanciers' Association, at Battle Creek, Dec. 4 to 7, as follows: Black Langshans, 1st and 2d hen; 1st, 2d and 3 pullets; 2d cock; 1st cockerel; 1st breeding pen. Buff Pekin Bantams—1st, 2d hen; 1st cock; 3d cockerel; 2d and 3d pullet; 2d breeding pen. Black Pekin Bantam—1st cockerel, 1st and 2d pullet. J. A. Tucker, judge.

D. F. Taylor, of DeRuyter, N. Y., won at Cortland County P. and P. S. A., Cortland, N. Y., Dec. 18-22, 1900, as follows: White Plymouth Rocks—4th and 5th cock, 3d hen. White Wyandottes—1st cockerel; 1st, 3d and 4th pullet; 1st hen, and 1st pen. Special for best collection. D. A. Nichols, judge.

Arthur W. Davis, of Taunton, Mass., won at New Bedford Poultry Association, New Bedford, Mass., Dec. 18 to 22, as follows: S. C. Brown Leghorns, 1st cockerel, 1st pullet, and four specials. Black Cochins, 1st pullet, 4th cockerel, 5th hen. Buff P. Rocks, 1st cock. Black Cochin Bantam, 1st hen and two specials, winning thirteen prizes on eight entries, seven regular and six specials. Nine in Brown Leghorn class, C. A. Ballow, judge; 25 in Black Cochins class, N. A. Knapp, judge; 17 in Buff Rock class, H. S. Ball, judge; 4 in Black C. Bantam, John Evens, judge.

T. W. McClure, of Carey, Ohio, won at Carey Francy Poultry Breeders' Club, Carey, Ohio, Jan. 3 to 8, 1901, as follows: Barred Plymouth Rocks, 1st cockerel, 1st and 2d hen, 1st breeding pen, 4th cock. Also highest scoring 10 in class. Charles McClave, judge. Ninety-five in Barred Rock class.

James Christopher, of Heyworth, Ill., won at Palmyra Poultry Club, at Palmyra, Ills., Dec. 17 to 21, as follows: 1st on Barred Plymouth Rock; cockerel scored 92½. J. K. Felch, judge. Fifteen in B. P. Rock class.

H. D. Thompson, of Wheeler, N. Y., won at Elmira Poultry Show, Elmira, N. Y., Nov. 26-30, 1900, as follows: On White Wyandottes, 1st cock, 1st and 2d hen, 1st and 2d cockerels, 1st and 2d pullets. American Dominiques, 1st cock, 1st, 2d hens, 1st cockerel, 1st pullet. Black Langshans, 1st and 3d hens. George H. Burgott, judge.

W. J. Lincoln, of Mt. Pulaski, Ill., won at Peoria Fanciers' Show, Peoria, Dec. 12-17, 1900, as follows: White Fantails, 1st, 2d and 3d on cock; 1st and 2d on hen; 1st on 1900 bred, and special for best Fantail in show. Robert Joos, judge. Six in White Fantail class.

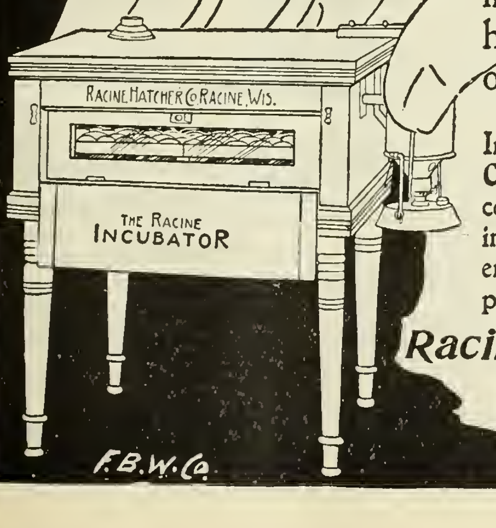
Frank O. Jordan, of Corydon, Ind., won at Old Capital Poultry Association, Corydon, Ind., Dec. 18 to 22, as follows: White Plymouth Rocks, 2 pen and 1st cockerel scored 94¼; scored by O. P. Greer; pen scored 188⅜. Won 1st pullet at the Southern Indiana Poultry Show. Scored 95 at New Albany, Ind. Judge, J. R. Welch.

Dykes & Wimken, of Dana, Ill., won at Wenona Poultry and Pet Stock Association, Wenona, Ill., Dec. 17 to 21, 1900, as follows. Showed three White Wyandotte hens, winning 1st, 2d and 3d. 3d cockerel and 2d pen on S. C. Brown Leghorns. 2d hen and 3d cock on White Rocks. 1st, 2d and 3d pullets, 1st breeding pen, 2d and 3d cockerels on B. Minorcas. 1st cock, 2d and 3d hen, 3d cockerel on B. Langshans. All the 1sts and all but one 2d on Pekin Ducks. One Barred Rock cockerel (young bird), 90¼, cut 3 on weight, ¾ point the hardest cut except on weight. D. T. Helmlich, judge.

J. G. Lembke, of Griswold, Ia., won at Modaway Valley Association, Clarinda, Ia., Dec. 11 to 15, as follows: Light Brahmas. 1st, 2d and 3d cockerel; 1st and 3d cock; 1st hen; 1st and 3d pullet; 1st and 3d pen, and all special on Light Brahmas; 1st cock-

# The Easy to Handle Racine

Of all the incubators you ever saw, read or heard of, none of them is so easy to handle and operate as The Racine Incubator. They are entirely self-ventilating and self-regulating. You can entrust high priced eggs to this machine. If the eggs are any good you'll get the chickens, and a Racine Brooder will raise them too. They're not made for boys to play with. They are a business man's machine. Taking into account their many advantages and high quality they are the cheapest machines on the market at the price.



We make four sizes of Incubators, 50 to 300 eggs. In-door, out-door and sectional Brooders of all sizes. Our Catalogue and "Poultry Pointers" contains more good common sense on the poultry business than you can buy in a dozen books. It's all drawn from practical experience—not mere idle theory. We mail it for 2c stamp to pay postage. It's like getting $2 for 2c. Write to-day.

**Racine Hatcher Co., Box 26, Racine, Wis.**

**Houdan Specialist for 16 Years.**

BATAVIA, O., Jan. 21, 1901.

*Mr. G. G. Bates.*

Again our W. P. Rocks are in the lead. At the late Cincinnati show, January, 1901, won on W. P. Rocks 1st, 2d cock, 2d cockerel, 3d hen, 4th pullet, 2d Buff Rock cock. Our White Rock hens were not cut in any section for color, eyes, legs, beak, feathers and fluff. Passed on a score of 100 points. Our cockerel scored 95 and was cut ½ on shape of tail sickles not filled in yet. Our cock bird scored 95½, cut ½ on tail sickles not in yet since molt. MRS. J. H. OREBAUGH.

# PERSONALS.

A. P. Winslow, of Freeport, Me., commences a yearly contract with this issue. He is a breeder of Barred Plymounth Rocks, and with others in Freeport is preparing to start an association which will be second only to Boston and New York. Mr. Winslow uses the double mating system, and in his pullet line can be found the best blood in New England. He is as strong in his cockerels as in his pullets and notices an improvement each year in his stock.

Sid Conger, Shelbyville, Ind., is an advertiser with us again in a good big space. To old poultry men the name of Sid Conger is a very familiar one, for he is one of the old timers and knows how to raise a good bird right. To the new ones who see his ad for the first time we can say Mr. Conger is a farmer, a man of affairs, and cuts a big figure in the politics of his state. He has a splendid farm at Shelbyville on which he raises Oxford and South Down sheep, prize winning poultry and Belgian hares. He has a record of 3,431 prizes won at fairs and shows and he won thirty prizes at the World's Fair on his birds. He breeds Barred Plymouth Rocks and can satisfy the needs of any one. Mr. Conger suffered a loss by fire of his home that had taken him thirty years to build as he wanted it, but this did not discourage him. He is admirably located near two railroads, the Big Four and the Pennsylvania system, and has long distance telephone and telegraph connections. Mr. Conger took up the raising of poultry when but a boy. His first investment was very small, but by industry and hard work he worked up a fine business and his Barred Plymouth Rocks have been prize winners at many shows in the last quarter of a century. Too much praise cannot be given to these men who years ago persevered in the raising of poultry when poultry raising was looked at in an entirely different way than it is now. The business had not then reached the point that it has today

and the pioneer poultry men worked against many difficulties. The success of the poultry business today is due to the efforts of those who stuck close to the business that was looked on more in derision than we can imagine at the present day. Mr. Conger has not lost the ability to raise good fowls and we take pleasure in referring breeders to his ad.

---

G. W. Brown, of Camden, Ark., renews his advertising contract and speaks very flatteringly of the good returns he has received through the AMERICAN POULTRY JOURNAL. Mr. Brown is very enthusiastic over his stock and winnings and writes his show record demonstrates that he has just as fine a line bred stock as there is in America and guarantees to give entire satisfaction or refund the money. The following letter gives a little idea of what he is doing in the South and will be very interesting reading to breeders of Barred Plymouth Rocks.

CAMDEN, ARK., Dec. 31, 1900.

*American Poultry Journal.*

DEAR SIRS AND FRIENDS: It's no use talking, I have the best stock in the south, as my show record proves, for at our state show I met 1,000 or more select birds from a dozen states, and won 42 out of 50 birds entered and at Texarkana, against 700 or more, I entered 16 and won on every bird entered—9 1sts, 5 2ds, and 2 3ds. I have all the breeders in the south guessing, and while they are all clubbing against me and buying the best to defeat me, I get there just the same. And brother, for the benefit of the double mating Rock breeders, I want to give you a few startling facts. In the first place, I am proud to say, as far as I know and can find out, I own the highest scoring Rock cockerel in America up to date. He has won two 1st prizes this season and scores 93¼ points, and, mark you, I bred and raised him from a single mating. Have a full sister to this cockerel which has won 1st and scored 93½, and the mother of them both scored 93, cut 1 on weight. I entered at Texarkana only three Rocks, the above cockerel and pullet, also the mother of them, winning 1st on all three. Now, whoever heard of such a family of Rocks, and all line bred and from a single mating. Regardless of what double mating breeders claim, I have a strain of single mating Rocks that I know can, have and are producing winners and high scoring males and females. It takes time to build up a strain to produce winners, still I have discovered the secret and am surely producing some as fine males and females from a single mating as I have ever seen, and for the benefit of your readers request that you mention the above, and see if any one else ever made such a winning on a hen, daughter and son.

Yours, G. W. BROWN.

---

W. B. Gibson & Sons, West Alexander, Pa., have Barred Plymouth Rocks that have been bred by them in line for twenty-one years. They have 103 prizes, secured at ten shows in two years under seven of the leading judges. If a good breeding trio is wanted you can make no mistake in ordering from them, as they write they have the finest matings this season that they have ever had. They also sell eggs that can be relied upon as all right. They have also patented a two-size poultry marker which can be bought of them at a reasonable rate. When sending for their illustrated circular, which is free, please mention the AMERICAN POULTRY JOURNAL.

---

That poultry advertisement of George Kreuscher & Co., Somers, Wis., appearing on another page of this issue of our paper has the ring of honesty. These people are large breeders of pure bred poultry of the standard varieties, and make it a point to supply stock of such high quality that they shall have no dissatisfied customers. They are now booking orders for eggs for future delivery. They also sell single fowls, pairs, trios

# BLANCHARD'S WHITE LEGHORNS.

**The Leading Strain of Heavy Layers**

Are no experiment, having been carefully selected and bred for over 20 years with results that fully justify the claim that they are **THE GREATEST LAYING STRAIN OF SINGLE-COMB WHITE LEGHORNS IN EXISTENCE.** No labor or expense has been spared in building up this strain, and while the production of large, pure white, fancy market eggs has been the main object, **STANDARD QUALITIES** have not been neglected. They are large, vigorous, active and handsome, unexcelled for introducing new blood or as foundation stock. 1,000 birds for sale. COCKERELS a specialty just now. Illus. circular free

**H. J. BLANCHARD, Box 997, Groton, N. Y.**

and mated pens of each of the breeds. Their handsome catalogue shows cuts of the fowls they breed and contains much other matter of interest and value to the poultryman. They will mail a copy of this booklet free to all of our readers who ask them for it. Write them before buying your poultry or eggs.

—o—

We reproduce herewith—very inadequately, but as best we can in black and white—the beautiful cover of the Heller Chemical Company's new catalog. It is one of the handsomest and certainly

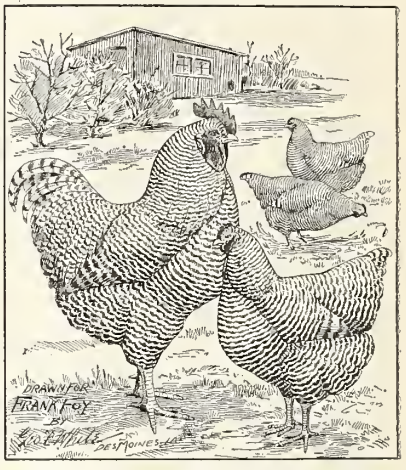
the most complete of the kind we have ever seen. The cover is lithographed in many colors on heavy linen; the book contains 144 large pages, 1,500 illustrations and gives cut rate prices on more than 15,000 articles—household and standard remedies, pills, tablets, live stock and poultry remedies, toilet preparations, rubber goods, paints, oils, brushes, and in fact everything found in a complete drug store. The prices quoted will be a revelation to our readers, as they are from 15 to 75 per cent below those of retail dealers. The book should be in every house in the land, for it will save the purchaser many dollars in the course of a year. The Heller Chemical Company, the only mail-order drug house in the world, is reliable; and our readers may depend upon fair treatment. Send 10 cents for this catalog, which will be refunded with your first order. See their advertisement in another column. Address Heller Chemical Company, Chicago, Ill., and mention this paper in writing.

A. V. Dykes, of Dana, Ill., has undoubtedly some of the best stock to be found in his varieties and is offering them at very low prices. Nearly all of the stock is scored. He made some good sales at the Mazon (Ill.) show, selling Pekin Drake for $10. At the Winona (Ill.) show he refused an offer of $10 for his best Barred Rock cockerel and swept everything in Pekin ducks with scores to 99; none below 98. His S. C. B. Leghorns scored at the Winona show 92 to 94. We urge those who are looking for good stock to write Mr. Dykes.

C. L. Hogue, of Battle Creek, Mich., has some very fine Barred Plymouth Rocks to dispose of to make room for his spring matings. At Kalamazoo, Mich., he won first, second and tbird cockerel, 92½ each; first pullet, 94½; third hen, 93½; third pen, 186½; also sweepstakes on Barred Rocks for best display. On Dark Brahmas, first cock, 90¾; first hen, 92½; first cockerel, 93, and first pullet, 92, with H. A. Bridge judge.

The accompanying illustration is a fair representation of the beautiful markings and typical shape of the Crescent Farm's Barred Plymouth Rocks. Mr. Frank Foy, proprietor of the Crescent Poultry Farm, Des Moines, Iowa, Box B, is preparing to make a specialty of the egg trade the coming season, and can furnish eggs by the single sitting or for incubator use from the following varieties: White and Barred Plymouth Rocks, White and Brown Leghorns, White and Silver Laced Leghorns, Light Brahmas, Buff Cochins and Mammoth Imperial Pekin Ducks.

Mr. Foy's idea is to give every one great big value for his money, then he will come back again, and this he con-



stantly does. Satisfaction full and complete goes with every shipment. Mr. Foy has issued a very handsome catalogue, illustrated in fine shape, which contains articles on winter egg production, broiler raising, poultry diseases, remedies, incubators and their management, etc. We would advise our readers, if interested, to send for it, as it contains much valuable information. It will be sent to any address upon receipt of a 2-cent stamp.

We have examined the Ideal Trap Nest manufactured by F. O. Wellcome, of Yarmouth, Me., and recommend it to our readers.

# KLONDIKE INCUBATOR

You cannot fail to appreciate the value of Klondike Incubators and Brooders if you examine the principles of their construction and operation. Their simplicity makes them easy to run. Lack of delicate parts makes them durable. Results make them successful. Low prices make them popular. What more do you want? For free illustrated catalogue which gives full descriptions, prices and much information for poultrymen, address **KLONDIKE INCUBATOR CO., Box 908, Des Moines, Iowa.**

# Sacrifice of Prize Winners!

## Barred Rocks and Brown Leghorns

I ever raised. Most of the birds on which I **won 40 Prizes at Chicago, Milwaukee and Quincy** last winter are still in my possession. A grand chance to get quality and a record cheap. Pairs, trios and pens if you want them. Please write.

C. A. DAMON, 2470 Monroe st., Chicago, Ill.

# Poultry Show Notes

## CLEVELAND'S "CENTURY LEADER" SHOW.

A Grand Success in all Respects.

The first annual exhibition of the Cleveland, Ohio, Poultry Association closed January 12 and aside from the number of birds entered it ranked well with the other great metropolitan shows. The officers worked under many disadvantages and deserve great credit for their success. Cleveland shows in the past under different management have not been financial successes and many breeders were loth to exhibit as largely as they would otherwise have done. Some of Cleveland's most prominent business men now have charge of affairs and the difference was seen on every hand. The show was elegantly cooped and presented a handsome appearance. About 1,500 specimens were in the show which was held in Central Armory, a building admirably adapted to the purpose. Every promise made to exhibitors was fulfilled and all premiums were paid in full. Messrs. Drevenstedt, McGrew, Bingott, Foster, Rigg and Shepherd placed the awards promptly and satisfactorily and the consensus of opinion among exhibitors was that Cleveland Association had earned the hearty support of all breeders in this section of the country and it should have it next season.

The more important winnings were made by AMERICAN POULTRY JOURNAL advertisers as follows, whose detailed winnings will be found elsewhere:

Barred Rocks—M. J. Temkovits, Brooklyn Ohio; Chas. Hopper, Ashley, Ohio.

White Rocks—W. J. Farrar, Toledo, Ohio; F. L. Gruehl, Cleveland, Ohio; Dr. W. A. Crum, Carey, Ohio; Geo. G. Brown, East Cleveland, Ohio.

Buff Rocks—Frank Wetzel, Painesville, Ohio.

Buff Wyandottes—D. D. Haines, Geneva, Ohio.

White Wyandottes—Fred E. Pile, Cleveland, Ohio; Geo. G. Brown, East Cleveland, Ohio; Chas. McClave, New London, Ohio; Clark and Troll, St. Clairsville, Ohio.

Light Brahmas—Geo. G. Brown, East Cleveland, Ohio.

Buff Cochins—Crescent Farm, East Ohio.

White Leghorns—Crescent Farm, Kent, Ohio; Clark and Troll, St. Clairsville, Ohio.

Black Minorcas—W. J. Boyd, Glenville, Ohio.

Turkeys, Ducks and Geese—Chas. McClave, New London, Ohio.

The Cyphers Incubator Co. had a large display of machines and hatched chicks during the show giving a practical demonstration of the work done by their incubators and brooders. The partially incubated eggs were made to produce chicks after having been shipped to the show packed in cotton in baskets, thus doing the work under the most trying circumstances. Mr. W. C. Denny had charge of the exhibit and booked quite a number of orders for machines.

G. E. Conkey & Co., of Cleveland, Ohio, had an attractive exhibit of the old reliable Conkey's Roup Cure, also of their Poultry Tonic and Louse Killer. These well known remedies are used everywhere and are absolutely guaranteed to do what is claimed for them or the money paid for them will be refunded.

DUSTON'S

White Wyandottes

have been

WINNERS

in all the big shows in the country for years. My customers not only win with birds bought ***direct,*** but raise winners from stock and eggs purchased from me. Isn't this just what you want? If so, write me and I will take care of you at right prices.

ARTHUR G. DUSTON,

Box 1020, MARLBORO, Mass.

***Headquarters for White Wyandottes.***

**THE LIFE OF THE INCUBATOR CHICK** depends upon the care given after it leaves the incubator. It is therefore necessary that you use a first-class brooder. You get this in the **WABASH BROODER,** simple in construction, built on honor, and will rear to a healthy maturity a greater portion of chicks than any other brooder made. Zero weather, a snow or thunder storm will not interfere with the healthy growth of your chicks if you use a **WABASH** brooder.

This Brooder is sold under a positive guarantee to be the equal of any made, and if it is not as represented in every respect your money will be refunded. Price $7 00.

**G. C. FLEGEL, Westville, Ind.**

SINGLE-COMB BROWN LEGHORNS

**Exclusively.**

Eggs 50 cents per 13; $3 per 100. I keep the best. Shipped more than 10,000 eggs last year for hatching, and every customer was satisfied. Send for circular that will tell about prizes, etc.

## *The "Gold Medal" Strain of*

# LIGHT BRAHMAS.

Have again proven their superiority over all competitors in the show room in hot competition. Our record at Keota Poultry Show, Nov. 20-23, 1900, F. H. Shellabarger, judge, 1st, 2d, 3d and 4th on hens, 1st and 4th on cocks, 1st, 2d, 4th and 5th on cockerels, 5th on pullets, 1st on pen, the **SILVER CUP** for best trio of old stock, besides other valuable special premiums. We still have some extra good birds for sale, either sex, at reasonable prices. Our **BRAHMA BOOKLET** is free. Address and mention A. P. J.

**MAPLE GROVE POULTRY FARM, W. S. GREGORY, Keota, Iowa.**

Sec.-Treas Western Light Brahma Club.

# White and Buff ROCKS
# White and Buff COCHINS

My birds are of the highest excellence, scientifically mated and bred to produce winners. My record in the show room is ample evidence of the quality of my stock. Prices are right and satisfaction absolutely guaranteed. Circular free. Correspondence promptly answered. Address, mentioning A. P. J.,

**FAMULENER POULTRY YARDS, E. L. FAMULENER, Prop., Cameron, Ill.**

Several fowls at the show were cured of bad colds by administering this roup cure in the drinking water.

W. J. Boyd, the Black Minorca specialist of Glenville, Ohio, was one of the most successful exhibitors at the Cleveland show. His birds competed with some of the best in the east, as well as those at home and he won 1st and 2nd cock, 2nd and 4th cockerel, 3rd hen, 2nd and 5th pullet and 1st pen. Mr. Boyd's birds were large, well shaped specimens and were exceptionally fine in color. He has been breeding this variety for eleven years and has used such care and good judgment in his matings that his stock is able to make a good showing in the strongest competition. His price for eggs is $2 per setting, as will be noted by referring to his advertisement. Tbis is a very low price for eggs from the kind of stock found in Mr. Boyd's yards.

The Central Poultry Supply Company of 1036 Woodland avenue, Cleveland, Ohio, had an exhibit of poultry supplies at the show. This firm handles all kinds of supplies and appliances from a leg band to an incubator and we respectfully refer our readers to their advertisement elsewhere in the JOURNAL. They have the best facilities for shipping to all parts of the country and have arrangements whereby the lowest possible express and freight rates are secured. They give all orders prompt and careful attention and our readers will find it a pleasure to do business with this firm. The manager, Mr. F. L. Gruehl, is a breeder of White Plymouth Rocks and won at the Cleveland show. He has a good record on this variety at other shows in the past and enjoys a large trade. He makes a special effort to please his customers and as far as we have been able to learn he succeeds in this respect.

Mr. M. J. Temkovits, of Brooklyn, Ohio, is keeping up his record on Barred Rocks by winning at the Cleveland show as follows, 1st cock, 2nd hen, 1st and 4th pullet, 2nd cockerel and 1st pen. This record might not mean much if it was on some unpopular variety or in a small class, but on Barred Rocks at Cleveland, it is worthy of notice by those who are looking for some good birds or eggs for hatching. Mr. Temkovitz raises the birds he wins on and is therefore in position to sell stock and eggs to his customers that will not disappoint them. His prices are low considering quality and our readers will do well to write him for a copy of his circular before placing their orders elsewhere. He guarantees to please his patons.

FARRAR'S WHITE ROCKS.

Mr. W. J. Farrar, of Toledo, Ohio, came down to the Cleveland show with three cockerels just to let the boys know he was still in the ring and carried away 1st and 3rd prizes. He might just as well have won more if he had brought more birds. During the past three seasons he has exhibited at seven prominent shows and has never failed to win 1st cockerel or 1st pen which are the two most desirable prizes. He has also won other firsts, seconds and thirds but has never lost the ones mentioned. This is a record which will do to paste in your hat if you want stock or eggs of this variety. When a breeder can mate birds each season so as to win these two prizes it shows that he has "learned his lesson" and he is in position to help others. Mr. Farrar is an old breeder of White Rocks and a prominent member of the White Rock Club. When he sends

out stock it can be relied upon as represented. He will have a limited number of eggs for sale from his high grade pens this season.

OKLAHOMA CITY, O. T.

The Oklahoma City Poultry and Belgian Hare Association held its first annual show Dec. 26, 27, 28, 1900. It was a success from start to finish, both as to quality and numbers and financially. Every cent of expenses and premiums were paid before the show closed and general satisfaction was given to the management, exhibitors and visitors. The display of fine stock was better and larger than was expected and the scoring was satisfactory to all, not one finding any fault of any kind. Mr. Fite is rapidly getting a reputation as one of the leading judges of the southwest and knows when to cut a bird and shows no partiality or favoritism. The following officers were elected for the ensuing year: D. A. Johnston, president; J. J. Wallace, vice president; W. P. Hawkins, secretary; Mrs. Lillie Kirby, treasurer; E. J. Rockefeller, superintendent; directors, D. A. Johnston, J. J. Wallace, W. P. Hawkins, Mrs. Lillie Kirby, E. J. Rockefeller, W. L. Alexander and R. F. Caffrey. The directors will meet Jan. 15th to fix dates and select judges for the 1901 show.

SYCAMORE OHIO.

The fourth exhibition of the Sycamore Poultry and Pet Stock Association was held Dec. 26-29, 1900. The attendance was good and the exhibit was one of the best that H. A. Bridge has passed on this present season. American class led in numbers with the Mediterranean a close second. A large line of dogs also were on the stage and a fine display of Belgian hares. About 500 birds were on exhibition. Everything considered it was a grand show.

CHILTON, WIS.

The first annual exhibition of the Chilton Score Card Poultry Club was a success, both financially and in the quality and quantity of birds exhibited. As regards quality, 12 percent of the birds exhibited were entitled to and received merit cards. These birds were within one point of the winners, and as Judge Felch remarked, were of good quality and showed careful and good breeding.

The American class carried off the cake. Ninety-seven Barred Plymouth Rocks were on exhibition, scoring from 88 to 94½ points. One hen would have scored 95½, but she lost in weight by being cooped one week before the show.

In White Plymouth Rocks there were seventeen entries. The first prize cock was good color, scoring 94 points, being cut 1½ in weight.

The Buff Plymouth Rock class contained eighteen specimens. The males were not as good as I have seen, but the pullets were grand and of true Buff color, buff to the skin.

In Wyandottes the White led, there being fifty-seven in this class, the crown going to a 96-point hen. The first prize cock scored 94; two cockerels also scored 94, one losing by ½ point in weight. This was a beautiful class, the first prize pen scoring 189½; second pen, 187⅝.

The Goldens were represented by thirteen head.

**Bennett's Buff Rocks.**

**Are Still Winning.**

Mazon, Nov. 29th to Dec. 1, 1900—W. S. Russell, judge—1, 2d, cock, 92, 92, 1, 2, 3, 4 hens, 94, 92½, 92½, 92; 1, 2, 3 ckls, 94, 92¾, 91½; 1, 2, 4 pullets, 93½, 93, 93; 1, 2 pens, 187⅞, 185⅝. 40 ckls. and 40 pullets, same breeding as these, at $2 to $5 each. Send for free circular.

Burdick's "Nuggets," Pure. DR. O. P. BENNETT, Mazon, Grundy Co., Ill.

**Buff Rocks.** Pen No. 1—Headed by a ckl, score 93½, one point better than the Madison Square Garden bird, both scored by F. C. Sherherd. Clear buff

**Lt. Brahmas.** Pen No. 1—Jack Frost, wt. 15 lbs., score 92½ to 94, always takes 1st prize when shown.

**Main Office, Cleveland, Ohio.** **Central Farm, Kent, Ohio.**

It was for the Light Brahmas to walk away with the whole cake, the cock in this class scoring 92; one pullet scoring 95. She was the admiration of all the visitors, being the queen of the show, and she seemed to know it. The Light Brahmas showed up to the number of forty-six, a grand class. Judge Felch remarked he had not seen their equal this season.

Upon the call of the roll Black Langshans responded to the tune of thirty-nine, and were a splendid lot, the first cock scoring 94½; the first hen, an eight-year-old girl, also scored 94½. She showed great breeding, as her color was all that a Langshan breeder could ask for.

Blue Langshans one pair.

Buff Wyandottes showed up eleven head. Buff Cochins were a grand lot, but all suffered for weight. Twenty-six were in this class.

Of Houdans, Judge Felch said this was the largest class that he had judged at any show this season, there being thirty-four, the first prize hen scoring 95½. As a class this was a good one, scoring from 89½ to 95½.

S. C. W. Leghorns carried off the honors in the Leghorn class, fifty-one being in line for cards, scoring from 92½ to 95½. This was a splendid class, but pullets were all late hatch and received a cut of ½ to 1 for size.

Next in line came the Buff Leghorns, forty-nine in class; a fair class in hens and pullets, but the males could all stand improvement.

The S-c. Brown Leghorns showed up forty-seven in number and were a good lot, although the females showed up a trifle too dark to please the judge. However, the queen in the class, a hen, scored 94½.

In R.-c. Brown Leghorns there were eleven head. The first prize cock in this class was a beauty.

Black Hamburgs showed up three, one pullet going 96 and was the best colored pullet Judge Felch ever passed upon.

S. S. Hawlings were nine in number; Black Minorcas, nineteen; White Minorcas, eight. One pen of W. C. W. Polish in the class and they were an exceptionally good lot, as were also one trio of W. C. Black Polish. Black B. R. G. Bantams were represented by nineteen specimens. The Buff Cochin Bantams showed six specimens. White Holland Turkey Gobbler, one; no hens. Bronze Turkey Gobbler, one; no hens. Three pair of Toulouse Geese. One pair of Pekin Ducks completed the list.

In summing up the show, the club is to be congratulated upon a successful and A. No. 1 show. The untiring eforts of the president and secretary to make it a success were well rewarded, and the poultry fraternity are thankful for their good work.—*Cor.*

---

WENONA, ILL.

This association is one that may justly feel proud of their last show, as it surpassed both in numbers and quality any of the previous efforts. The Barred Rocks were out in great numbers, over 180 being in competition, many of high quality, the winners in this class scoring higher than any met with thus far this season. This indicates that Illinois fanciers are not slow in their efforts to get and stay in the front ranks with this variety. The White Plymouth Rock class was well represented by over 60 head of

quality witbout a disqualified specimen in the lot. S. C. Brown Leghorns were a grand lot, fine in size, shape and color. Numerous other varieties were there. But for Bronze and White Holland turkeys this show led all I ever scored, over 30, all first class birds, being shown. Pekin and Rouen ducks too were a large class, more than 50 head representing these varieties. The most entertaining feature in connection with tbis exhibit is the fine band that discourses tbe latest and best of music every evening to the immense crowd that gathers in after 7 o'clock every evening to enjoy the show and listen to the joyous strains that lighten the heart and uplift the thoughts away from self and all the worldly things too often uppermost in mind. This association is composed of farmers, with but few to do tbe work, but wbat is lacking in numbers is made up in enthusiasm, sticktoitiveness and push wortby of the cause. Long may they live, is the wish of yours, D. T. HEIMLICH.

HOOPESTON, ILL

At the Hoopeston Fanciers' Association show the attendance was very good and a sufficient amount of money was taken in to pay all premiums in full. The contestants also express tbemselves as being well pleased witb the awarding of the premiums, and the able and just manner in which the business of the enterprise has been managed has met with the hearty approval of every one. While this was but the second attempt upon the part of the Hoopeston association to give a poultry show of their own, it has proven a very successful one, and hereafter these sbows will be held annually in Hoopeston.

The officers of the association are as follows: President, Mrs. G. M. Hanly; vice president, F. H. Ayres; secretary, A. L. Knox; assistant secretary, Ed Erickson; judge, S. H. Taylor; superintendent, Ed Weaver; directors, D. D. Gilman, M. Neves and F. M. Owen.

GREENVILLE, MICH.

The Greenville Poultry and Pet Stock Association was held at Greenville, Mich., Dec. 25-28. The number of fowls exhibited was 305, and Belgian hares 15. Largest number of one variety was 80, consisting of Barred, White and Buff Plymouth Rocks. Wyandottes were the next largest, 48, White, S. Laced and Golden. Bantams came next with 40, Buff Cochin, Buff Pekin and Golden Sebright. Belgian bares were also shown.

CRAYMER, MO.

The Northwest Missouri poultry show at Braymer, December 3 to 7, was a grand success. This being the fourth annual show, it was productive of a higher grade of birds, a larger variety and greater number.

The Belgian bare exhibit was a new feature and created much interest.

Judge Rhodes, of Topeka, Kan., judged the birds with satisfaction to the management and exhibitors.

KIRKSVILLE, MO.

The fourth annual show of tbe North Missouri Poultry Association was held at Kirksville Dec. 3-7, 1900. There were about 500 chickens, turkeys, ducks and geese entered and on exhibition. Tbe main excitement was in the Barred Plymouth Rock class, in competition for

**GOLDEN WYANDOTTES.**

They are again winners. At the Danville, Ill., Show, Jan. 1-4, 1901, they won as follows: Cock, 1st, 2d, 3d and 4th; hen, 1st, 2d, 3d and 4th; cockerel, 1st, 2d, 3d and 4th; pullet, 1st, 2d, 3d and 4th; pen, 1st and 2d, in a class of 28 head.

Address

J. F. CRANGLE, Manager, Simsbury, Conn.

Dr. C. E. Still's cash special prize of $25 for the best male and four best females in the show. The judge awarded this prize to the Ortiz Fruit Farm, Mexico, Mo., owned by M. B. Guthrie, and represented at the show by Mr. J. R. Lampson. D. T. Heimlich judged the show and gave entire satisfaction. The annual meeting was held on Thursday night, Dec. 6, with President Fraker in the chair. The following officers were elected for the coming year: President, E. Fraker, Downing; vice president, M. L. Kurtz, Wyaconda; second vice president, Mrs. J. D. Lyda, Atlanta; secretary-treasurer, F. M. Buckingham, Kirksville; board of directors, S. J. Miller, Isaac A. Novinger, C. C. Hopewell, W. F. Hannah, Kirksville; Mrs. F. W. Cain, Novinger; A. F. Zimmerman, LaBelle; Mrs. S. A. McClellan, Granger.

Kirksville was voted as the place to hold the next show, and the first week in December was fixed as the date.

DAVID CITY, NEB.

The second annual show of the Butler County Poultry Association, held at David City, Neb., Dec. 11 to 14, was a grand success. While the number of birds shown was considerably less than last year, they made up in quality. The number of birds shown was 255, the larger classes being Barred Plymouth Rocks and Leghorns, 60 barred Plymouth Rocks, 35 White and 20 Buff; Wyandottes, 4; small show of Wyandottes; Cochins, 34; Langshans, 14; Light Brahmas, 5; S.-c. Brown Leghorns, 18; S.-c. White Leghorns, 11; S.-c. Buff Leghorns, 30; Buff Orpingtons, 8; Klondikes, 5; Ducks, 7.

The Central Union Poultry Association holds its next show at Galva, Ill., Dec. 10 to 14, 1901, with A. B. Shaner as judge.

The show report of James H. and Flora A. Waddell in another column is an excellent record and the scores of breeding pens are of especial value. These people have given to the breeding of Houdans special study for years and give their best attention to this variety. The color is an especially strong point with them. Houdan breeders should write them for further information.

Mr. W. R. Wooden of Battle Creek, Mich., fared well at the state show at Detroit, Mich., January 7, winning on his royal strain of Buff Wyandottes with an entry of sixteen birds in a class of forty. First cock, first, second and third hen; first and second cockerel; first, second and fourth pullet; first and second breeding pen. Prince Charles has now a record of three firsts in succession, at Detroit, January, 1900; Battle Creek, December, 1900, and Detroit, January, 1901.

H. E. Bates of Galesburg, Ill., changes his ad this month with an announcement regarding eggs for sale from his White Rocks, Buff Wyandottes and Brown Leghorns. Mr. Bates writes that his birds are fine and he will give close attention to all egg orders.

George M. Leffel, of Springfield, O., writes: "My strain of Barred Plymouth Rocks in hands of Jacob Frye won first, second and third cockerel, scoring 94, 93, 92½, second pullet 92½, cut 2

PURE BRED DUSTON

and Knapp Bros.' strain prize winning White Wyandotte cockerels, June hatch, 7½ to 8½ ponnds, well built, extra large, bay eyes, yellow legs and beak. Elegant breeding stock. Also breeders of White Japanese Bantams. Call or write for prices.

A. M. JETTNER, Terre View Farm, New Carlisle, Ind.

MURPHY'S ROCKS

Won at the big Indianapolis Show, Dec. 10-15, 1900. Barred Rocks, 2d cockerel, score same as 1st cockerel, and 2d pen. Buff Rocks, 1st and 3d cockerels, 1st and 2d pullet, 2d pen. This is the third year of winning at Indianapolis. My White P. Rocks and White Wyandottes and Brown Leghorns score 94 to 95 and are fine in shape and color. Stock for sale. Eggs in season. A fine COLOR PLATE catalogue of four leading American breeds and a whole lot of things you ought to know, only 10 cents for mailing, after Jan. 15. Address

ED. B. MURPHY, Box 3, Carmel, Ind.

WM. CAMPBELL, 3034 Emerald Ave., Chicago, Ill.

McClave's

Barred, White and Buff Rocks, White and Silver Wyandottes, Brown and White Leghorns, Black Minorcas,, Buff Cochins, big Bronze and White Turkeys, large Toulouse, Embden, White and Brown China Geese, prize Rouen, Pekin and Muscovy Ducks.

1,500 Birds to Select From.

The finest lot ever bred at Linwood Farm. Now is the time to place your order for show birds and breeding stock. Don't waste time and money buying cheap or inferior birds, but write at once to McClave, the largest breeder in OHIO. Over 2,000 prizes won by my birds at the leading shows. Valuable catalogue free. Write for prices and description of birds.

CHAS. McCLAVE,
Box R, New London, O.

on weight at Sycamore, O. The first pullet and second cock were also my strain. At this show he exhibited 10 birds and won eight regular prizes, H. A. Bridge, judge. Ninety-four was the highest score given this year at any show with hut one exception, when the score was tied. He bought $12 worth of eggs to raise these winners."

John M. Sontag, of St. Charles, Ill., won at Elgin, Ill., Dec. 24-28, 1900, on Black Langshan pullets 1st, 2d, 3d, 96¼, 95½, 94½. Special for the highest scoring pullet in the show with B. N. Pierce as judge.

L. E. Meyer, Bowling Green, Mo., won at a recent show held in Missouri, December, 1900, with Ben S. Myers judge, eight out of the fifteen ribbons offered on Langshans, seventy birds competing. He exhibited six cockerels that weighed from eight to ten and one-half pounds and scored from 93¾ to 94½. His pullets all weighed over seven pounds.

U. Grant Davidson, Manson, Ia., won at Mason City, Iowa, December, 1900, where he sent six hirds, first on hen. Mr. Davidson has spent a great deal of money and has had years of experience with his Light Brahmas and at Fehruary shows is going to make the boys hustle to win over him. .

Ed. N. Maish, Frankfort, Ind., at the Frankfort show in Decemher, 1900, won special on ten highest scoring Barred Rocks, also second on breeding pen. Mr. Maish commences a yearly contract with us this month.

Paul B. Harshman, Sullivan, Ill., came out first class with his White Rocks at Bloomington, winning first pullet 95, third pullet 94½ and another pullet with the same score that did not get a class, second and third hen 93, 92½, second cock 91½, fourth cockerel 93½, second breeding pen 187¾, also $3 special for the highest display. His birds are extra good in color and size.

Charles B. Sayers, Waynetown, Ind., commences a yearly ad with us this month. Mr. Sayers lives near Waynetown on a farm of 360 acres and is a Barred Rock and Silver Wyandotte specialist, a hreeder and originator of the Blue Tinge strain of Barred Rocks. He has also made a specialty of fine seed corn.

R. C. Reynolds, Jacksonville, Ill., won the sweepstakes in the Hamhurg class at Kansas City in 1900.

Joseph F. Misener, of Mazon, Ill., was a winner on White Wyandottes and is now offering some grand cockerels for sale, scored or unscored, and has a few more pullets to spare, and will book orders for eggs.

I. E. Beyer won third on Buff cockerel 91½, and fourth on Buff Rock Cochin. At Galena, on Buff Rocks he won first and third cockerel, first on pullet, first on pair, and several special premiums.

The recent wimnings of the Highland Poultry Farm, of Des Moines, Iowa, at the Iowa state show can he found in their ad on page —. The manager, Mr. Hall, has found it necessary to add a superintendent in the person of D. Amos Burkhaus, a White Wyandotte judge

# Brintnall's White Rocks.

40 pullets scoring from 90 to 93 at $1.50 to $2 each. 25 exhibition pullets and hens scoring from 93 to 95½ at from $2.50 to $5 each. They can't be beaten for color, size, shape, etc.

ELMER BRINTNALL, Aurora, Iowa.

## HELP US GET RICH!

***Eggs, $3 for 18; $5 for 36.***

**C. I. FORSYTH, Winfield, Kansas.**

# Blood Meal

BLOOD MEAL (TRADE MARK)

**Greatest Egg Producer on Earth.**

**Blood Meal** is manufactured by the Summer's Process, and is absolutely odorless. Everyone knows that blood contains all the elements necessary to build flesh, make eggs or to grow anything of an animal nature. Hence, it is nothing strange that blood, after being dried and submitted to a process which makes it odorless, should be the best of all poultry foods.

It is cheaper than most poultry foods, because being so nutritious a small amount will do for a large flock of fowls, as it must be mixed with other food when fed.

Blood Meal contains no ground bone or other cheap adulteration of any kind. It has less than five per cent of moisture, and is the only **Perfectly Dry** poultry food made. Send for circulars and testimonials from those who have used it.

**10-lb. bags, each 50c. 50-lb. bags, each $2.00**

**FOR SALE BY ALL DEALERS IN POULTRY SUPPLIES.**

**W. G. GRIFFITH, McNabb, Putnam Co., Ill.**

# Buff Wyandottes and Buff Leghorns

Two grand yards of Buff Wyandottes for this season. Yard one, contains hens that score as follows: 93½, 92½, 92, 92. Yard two, pullets 94, 93½, 93, 92. mated to a 92½ cock bird. One yard of Leghorns, hens scoring 94½, 94, 92½, 92½, 92, 91½; cockerel 91, cut two points for wing being cut. Stock and eggs at all times. Satisfaction guaranteed.

**B. J. LUCAS,**

**1002 Robinson St. - - - - Danville, Ill.**

and breeder of Nebraska. Their Dottes are the cream of the West, as their winnings prove, and they have lots of them. They have been rightly termed the "Quality Breeders of the West." Their eggs hatch stock which win and reproduce themselves. This season they are especially strong in eggs for hatching, as there are but nine females in a yard and each yard is headed by a grand cock or cockerel. They guarantee good, fertile eggs that are carefully packed in light, strong baskets. See ad.

In the January ad for I. E. Bever, Keithsburg, Ill., we had it read that his feed cooker "cools the morning mash." It should have read "cooks the morning mash." This feed cooker, patented by Mr. Bever, is a great convenience for the poultry man, not only cooking the morning mash but warms the poultry house in winter and increases the egg production.

Mrs. J. H. Orebaugh, of Batavia, O., commences advertising with us again after an absence of several months owing to the fact that she lost 300 of her largest and earliest birds last spring, as these were stolen or killed. She was able to save the cream of last year's breedings for her breeding pens and is in the market with eggs of the best quality this season. All persons wishing to establish a poultry plant will do well to write her and get prices.

J. M. Holt, of Marshalltown, Iowa, won on Barred Plymouth Rocks at the January, 1901, Marshalltown Poultry Association show, 1st and 2d on cockerels, 1st on pullets, 1st on hen and 1st on pen.

If poultry people would only stop to consider that a very large percentage of the natural food of ducks is animal food they would succeed much better with their flocks. Fish, crabs, snails, slugs, etc., found naturally in the water, originally constituted the duck's food when in a wild state. Tame ducks do equally well on animal food and will not lay, breed, thrive and grow to best advantage without it. Sweet Beef Scrap is the very best food for ducks of all ages. See advertisement of Darling Pure Poultry Foods in this issue of our paper.

Mr. I. T. Bryant, Oxford, O., Buff Plymouth Rock breeder, exhibited at Hamilton, O., recently and won 1st and 3d pullet, 1st and 2d cockerel, in a class of 60 birds. Mr. Bryant endeavors to please all his customers and according to the business that he reports is undoubtedly successful. He has a few Buff Leghorns to dispose of and Judge Becknell says that he never saw any better, being a clear, even Buff with solid wings and grand tails.

C. A. Porter, of Flat Rock, Ind., won four firsts on his Barred Plymouth Rocks at the Bloomington State Poultry Show.

C. E. Detter, Van Wert, O., in addition to the winnings already noted won the $25 prize for the highest scoring 50 birds in Van Wert show with an average score of 93 4-10. His White Rocks won a membership for him to the American White Rock Club.

E. F. Peirce, of Port Clinton, O., won special for best display of Barred Plymouth Rocks at Toledo.

# Bantam Briefs

### Frizzles, Rumpless and Dominiques.

The Frizzle Bantams are surely an oddity, and although those shown do not, as a rule, match in color and many of them are of no particular color, they usually attract considerable attention. We see them very small in size and we believe they would become reasonably popular if some up-to-date breeder would take up the breeding of them and perfect a strain of some solid color, say either buff, white or black, with either rose or single combs and with legs of some one particular color. Then they would look like and in reality would be pure breds, but as they are today, of all colors or of no particular color, and not matching in color of plumage or legs, and often one having a rose, the other a single comb, they give the fancier the impression that they are very common culls, which is about all they are at present. But, as we said, they could be made a quaint and attractive variety, and many friends would flock to them, if properly mated and bred, and we do not imagine it would require many seasons' selection and breeding to produce them solid white, black or buff. The Rumpless Bantam has had as little attention paid to them as the Frizzles as regards color, combs, etc., and we see them shown of all colors and no special color. We remember once seeing one pair with the colors of our B. Red Game Bantams, and a pretty pair they were. In this variety, as well as the Frizzles, we see birds very small in size; therefore to the breeder who has the inclination and room to take up the perfecting of any solid color he would have no trouble about size. We are certain this breed could be bred almost any color desired from any of the solid colors, to the lacing of the Seabright or barring of the Plymouth Rock, and a strain that bred true to color, whatever the color might be, to one sort of comb and color of legs, would be bound to attract attention and create a demand for them. At one of the shows we attended some four years ago we saw a large display of Dominique Bantams that were really miniature American Dominiques. The same style, same combs, and same yellow legs. They were very pretty and we were so much interested in them that we made inquiries of the secretary of the show as to who owned them, and found they belonged to a wealthy party who owned a large stock farm. We tried to buy, but whether he thought he had a cinch, or that selling chickens was beneath him, or for what reason we cannot say, but he simply would not sell. We never saw anything like them since then, and are only sorry we could not obtain any of them, as they certainly were pretty, and as there was no less than fifteen on exhibition, must have bred very true to shape and color and were small in size.

"ZIM."

Just think about these things and then send us **4c in stamps for our catalogue No. 2.**

**BUCKEYE INCUBATOR CO., Springfield, O.**

# LEE'S LICE KILLER.

**What It Is.** Lee's Lice Killer is a liquid for killing lice, mites and other vermin on poultry and hogs. It is used by painting, spraying or sprinkling it on roosts for chickens; on rubbing posts or bedding for hogs.

**How It Operates.** It kills all mites or lice on the roosts, or wherever applied and it then evaporates, forming a gas of the same weight as air. This gas or vapor penetrates the feathers of the fowls on the roosts and kills all body lice. A certain portion of the fluid evaporates very slowly and remains on the roosts and other woodwork for a long time, disinfecting the poultry house, and preventing other insects from gaining a foothold. It is the same with hogs when applied to bedding and rubbing posts.

**Superiority.** It saves time, labor and expense. It saves handling and disturbing fowls or animals. It does not have to touch lice to kill them. It is the modern method, far superior to old methods of dusting, dipping and greasing.

**Reasons Why** Lee's Lice Killer is a good lice killer. It is all lice killer, undiluted. It is always the best and always the cheapest, in real, insect destroying power. It is the original liquid Lice Killer; our own invention, perfected by our years of experience. We guarantee it to be exactly as represented. It is endorsed by Poultry and Farm Journals; by stock and poultry raisers everywhere. It is on sale in every state in the Union and can be supplied by any dealer. It is a money saver and a money maker to the raiser of chickens and hogs.

*Four sizes—quart, 35 cents; half gallon, 60 cents; gallon, $1.00, and 5 gallon, $4.00. Handsomely lithographed souvenir catalogue free.*

**Geo. H. Lee Co., Omaha, Neb., or 8 Park Place, N. Y. City.**

**FREE.**—To any one who has never tried Lee's Lice Killer we will send a free quart can by express from Omaha office. The same offer applies to our large 42-ounce packages of **Lee's Egg Maker and Chicken Medicine.** Give name of Express office.

# GREAT CROPS OF SMALL FRUIT

**AND HOW TO GROW THEM.** The author has grown the largest crops of fancy fruit ever produced on an acre. In his experimental grounds are **single plants which yield over FOUR QUARTS** each of fine large berries. His customers have done as well. This has been accomplished by **SCIENTIFICALLY BREEDING up plants** to a high fruiting vigor so they throw their energies to the development of fruit instead of useless runners. **The profit comes from a big crop of big berries** that sell at sight to regular customers. This book tells you all about how it is done. **THE CHEAPEST PLANT** is the one that will give you the best fruit and most of it. You can't afford to play **second fiddle** on the market by using scrub plants. The only stock of scientifically grown thoroughbred plants in the country for spring planting. Send your address **at once** and get it **FREE.** Address

**R. M. KELLOGG, THREE RIVERS, MICH.**

## *Questions and Answers.*

LISBON, OHIO, Dec. 12, 1900.
*Editor American Poultry Journal.*

DEAR SIR: I am going to build a poultry house the coming spring and am thinking of building walls of same of field stone and mortar. Thought of simply making a temporary cribbing of rough boards a foot apart and filling in with small stone and mortar or cement, then remove boards. Will my plan work? How would a cement floor do in same? Please answer through AMERICAN POULTRY JOURNAL. C. G. M.

Your plan will work O K, providing you get sufficient cement in your mortar to hold your walls together, otherwise your walls will crumble and fall in. It is very necessary that you fill in all spaces between the boards, or your walls will be a regular nest for rats, skunks and minks. The cement is all O K for this kind of a house.

---

CHILLICOTHE, O., Dec. 19, 1900.
*Editor American Poultry Journal.*

DEAR SIR: I will give my experience with the Light Brahma, which so many condemn as poor layers. Commencing with Dec. 1, 1899, to Dec. 1, 1900, I kept eight pure bred Brahma hens. I set four and let them raise chicks. I find the eight hens laid me 1,250 eggs in the year's time. I think that is as good a year's work as any of the heavy breeds will do. I feed them morning mash, wheat at noon in scratching shed, corn at night, keep grit and shell before them, and cabbage three times a week, meat once a week. Always have plenty eggs. I have been a subscriber to the AMERICAN POULTRY JOURNAL several years and think it one of the best journals out.

MRS. R. W. F.

Your Brahmas have indeed a good record as egg producers, a record to be proud of, and a far better one than the average of this variety can claim. This is largely due to your own efforts, for your style of feeding has kept them constantly employed, and it is exercising at all times that has encouraged your fowls to lay and keep healthy.

---

TECUMSEH, O. T., Dec. 12, 1900.
*Editor American Poultry Journal.*

DEAR SIR: Can you tell me how to destroy chicken fleas. They get on the comb and the top of the head and around their gills, sticking as tight as if they were glued. Yours truly, W. H. M.

Try any of the lice paints or powders that you see advertised in the AMERICAN POULTRY JOURNAL. They are all good and will do the work all right, or take sweet oil or lard and grease the parts that are affected by the fleas, for fleas, like lice, cannot stand grease of any kind.

---

GENOA JCT., WIS., Dec. 10, 1900.
*Editor American Poultry Journal.*

DEAR SIR: I have a cockerel with sore eyes which matterate and discharge. Can you tell me the cause and a cure? Yours truly. L. E. M.

Your bird has a severe cold that may at any time develop into roup. The most reliable and best cures that we know of are advertised in the AMERICAN POULTRY JOURNAL. Roup cures are good not only for a cold but as a preventive. If the bird is valuable, we suggest that you give this a trial before it is too late.

---

DESELMS, ILL., Nov. 19, 1900.
*Editor American Poultry Journal.*

DEAR SIR: Being a subscriber to the

JOURNAL, would like to ask its readers if they can give me a plan for building a folding hen house; one that is put up in sections, size 8x10. I think such a house would be handy to move any place you wanted to. Oblige a subscriber.

J. C. M.

Would respectfully refer you to those who manufacture these portable hen houses, whose advertisements will be found in the AMERICAN POULTRY JOURNAL. They can give you reliable information in regard to the building of a house of this style, and it is always best to start right than wrong. Would suggest that you write them and get full information in regard to prices.

---

*Editor American Poultry Journal.*

DEAR SIR: I have a flock of Plymouth Rocks which for the last few days seem to have some sickness, two having already died.

Symptoms are: They make a noise when breathing, open their mouths often and make a loud noise, also keep swallowing often, seem droopy but eat and drink.

I have given them lime water to drink and swabbed out their throats with a mixture of coal oil, turpentine and carbolic acid.

Let me hear from you. Respectfully,

G. B. L.

Your fowls have a bad case of roup. Will suggest that you send at once for any one of the roup cures advertised in the AMERICAN POULTRY JOURNAL.

---

*Feeding for Egg Production.*—F. A. W., Dayton, O., writes: Will you kindly advise me what method of feeding you recommend for production of fertile eggs? I am feeding my stock wheat and oats, morning and noon and whole corn at night, but am unable to secure satisfactory results. My hens are not fat and seem very active.

[In another place in this number you will find some remarks about feeding for winter eggs. The feed you are giving is good, but it lacks vegetables and animal food. Get a bone cutter and feed one ounce of green cut bone a day to your hens and give less grain than you have been feeding, as the cut bone will take the place of a part of this. If you cannot get a bone cutter buy a fifty-pound sack of animal meal and feed half an ounce a day mixed with wheat middlings. Feed this made into a crumbly mass with water in the morning and omit other morning feed. In the place of other green feed give waste cabbage heads or, preferably, beets or boiled potatoes. Turnips chopped fine are relished also.]

---

## CRIPPLED CHICKS.

I noticed not long ago the question asked in a poultry journal, why there were a greater percent of cripples hatched in an incubator than from a hen.

And as I have thought about that myself a great deal, and have been trying for several years to solve the problem, I will tell what I have learned so far. I used to think it might be in the way the eggs were turned, so I tried turning them different ways but this did not seem to make any difference. However, I found out that it makes a difference what is used on the floor of the incubator, that is, where the incubator has a nursery below the egg trays for the chicks to drop into. I have nearly always used pieces of an old blanket as that seemed to me to be the

# White Wyandottes,

**EXCLUSIVELY.**

Our birds at the late Indianapolis Show scored from 95½ to 96¼ by Hewes. Our winning pen reached the high score of 191. Our birds are all our own breeding. We can sell you eggs from stock which will produce winners. If you want eggs from this class of birds, address

# TIBBETT'S BARRED PLY. ROCKS

## Winners

At Chicago Joint Show, Illinois State Show, Quincy, Princeton, Ill., Cedar Rapids, Ia., largest shows in the West. Grand lot of stock bred from above winners for sale that are bound to please. A limited number with score cards by Judge Shellabarger. Do not fail to write me and let me figure with you on what you want to buy. I can save you money. Circular and show record free, Mention A. P. J.

**H. TIBBETTS,**
**Neponset, Ill.**

---

# Clean Sweep

Of all 1st prizes on Barred Plymouth Rocks in a class of 120 birds at Battle Creek, Mich., Dec., 1900, defeating some of the best birds raised in the state and establishing a record which is unprecedented. We have

## 300 BIRDS

which are fit to win in the strongest competition, and you can buy some of them at a fair price. We can surprise you both in quality and price. Our Houdans captured seven 1st, 2d and 3d prizes in competition with America's best birds. At the Indiana State Show, Indianapolis, Dec. 10-15, we entered one pen of Barred Plymouth Rocks and one pen of Houdans, 10 birds in all, and won 10 ribbons. Houdans—1st cock, 1st, 2d and 3d hens and 1st pen. Barred Plymouth Rocks—3d cockerel, 1st and 2d pullet, 4th hen and 2d pen. If you want to win, write to

**WHITE'S FEATHERED STOCK FARM,**
**B. H. WHITE Prop., Battle Creek, Mich.**

most comfortable material for the newly hatched chick. Once this season I used paper instead of a blanket and when I went to examine the chicks after they were hatched, to my great surprise found a dozen or more nice large chicks that could not stand up, and I thought them to be very badly crippled, as badly spradled as any I ever saw, and I could not think what would cause so many cripples when there was such a good hatch and nearly all of the chicks nice, large ones. But when I took them out and put them on a carpet they began to try to stand up and it was not long until they could stand for a few minutes at a time. It was amusing to see them trying to walk. It looked like a lot of boys trying to walk on stilts for the first time. After a little while I placed them back in the incubator on the paper and in a few minutes they were just as bad as ever. The paper was smooth, they could not stand up on it, while they could on something rough. So I took them out and put them in the brooder and as the brooders had sand on the floor they soon got so they could walk and nearly every one recovered. Now, I believe that a good many times they are not cripples when they hatch, but become so afterwards. Of course in a nest there is always straw or something of the kind that helps the chick to get around. At least there is nothing as a general rule as smooth as the floor of the incubator or paper. Now, I don't say this is the only cause of cripples in an incubator, but I find this is one of the causes and if any one else with more experience can throw any more light on the subject I am sure there are a good many like myself would be glad to hear from them.

PAUL B. HARSHMAN.

## SUCCESS WITH CHICKS.

I would like to give a little of my experience in the poultry line. Last spring I started with twelve B. P. Rock hens and one cock. I fed them on cracked corn, wheat oats, giving raw meat two or three times a week, and expected to raise a nice flock of young ones, but had poor luck hatching them. My first ones hatched June 9. One hen that I set and had shut up in a barrel, so the other hens could not disturb her, commenced to lay in her nest when she had set seventeen days. I kept her shut in but did not succeed in having any chickens hatch, and from other hens from four to nine eggs out of a setting would hatch. However, I succeeded in raising about fifty-five young ones in all. My luck has seemed to change later in the season. One of my first pullets hatched June 9, commenced to lay Oct. 11 and up to date, Oct. 21, three more are laying. Is not this pretty good for four months and two days? I feed young chicks steel cut oats, millet seed, cracked rice, hard boiled eggs, cracked corn, wheat, boiled oats, giving raw meat four or five times a week. My heaviest pullet weighs five pounds. My heaviest cockerel six pounds. If you care to give this space in your journal, do so. I would like to know if any one has pullets that have done better. Yours respectfully,

J. E. STANLY.

The Fanciers' Club of Sharon, Pa., will hold its exhibition Jan. 17-19, 1901. F. B. Zimmer, judge; I. C. Gates, president; W. B. Isenberg, vice president; J. E. Campbell, secretary; A. S. Seriree, treasurer; H. T. Allen, superintendent; F. A. Stewart, assistant superintendent. Ben S. Myers, judge.

Pekin Ducks and W. Wyandottes.

My Pekins have a show record unequalled by any breeder in the West. My Wyandottes are noted for their true Wyandotte shape, splendid combs, size and color, and have always

Won Their Share of the Premiums wherever shown.

Every bird is guaranteed. Your money back if I don't please you.

J. L. McCORKELL, Akron, Iowa.

ROUP CURE GUARANTEED, ROUP

CONKEY'S ROUP CURE is the only positively known remedy that will cure roup in all its forms as long as the fowl can see to drink. Simply put the cure in drinking water and the fowl takes its own medicine. For Canker, especially in pigeons, it excels all others. One 50 ct, package makes 25 gallons of medicine. Directions with every package. If it fails to cure, we refund the money. Postpaid, small size 50c; large size $1.00.

Conkey's Louse Killer never fails to kill. Try it; 25c per package and 15c extra for postage.

CONKEY'S POULTRY TONIC will keep your fowls in perfect health and make your hens lay eggs in winter. 25c per package and 15c extra for postage.

## REPORT OF THE FOURTH ANNUAL EXHIBIT OF THE R. V. D. POULTRY ASSOCIATION.

The fourth annual exhibition of the Republican Valley District Poultry Association, held at McCook,, Neb., Dec. 5, 6, 7 and 8, 1900, was, taking everything into consideration, an unqualified success.

The management was unfortunate in not being able to secure a building more favorably located, and which undoubtedly accounted for the gate receipts being somewhat less than previous years. It is expected that the premiums will be paid in full or nearly so.

The quality of the birds exhibited was as a whole far ahead of any previous exhibit, and although the scores do not average, perhaps, as high as last year's show, this is accounted for from the fact that the young birds shown were not up to weight in a great many cases, and many of the older ones were not entirely through moulting.

The fact that a large number of new exhibitors, outside of the immediate vicinity of McCook, placed their birds in the show room, and a number added their presence also, was gratifying to the management, and proves the assertion that the thorough-bred poultry industry is growing better every year, and that progressive people demand something better than thorough-bred "mongrels."

A brisk effort should be made by each individual member to make the next show, to be held early in January, 1902, bigger and better than ever.

The following officers were elected for the ensuing year: President, Mrs. W. S. Norlan, McCook; Vice-Presidents, J. S. Leehew, Mrs. Ida E. Bard, Imperial, and Mrs. Sara E. Sexson, Indianola; Treasurer, Mrs. R. L. Tinker, McCook; Secretary, A. H. Terrill, McCook.

The exhibition hatch made by the Sure Hatch Incubator Company of Clay Center, Neb., was good and attracted the attention of every visitor at the show. They were liberal to a fault, paying all the expense of getting the machine here and then giving it away to the association, who in turn offered it as a sweepstakes prize to the ten highest scoring fowls at the show.

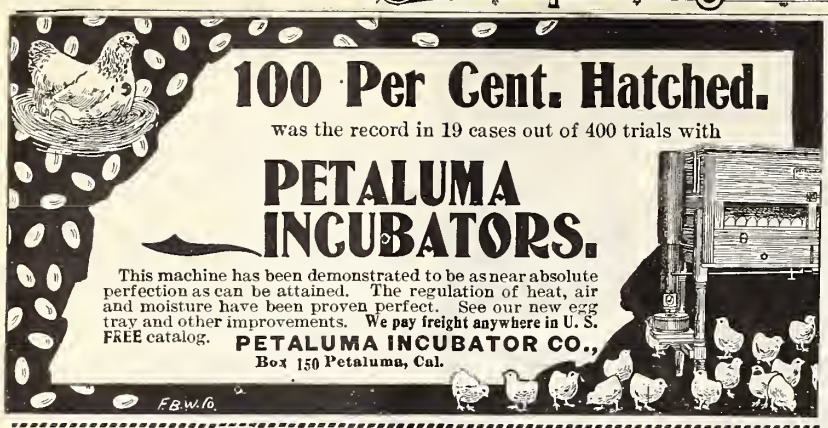
B. G. GOSSARD, Secretary.

## LA PORTE POULTRY SHOW.

NOV. 26 TO DEC. 1, 1900.

The La Porte County Poultry, Pigeon and Pet Live Stock Association have the credit of having held two most successful shows inside of eight months. The last, just closed, eclipsed anything of the kind ever held in this part of the country outside of Chicago, there being 1,075 entries. The management thought they had secured ample room when through the courtesy of the Common Council of the city of La Porte the entire floor of the city building was turned over to them, thus giving them the use of one of the largest floors in the northern part of the state, but this large building was taxed to the utmost by the number of fowls, pigeons, and pet stock placed on exhibition. The stock entered was 'way above the average and was good enough to push its way to the front in the largest shows in the country. Judge Theo. Hewes had more on his hands than he anticipated when he came to do the judging, and remarked to me that he never had seen a show that was better managed, taking all things into consideration.

The entries of poultry were as fol-



100 Per Cent. Hatched.

was the record in 19 cases out of 400 trials with

PETALUMA INCUBATORS.

This machine has been demonstrated to be as near absolute perfection as can be attained. The regulation of heat, air and moisture have been proven perfect. See our new egg tray and other improvements. We pay freight anywhere in U. S. FREE catalog. PETALUMA INCUBATOR CO., Box 150 Petaluma, Cal.

F.B.W.Co.

BABCOCK'S

White P. Rocks and Buff Cochin Bantams

Have made a clean sweep at La Porte, Goshen and Columbia City this season, and have won highest honors at many other shows, such as Chicago, Detroit and Grand Rapids. Our White Rocks are pure white, large bone and always over weight. Our Bantams are simply grand, being a soft, golden buff, small in size and good Cochin shape. A few good birds for sale. Write for show record. Eggs, $2 per 13; $4 per 30. Correspondence a pleasure.

J. A. BABCOCK & SON, Goshen, Ind.

Coolidge's White Wyandottes

Won last year and they are winning this. At Chicago, 1st cockerel, 1st and 2d pullet, 1st pen. At Galesburg, every first and silver cup for ten best birds in American class. Look up winnings at Bloomington. If you want this kind, write

JOHN COOLIDGE, Galesburg, Ill.

S. C. B. LEGHORNS.

A Fine Lot

Of healthy, vigorous, farm-raised cockerels—good, honest cockerels, $1 and $2 each. Only a few more females left. Eggs in season, $2 per 15; $3.50 per 30.

G. W. NEWKIRK, Lebanon, Mo.

BARRED ROCKS, BUFF COCHINS.

Winners in strongest competition. Space here is too limited to give a list of their winnings. Write me your wants and mention American Poultry Journal. My customers are winning with birds bought of me, and I still have a lot of early hatched birds from Chicago Boy (1st Barred Rock cockerel at Chicago last season) that are going to do some one a lot of good. You might as well have a few. You can buy them right. My Buff Cochins are acknowledged leaders.

WM. WEBB, Box 1920, Joliet, Ill.

White Wyandottes Exclusively,

And as good as it is possible to produce. My birds are absolutely in the front rank, as is proven by their records at the largest shows. Prices are right and satisfaction guaranteed. It will pay you to write me before placing your order. My last Chicago record was four prizes on six entries, and I have young stock for sale bred in line from these winners.

CHAS. H. DANFORTH, Batavia, Ill.

WORLD BEATERS IN

Barred, Buff and White Plymouth Rocks.

Barred cockerels, scoring 90 to 95; Barred pullets scoring 88 to 93½; Buff ckls. scoring 88 to 95; Buff pullets scoring 90 to 94½; White ckls. scoring 90 to 95; White pullets scoring 90 to 95. The birds were scored by Thos. Rigg, of Iowa Falls, Iowa, a judge of national reputation. I have Fox Terrier Dogs for sale. J. T. MOLLOY, Box 20, Laurel, Iowa.

CLOSING OUT

My Entire Flock of Buff Rocks

Without reserving any, at prices too low to talk about. Choice breeders in cocks, hens, cockerels and pullets. I will breed Barred Rocks hereafter and must give them my entire attention. I can please you with my stock. I have some fine breeders and exhibition stock for sale in Barred Rocks and Silver Laced Wyandottes, and will book orders for a few sittings of eggs from my best matings at $2.50 per 15; $4 per 30. Correspondence invited.

GEO. J. GLEASON, Box C, Elburn, Ill.

lows: P. Rocks, all varieties, 289; Wyandottes, 101; Javas, 18; Light Brahmas, 26; Dark Brahmas, 10; Buff Cochins, 30; Partridge Cochins, 20; White Cochins, 10; Black Cochins, 5; Langshangs, 16; Brown Leghorns, 35; R. C. B. L., 10; R. C. W. L., 7; S. C. W. L., 25; Buff Leghorns, 40; Minorcas, 28; Golden Polish, 8; S. S. Hamburgs, 57; C. I. Games, 25. Total, 770.

The Bantam class was as follows: Golden Sebright, 12; Buff Cochin, 54; Black Cochin, 2; total, 68.

The total number of birds, exclusive of geese and turkeys, was 858. There were 200 entries in the pigeon class and competition was hot in the pet stock department. There were 50 entries. The judges were: Theo. Hewes, poultry; Geo. Kelsert, pigeons, and Frank Fox, Belgian hares and pet stock. The satisfaction given by these gentlemen speaks well of their work. There was no complete walk away by any of the exhibitors, as all had stock entered that made themselves felt, and nearly every exhibitor had the pleasure of taking ribbons from his coop. The one great fact demonstrated at this show was that the farmers in this section are breeding poultry according to standard requirements, and that it was not the fancier who received the greatest number of prizes. That the La Porte Association will endeavor to outdo this show next year is a settled fact, and about the only thing in the way now is a building of suitable size in which to hold the show.

The show was a success from every point of view, there being but very few kicks from exhibitors and none from visitors. G. C. FLEGEL.

## A MOST SUCCESSFUL SHOW.

### Was That Held by the Association at Warren, Pa.

The exhibition held last January by the Warren County Poultry and Pet Stock Association at Warren, Pa., was one of the most successful shows held in Pennsylvania. Not only were all the breeds of standard poultry represented largely (there being over 100 birds shown in the Barred Rock class alone, with the Brown Leghorns nearly as large), but various kinds of pet stock was exhibited in large numbers, such as foxes, coons, squirrels, opossums, ferrets, minks, Angora and common cats, pigeons, parrots, canary birds, morning doves, owls, etc. The association also offered specials, and had on exhibition incubator, floral and taxidermist displays, and an aquarium containing large numbers of goldfish. The members of the association are already busily engaged on the preliminary work for the next exhibition, to be held Jan. 8 to 12, 1901, inclusive, and the lines followed at the last will be strictly adhered to at the coming show—that of holding a joint poultry and pet stock exhibit. The members are unanimous in the opinion that this is the only way to hold a successful poultry show and that if you ask for the public's patronage you must cater to their demands and give them variety. It is expected that Belgian hares will be largely represented at the coming show, as the writer has already taken them up and several other members are considering the matter. J. Y. Bicknell has been engaged as judge, which is a guarantee that the work will be properly done without fear or favor. Many breeders from Pennsylva-

nia and surrounding states have already signified their intention of showing at Warren, and all who can possibly do so should make an exhibit there. The association last year paid every cent of its obligations and had a nice surplus with which to commence work on the coming exhibition. BURT L. DALRYMPLE,
Chairman Executive Committee.

## POSSIBILITIES OF POULTRY RAISING.

To the man who pursues the poultry raising industry as diligently as the farmer cultivates his crops, and bestows upon it the same care and study that is essential to the success of any enterprise, it presents money making possibilities that are really surprising. Those who are not familiar with the subject can scarcely realize that the yearly earnings from this industry exceed that of the entire wheat crop of the country, and fall little short of the combined earnings of the railroads, yet statistics show this to be a fact.

But to successfully follow this occupation requires careful study and the aid of the latest improved incubators and brooders. The Forest Incubator Co., of Forest, O., manufacture an incubator that is vastly superior in many respects to other makes. It is self-regulating and has an automatic egg tray which does away with the necessity of removing the tray to turn the eggs, thus exposing them to the cold. This firm is the first to produce a perfect incubator at the nominal price of $10. The catalogue published by this company besides fully explaining their machines, contains much valuable matter relating to poultry raising and should be in the possession of all interested in the subject. It will be mailed to any address upon request.

The Standard Poultry Breeders' Association of Louisiana is rapidly forging to the front of public attention. It has shown energy and progress from the very beginning of its organization. The reason for this may be assigned to the fact that it was organized for a specific and definite purpose and with high aims to reach out for. It has gone on in that direction with unswerving valor. One of its principal objects of organization, according to Article 2 of its Constitution, is to develop one of Louisiana's great possibilities—the poultry industry. This they believe can be done by edueating the people through object lessons that will awaken them to a full realization of a treasure lying at their very door.

The Standard Poultry Breeders' Assosiation will hold its annual exhibition of poultry and pet stock during Mardi Gras week at New Orleans, La., February 15 to 20, 1900.

Please communicate with the secretary, Mr. A. Magnitzky, 5321 Camp street, New Orleans, and you will receive something of interest.

Mr. J. W. Molloy, of Furgeson, Ia., who commences an ad in this issue, has been a breeder of Barred Plymouth Rocks for several years. In introducing new blood in his stock he has always bought the best stock that money could buy. A. A. Anderson, of Boone, Ia., scored his birds last spring, scoring as high as 93, and only one hen less than 90, which scored 89. His White Wyandottes are very nice, but he wishes to close them out, in order to breed Barred Plymouth Rocks exclusively.

**Tobin's White Leghorns,**

*Am Getting Lots of Orders From Other People.*

*What Does it Take to Get Yours?*

I HAVE THE RECORDS. More prizes at more large shows than any other breeder in America. I CAN FURNISH YOU WITH WINNERS, Thts is proven by the winnings of myself and my customers. I KNOW A GOOD BIRD FROM A BAD ONE. Am competent to pick out just the kind of a bird you want. THE PRICE IS ALWAYS RIGHT. I will guarantee to furnish the highest quality at the lowest price.

***What More Do You Want?***
***What More Is It Possible to Get?***

It looks to me like an unprejudiced consideration of these facts ought to settle the matter in my favor, Let me send you a circular.

**FRANK HECK, Box 12, New Albany, Ind.**

Sec'y. and Treas, American White Plymouth Rock Club.

# Johnson's Light Brahmas

Won every prize at the St. Louis Fair, 1899, a record no other Light Brahma breeder has ever made. Winners for sale. 200 elegant birds for sale at prices that will move them.

**FRANK P. JOHNSON Box A, Howlands, Ind.**

# Now, Will You Believe It?

I claim that **PILE'S WHITE WYANDOTTES** are the real thing and fit to win anywhere. Look at the record at Cleveland, O., this season: 1st and 4th cockerel, 1st and 3d pullet, 1st, 2d and 5th hen, 3d cock, 2d and 5th pen, $100 silver cup for best pair, silver cup for best pullet, special for best cockerel, $10 in gold for best exhibit. Remember that these prizes were won in competition with some of the best birds in the country. If you want a record like this, buy some of the same stock or eggs and send me your order at once so you will be sure to get what you want.

**FRED E. PILE, Cleveland, Ohio.**

# Kegley's Barred Rocks.

JOURNAL readers desiring something extra choice in early hatched exhibition Barred Plymouth Rocks, should write **DR. A. E. KEGLEY, Cedar Rapids, Iowa,** president of the American Poultry Association, for prices, as he is prepared to furnish extra early hatched, well matured cockerels or pullets; also a few yearling cocks and hens that are strictly first-class. Judge Russell, who recently visited his yards, pronounced them one of the most even lots of Barred Plymouth Rocks he had visited this fall. At the great Cedar Rapids show, in a class of 243 birds, Mr. Kegley won the grand special of $25 for best ten; special for best five pullets and five best cockerels; special for best cock, cockerel, two hens and two pullets; also 1st cockerel, 92; 1st hen, 93; 1st pen, 184 7-16; 2d, 4th and 5th pullets, 92½, 92 and 92; 4th hen, 92¾. All scores given by Judge Lambert who is pronounced as one of the most critical Barred Plymouth Rock judges in America.

## $5.00 PER TRIO.

Good breeding birds, Barred Plymouth Rocks, Ringlet strain. Male birds alone worth price asked for trio. Winners at St. Louis and Galesburg, 1900. 50 fine cockerels $2 each; eggs $2 per 13.

**F. B. SCHLATTER, Keokuk, Iowa.**

# Barred Plymouth Rocks.

**My Birds** { Are strong and vigorous, quick growers, great layers, true Rock shape, nice bay eyes, clear, even barring.

**My Prices.** { Cockerels $3 up. Fertile eggs for hatching, $2 per sitting. Why not write

**A. P. WINSLOW, Box 223 X, Freeport, Me.**

# Langshan Winners

Ready now for the shows. 200 choice birds to select from. Bred from the first prize cock at Indiana State Fair and winning females at some of the best shows in Ohio. These birds are for sale at prices that are right. Send for circular.

**DAVID C. H. SCHRAMM, Springfield, Ohio.**

# Golden Wyandottes.

My birds have kept their reputation good again this season. At Aurora, Ill., Dec. 6-12, 1900, Heimlich and Shellabarger, judges, won 1st cock, 2d and 4th hen, 1st, 2d, 3d and 4th cockerel, 1st, 2d and 3d pullet, 1st breeding pen and every special in the class. If you are wanting cockerels to go into shows with, I can furnish you with such, or if you are wanting to mate your females with a good breeding cockerel, write me and let me know your wants. Can spare no exhibition females.

**A. W. DAVIS, Big Rock, Ill.**

## We Breed America's Best

# Golden, White and Buff Laced Wyandottes, Sebright Bantams

**and Imported Pedigreed Belgian Hares.**

Winners of over 125 regular premiums at New York in five years, also thousands of prizes at the leading shows of the world for our customers and our selves. We have a grand lot of young and old birds to spare for showing and breeding. Also choice young hares. Remember we breed more Wyandottes than any other breeder. A stamp will bring you our circular, showing 22 of our winners.

**IRA C. KELLER, Box 75, Prospect, Ohio.**

# 1882 Union Poultry Yards 1901

Line bred Barred Plymouth Rocks, Pekin Ducks, Bronze Turkeys and up-to-date Belgian Hares

## MY SPECIALTIES.

To close out at once—1 cock and 12 hens, Light Brahmas; 1 cock, 1 hen and 3 pullets, Silver Laced Wyandottes; 1 cock, 3 cockerels, 7 hens and 3 pullets, White Wyandottes. These offerings are of the highest breeding. Those wanting same should write quick. No circular.

**D. J. KOHLI,**

# Plymouth Rocks.

A few nice White Plymouth Rock cockerels and pullets for sale. Eggs from the above varieties in season at $1.50 per 13; $3 per 30.

**Van Buren Poultry Yards,**

**J. J. CLEMENT, South Haven, Mich.**

## J. D. W. HALL'S AIR CELL MODEL.

It is almost impossible for the incubator operator to determine what the exact size of the air cell in an egg during incubation should be in comparing it with the design furnished with the direction books; the model that J. D. W. Hall, of Des Moines, Iowa, is placing on the market is an enameled egg, the size of an ordinary hen's egg, with a different line marked upon it for the different stages of the air cells on the fifth, tenth, fifteenth as well as the twentieth day of incubation; by holding the model by the side of the egg that you are testing shows the amateur size the air cells should be.

This certainly will be the means of securing better results from incubators in the hands of amateurs.

## AN EGG FARM.

In the November number of the AMERICAN POULTRY JOURNAL we said something about egg farms in reply to a question by a subscriber. We have before us a letter from Howland & Son, Crown Point, Ind., saying they have an egg farm pure and simple, within thirty-six miles of Chicago. They add that they will be glad to show the farm, and have ample orders for all the eggs they can furnish at excellent prices. The egg receipts from this farm were last year more than 4,200 dozen.

H. Tibbetts, of Neponset, Ill., is one of A. P. J.'s oldest advertisers. Mr. Tibbetts breeds Barred Plymouth Rocks exclusively and has been a winner at Chicago, Quincy, Princeton, Ill., and Cedar Rapids, Ia. He has an increased space this month in which he describes his birds. Mr. Tibbetts has got the birds to sell; has got good ones and customers are bound to get good results from them. Don't overlook them when you are writing.

The old and well known poultry supply house of Johnson & Stokes, Philadelphia, appear with their winter announcement elsewhere in this issue. These people handle everything necessary to make a success of the poultry business, including the famous Cyphers Incubator, for which they are agents. This means that they carry the machine in stock and can make prompt shipments at great saving of freight. Their catalogue is a veritable encyclopedia of everything needed by the poultryman. Write for one and mention this paper in doing so.

George H. Burgott, of Lawtons, N. Y., the well known poultry fancier, who was recently appointed superintendent of the poultry exhibit at the Pan-American Exposition at Buffalo, N. Y., said:

"We are going to have the best and largest poultry show that has ever been held and one which will rival the famous Crystal Palace and Birmingham foreign exhibitions. I think, as a matter of fact, that we will reach the climax of poultry shows at the Pan-American next summer.

"Every recognized species of poultry will be exhibited here and it is safe to say that the finest specimens of each species in existence will be brought here.

"We will offer prizes next year on behalf of the exposition amounting in the aggregate to $4,000, and these prizes will be awarded in every class where there are four or more entries, besides special premiums offered by specialty clubs."

# Brooder Department.

Conducted by G. C. Flegel, Westville, Ind.

Education is a great thing to have and especially a scientific education, but if practical experience is combined with the education it is much better. This applies to the operation of a poultry plant as forcibly as to any other occupation or calling.

A brooder is a simple thing and it should be an easy matter to care for it. But let me tell you, right now, that no brooder manufactured was intended to operate itself, fill its own lamp, feed the chicks, clean itself out, or move itself from place to place as it should, or any of the various little cares a brooder requires. And they will not do so, as they are not automatic in their operation. It is positive that the operator must attend to business or there will be cause to regret the neglect.

Don't think for a moment the work is done when the lamp is lighted and placed under the heater, as it is only just begun. Don't keep the chicks continually penned up in the brooder, never letting them put their feet on the ground—then say the brooder is no good. The person that does this kind of work should bear all the blame, for he has no kick coming. All the education of Yale will not help to raise chicks successfully if a little common sense is not used in correction.

* * *

If you have a good brooder apply a little judgment to its care and the result will be astonishing. See that the lamp is always well filled the last thing at night, then it will be sure to burn brightly until you can get to it in the morning. This is of such consequence that it should not be neglected, for to do so means that it may burn dry just before morning after a cold night and the chicks suffer from chill, and the result is a lot of stunted fowl if the chicks don't die at the time.

* * *

This is the month when we commence getting the incubator in shape to batch the early chicks, and we should begin to study where to put them after they are hatched, as the great battle to be fought is in the brooding. We do not all have long brooder houses with steam heat, etc., as these are expensive. However, those of us who are dependent on in or outdoor brooders to rear our chicks in must make other arrangements. One of the best arrangements is to have, if but two brooders are used, a house about eight by ten feet in size. This will hold two brooders nicely and need not be built any warmer than to use a good quality of barn siding cleated and lined with paper. This will be sufficiently warm to let the chicks run free even in cold weather if they have the warm brooder to run to. As soon as the chick becomes too cold it will avail itself of the privilege, and it it wonderful what an amount of exercise it will take even in very cold weather if protected from the effects of the wind.

* * *

There is one very important matter to be considered in connection with poultry raising. That is, the parent stock must be strong, healthy birds, that have come from the stock that was strong. Take eggs from this class of fowls and the results are for the best; if the eggs prove

THE ADAM GREEN BONE CUTTER

**This is the Bone Cutter**

—and indeed the only one which is equipped with **ball bearings.** That's why it **runs so easily.** It cuts on the shear plate principle. No gouging, crushing or breaking of bone into pieces or dangerous bone splinters.

**Leaves a Shaving of Bone,**

fine and easily consumed by fowl or chick. Easiest to clean — **cleans itself.** Feeds at will of operator. Strong and durable. Large capacity. Made in various sizes for hand and power. Write for our illustrated Catalogue No. 8 prices, etc.

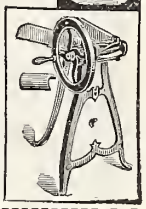
# MANN'S GREEN BONE CUTTERS

are more largely used than those of all other makes combined. There are good reasons for this. They are found in the superiority of these machines, in material, construction, ease of operation, rapidity, quality of resulting food, general efficiency, etc. They last practically indefinitely.

MANN'S GRANITE CRYSTAL GRIT

**Mann's Clover Cutter** cuts four times as fast as others, as one turn of the wheel makes twelve cuts. It is a strong, practical machine and in no sense a toy or plaything. Cuts dry or green feed equally well.



**Mann's Swinging Feed Tray** keeps the feed in and the poultry out. Saves the feed and insures against foulness and dirt. Made of iron they last always.

**Mann's Granite Crystal Grit** insures perfect digestion, as it is the hardest grit known. No dust, sand, &c. Lasts longer and is better and cheaper than oyster shells. **Sold for cash or installments.** Write for free illustrated catalogue of these and many other things convenient and valuable for poultrymen.

**F. W. MANN COMPANY, Box 56, MILFORD, MASS.**

# Phenomenal Record:

First cock, first and second cockerel, second pen and gold special for five highest scoring Buff Rock males. These winnings were made at Battle Creek, Mich., Dec., 1900, in a class of 117 birds as good as is produced.

# FOR SALE. FOR SALE. FOR SALE.

Owing to our changing the location of our farm we will make a special price on birds from our 1900 yards and 1900 hatched birds for the next thirty (30) days, of the following varieties:

White Cochins,
White Wyandottes,
Black Langshans,
Buff Cochins,
Barred Rocks,
Pekin Ducks, B. Turkeys.

March 1st, 1901, we will be in position to fill all orders promptly in any of the foregoing varieties, as we are more than doubling our facilities. I also have a very neat Short-Horn bull (yearling) for sale. If you need him write for particulars.

***R. D. BURNHAM, Champaign, Ill.***

to be of low rate of fertility it will be the exception, for if properly fed a high percentage of chicks may safely be counted on, and when hatched the chicks will prove to be healthy and strong and quick growers. It is from chicks of this kind that we get the best results from the brooder. They have great vitality in their little bodies, which means activity, tenacity and those qualities that go to make the thriving, hustling chick. That birds of this class will reduce the percent of loss to the lowest rate goes without contradiction.

* * *

There is some satisfaction in raising chicks of this kind. They thrive right along, there are no weaklings to be contended with and at last to carry out simply because they had not enough vitality to continue the fight for life. It is as nearly useless to place weakly, crippled or late hatched (by this I mean chicks hatched as late as 23rd day) chicks in the brooder and expect to raise them as anything I know of, and yet it is done right along. And yet, if the operator does not succeed in trying to raise them, then, what a howl goes up from the same person. The party that sold him the brooder comes in for one of the most complete roasts man ever received, and why, all because the owner of the brooder was trying to perform the impossible and when failure was the result of his efforts it was all at the door of an innocent party.

Another great factor that goes to make up the cause of failures is the penny wise and pound foolish plan of some poultry raisers. They attempt to raise the product of a 200-egg incubator in a single brooder. I wish to say right here that this is one of the most expensive ideas a person can get into his head, for as sure as it is tried it will result in a loss of 50 percent and probably more. Better by all means use a 100-egg incubator and two brooders.

* * *

My way is to use two brooders for each 100 eggs placed in the incubators the first time. If this number is used it will not be too many and the result in the fall will be a large pecent of fine, healthy fowls that have grown fast, matured nicely and such as are a satisfaction to the owner.

* * *

I have never found that a slight variation in the heat of the brooder was detrimental to its effectiveness as a rearer. If during the first two weeks the chicks are in the brooder the heat is kept at from 92 to 95 degrees, no bad results will be experienced. Then the heat can be reduced gradually each week until 75 is reached, at about the fifth week. This degree I find to be the most satisfactory to myself and the chicks. To myself because it means less oil used and the chicks because they seem to enjoy it better than if it was warmer. If the heat should drop to 70 don't worrk, the chicks will not suffer, nor will they become chilled.

* * *

To those contemplating purchasing brooders this season for the first time, I would advise them to be careful as to what they buy. Don't be captivated by the great capacity that may be claimed by some or possible cheapness of others and then after using the brooders for a time find that you have made a mistake. A good idea is to do a little thinking for

yourself and not let the other fellow do both the talking and thinking.

If a person will stop to consider the size of a chick of the American class when hatched and the size to which it will grow at the age of six or seven weeks and then just imagine how many of these little fellows can occupy one square foot of space and at the same time have room to do a little exercising, he can figure the capacity of a brooder as easily as the most scientific builders. The capacity of a brooder should not be judged by the number of chicks that can be crowded into it, but by the number that live, not exist, and thrive to the age when it is desired to turn them out to care for themselves, and if the prospective buyer will consider this matter well when making the purchase it will save him both inconvenience and possible loss arising from the effects of overcrowding.

* * *

As to the price that should be paid for a good brooder, this depends on what is considered a good machine. I presume there are brooders that can be bought for less than five dollars. Then there are others that will cost twelve or thirteen. I am not going to say which I consider to be the cheaper but I will say this, that with lumber at the present price it will be a hard matter to buy all the raw material that goes to make up a strictly first class brooder with the money that some brooders are advertised to be sold at. This is not taking into consideration the labor necessary to build them. Therefore if those who contemplate raising their chicks this season by artificial means do a little thinking, and use a small amount of judgment before making their purchase and then buy enough brooders to rear the number of chicks they wish to hatch, they will find the way much smoother, the labor more satisfactory and enjoyable and the harvest more remunerative.

* * *

In the December number I stated as follows: "My advice is, don't buy a brooder just because it is cheap," and further on in the paragraph, I said, "A great many brooders were worthless and especially the very cheap ones." I wish to put myself right in this matter with the readers and will say I did not intend that it should be understood that I condemned cheap brooders because I do not, and I know there are some excellent brooders, the cost of which are from $5 to $10. When I mentioned the very cheap brooders I had in mind brooders I have seen that are sold at $3 and even less than that. The results obtained from these were most discouraging to the operator. As to the expression "Don't buy a brooder because it is cheap," I meant to convey the idea that it was good policy to investigate as to the quality of the machine regardless of price before purchasing. I think this explanation will make plain my position and that I am not writing in the interest of any particular make of brooders, regardless of cost. I am glad the editor made note of this as I through lack of explicitness may have given a wrong impression.

---

At the Hoopeston, Ill., show in December, 1900, Mrs. Geo. M. Hanly won on Silver Wyandottes, first on cock, only one bird entered; first, second and third hen, first, third cockerel on the two she entered, first, second and fourth pullet, first pen. She entered but one pen.

# *Bronze Turkeys*

## OF THE *National Strain*

## Winners Wherever Shown.

We have the finest lot we have ever raised, in both size and color. We breed from 12 different pens, and can at all times mate pairs, trios and pens, not kin and for best results. Our birds are winners and will produce winners. The National Strain enjoys the greatest record of producing prize winners of any other strain in the world, and has won more first prizes in hot competition than any other. Sell very low considering the quality. We have pleased customers in nearly every State in the Union besides Canada, Africa and Australia. Send to headquarters and get the true National Strain. Eggs are $5.00 per 12 or $20.00 per 50. We also have a grand lot of

***Show Birds that Win in the Fastest Pace.***

## *Barred Plymouth Rocks*

in any quantity, for sale cheap. Western agents for the famous Star Incubators and Poultry Supplies. Send for the best catalogue out on Bronze Turkeys—28 pages. It is worth a dollar to you. Write for prices. Catalogue free. Send 10 cents in silver or stamps for our new 1901 catalogue and guide, "How to Make Money with Turkeys"—20 pages, 8½x11½ inches, with colored plate valued at $200.00. It will tell you how to feed and care for old and young stock, how to mate to produce winners, how to judge them and score them, giving cut, section by section, as I would in the show room; giving secret in a nutshell to the successful raising of turkeys; valuable recipes for diseases, and is a book that is worth $25.00 to anyone who is interested in turkeys, but will be sent for only 10 cents and you may deduct that from your first order. It is the greatest work of the kind ever put out. Send to-day; do not delay.

# WE PRIZE OUR PRIZES.

We have an array of Gold and Silver Medals and Diplomas of Awards, won at the leading Expositions all over the world, from our own World's Fair in 1893, down to the Paris Exposition in 1900. We show a few of them here, and we are proud of them.

But we prize even more highly the record our

# RELIABLE
## Incubators and Brooders

have made, the world over, in actual operation in the hands of practical men and women.

It is this record

## FOR GOOD WORK

and perfect reliability, that has built up our business. We don't claim to have the cheapest incubator made, but we *do claim* to have a line unequalled for ease of operation and certainty of results. We ask you to investigate our claims. Ask experienced poultry raisers, who have tried the **RELIABLE** and then decide for yourself. To help you get at the root of the poultry question, we have published our elaborate **Second Edition**

### 20th Century Poultry Book.

It discusses every phase of the poultry question, containing chapters on Poultry Raising on the Farm, Feeding for Eggs, Raising Broilers, Capons for Profit, Pekin Duck Industry, etc., etc. It's easily worth a dollar but it will be sent Free on receipt of 10 cents to pay postage.

### OUR POULTRY YARDS.

We give our personal attention to breeding extra fine fowls of the Standard Varieties. Eggs and Prize Winning Birds in season. Described in our 20th Century Poultry Book. Address.

**Reliable Incubator & Brooder Co.**

Box **A** 1. QUINCY, ILLINOIS.

# "Profitable Poultry Keeping In All its Branches"

This is the title **of** the new and elegant catalogue issued by The Cyphers Incubator Co. for 1901. It contains 224 pages, 8 x 11 inches in size, **over** 200 fine new half-tone illustrations and a wealth of interesting, down to date matter, covering the subject of **Poultry for Profit** in all its branches.

## THIS IS A BRAND NEW BOOK,

### Not a Re-hash of Old Ones.

It contains special articles written by experts, and illustrates and describes over fifty of America's largest and most successful duck, broiler, roaster and egg farms. It also contains the endorsements of over one hundred of the foremost breeders of this country—men and women who are using the Cyphers Incubators—and shows **Photographic Views** of many of their poultry plants and **Favorite Poultry Houses.**

## This Book Weighs a Pound and a Quarter.

The cost to mail it is exactly 10 cents. **The book itself is free to you,** provided you will pay the postage. We count this book worth $2.00 or $3.00 of any person's money who is really interested in making money out of poultry. We have crowded into it every item of value possible to make it worth several dollars to you.

Of course it contains (additional to all of the above) a fully illustrated description and explanation of the Cyphers Latest Improved, Non-moisture, Self-ventilating, Self-regulating Incubators, and Cyphers Double and Triple Apartment Safety Brooders; also the full line of poultry appliances we manufacture.

**Write for a Copy To-day,** enclosing 10c in stamps. Ask for Book 5. Address nearest office.

One thousand Pekin Ducks at $1.25 each; $2.25 per pair; $3 per trio.

***REMEMBER***—I guarantee everything I ship and refund money (less express charges) if goods are not as represented. Can you ask anything better than this offer?

Have you seen our Poultry Guide? It is by far the best poultry guide and catalogue we have ever issued. It tells all about the care of poultry as to the money making results, valuable recipes, plans for poultry houses, how to get eggs, illustrations of the different varieties taken from life, and a full description of one of the largest and most successful poultry farms in the country. Contains information worth $25. It will be found the best help of the year toward making your poultry pay. May we send it to you? We only ask 15 cents to pay postage and mailing.

## JOHN BAUSCHER, JR., box 130, Freeport, Ill.

**DIAMOND CREEK POULTRY FARM,**

***A. V. DYKES, Manager, Dana, Ill.***

No. 717—Canopy top surrey with oil burner lamps. Price complete with pole or shafts, $75. Same as sells for $35 more than our price.

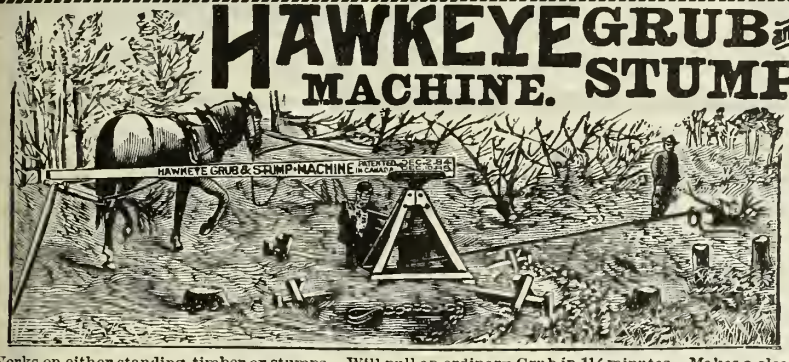
## HOW MUCH CAN I SAVE?

This is a question that every man should ask himself when it comes to a business proposition. For instance, we manufacture **vehicles and harness** and sell them **to you direct from our factory at wholesale prices.** On this plan the saving to you is **about 35 per cent;** that is, you would have to pay a local dealer or agent about that much more than you pay us for the same quality of goods. **Is not this item worth saving?** We make 178 styles of vehicles and 65 styles of harness and are the **largest manufacturers of vehicles and harness in the world selling to the consumer exclusively.** We make every article we sell and **ship our goods anywhere for examination** and guarantee safe arrival. You have the advantage of large selection, newest designs, latest styles, &c. Above all you have a guarantee of quality at a reasonable price. **144-page illustrated catalogue FREE.**

No. 130—Double Buggy harness, with nickel trimmings. Complete with collars. $22. As good as sells for $30.

**ELKHART CARRIAGE & HARNESS MANUFACTURING CO., Elkhart, Indiana.**

# HAWKEYE GRUB & STUMP MACHINE.



Works on either standing timber or stumps. Will pull an ordinary Grub in 1½ minutes. Makes a clean sweep of **Two Acres at a Sitting.** A man, a boy and a horse can operate it. No heavy chains or rods to handle. The crop on a few acres the first year will pay for the Machine. Send postal card for Illust'd Catalogue, giving price, terms and testimonials. (*Address Milne Bros. for Shetland Pony Catalog.*) **MILNE MFG. CO., 864 8th St., Monmouth, Ill.**

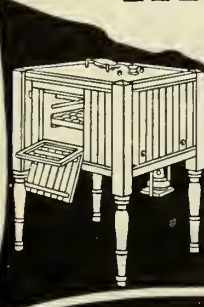
# *A Bird in the Hand*

is worth several in the shell. But a bird in the shell is as good as hatched when you put it in a

# *Marilla Incubator*

***Hot Air and Hot Water.***

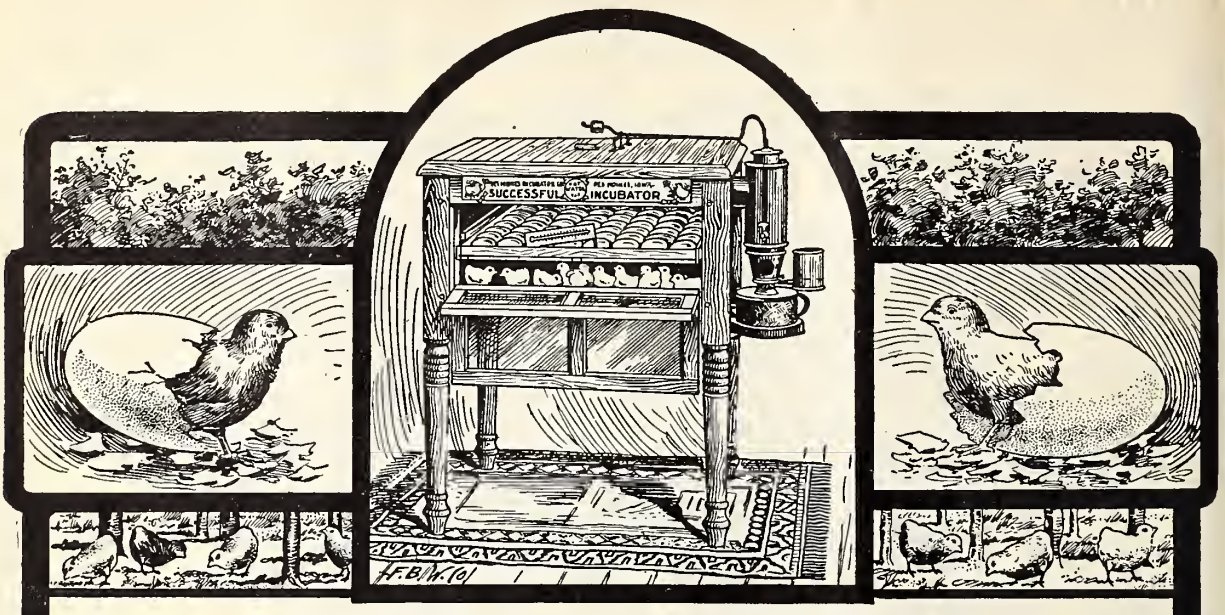


The **Marilla** never fails. It works automatically, the regulator being as near perfection as it is possible to make anything. Made of the best material throughout, by the best workmanship. Double walls, double floors, bottom and top. Ventilation perfect. Fire proof. Twelve years of success behind it. Each machine complete. "No extras."

***We Guarantee*** the Marilla to do satisfactory work in every respect. We do not care to "sling mud" at other machines, preferring to let you be the judge; but if you do not find ours easier to run, and better in the hatch, you get your money back. Send 2c stamp for catalogue.

***MARILLA INCUBATOR CO., Box 11, Rose Hill, N.Y.***

***THE MARILLA BROODER is the only one in which crowding and trampling is prevented.***



# Incubator Economy

does not necessarily consist in buying a machine for the least money. True Economy consists rather in obtaining practical results—in getting the most for your money. The

# Successful Incubator

in practical results, represents the height of true Incubator Economy. It is a saver.

**It saves Worry, because you can always depend upon it.**
**It saves Time, because it does not require constant watching and fussing over.**
**It saves Eggs, because it hatches every fertile egg.**
**It saves Chicks, beause it gives every chick the right start in life.**
**It saves Money, because it outlasts two incubators of the ordinary kind.**

It does these things because it is constructed of best materials by perfect workmanship on correct principles. Its system of regulation, the control of temperature and moisture, is perfect. Investigate it.

***We Also Make a Complete Line of Brooders.***

Send 6c for our new 154-page poultry book and see for yourself what users say about the big hatches, the ease of running, the little trouble, the general success. *Catalogues in five languages.*

**DES MOINES INCUBATOR CO., Box 1, Des Moines, Ia.**

*Our Creseent and Eclipse Hatchers do good work and cost less than the Successful.*

## HOLLIS' WHITE ROCKS.

I think that ten years of exclusive breeding of White Rocks ought to teach me how to get good ones. Other people have found it so and so will you. I have the right quality at the right price. Eggs, $3 per 15; $5 per 30.

**C. A. HOLLIS, Hudson, Iowa.**

# Leffel's Unconquerable Barred Rocks

## Always Win Lions Share of Prizes.

First Prize Pullet, Cleveland, O., Show, December, scored 94½ by L. G. Jarvis, Guelph, Canada.

If you do not believe it **SEND AND GET HIS CATALOGUE** and it will tell you who scored his birds. He stands in front, with highest scores by leading judges. I. K. Felch gave one of his cockerels score of 95 points, and wrote across score card, every doubt given against this noble hig follow; weight, 11 lbs. H. A. Bridge gave one of his birds score 95 points. B. N. Pierce cut one of his cockerels one-half in color. L. G. Jarvis, Guelph, Canada, scored 4 birds 94½. J. Y. Bicknell scored cockerel 94½. Charles McClave, 93¼ scores of birds. I have exhibited 30 times in past 8 years and won 29 times on cockerel, and tie the other one score. Sharp Butterfield scored 3 cockerels in one show 93½. Send for my catalogue and see my winnings and scores, and who scored them, and you will say he leads the procession in winnings.

## Never Lost on Breeding Pen

in any score-card show, nor any pullet where they were weighed and weighed correctly. Eggs $3 per sitting. Only lost once on first cock. I won all prizes at Springfield, O., Aug. 21-24, 1900, all prizes offered. My strain won all prizes at Urbana, O., Aug. 14-17, 1900, this season making 30 times I have exhibited in 8 years. No breeder ever made such record.

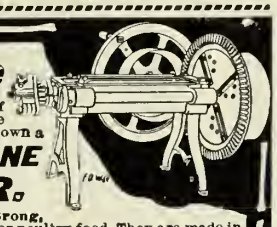
## Ten Times I Have Won Every Money Prize Offered. Eggs $3 per sitting.

500 cockerels—choice ones—for sale, and pullets in any number. I have a grand lot of show birds for winter shows. They never fail to win for me, and they will win for my customers. Residence, 363 South Fountain ave. Farm one-half mile from city. 265 acres.

***GEO. M. LEFFEL, Springfield, Ohio.***

## THE Bone Pile

does not now come in for the derision of former times. Particularly if they are green bones. More particularly if you own a



# DANDY GREEN BONE CUTTER.

They turn a bone pile into profit in a most satisfactory way. They are strong, durable and easy to operate and prepare the bone in the best form for poultry food. They are made in a great variety of styles and sizes for hand and power. Capacity up to 200 lbs. per hour. Remember that nothing makes hens lay like GREEN CUT BONE and that no machines prepare it so well as the "DANDY." This is well known by all who have used them and others will find it so after a trial. Send at once for our large free catalogue.

***STRATTON MFG. CO., Box 17, ERIE, PA.***

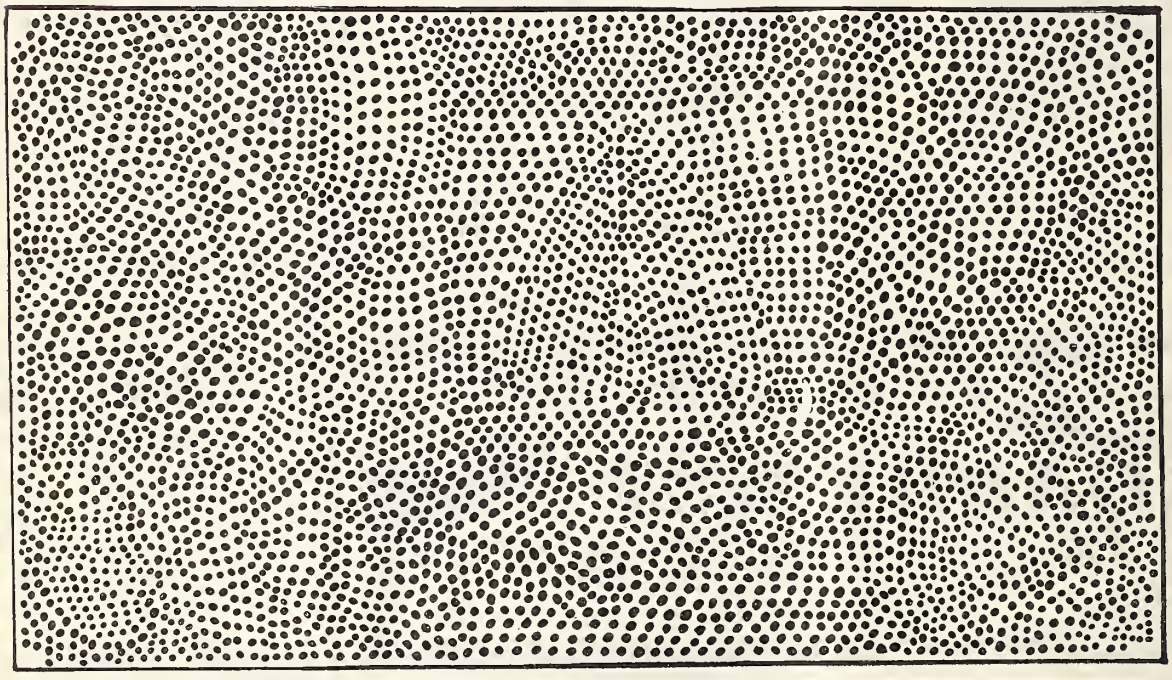
**ADVANCE FENCE COMPANY,**

**108 Old Street, Peoria, Ill.**

# $500.00 IN CASH PRIZES

## IF YOU CAN COUNT YOU CAN WIN



## POULTRY SUCCESS DES MOINES, IOWA

That bright, handsome, aggressive poultry paper, will pay to those who can count the dots in the above diagram correctly, $500.00 in cash prizes, as follows:

***FIRST PRIZE $100; SECOND PRIZE $50; THIRD PRIZE $25; FOURTH PRIZE $25; TWENTY-FIVE PRIZES $2 EACH, $50; 100 PRIZES $1 EACH, $100; TWO GRAND SPECIAL PRIZES $150. TOTAL 131 PRIZES, AMOUNTING TO $500.***

***Awards will be Made as Follows*** The person counting nearest the correct number gets first prize, next nearest second prize, and so on down the list. Should there be a tie for any prize it will be equally divided. To the one making the poorest count a "Consolation Prize" will be given.

***Please Note..*** That there is no element of chance or guess work whatever about this. It is a test of skill, pure and simple. If you can count the dots correctly you can win. You have a definite basis to work on, something you do not have in a mere guessing contest. The number of prizes offered is so large you are bound to hit it somewhere.

***Conditions...*** Contest is open to all, both old and new subscribers. Those now in arrears must pay up, and a year in advance, this will entitle them to compete. Send 50 cents for one year's subscription to POULTRY SUCCESS, and you will be entitled to one count. and just as many additional counts as you send yearly subscriptions at same rate. You can send 50 cents in silver securely wrapped in a letter.

## ...TWO GRAND SPECIAL PRIZES $150.00...

These will be awarded as follows: Send $1.00 for a three years' subscription, and if you win either the first or second prizes, we double it, and send you $200.00 in the one case, or $100.00 in the other. You will be entitled to THREE counts under this offer, and paper can be ordered sent to three different addresses one year each, instead of three years to one address, if you desire. A dollar bill will come safely, and save you charges for money order, or draft.

***Contest Closes*** April 20th, 1901, at noon, and the names of all the winners will be published in our May 1st issue, and prizes paid the same day. If you would like to have a part of the $500 make a careful count.

***Very Important..*** At the close of the contest a key to the puzzle, which is so constructed as to prove the absolute correctness of the answer, on the basis of which the awards will be made, will be sent to everyone who requests it when sending subscription, and who encloses 10 cents in stamps to pay for it. All who take part should have this chart, as it settles the question as to the actual number of dots in the diagram.

***A Word of Advice*** Don't make the mistake of thinking that this is "easy" and therefore go about it carelessly. It takes care to count those dots, and if you get them correct we predict you will win a prize. This a case where it will pay to take pains—perhaps you can use $200.00 to advantage? Then go after it right and get it. Fill out this coupon and mail to us with 50 cents for one year's subscription, or $1.00 for three years, if you wish to compete for those "two special prizes."

Publisher POULTRY SUCCESS, Des Moines, Iowa.

# Specialties for Poultry Raisers

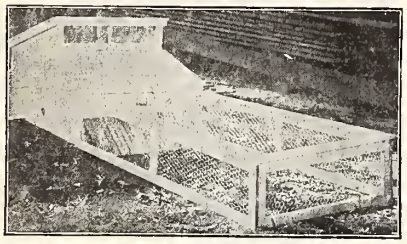
## 20th Century

### *Portable Hen Houses, Roosting Coops, Brood Coops, Outdoor Brooders,*

These articles are designed for the practical poultry raiser who wants to get the best results with the least fuss and bother. They are practical

**VERMIN PROOF,**

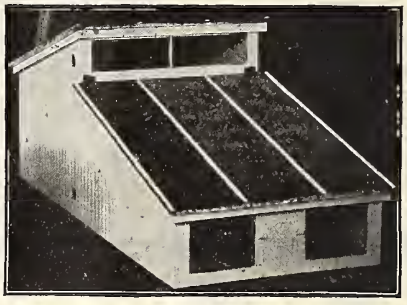
being built so that they leave no places in which vermin can be harbored, and are easily kept clean. By the removal of a few screws they can be taken entirely apart and thoroughly scalded. They are pre-eminently the thing for cleanliness and health.



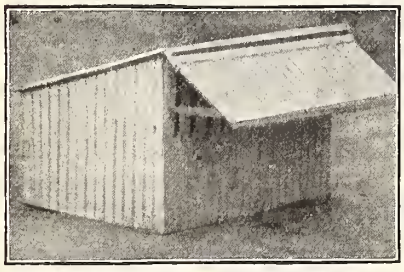
20th Century Brooder No. 1.

Brooder No. 1 is 3x4 feet, with two compartments with different temperatures. It is fireproof, being painted with two coats of asbestos paint. Easily cleaned and ventilated, and with it a perfect system of heating will raise a larger percentage of healthy chickens than any other brooder made.

Brooder No. 2 is 3x6 feet, has three temperatures and allows the chickens to be on the ground and still be in the brooder. Apartments and hover separated by a heavy felt curtain that is slashed so as to allow the chicks to pass in and out. Hover apartments lighted by separate windows.



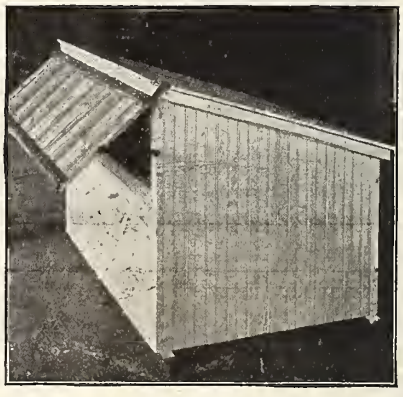
Brooder No. 2.



20th Century Brood Coop.

The 20th Century Brood Coops will accommodate old Mrs. Biddy during the entire period of incubation and of brooding, keeping her separate so other hens cannot molest her and protecting her from cats and vermin. It is easily kept clean and free from lice and mites. In one of these coops you can wean the chicks from three to four weeks sooner than the hen would naturally do. You can raise the coop from the floor to sweep it off, or take it entirely apart for scalding, in a few moments. Size 2x3 feet.

The 20th Century Roosting Coop, for youngsters too large for the brooder. It is provided with an awning or hood by which you can regulate the sun in the coops and protect the fowls at night. Absolutely no place about it to harbor insects.



Roosting Coop.

## 20th Century Portable Hen House.

20th Century Portable Hen House—Just the thing for the small fancier or the man who does not want to put a permanent house on another man's land. Neatly finished and durably built. Easily taken down and put up. It houses from 12 to 15 birds. Built on the "scratching shed" plan. Size, 5x10 feet and 6 feet high.

This line of brooders, brood coops, roosting coops and hen houses, is the outcome of years of experience. They meet every requirement of the poultryman. Fully guaranteed. Send stamps for photographs, prices and full particulars.

## SAM D. MACMILLAN,

***1202 Twelfth st., Pine Bluff, Ark.***

# FACTS ARE PROOF!

Pedigree White Wyandottes. This shows what blood and line-breeding will do. Our winnings prove the quality of our stock. To make the matter plain will state that in five shows we won the following prizes on our famous White Wyandottes, exhibited at Chicago and Iowa State Shows in 1900 and 1901, Cedar Rapids, Illinois, State and Iowa State fairs 1899 and 1900:

**On Pullets, 4 firsts, 3 seconds, 2 fourths, 1 fifth.**
**" Hens, 1 " 1 " 1 "**
**" Ckls., 2 " 2 " 1 "**
**" Cocks, 1 " 2 " 1 "**
**" Pens, 4 " 1 " and one third.**

Also 17 specials in gold, etc. Grand sweepstakes for 10 highest scoring in American class at Cedar Rapids, 1900. Three firsts on best display and highest scoring 10 birds in American class. Three first on best display in White Wyandotte class. In great Chicago show, 1901, in the largest White Wyandotte class ever shown in Chicago, of 170 birds, we won five prizes out of a possible 25. We ask any breeder to show a better record and invite inspection. Our customers are winning on birds hatched from eggs they bought of us last season. You can do so if you order of us this season. Eggs $3 per 13; $5 per 25. Guaranteed 75 per cent fertile. Each bird in our pens is a show specimen. Send 10 cents for our beautifully illustrated catalogue of our prize winners from life. This book is valuable as it tells how to mate White Wyandottes for best results. Treats on rearing and feeding chicks and how to produce fertile eggs. Treats on all diseases and cures for poultry.

# MILLER'S MILLHOOK FARM.

# How About Eggs?

We have mated this season the grandest lot of Barred Plymouth Rocks that we have ever seen. The hens and pullets score from 91 to 93, and the cockerels from 92 to 93—good, honest show room points. Every sitting of eggs from this mating is worth $5 00, and they will produce just as good stock as you would get from the eggs that you would pay a specialist $5.00 per sitting for. During March we will accept orders for eggs from these grand Barred Plymouth Rocks at just $1.00 per sitting, cash with the order, and no order accepted for less than two sittings. You can have eggs shipped any time during March, April and May. Send your order at once, then when you are ready for the eggs drop us a card and we will ship promptly.

These eggs will positively not be sold for less than $2.00 per sitting after April 1st, but if you will order during March you can have them at only $1.00 per sitting. We guarantee all eggs to reach you in perfect condition and to be reasonably fertile.

## Read What Our Customers Say:

FT. JONES, Cal. June 23, 1900.

J. W. MILLER CO., Freeport, Ill.

Gentlemen:—I wish to thank you for prompt attention to my order for Light Brahma eggs in May. I received them just two weeks from the day I sent my order and I live 30 miles from a railroad and ten miles from an express office. The eggs were in good condition and ont of the fourteen received I have eight fine chicks. One egg was broken in the nest the day I set the hen, and one chick was smothered in hatching. You may expect my orders hereafter.

MRS. ELLA BROWNING.

PONTIAC. Ill., July 7, 1900.

J. W. MILLER, Freeport, Ill.

Dear Sir:—I received those eggs all right and got a fine hatch—eleven out of the thirteen. I am well pleased and will send for some more eggs next spring. Yours truly,

F. D. REINAGLE.

J. W. MILLER CO., Freeport, Ill.

Dear Sir:—Please send me your catalogue of thoroughbred poultry for 1901, giving prices of birds and eggs. I wish to purchase a sitting of Barred Plymouth Rocks from some reliable breeder. I want only the best to be had. I suppose your firm would do the best of any I could send to. My brother, S. C. Barton, sent to you some four or five years ago for a sitting of Barred eggs, and he got some fine hens and cocks from them. One cock took 1st premium at the Warwick Co. Poultry Show, held at Boonville. If I send to you and you do as well by me I will have no cause to complain.

Respectfully yours, ALBERT BARTON, Boonville, Ind.

June 4, 1900.

Dear Sir:—I write you these few lines to let you know that I received the sitting of eggs you sent me all in good order. I set them and hatched eleven chicks out of the set—all good, strong chicks. I thank you very much for your honesty in filling my order. I remain your true friend,

JAMES MALONE, 131 Steward St., Fall River, Mass.

EAST DES MOINES, Ia., June 27, 1900.

MR. J. W. MILLER, Freeport, Ill.

Dear Sir:—This gives me the opportunity to praise your eggs very highly. We got twelve out of thirteen eggs. Thank you for honesty in sending good eggs. Now, Mr. Miller, what price would you send me a pair of Silver Spangled Hamburgs, for exhibition purposes; also a pair of Hondans and Golden Polish? Are the eggs you send out after July as good as you send out before? I am Yours truly,

BOON POLLAN.

RAMSEY, Ill.

J. W. MILLER CO., Freeport, Ill.

Gentlemen:—I bought of you last May three sittings of White P. Rock eggs. I got 40 eggs and hatched 34 chicks. I have 20 fine chicks—16 pullets and 4 cockerels. There cannot be any finer raised than those I have. I will send to you for some eggs in the spring, as I am well pleased. With best wishes I am

Very truly yours,

MRS. IONIA TODD.

## OUR CATALOGUE.

Perhaps you do not know that we issue a very complete and handsome poultry catalogue; well, we do, and if you are interested in poultry, even just a little, you will surely want this book. We will name just a few of the good things it contains: We show in colors Barred Plymouth Rocks, Buff Cochins. Black Langshans, Single-comb Brown Leghorns, Black Minorcas and Buff Plymouth Rocks. We tell you how to build poultry houses and yards; how to prevent and cure all diseases of poultry; how to feed and care for your poultry from the time they are hatched until they are full grown. We illustrate and describe forty of the leading varieties of poultry, answer hundreds of important questions, give lowest prices of poultry and eggs and much other useful information. This book contains 84 pages and should be in the hands of all who are interested in poultry. Sent postpaid for 10 cents. Address

## "Gold Coin" Strain

# LIGHT BRAHMAS

### Are Some Ahead

of any record yet made by any breeder in the West. They are never on the background; they get out to compete against competition that is competition. No, never been disappointed either. Wasn't at Kansas City, 1900, when I won 1st and 2d pullet, tie 1st hen, 3d and 5th. At Crystal Palace, Kansas City, entry too late arrival, but Supt, Newcastle writes, "Would have won everything in their class." 12 made an average score 94¼—Hewes.

Record at St. Louis, 1901, stands without a parallel by any breeder—5 awards, 6 entered—1st cock, 1st and 2d hen, 2d and 3d pullet. Above cock, score 94, does not bear a cut on wing by Rigg, Hewes, Butterfield or Taylor, and only ½ on comb.

### Eggs $3 per 13 straight.

From the above winners.

**The Only Strain and the Only Breeder Advertising**

winning from 1901 shows, outside of local shows, in North Missouri. Winnings made by going out for them and sure gets them.

**E. A. WILSON, Cainsville, Mo.**

# BIG CUT IN DRUGS

## The Sure Hatch Hatches Sure.

Four years ago the inventor of the "Sure Hatch" Incubator made incubators to order. A spare room in his dwelling house was his only factory—all he needed. Now, the Sure Hatch Company employs 100 skilled workmen and has one of the largest and best equipped incubator factories in the world. Their business has more than doubled every succeeding year. There is only one explanation of this marvelous growth. It is that

*The Sure Hatch*
*Hatches Sure.*

## A Sure Hatch Hatch.

The accompanying illustration shows Mr. and Mrs. T. D. Stradley of Great Bend, Kans., and one of their Sure Hatch hatches. Mr. Stradley is one of Kansas' most enterprising breeders. He has before him his first prize Partridge Cochin, scored 92 points by Judge Shellabarger at the Barton County Poultry and Pet Stock Association's 3rd annual exhibition—a hen that has never yet been beaten at a show. Mrs. Stradley is holding her 1st prize White Wyandotte Cockerel, scored 93 points by Judge Shellabarger. They raise good birds which capture good prizes, and they hatch them in the Sure Hatch.

# The Real Price of an Incubator

is not the first cost. There are many flimsily built, single-wall boxes on the market with cheap lamps and poor regulators, offered for a song; but they are dear in the long run. They bring only worry, disappointment, and loss of eggs, time and money.

**It Pays to buy an Incubator on which you can depend** under all circumstances. That kind is the cheapest in the end.

# The Sure Hatch Hatches Sure.

Why? **Because** there are three walls and two dead air spaces (one more than in any other machine.) **Because** the cases are made of California Redwood, which not only takes a beautiful finish but beats anything we know of to stand the heat and moisture of incubation. **Because** the tanks are made of 12-oz. hard rolled copper. **Because** the system of regulating is simple but most effective. **Because** the lamp is the Hydro-Safety, which cannot explode or smoke. Every point which goes to make an incubator work satisfactorily is covered. **For practical results we put the SURE HATCH against any incubator in the world.** We are selling this year three times as many machines as we sold last year, and they are largely going into the same localities where we sold last year. Every machine sold sells others. That's the kind of record the **Sure Hatch** makes.

**Our Catalogue is free.** We don't ask you to pay our advertising bills. Ours is a common sense catalogue, full of meaty talk on the incubator question. Lots of poultry men tell us that its worth more than half a dozen of the other kind. Write today for a copy. They are going very fast. **The Common Sense Brooder** is without question the most practical, easiest to keep clean, non-crowding brooder made.

**Sure Hatch Incubator Co., Box 136, Clay Center, Neb.**

## The Sure Hatch at the 1901 Kansas State Poultry Show.

Our exhibit at the Kansas State Poultry Show was in charge of one of our lady customers, Mrs. J. W. Pinkerton of Clay Center, Kansas. She filled the machine at her home, shipped it to Topeka, timing the hatch so that the chicks began to peep the day the show opened. It was one of the most popular features of the entire Exhibit.

# Bonniwell's Buff Rocks

Still holds the record at the great St. Paul Show. Winnings this season were 1st, 2d and 3d hen, 2d cockerel, 1st pullet, 1st pen, best cock and best display. The class was big and quality the best. My first hen scored 94¼. I have a limited number of eggs for sale from best birds. They are large, well-shaped birds with good combs, and are the proper shade of Buff. Burdick's Nugget Strain.

**H. H. BONNIWELL, Box 395, Hutchinson, Minn.**

# Stone City Poultry Farm.

| CHICAGO: 1st B. P. Rock Cockerel, Chicago Boy. 1900. | TWO YEARS at the great Chicago Show. | CHICAGO: 1st B. P. Rock Cockerel, Chicago Boy 2d, 1901. |
|---|---|---|

Space here is too limited to describe my B. P. Rock Yards, which are headed by my noted prize winners for 1901. In Buff Cochins I've got the winners: Yard No. 1, headed by 2d cockerel at Chicago, 1901. Yard No. 2, headed by 1st cock at Mazon and Joliet, Ill., scored by Judges Russell and Hewes, 94 and 94¼. Females in above yards scoring from 94 to 95½. Stock and eggs for sale from above varieties. Mention A. P. J.

**WM. WEBB, Box 1920, Joliet, Ill.**

# Arnold's White Wyandottes.

Prize winners at **CHICAGO, PEORIA, DANVILLE, SPRINGFIELD, BLOOMINGTON, ROCKFORD, STREATOR** and **PRINCETON**, always winning where competition was strongest. I ship the kind of stock and eggs that you do not regret having bought. My birds have scored 96¼ under prominent judges. I have a large number of high-scoring birds and can sell you just what you want. Circular free.

Price of Eggs: One setting $5.00; Two settings $8.00; Three settings $10.00. Positively no reduction on larger orders.

THOS. F. RIGG, Iowa Falls, Iowa.

# Boyd's Black Minorcas

## Were Good Enongh to Win

The creamy prizes at the great Cleveland, Ohio, show this season, including 1st and 2d cock, 1st pen and other seconds and thirds. Also won at the great Chicago Show, 2d cock, 1st and 2d hen, 1st and 2d cockerel, 1st and 2d pullet. 1st pen and specials for best cock, cockerel, hen and pullet and best display. These birds won in competition with crack birds of the East. Is this class of stock good enough for you? I can furnish you birds at reasonable prices. Eggs from winners only $3 per sitting. Eleven years a breeder of Black Minorcas.

**W. J. BOYD, Glenville, Ohio.**

# Barred P. Rocks,

***EXCLUSIVELY.***

My stock is pure Bradley Bros. strain in the male line, and pure E. B. Thompson strain in the female line. Every breeder is grand in size, shape and plumage. In my pens are the sires and dams of many first place winners in the best shows in the Mid-West. Stock of high quality for sale.

***Eggs $2.50 per 13; $4 per 26.***

Satisfaction or your money refunded.

L. H. EDWARDS, Mulberry, Ind.

# White Wyandottes.

## Well, I Should Say So!

## HOW'S THIS?

After winning practically all the 1st, 2ds, 3d, 4th, breeding pens and specials at the Mazon, Ill., and Joliet, Ill., shows, I sent ten new birds, nearly all caught fresh from my yards, to the Illinois State Show, held at Bloomington, Ill., Jan. 7-12, 1901, and won seven regular prizes, among them being 1st, 2d, 5th hens, score 95¾, 95½, 95; 2d pullet, score 96, by Theo. Hewes, judge. That's the kind of birds to own and you can get them. Pens all mated for 1901, containing all these prize winners and many more just as good. Eggs from three best pens $3 per sitting, other seven pens $2 per sitting. Incubator eggs $6 per 100.

***100 Finely Bred Cockerels,***

at $2 to $5 each. Pens and pullets at $2 to $3 each. Write me your wants.

F. C. WILCOX,

Prop. Hickory Grove Place, JOLIET, ILL.

# JUST PLAIN SENSE

We know that poultry raisers must grow very, very weary of the constant jangle and extravagant claims of incubator men, each one with the "only machine on earth!" We try to avoid that sort of thing. Our catalogue is just a plain sense talk, truthfully describing the

**Bantam Hatcher, The Buckeye Hatcher, The Invincible Hatcher. The Chick, The Old Hen and The Security Brooders for indoor use, and The Old Hen Outdoor Brooder, and the Jewel Pipe System Brooder for large plants, and the other styles of Incubators and Brooders we make.**

We believe we have the right principle of construction, and a good many thousand poultry raisers who use our machines think so, too. If you are interested in poultry, you will also be interested in our plain sense catalogue. It states the case plainly and lets you decide. If you can't agree with us, we won't "talk back." We know we have the best selling proposition. Having no agents we can sell a first class, self regulating incubator for only $5.00 and a brooder for only $3.00.

**We send our Machines anywhere**

# On 30 Days Trial

**and let you judge of their construction and efficiency.**

Our guarantee covers every possible point; it is broad and binding.

☞ **The Buckeye** is the compartment hatcher—each compartment being a separate incubator, distinct from the others, with its own regulator. The regulation is the most simple, acurate and powerful. Machine ready to start (excepting the oil and water) when you get it.

*Send 4 cents postage for Catalogue No. 2*

BUCKEYE INCUBATOR CO., SPRINGFIELD, OHIO.

# Light Brahmas, Gold Medal Strain.

Winners at Cedar Rapids, Iowa, State Poultry Show, Keota Poultry Show, 1900-1901. Plenty of first-class hens and pullets for sale yet. Only a few cockerels left. Eggs $3 per 13 straight. Dark Brahma eggs, from extra good stock, at $2 per 13. NO CIRCULARS. Write us for just what you want. Have your egg orders booked early. Address,

**Maple Grove Poultry Farm.** ***W. S. GREGORY, Keota, Iowa.***

Secy-Treas. Western Light Brahma Club.

## Don't Forget.

That when you order a setting of Eggs from my Black Langshans, you get them from two of the best pens in America. At Canton, O. show, Jany. 2-5, 1901, Myers, Judge. I won 2 ck., 1 ckl., 2-3 pul., 1, 2. 3 hens, 1 pen on 9 entries, and in good company. Pen 1 is headed by 1 ckl. at Canton, 2 by 5 ck at Chicago, 1901. Eggs $2.00 per 13; $5.00 per 39. No Circular. **GEO. W. WAGNER,**
1303 E. Tus. St. **Canton, O.**

## VASS' BUFF ORPINGTONS

At the Crystal Palace Show of America, Madison Square Garden, New York, 1901, 1st and 2d cock, 1st and 2d hen, 1st cockerel, 1st and 4th pullet in the largest Orpington class ever shown in this country. Winners at Boston, Philadelphia, Orange, Hagerstown, Trenton and Dryden. Buff Plymouth Rocks and White Wyandottes of high quality, eggs and stock at all times. Satisfaction guaranteed. Circular free; write for prices.

**C. E. VASS, Washington, N. J.**

# Barred Plymouth Rocks.

Winners at Indianapolis and Danville, Ill., with the following scores: Cock, 91½; hens, 93½, 93½, 93, 93; cockerels, 93½, 93½, 93, 93, 92½; pullets, 94¼, 94, 94, 93¾, 93½. At the great Columbus, Ohio, show, 1 won 1st on cockerel, 1st on breeding pen, (tied on 1st pullet), and Silver Cup for highest scoring male and female. My matings proved a grand success, producing the best chicks I ever owned.

I have a number of cockerels sired by **COLUMBUS for which I refused $100.** Can mate up pairs, trios or breeding pens for best results. Stock not satisfactory can be returned. Write for what you want.

***Eggs $3 per 15 from same yards I breed from.***

# Porter's Barred Plymouth Rocks

# W—I—N

At the Bloomington State Poultry Show, under Judges Hewes and Russell we got the following winnings:
1st Cockerel scored 93.
1st Pullet scored 93½.
1st Hen scored 92.
1st Pen.
In a class of 159 B. P. R.'s and 57 Cockerels.

At New Albany Poultry Show, 1900, under I. K. Felch, Judge, we got the following winnings;
2nd Cockerel scored 92.
1st Pullet scored 94½, and a great beauty.
2nd Hen scored 92½.
3rd Pen scored 184⅝.

**EGGS EGGS EGGS**

We we will now mate up seven yards for Eggs, four yards for Cockerels, two yards for pullets and one yard Standard Mating. Eggs from the above yards will be $3.00 per setting. Incubator Eggs $6.00 per 100. We have 300 head of fine young stock yet for sale to quick buyers at low prices. Write your wants.

**C. A. PORTER, Box B, Flat Rock, Indiana.**

Busy as Beavers, are the Birds on Beaver Hill Farm.

At New York and Chicago the same week

# The SILVER WYANDOTTES and PARTRIDGE WYANDOTTES

of Beaver Hill Farm, (T. E. Orr, Prop.) Won High Honors.

**At NEW YORK** **Our 9 Birds won 6 Regular and 3 Special Prizes,** including **1st on Silver Hen, 1st on Partridge Cockerel,** 2nd on Partridge Pullet, 2nd and Special on Partridge Cock, and the $10.00 **Special on Silver Wyandotte Cock.**

**At CHICAGO** We won 6 Regular Prizes, and 1 Special, including **1st and Special on Silver Wyandotte Cock** and **1st on Partridge Cock.**

**At PHILADELPHIA** **Our 5 Silvers won 4 Regular Prizes.**

**At INDIANAPOLIS and HAGERSTOWN** Our **Whites** and **Silvers** won high honors, including **1st on White Cockerel. at both places.** Said by both judges to be the best one they had seen this year. We did not show White Wyandottes at New York or Chicago, but furnished fine birds to some who did.

# EGGS FROM THE GRANDEST MATINGS in AMERICA

### WHITE PLYMOUTH ROCKS.

**AT INDIANAPOLIS, DEC. 10-15, 1900**

We won the following: Cocks 1st, 2d and 3d, 96¼, 95¼, 95¼; hens 1st, 2d, tie 3d, 4th, 96, 95½, 95¼, other hens 95, 95, 95, 94¾; cockerels 3d and 4th, tie 2d, 95¾, 95¼; pullets 1st, 2d 3d and 4th, 96¼, 96¼, 96¼, 96; pens 1st. 192 7-16, the highest scoring pen ever shown, 2d, 191 5-16. Who has ever come anywhere near this especially in such a show. Also best display.

**AT CHICAGO, JANUARY 1900**

We won on 13 entries 1st cock, 1st and 4th hen, 1st and 2d cockerel, 1st pullet, 1st pen and best display, defeating the winners from several State shows and birds from several States. This is the greatest record ever made by a White Rock breeder. 89 birds in the class and we won all of these prizes with only 13 birds.

We have five of the grandest matings ever gotten together.

### WHITE WYANDOTTES.

**AT INDIANAPOLIS, DEC. 10-15, 1900**

We won the following prizes: Cocks 1st and 4th, 94¾, 93¾; hen 1st, 96½; cockerel 1st, 95; pullet 4th, 96¼, and one other 96¼, five pullets tieing for 1st, we owning two of them. Pen 1st 191¼, and best display.

At Indianapolis last year we won the big end of the regular and special prizes, including special for best display.

What Judge Hewes says of our exhibit at Indianapolis this season, in his report of the show in the R. P. J.:

"W. C. Pierce & Co., Indianapolis, had as fine a showing of White and Buff Wyandottes and White Rocks as ever stood in the show room. There is a question in my mind whether there is a breeder in America that can head this firm off."

### BUFF WYANDOTTES.

**AT INDIANAPOLIS, DEC. 10-15, 1900**

We won cocks 1st and 2d, 94½, 93; hens 1st, 2d, 3d and 4th, 94¼, 94¼, 94¼, 93½; cockerels 1st and 2d, 92¼, 92; pullets 1st, 2d 3d and 4th, 94, 93¾, 93, 93; pens 1st and 2d, 186 15-16, 184 9-16.

We have mated of this grand variety five yards, containing more high scoring birds than any breeder of this variety in America, and scored by Theo. Hewes and other noted judges. Our birds are of true Wyandotte type and beautiful, rich, golden Buff, so much desired.

We have for sale yet a number of Cockerels of each of our varieties, and a few females in White and Buff Wyandottes and Buff Plymouth Rocks. Our egg circular gives a fine description of each of our breeding yards. We do not have any private yards but sell eggs from each.

We did not show **BUFF ROCKS** this year but have some as fine show birds as can be found. We sold several birds of this variety that won 1st honors in some of the largest and best shows held in the United States this year. Send for beautiful egg circular free if you mention this paper. Stock raised on three separate farms. Address as below at our office.

# We Shall be in a Better Position

To Supply

# WHITE WYANDOTTE EGGS FOR HATCHING

This season than ever before. Lots of time and money have been spent to get the flock up to their present condition. We have the room this year to give large space for each pen, well supplied with shade and green stuff and **not too many** females with each male, thus insuring a high perceutage of fertility. Our best pens are composed of a very high quality of birds and cannot help giving satisfaction to purchasers of eggs. We are going to hatch quite a number of these eggs ourselves, so will not have a great many to sell. Can also supply incubator eggs from standard-bred birds, on farm range, at a low price. These birds are of a quality above the average from which incubator eggs are generally furnished. Every bird on the place strong, healthy and vigorous, and not a disqualified fowl in the lot. No feathered legs in the bunch. If you are going to be in the market for eggs from either lot, don't be bashful in coming forward. Will be pleased to describe birds more fully on application. Also have a few nice cockerels left but no females. Cockerels will go cheap. Everything absolutely guaranteed. Eggs from best birds $2.50 per sitting, three sittings, $6.00. Incubator eggs $7.00 per 100. Either lot will be sure to please.

Can also furnish Belgian Hares, pedigreed or meat stock. Former of the best strains and all perfectly healthy. If you are interested in anything in our line, write at once and you will be treated right.

**R. M. COLE,** Supt. Normandy Poultry Farm, **Bangor, Mich.**

# North Side Poultry Yards.

## Silver and Buff

# WYANDOTTES

## Are They Still Winning?

Look at the following list, which goes to prove our statement that we have as good Silver and Buff Wyandottes as anyone. At the Philadelphia Show we won on Silvers 1st cock, 2d hen, 1st and 2d cockerel, 2d and 5th pullet, on six entries. At Illinois State Show, on Buffs—1st and 3d cockerel, 4th cock, 4th hen, 2d pen and special for best colored female. At Chicago's great show, on Silvers—3d and 4th cock, 2d and 3d hen, 3d and 5th cockerel, 1st, 2d, 3d, 4th and 5th pullet, 1st and 4th pens. Gold special for best display in Wyandottes; gold special for best display in Wyandottes, any one variety; special for best laced pullet. The class was pronounced by Judge Drevenstedt to be very strong and made the best showing he had seen at any show since 1892. On Buffs—3d cockerel, 1st pullet, in a class of 47; 4th pen. Gold special for best Buff Wyandotte pullet; special for 3d best cockerel. Some choice stock still for sale at prices that are right considering quality of same. Have some cocks and hens of both breeds—good breeders—which we wish to close out, we make the following low prices: Trios, $4.00 to $7.00; pen of 7 birds, $9.00 to $15.00; single $1.50 to $3. A few hens at $1.25 each. First come, first served. Remember that we do not sell eggs for hatching.

# *Light Brahmas,*
# *Barred Rocks.*

Nothing cheap except the price. At Burlington, wis., we won more prizes on Light Brahmas than any other exhibitor. We won 2d pullet, tied for 1st; 3d hen, tied for 2d; 2d and 3d cockerel, 3d cock. No pens entered. One of our best breeding pens contains seven females with an average score of 93½. Our best Barred Rock pullet at this show was pronounced by the judge to be the best and evenest surface colored bird in the show. We can please you and will guarantee to do so if entrusted with your order. Eggs from our winning Light Brahmas, $2.50 per 13; Barred Rocks, $2 per 13. Mention A. P. J. when writing.

# *TALK ABOUT QUALITY!*

At the Indiana Poultry Association Show, at New Albany, Ind., Jan. 8-13, in a class of 141 White Plymouth Rocks, the cream of Indiana's production and the largest class ever exhibited at any show in the State, with only 12 birds entered, winning four out of five possible firsts and all cash specials but one. These proud winners are the result of seven years of careful selection, scientific mating and systematic line breeding—the only method by which any breed can be brought to perfection. My customers will get eggs from a pen headed by a 95 1-2 point male bird mated to females scoring 94 1-2, 94 1-2, 94 1-2, 95, 95, 95, 95¾ by Pierce and Helmlich, at New Albany, Ind., and Bridge and McClave at Louisville, Ky.

**W. A. GREENE,**
**Box 401, New Albany, Ind.**

# S. L. Wyandottes and S. C. White Leghorns.

That are line bred and have been winning for us and our customers for 14 years. They again show their winning qualities in the show rooms this winter. At the Chicago Show our Leghorns won 9 regular prizes. At the Minnesota State Show, St. Paul, Feb. 6–12, our birds captured 8 firsts, 9 seconds, 6 thirds, 2 fourths, 4 fifths, 1st and 2d pens, both varieties; display and sweepstakes. Also $50.00 cup for highest scoring pen (190¼) in the show room was awarded our Leghorns. Eggs for hatching, fresh and fertile. Leghorn eggs, $2 per 15; $5 per 45. Wyandotte eggs, $3 per 15; $5 per 30. Stock for sale at all times. Satisfaction guaranteed. Write your wants.

**GOETTE & SCHROEDER, St. Paul, Minn.**

# FENN'S BANTAMS

Win again in strong competition.

**91½ to 95¾**

is our score at the South Eastern Wisconsin Show, held Jan. 7–12, 1901. 55 birds entered, 24 firsts, 14 seconds, 8 thirds, 3 fourths. **EGG** orders booked now. 12 varieties. Write us.

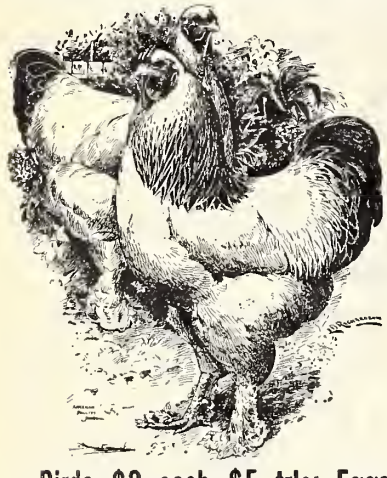
***DO YOU KNOW***



# Scott Deaner?

If not you had better get acquainted with him and his prices for poultry and eggs for **1901.**

## Please Read Carefully.

The prices quoted for stock and eggs are as low as I can afford to make them and send you birds and eggs from first-class thoroughbred stock. Any breeder who offers to sell at a less price must either furnish you with inferior stock and eggs or lose money. I have birds in my yards that are hard to duplicate for quality. They are premium winners. I showed at Rockford, Ill., (F. H. Shallabarger, judge,) 24 birds and received 17 firsts, 4 seconds and 3 thirds. At Freeport, Ill., I showed 30 birds and received 25 firsts and 5 seconds. My guarantee on eggs are 7 chicks from each sitting or duplicate same at half price. I replace broken eggs free of charge.

### Can You Ask for Anything Better Than This?

You may order of different varieties if you wish to make up one, two or three sittings. Order direct from this ad and get what you want at prices that cannot be duplicated for the quality of the stock. **Remember I guarantee everything I ship and refund the money if not exactly as represented.** I have bred fancy poultry for thirty years, and will send a score card with each bird if desired.

**Mating and Scoring Birds a Specialty. Terms within Reach of All.**

## Birds, $2 each, $5 trio; Eggs from following varieties $1.50 for 13, $2.50 for 26, $3.50 for 40.

## You Can Beat the Band, or the Express Co. Either,

By buying eggs for hatching. You do not have to pay two rates on them as on breeding stock. You can raise your own winners, save that $10 to $25 per show bird you paid Brown or John Jones, and laugh at your neighbor because he said there was nothing in it. We sell you the eggs from our best matings at only $3 per sitting of 15 or $5 per 30. Will positively make no further reduction as we send you from the same pens we set from in our own yards, Remember, we breed Barred Plymouth Rocks exclusively, and have had twenty year's experience with this breed. We have furnished winners in many of the largest exhibitions of the past, also winning in our own exhibit at Cedar Rapids, Ia., Jan., 1900, the most valuable prize ever offered on this variety, by the American Poultry Association—the grand $50 sweepstakes cup, for best cock, cockerel, four hens and four pullets in American class. Mention this paper in writing me. Also send for our 1901 circular, which is free.

***F. H. SHELLABARGER, West Liberty, Iowa, U. S. A.***

# CHICAGO'S RECORD BREAKER

## The Last Exhibition of the National Fanciers' Association is a Credit to the Industry and an Inspiration to the Association--Management Excellent--Exhibitors pleased.

CHICAGO'S show this year was a success beyond the fondest expectations of its promoters. It was not only larger than ever before but it so far outdistanced previous attempts that it stands out a conspicuous example of what enterprise and well directed effort can accomplish with a spirit of determination as th emoving power. The Chicago association has not only eclipsed its own brilliant successes of the past but it has done more. It has taken second place in the list of large poultry shows and in point of number of entries it is next to the Boston show, which is held in the heart of the greatest poultry section of the country, and in point of quality of stock shown it has no superiors. The importance of Chicago's achievement cannot be overestimated. It is another wedge in opening up the vast resources of the west as regards its facilities for making the poultry business a profitable one. It is taking another long step toward making Chicago the central point where the best birds in America from all sections will meet in competition each season. There were more than 2,000 entries of poultry this year. Pigeons numbered about 1,500, Belgian hares 250, dogs 225, cats 200. Each department, of course, attracted visitors interested in it alone, and the diversity of display brought an attendance of the public that at times during each day filled the large hall to overflowing, making it impossible to get through the aisles. The revenue from this source was very large and the association has had a very profitable year. The show was held in the Coliseum, a new building, well arranged for the purpose and one of the largest of its kind in the east or west. Notwithstanding this, there was not room for all the exhibits to show up to best advantage and the crowded condition would have been more noticeable had it not been for the fact that about 300 entries of fowls were refused on account of not being received within the time limit. The exhibits generally were of such high quality that the judges experienced some difficulty in determining where the awards should be placed. Many of the individual specimens were of such exceptional merit that $100 for single birds was in many instances refused and a large number of birds changed hands at long prices. The judging was about as satisfactory to exhibitors as could be expected. No judge or judges ever were nor ever will be able to place the awards at any show to the entire satisfaction of all exhibitors and the critics. The consensus of opinion, however, was that the score card system of judging would have placed the awards differently in some important classes. The comparison system has few advocates in the west and the Chicago show would have had several hundred more birds if it had been a score card show. The poultry press was well represented and many of the publications had tastily arranged booths. Incubators, brooders and all kinds of appliances constituted a large and varied display which in itself was quite an education to those unfamiliar with the business. The banquet tendered by the association to the members of the American Poultry Association and exhibitors was as usual a most enjoyable one. The large dining hall at the Sherman House was tastefully and handsomely decorated with ferns and pink carnations. The menu was of the kind for which this house is noted, and that means the best. Below will be found a list of the awards in full:

EMBDEN GEESE.—Mottier, 1 ck; 1 hen. Wakem, 1 pen.

GUINEAS.—To Wakem.

# A Resolution of Vital Importance to the Poultry Industry.

**Offered by Mr. W. R. Wooden at the Last Meeting of the American Poultry Asso-tion, held at Chicago, Jan. 23, 1901.**

[We have the pleasure of presenting to our readers a few remarks from Mr. Wooden in support of his resolution offered at the Chicago meeting of the A. P. A., the text of which appeared in these columns last month. This has aroused much interest all over the country and is most assuredly a move in the right direction. Mr. Wooden is the newly elected secretary-treasurer of the American Buff Wyandotte Club and is an ardent fancier who has the interests of the fancy at heart. He is a man of affairs and thoroughly competent to offer and take part in carrying out suggestions of this character.—EDITOR.]

*Editor American Poultry Journal, Chicago.*

HAVING introduced the resolution at the last annual meeting of the American Poultry Association providing for the election of a commission to consider the formation of a league of poultry associations, I am importuned to give my ideas upon the subject.

I can only say that the ideas of any one upon the subject can be but limited, for the reason that no one has yet given the matter sufficient thought to get at the probabilities and possibilities of the scheme. The resolution fully covers the superficial thought of the writer upon the subject prior to the determination to present the resolution. The reasons for such a move can be summed up in the following:

In the first place, the American Poultry Association has been in existence many years, and what has it accomplished? A Standard of Perfection that is the subject of constant criticism seems to be left as the sole monument of these years of effort.

Hundreds of poultry associations have been formed and all hold exhibitions governed only by the whims of their projectors or managers. Scores of poultry judges have sprung up, and all governed too much by ideals and notions of their own and too often differing from their fellows. Many are honest, earnest and capable, while some have demonstrated no capabilitity for such positions, and some have evinced a disposition to be dishonest.

Those inclined to evil are restrained in no practical way. They buy for or loan birds to an exhibitor and judge them in close competition and unjustly place awards.

The fancy is helpless and the industry injured. The business bears the burden of discredit and respectability hesitates to continue with it.

Exhibitors resort to fraud, deception and misrepresentation. Yet they exhibit year after year, and there is nothing to prevent.

They advertise their winnings and gull, deceive and defraud the buying public. What is there to prevent?

They can show, can win, and can advertise and sell. The buyer can be defrauded, and is without relief.

An association can have rules of its own, can impose upon buyers by waiving the weight clause after December 1; can defraud exhibitors in withholding premiums, and there is no restraint, remedy nor punishment for so doing.

The time has come when something must be done by the fancy to place poultry exhibitions upon a plane where respectability predominates.

The average poultry fancier or breeder would not for one moment admit that horse races or horse racing was a more respectable business than his. Yet if a racing association does wrong it can be punished. If a judge wilfully errs or resorts to dishonesty he can be barred from judging. If a jockey, driver or any one else taking part deports himself as he should not, he can be effectively barred from the track. The same thing is true of the League of American Wheelmen, the Field Trial Associations, etc. Why cannot poultry associations be put upon the same plane? Let the A. P. A. be the mother association, not holding exhibitions, but all local associations to be constituent parts of it, with the right of representation at its meetings. The old ten dollar life membership scheme can remain the same, and such members retain all the rights they now have.

Each local association that becomes a constituent of the parent association to be entitled to one representative in the meetings of the A. P. A. and with the right to vote upon all questions including the election of officers, but not to hold office unless such individual representative is personally a member of the A. P. A.

All this would necessitate radical changes in the constitution and by-laws of the A. P. A., but it is time that it changed something. Let each local or subordinate association subscribe to the laws and rules of the parent association; and hold its exhibitions under such laws and rules.

Uniform rules can then be assured. Conflicting dates can be avoided. Any exhibitor entering birds in an association show becomes amenable to association laws and can for due cause be debarred from exhibiting at association shows.

The same rule can be made to apply to local associations and judges. Then honor will rule and fear of consequences will eliminate fraud and dishonesty.

Too much must not be undertaken at first; but let the scheme be started and it will evolve into a practical existence where nastiness in connection with the business will be only a reminiscence.

It is a matter that should receive the earnest consideration of every fancier and breeder, and though it must be given thought and approached with moderation, it certainly seems that it could be successfully launched.

It means much to the American Poultry Association, and means life or death to the fancy.

Good practical suggestions can be made by thoughtful breeders and the commission elected will be only too glad to receive them.

W. R. WOODEN,
Battle Creek, Mich.

# Water Fowl and Their Care.

*By Chas. McClave, New London, O.*

TO OBTAIN the desired and best results with goslings, proper care must be exercised from the beginning. Having obtained breeding stock of good quality, the next thing wanted is eggs. The goose will usually select a location for her nest several days in advance of the first egg. In building the nest the interests are mutual with the gander as well as the goose, and woe to the small boy or man who dares to interfere with their home. The goose has no regular time of day to deposit her egg, and early spring she will in most cases lay only every other day. Geese are very particular and cover their eggs when leaving the nest. Visit the nests daily and gather the eggs, keeping them where they will not chill in the early spring.

In our last we recommended chicken hens for hatching geese eggs. Prepare a nest where the hen can walk in without having to jump down on the eggs. Use four or six inches of soil in the bottom with sufficient litter to protect the eggs. Four or five eggs for a hen are the right number, according to size of the hen. Any good sitting hen will do the work. The twenty-sixth and twenty-seventh day, goslings will begin to break their prison walls. The goslings require no food until fully thirty-six hours old. A careful hen will brood the young same as chicks. We first give them milk from a spoon or small dish and add fine bread crumbs and later soft food made very thin with milk or water, giving the goslings a small grassy run from the first. Short green grass is nature's food for the gosling, and they commence to eat it from the very start. Change them often and do not compel them to eat soiled or dead grass. It will be remembered that geese are strictly vegetarians and the young will not thrive without green food in abundance. As soon as they will take grain, add that in small quantities to their daily bill of fare. Some of the finest goslings we ever produced were Brown Chinas, and were fed almost entirely on bread and milk until nearly two-thirds grown, however this method is entirely too expensive to be practiced. Goslings grow very rapidly from the start and will in many cases weigh 5 or 6 pounds each when 8 weeks old. At this age it is desirable to turn them over to the care of their legal parents—the old geese—who always stand ready to accept them, with open arms, no difference how many or what size or color. Continue their regular food daily, although they will only consume a small amount of grain if allowed the run of the pasture field or woodland range.

Goslings like ducks grow very rapidly and come to maturity far in advance of chickens. While it is not absolutely necessary that they should be provided with a large pond, it is advisable to keep water before them at all times. After the young are one-half grown, give them free access to the pond or stream.

Barring accidents, if the gosling survives until after four weeks old it will surely become a goose (or gander). Disease is almost unknown in this branch of the aquatic family, however the writer has known goslings to die with gapes the same as chickens, but only where the two run together on the same ground.

If the goose is allowed to sit and hatch, she will usually bring off a bunch of goslings, however in many cases they will tramp on the young, thus destroying them. This is especially true if a dozen or more old geese have a range together, for all are anxious to "father and mother" the young and a general war will be carried on constantly between the old males. The old geese will protect their young under any and all circumstances. When about 4 months old, the goslings will commence to moult their plumage. Many growers pick them at this time, and again later in the fall. We would not advise picking except goslings are well cared for, as it somewhat retards their growth. In plucking geese for the feathers, it should be done at six to seven weeks apart, as feathers mature in this length of time. Old geese should not be plucked while laying or before the period, as it always checks egg production. Prime geese feathers, especially the white ones, always command good prices for pillows and other purposes. Very few people, comparatively speaking, rest their weary heads on pillows made entirely of unadulterated geese feathers, for the reason that they are sooner or later mixed when hen feathers or "powdered" to add weight. This is usually done after they leave the producers' hands. I refer to this only in justice to producers of prime geese and duck feathers and to warn consumers who may purchase pillows from the retailers that are "warranted live geese feathers" and answer the same purpose and feel like a sack of hard-wood sawdust.

First prize White Plymouth Rock Pullet, owned and bred by Duane Shaw, Palestine, Ill.

## Color of Brown Leghorns

The true and the most beautiful as well as the most lasting color in the females of a strain of Brown Leghorns, that have been and are being bred in a single mating, is a rich mahogany or seal-brown. It is a color that never runs to the brick, or too reddish cast; neither does it descend to blackish backs and grey breasts.

The females of the seal-brown color have tea-colored or light salmon breasts, and clear yellow legs, invariably—never sporting chicks with pale flesh-colored shanks. Neither do they throw those off-colored light looking chicks, that later on become the darkest in plumage of the whole flock. Those freaks bob up where the double-mating system is in vogue. Isn't that so, brother fancier?

The seal-brown hen has a golden hackle, beautifully striped with black; and as she stands in the sun-light she makes one of the prettiest pictures in feathers.

The mahogany or seal-brown is the true Leghorn color, and it cannot be improved upon by the standard makers, nor by the double-maters. Get it fixed in the females of your strain. Follow the single mating, and you can maintain it. When the color of the mother of the male bird is right, and the color of his mate is right, the color of their off-spring in both sexes will be right.

# Success With Turkeys.

*By S. B. Johnston, Boggstown, Ind.*

MARCH is one of the most important and busiest months in the year for the poultrymen. Those in need of stock should have it in their yards not later than the 15th of the month, but the earlier the better, as the birds will get used to the place and will do better in every way than when they have such a short time to get acquainted with their surroundings before the breeding season commences. Turkeys do very will, however, when they are ordered in March and one that is hindered in getting stock early should not fail to order on account of being a little late as you cannot afford to wait until the next season. I would also caution you again to order your eggs of some good breeder as early as possible, so that the order can be booked and you can have the eggs shipped when you want them. Turkeys in this latitude begin laying about the first of April. There are a great many who wait until they want their eggs and then order them, but in the very busiest part of the season breeders cannot always send eggs by return express. I still occasionally get letters from people who seem to have roup in their flocks and suppose I will have to give my treatment for roup again, as I have said before I generally use the hatchet, if it developes into the roup, but try to check it before it runs into this disease. A gentleman from Pennsylvania states that his turkey tom has something like the toothache. He has his jaw all swollen up and his eye waters and he does not know what is the matter with him. I think I have answered some similar questions in the past. This is caused by roup or canker and the soft swelling on the side of the face should be opened with a sharp knife and puss sqeezed out. Then use a weak solution of carbolic acid water, and if he has canker in the mouth you should used powdered borax and give four drops of spongia in a cup of water. but better still than to doctor him would be to use the hatchet. I have been asked a number of times, how old one can use hens. I have never found them to be profitable after they were four years old, but have known them to live until they were ten years old and have heard of them that were twelve years old. Turkeys do best when they are mated not akin to each other. Several have enquired as to the advisability of using the sire on young stock. It is not the best, but it can be done without injuring the stock the first year, if it is for the purpose of some special marking of plumage, but it is best to have a new tom every year. A gentleman in Nebraska has asked me what I consider a good hatch from 12 turkey eggs; would state that I have shipped eggs to California, Washington and Montana and have had some customers report every egg hatched. Of course this is an exceptional case with most people, but with our mode of packing them and the great vigor of the national strain, it is not an infrequent occurrence that we have hatches of ten and eleven reported, but we consider that nine turkeys from one sitting is a good batch. He also asks if turkeys do well after they have matured, or at six or seven and would state that is the way that we handle our turkeys, by letting them out in the evening for new range and new pasture after they have laid, and then see that they are all in at night. This is the only way that I know that one can get all the eggs that are laid as the hawks and crows are very fond of the eggs. And fifty cent eggs are a little to rich crow bait for my blood. This is also a good pen for the young until they are old enough to run at large without the wet grass hurting them. Turkeys should be fattened for market away from those you want for breeders, but they must not be in close confinement when feeding them. A two acre lot is a pretty good place to feed them in, and they should be fed for two or three weeys but not longer than three weeks, as after that time they begin to go back rather than to gain flesh. Turkeys when kept in a shed will worry and loose flesh every day, no matter how hard you may try to fatten them. A gentleman from Minnesota has asked me the name of the brown turkey and also what the color is throughout, whether it is called buff, slate or narragansett and would saw that he is ahead of me on this, as I have never seen a brown turkey. The buff, slate and narragansett turkeys are three separate and distinct breeds. The names of the two former breeds indicate the color, while the narragansett is of metallic black, with the feathers edged with grey. The narragansett is next in size to the mammoth bronze. They are found mostly in the East. Rhode Island seems to be the central point of the narragansett breed, although there are a number of breeders scattered all over the United States. Every breeder should have a copy of the American standard of perfection. It is the lack of knowledge of the breeds that has caused so much dissatisfaction and trouble to the seller as well as the buyer. I find that there are a great many buyers who do not know just exactly what they do want, that is they do not know what the bird should be to mate with their particular pens, in order to obtain the very best results.

SILVER WYANDOTTE.

One of the best in the world, winner in four states, and has made the remarkable score of 95 points. Bred and owned by G. W. Brown, proprietor of Ouachita Valley Poultry Farm, Camden, Ark.

## Poultry at the Pan-American.

Mr. F. A. Converse, superintendent of live stock at the Pan-American Exposition at Buffalo, N. Y., informs us that in deference to the opinion of poultry, as generally expressed, Rule 5 of the Rules and Regulations of the Poultry and Pet Stock Exhibits, has been changed and that all exhibitors whose entry fees amount to $20 or more will receive tickets of admission to the exposition during the period of the Poultry Show, which will be held from Oct. 21 to Oct. 31. The indications are that the poultry exhibit will be by far the largest ever brought together at a single place. A number of poultry clubs have already decided to hold their meetings in connection with this show, and the chances are that the meeting of the American Poultry Association will be held there also. The entry fees will be $1.00 each on single birds and $2.00 on pens. The cash premiums will be $4.00 for first, $2.00 for second and $1.00 for third in the open class, and $5.00 for first, $2.50 for second and $1.25 for third in the pen classes. The conditions are certainly favorable for a large display, and breeders everywhere should make preparations to send some choice specimens.

# Questions and Answers.

Our Subscribers are invited to make use of this department whenever we can be of service to them. All questions are answered in the order in which they are received. If your question is not answered in this number, look for it next month.

POYNETTE, WIS.

Editor AMERICAN POULTRY JOURNAL.

DEAR SIR:—I am in deep sorrow over a disease that has appeared in my poultry yard. I will try and describe it, hoping you will be able to name it and also give remedy.

First symptom I have noticed, the bird acts as though he was trying to remove something from his throat by opening his mouth and shaking his head. On examination I find his throat covered with a thick yellow membrane. (Please find inclosed membrane.) This continues to grow for about three days, when it has by that time done its most. The fowl is dead, the membrane having entirely filled the throat and mouth. There is a very offensive odor. I find no other symptom of disease. My fowls are and always have been free from any disease. This new (to me) disease is only in one house. All the others are in splendid condition, but I believe it is contagious, and am using every precaution to prevent its spreading. Does roup ever come in this form? They have no swelled heads or inflamed eyes, no running at nostrils. Hoping you can advise me without delay, I am yours very respectfully, MRS. E. McD.

P. S.—Please answer this by letter, and I will remit whatever your charges are. I would send it in this, but I do not know what the amount is nor could I find anything in A. P. J. that told me your terms for such information.

MRS. E. McDONALD.

The disease you mention is canker, which may or may not accompany roup. The bird or birds should be isolated from the remainder of the flock as soon as the trouble is detected. Unless they are valuable we would advise you to kill and bury them. We have seen birds thus afflicted cured as follows: Clean out the pus in the mouth with a little wooden spatula; if you make it bleed a little don't be alarmed. When this is done, wash the mouth and throat with cotton wadding saturated with peroxide of hydrogen and attached to a little stick of wood. Then drop a little aristol on each sore place. Repeat this operation morning and evening for three days. We are pleased to answer your inquiry without charge. Our subscribers are invited to make use of this department as often as we can be of service to them.

---

Aurora, Ill.

*Editor American Poultry Journal.*

Dear Sir:—Being a constant reader of the AMERICAN POULTRY JOURNAL I take the liberty of asking you a few questions. We are keeping a few hens, having something over one hundred, but we get no eggs and we would be very glad to know what is the matter. We have the Light Brahmas and Partridge Cochins; from the Cochins we get no eggs, from the Brahmas a very few. We feed in the morning scattered in "litter" about six quarts of oats and barley, mixed equal parts; at noon a dry mash composed of two parts wheat bran, two parts oats and barley, equal parts, ground fine together. About one pint of oil meal and twice a week a dash of Pratt's Poultry Food. In the evening a small feed of oats and barley and corn. They have green cut bone three times a week; cabbage two or three times a week. They all seem to be well and happy and also charcoal, clean feeding troughs and yards. What more can we do for them? Now, can you tell us why we get no eggs? Please tell us what is wrong in our treatment of them, there is no vermin about the hens or the place.

We inclose a stamp and will you please give us a personal answer and tell us all about what is the matter, for we feel almost discouraged and disgusted with the whole chicken business.

H. E.

You seem to be doing all for your birds that can be done. It may be, however, that they are overfed. You do not say

White Leghorn cock owned and bred by E. G. Roberts, Ft. Atkinson, Wis. Score 95½ by B. N. Pierce, at Jefferson county, Wisconsin, winter poultry show, Ft. Atkinson, Wis. A winner at same state fairs as his s. c. b. Leghorn cock.

First prize S. C. Brown Leghorn Cock at Des Moines, Ia., St. Paul, Minn., Milwaukee, Wis., Springfield, Ill., and second at St. Louis last fall, and first at Fort Atkinson, Wis., Winter Show. Score 94. He has prize-winning ancestry for twelve years back. Owned and bred by E. G. Roberts, Ft. Atkinson, Wis.

are in just good working order. The houses are clean and warm, plenty of light, plenty of clean, fresh water, oyster shells and mica grit always before them; the exact quantity of feed given to a specified number of birds. The varieties you mention are easily fattened. It may be that the birds are old and have passed

their period of usefulness as layers. We would advise you to read carefully the article on "Winter Feeding" on page 23 of the January number of the AMERICAN POULTRY JOURNAL. If after another trial you cannot make them lay try some other variety and procure birds from a good laying strain.

———o———

Springfield, Mich., Jan. 17, 1901.
Editor AMERICAN POULTRY JOURNAL.

Dear Sir.—Will you write a short article in the Journal about Capons. About the feeding, age for operation, how to fatten and whether it pays to raise them.
W. A. P.

Capons should be fed and fattened just as you would any other fowls. The best time to operate upon the chick is when it is about two months of age. Select the largest and the hardiest birds for the purpose. It pays to raise them if you are close enough to a good market. They oftentimes sell for 25 cents per pound, and at times bring larger prices.

———

TIFFIN, OHIO.
*Editor American Poultry Journal.*

DEAR SIR:—I have a Buff Rock hen with a peculiar complaint. She will seem to try to use her head and neck as a corkscrew—to use an expression to best illustrate my description—and then try and back all over the coop. When she gets off the roost she will fall over on her back and then follow up with the above.

For weeks at a time she will seem to be all right, and then it is the same "old thing." She has a good appetite and always toes the mark for feed. Have never had another like her, and cannot find out what the trouble is.

Being a subscriber to your journal I thought you could probably help me out by describing the trouble, the cause and cure, if any.
F. L. B.

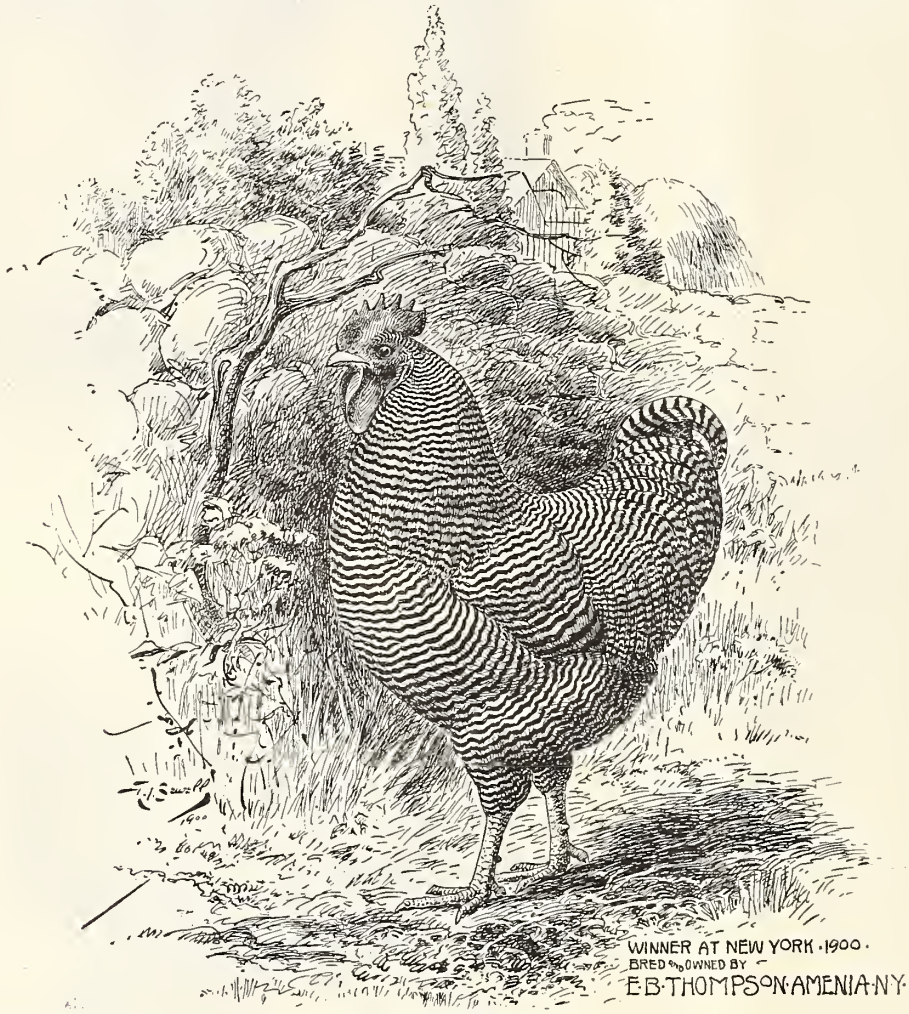
Your hen is troubled with apoplexy, which may be brought on by various causes. In your case we should judge it was from overfeeding. If the bird is not past a cure she will be greatly relieved by bleeding from the vein on under side of wing.

You can, most assuredly, overfeed your chicks with green cut bone. An ounce of green cut bone per fowl, per day, is certainly enough. This for adults. For young stock it is too much. Green cut bone must be handled and fed with great care. If the birds are overfed with this they soon "go off their feed" and refuse other rations. As a result they fail to develop properly, or if laying stock, to give eggs.

Fish, either boiled or raw, is an excellent food. The Long Island breeders feed a great deal of it. They cook it with cornmeal, ground oats, etc.

If you will look over the back numbers of A. P. J. you will find many simple remedies for roup, etc. We believe any of the remedies adertised in this number are good.

ROCHESTER, N. Y.



A WINNING "RINGLET."

Barred Rock cockerel at New York, 1900. Sketched from life by Sewell. Exhibited and owned by the great Barred Rock specialist, E. B. Thompson, Amenia, N. Y. This bird shows the ringlet barring in every section, and is certainly remarkable in this popular style of barring.

MT. JEWETT, PA.
Editor AMERICAN POULTRY JOURNAL.

DEAR SIRS:—Will you please inform me the following: Can I overfeed my chickens with green cut bones by giving them once per day.

Is boiled or raw fish (fresh) good for chickens, and how is best to feed fish, if any? I have lots of fish heads a little old. Let me know about it. Can you give me a good recipe for cholera and roup?
G. H. W. L.

Editor AMERICAN POULTRY JOURNAL.

DEAR SIR:—Being a subscriber to your most valuable paper, among five of the best which come to me regularly, I venture to ask a few questions. Having read that all details were necessary for an intelligent answer I write the following: I set 103 duck eggs April 18, 1900, and on May 16, 1900, hatched out 26 ducklings (on the 25th day). There were 46 alive in shell, so 20 died after that day. The lining or membrane seemed so tough

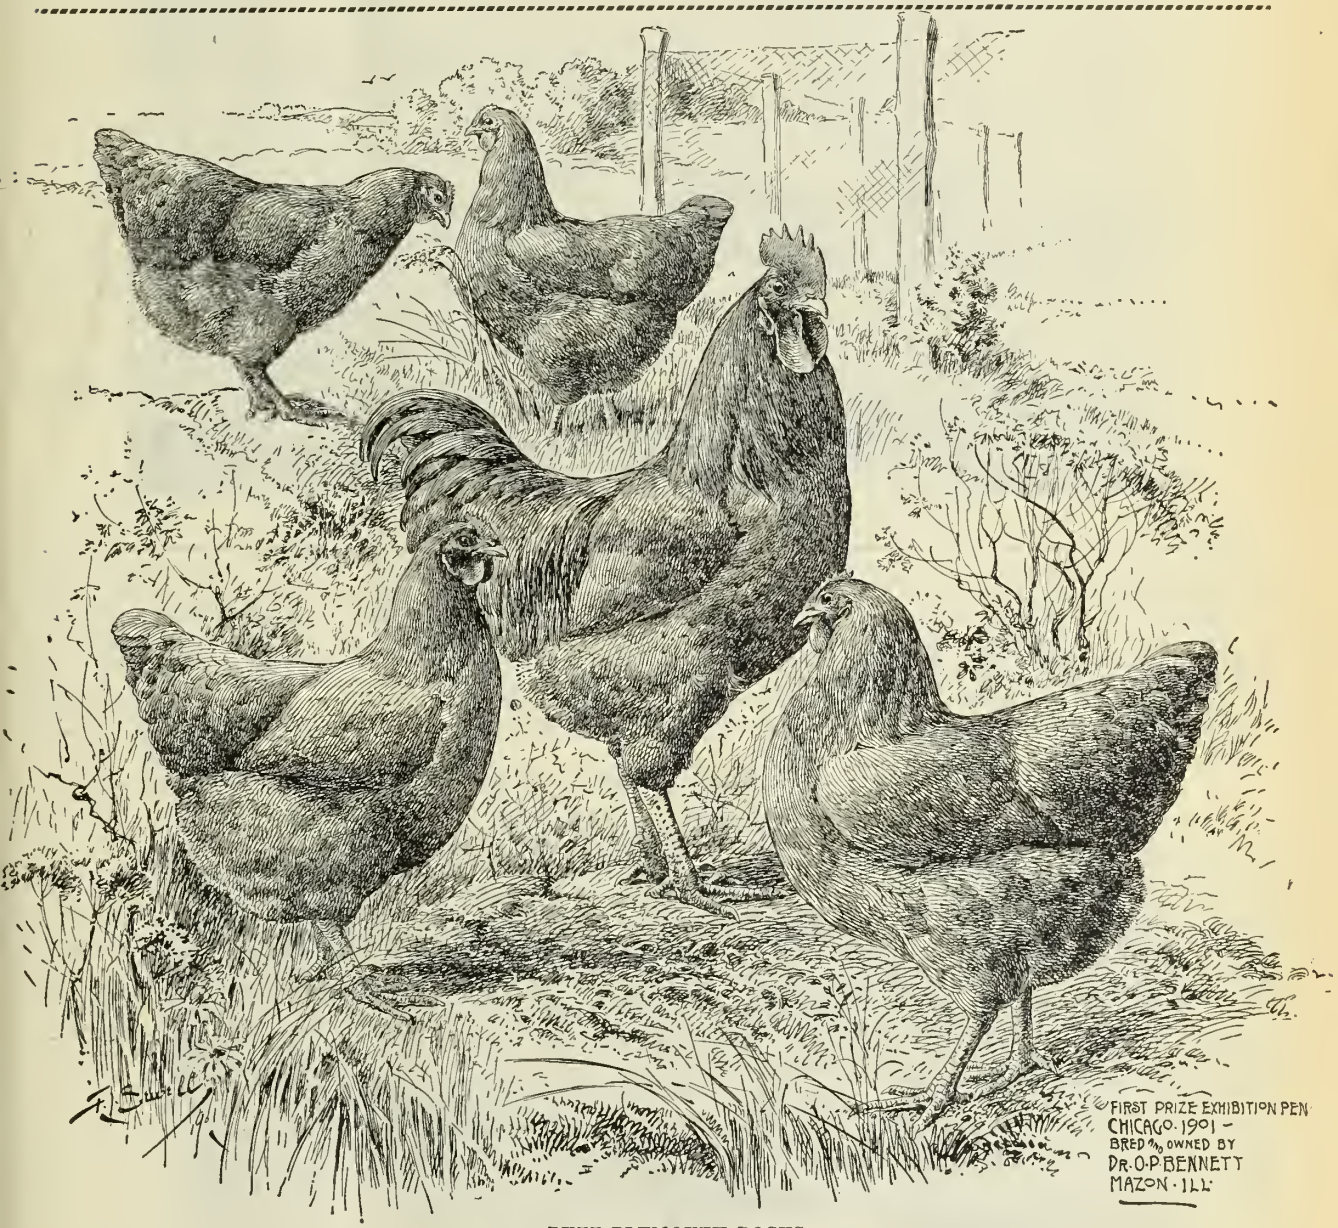
they could not break through. Some did not even pip the shell. Out of the 26 hatched I raised 24 to 6 months old, 2 having died. The machine was a no-moisture, hot air one. What was the trouble

At six months old I killed off all but 12 (10 ducks and 2 drakes) I wanted for breeders. These ducks had beef scrap up to 3 months old, and once and a while meat meal, vegetables of different kinds cornmeal bran, middlings, oyster shells and grit, and once in a while charcoal in feed.

Cut corn stalks, beet tops, etc., for each. Soil, light, sandy loam. Keep lantern in house and propose to feed the following articles in the proportions and amounts named:

Morning feed: 1 qt. of cut clover or 2½ gills beef scrap, cabbage substituted about three days a week, 5 gills corn meal, 5 gills middlings, 5 gills bran, 1½ gills flour, 5 gills vegetables, to hold together, potatoes, turnips, etc., 1 gill sharp sand, 1 gill grit, 9 gills water to mix to right consistency. All together, 34 gills (aside from water for 12 ducks).

Noon feed: 1 pint whole wheat, 1 pint cracked corn heated in oven, 1 pint



BUFF PLYMOUTH ROCKS.
First prize exhibition pen, Chicago, 1901. Bred and owned by Dr. O. P. Bennett, Mazon, Ill.

37 gills.

Note—I add more middlings and bran at night because they eat better and change grit for oyster shell and cut bone.

Cut oyster shells, crushed bone, XX grit and charcoal will be always before them. Will this be over or under feeding? Can you suggest any change from same or management?

After this housing and feeding takes place, how long before they may be expected to lay?

Will the eggs likely be fertile?

NOTE:—They will readily eat above amounts and look for more, or, at least, green stuff and lately cabbage. They have had about 50 square feet of yard room each and 3 square feet of house room. They are over six months old and do not lay yet. Why?

I am going to move next week to a six-acre place with stream of water and shall put up my breed pen, which will be warm and give 6 square feet of floor space each and a yard to give 100 square feet each of yard and 8 square feet of water range

white oats whole (steamed). Altogether about one good handful to each duck.

Night feed: 1 qt. of cut clover (steamed), cabbage three times a week, 5 gills corn meal, 6½ gills middlings (1½ gills more than morning), 6½ bran (1½ gills more than morning), 2½ beef scrap (the best), 5 gills vegetable (variety), 1 gill sharp sand, ½ gill oyster shell, ½ gill crushed bone, 10 gills water to mix above mash. Above (aside from water), be ready at next feed time. I give them warm water to drink in cold weather.

These questions seem rather long, but I write all so you can answer correctly.

Hoping to receive an answer in the Jan., 1901, issue of the AMERICAN POULTRY JOURNAL, I remain, yours for an even better paper to cover a larger field of subscribers. C. F. R.

From the report of your hatch we are led to believe that you did not dry your

eggs down enough. In other words, there was too much moisture in the shells and chicks died in trying to turn over, whereas if you had opened the ventilator to your machine probably between the 18th and 25th days and allowed them to dry down, giving more room in the egg for your duckling, the chances are that you would have had a far better hatch.

Remember this is only conjecture on our part, as without seeing the eggs and knowing more about them, we could not give a positive answer to the questions, but from what we have seen at other places this is the conclusion that we have come to; in using the non-moisture machine you have failed to dry down at the proper time and as a result had a smothered chick.

A very good rule to follow is to set a hen at the same time you set your machines and test the air cells of the eggs in your incubators with those under the hen, open your ventilators until they dry down to that size; but where they seem to be alike then leave your ventilators closed, as you have the right proportion of moisture and the hatch is coming along all right. One thing that you should be very careful of, however, and that is: do not allow the ventilators to be open, nor the door of the machine to be open after the chicks begin to pip the shell, as you need all the moisture there is in the machine at this time, to bring the hatch to a successful termination.

Your feed is O. K. We don't know that we can recommend a better one. The ducks are too young to lay yet. You need not expect much from them before early February.

---

*Editor American Poultry Journal:*

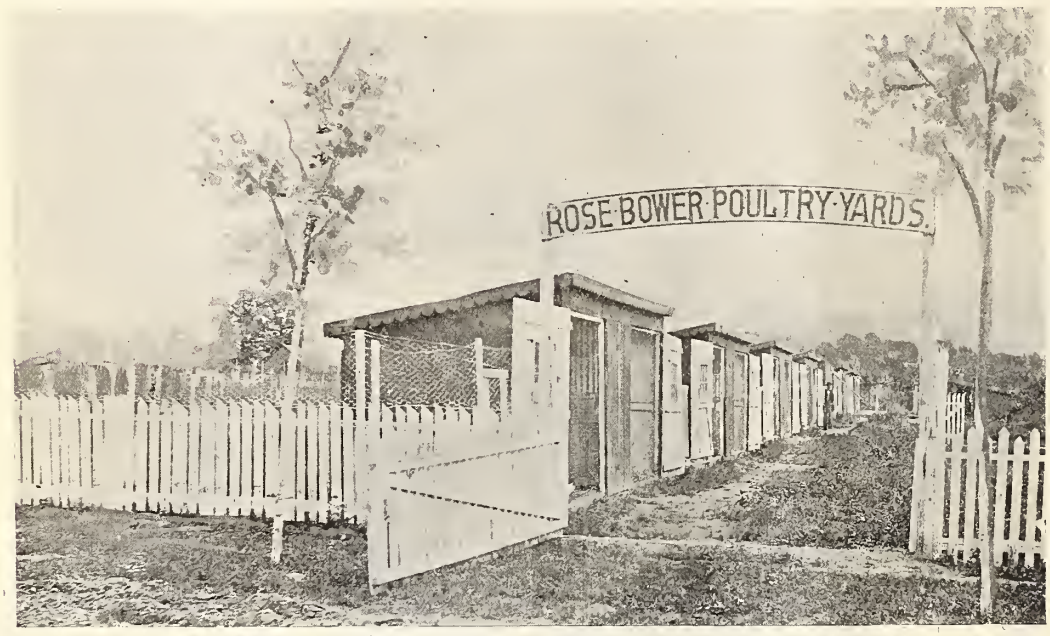
DEAR SIR: My young stock are all falling off as fast as they can. Do you think they are getting too much feed?

Morning, whole oats, peck and one-half for 100 fowls; noon, one kettle potatoes, carrots and beets, boiled; at night whole corn.

They stand around a day or two and die, with water running from their mouths. Please advise. H. W. F.

---

The food you are giving the fowls is all right, if judiciously administered. The fact that the fowls show a water



Rose Bower Poultry Yards, C. O. Duffy, proprietor, Owensboro, Ky.

Scene from C. O. Duffy's Poultry Farm, Owensboro, Ky.

discharge at mouth is conclusive evidence that their digestive organs are not in proper condition. It indicates a lack of grit and of exercise. In all probability you are overfeeding. Change rations, making an entire change. Feed lightly and make it almost wholly millet or wheat, and feed but little.

———o———

*Editor American Poultry Journal:*

DEAR SIR: Your name has been suggested to me as most reliable for information on the subject of poultry and poultry raising, and as I contemplate going into that business on rather a large scale I am desirous of securing considerable information.

Will you kindly send me a sample copy of your publication and let me know the cost of a yearly subscription; also let me know whether you have any printed matter on the subject that would enable me to secure answers to some of the questions following—viz.

What is the smallest number of chickens and other fowl and the best breeds that can be handled at a profit considering that the business will include both the raising of chickens for eggs as well as for market purposes? In answering this, if you state the number of eggs that should be produced per day, kindly specify the number of chickens that would be required to produce said number of eggs.

On the basis of the number of fowls suggested what apparatus would be necessary in starting to make the outfit as complete as possible?

Is the raising of capons a success from a commercial standpoint?

Can you furnish any information on the subject of cold storage outfits for eggs and how that business is carried on, or refer me to any manufacturers of apparatus suitable for that purpose?

Can you refer me to any reliable poultry dealers near this locality from whom I could obtain the breeds of chickens and other fowl suggested?

To what reliable manufacturers can you refer me, from whom to obtain the hatchers, brooders and other apparatus you may suggest? In answering this you need have no fear of committing yourself, as I shall hold your reply in strictest confidence. R. A.

# Leffel's Barred Plymouth Rocks.

Mr. Geo. M. Leffel, of Springfield, O., writes that business is booming with him. This is not to be wondered at and a visit to his yards will disclose to anyone the reason for Mr. Leffel's success. The cause of it is, he has the kind of Barred Rocks which breeders and judges want and the demand with him is never fully supplied. For 16 years he has been devoting most of his time to the perfecting of his birds and for the last 10 years they have been his chief recreation. He has had an unusual advantage in that he has been able to combine intelligence, perseverance and practically unlimited means in his poultry business and this combination will win every time. In conversation with the writer Mr. Leffel informed us that he took up the business in a business-like way and was satisfied to develop it slowly and surely. He first obtained all the information possible about Barred Rocks and then bought the best that money could buy. For several years he has been at the top of the ladder and has taken the position of the fellow who has the best to sell and is passed the point where it is necessary to buy. At the Dayton, Ohio, show a few years ago Mr. I. K. Felch gave one of Mr. Leffel's cockerels a score of 95 points which was the highest score Mr. Felch ever gave to a Barred Rock cockerel and he has been judging poultry for about 45 years. It was this incident that clinched Mr. Leffel's reputation. Judge H. A. Bridge of Columbus scored one of Mr. Leffel's pullets 95 and another 94½ at the Columbus show and this was the highest scores in his experience. Mr. Leffel has always exhibited at Ohio's leading shows and come out victorious. He is an ardent advocate of the Single Mating system and we give herewith in his own words his methods of producing standard birds of both sexes from one mating. He says: "Some years I match the males and females in my breeding pens as near as I can. If I find that my birds are running too dark, I pull the colors of the males and females apart next season, but not wide apart. I do not have any trouble with my birds getting too light. As soon as the tendency to become a little too dark is overcome I close up the extremes of color again and match the birds in the breeding pens. I do not mate a dark cockerel with dark hens, but do mate a male bird that is a little lighter than standard color with standard colored females and from this mating I get my best results. The cockerel used in this case is an exhibition bird but a trifle lighter than our standard color. Our best judges would not cut such a bird very hard on surface color for they recognize the great value of this bird as a breeder. You may put me down as a believer in the Standard Mating system. In a few years I am confident I shall be able to match the males and females in my breeding pens right along and in this way produce 75 to 80 per cent of good exhibition and breeding specimens. I shall never again resort to extreme matings for I know it is not necessary." Mr. Leffel has several breeding pens and yards at his home place and has a large substantial winter house for his birds near his place in town but the largest portion of his flock is kept on his farm, located about four miles outside the city. The breeding yards on his farm are each about a half acre in size and are covered with blue grass and shaded by apple trees. They have a southern slope and are furnished with fresh pure water at all times from a small stream of spring water which flows through them. It will be seen therefore that he has an ideal place for poultry He has raised the past season about 1,200 birds. All his sales are made with the understanding that if the stock is not as represented and not satisfactory it can be immediately returned and the purchase money will be refunded. One of Mr. Leffel's best records was made at Cleveland, Ohio, where he won 1st and 2d cock; 1st, 2d and 4th hen; 1st, 2d and 3d cockerels; 1st, 2d, 3d and 4th pullets, and 1st and 2d pens, with scores ranging from 92 to 94½ on single specimens and the phenomenal score of 188½ on pen. It will be noted that Mr. Leffel has gotten these high scores at various times and under three different judges, each of whom is an old veteran in the field of judging. These conditions could hardly exist if the birds did not justify them.

———o———

Mrs. Eva L. Bodley, breeder of Barred Rocks, Newton, Ia., has had her pens mated by Judge Pedrick and considering the quality of her stock it is safe to say that she will have eggs that cannot fail to produce good results in quality of young stock hatched.

First prize pen at Louisville, owned and bred by C. O. Duffy, Owensboro, Ky. (See advertisement in this paper.)

# VIEWS OF MILLHOOK POULTRY FARM

J. W. MILLER
PROPRIETOR

FREEPORT
ILLINOIS

# MILLHOOK POULTRY FARM.

One of the Largest and Most Profitable Western Plants, I. W. Miller, Prop., Freeport, Ill.

The accompanying illustrations are of portions of the noted Millhook Farm, which is owned by Mr. J. W. Miller, of Freeport, Ill. Mr. Miller has been deeply interested in the poultry business for a great many years and has been an extensive advertiser, which has placed him so prominehtly before the public that his stock is in demand everywhere. He makes shipments each season to every state in the union and has a foreign trade of no small proportions. The business amounts to thousands of dollars a year and during the heavy season a large force of employes is kept busy looking after the details of the business. The office force alone is quite an item, as everything is conducted upon strict business principles and the immense amount of correspondence received by Mr. Miller is all handled by experienced clerical help. His shipments are larger than most people would imagine and have at times reached nearly 400 packages a day, including baskets of eggs and crates of fowls. In fact, so large is his business that the United States Express Co. established an office at his plant in order to properly and promptly handle the shipments. This magnificent showing is the result of several years of strict attention to business and a policy of satisfying customers by giving them value received for every dollar they remitted. Each year has seen a steady increase in his trade until now he can boast of having shipped as many as 4,000 birds and 50,000 eggs in one season. His advertising bills amount to about $2,000 per year and in addition to this expenditure he issues 40,000 copies of a large and handsome catalogue lithographed in colors in which is described the varieties he breeds. He handles nearly all the popular breeds and in addition to running to its full capacity his own farm he has arrangements with nearby farmers whereby stock and eggs are produced. In cases of this kind he makes all the matings of the parent stock which does not pass out of his possession as far as ownership is concerned and he exercises a general supervision over the flocks. His constant aim is to improve the stock and his knowledge of the different varieties is such that he is enabled to make as great headway in this direction as can any breeder. Mr. W. S. Russell spent a couple of days at Millhook scoring a portion of the stock and passed upon nearly 600 birds, giving them scores ranging from 90 to 95 points, some of the solid colored specimens reaching this latter score. It will be seen therefore that the stock is high grade and fit to win in the show room. Mr. Miller ships large numbers of birds that win for his customers, as will be seen by referring to the testimonials in his catalogue, which will be sent free to all who mention the AMERICAN POULTRY JOURNAL. In it will be found much valuable information regarding the rearing of stock, etc., that will be helpful to all who are interested in poultry. Mr. Miller is also publisher and editor of the National Poultry Journal, published at Freeport, Ill., and which is in every way a representative publication with a national circulation. A sample copy of the Journal will be sent free upon request.

Illinois State Cup, awarded to Dr. O. P. Bennett, Mazon, Ill., for best dipslay at Chicago, 1901.

Mr. Fred J. Phelps, of Bucyrus, O., has been sending out some White Rocks which are of the very best and will add to his reputation for having superior quality in this variety. The statements in his advertisement are backed up by his record in the show room which is no doubt sufficient to justify his claims. He holds the White Plymouth Rock club diploma offered at Columbus, Ohio, last season at the state meeting of the club and he has always won a liberal share of the prizes wherever he has exhibited. He has both young and old stock for sale and can fill all orders for eggs promptly.

FRANK WILLING LEACH.

We have the pleasure of presenting to our readers the portrait of Mr. Frank Willing Leach, proprietor of the noted Egg Harbor Farm, Tuckerton, N. J., and the recently elected president of the American White Minorca Club. Mr. Leach is a retired attorney, and while not now in active practice is still a member of the Philadelphia bar. He has taken quite an active part in politics and among the numerous positions he has held is that of secretary of the Republican National Convention at Chicago in 1888. He was assistant secretary for many years and has been identified in like manner with the Pennsylvania state organizations. He has held various important offices in Philadelphia. During 1888-90 he was private secretary to Senator Quay and managed some of the senator's subsequent campaigns. He has also devoted considerable time to literary and journalistic work. Of late years his health has become impaired and he has withdrawn from an active business life and settled down on his magnificent farm at Tuckerton, N. J. Here he had opportunity to gratify his desires and cultivate his fondness for standard bred poultry, and he has established a poultry farm which has developed into one of the leading plants of the country. In getting his foundation stock he procured the best birds to be found. First and second prize winners at New York, Boston and Chicago were purchased regardless of price, and it is freely acknowledged that no other breeder has so large an array of winners at these shows as Mr. Leach has on his farm. Every male bird that headed his pens was a first prize winner at these shows except one, and that one was a second. At Philadelphia this season be won 40 prizes on 40 entries, and at Madison Square Garden, N. Y., he won 67 prizes on 76 entries, which proves that not only has he the highest quality but that he understands how to mate the birds for best results. Elsewhere in this number will be found a list of the varieties bred on Egg Harbor Farm and their winnings at America's greatest show.

The Raisin River Broiler Plant, Petersburg, Mich., have a largely increased ad in this issue, describing the Garland brooder. Their catalogue will be sent upon application. They manufacture a very nice quality of Naylice, an insecticide and vermin destroyer.

# Egg-Harbor Farm's Great Record.

Probably no poultry establishment in America has, of recent years, made a greater impression upon the poultry loving public, both in the showroom and out of it, than Egg Harbor Farm, situated at Tuckerton, N. J. Last season their pens were all headed by prize winners at the leading shows, as follows: Nine New York 1sts, two Boston 1sts, two Chicago 1sts, one Hagerstown 1st, one Johnstown 1st, and one Boston 2nd. Not a single male was used for breeding purposes except these famous prize winners, the pick of the whole country. But that record, distinguished though it was, was of small concern beside the wonderful winnings of the show season just closing. Egg Harbor Farm won at Philadelphia, in December, forty prizes on forty entries; and, at Madison Square Garden, New York, in January, sixty-seven prizes on seventy-six entries. Such a show record is, to put it mildly, an astonishing one. As the result of such sweeping victories, Egg Harbor Farm has inaugurated the breeding season of 1901 with enough show birds in its various pens to constitute, of themselves, a poultry show of no small proportions. Besides an almost innumerable number of prize winning females from New York, Boston, Chicago, Philadelphia and Hagerstown, from the following ribbon-bedecked males and management has selected the leaders for the various breeding pens, to-wit:

*White Indian Games.*—First cock and 2nd cockerel, New York, 1900; 1st cock and 1st cockerel, Hagerstown, 1900; 1st and 2nd cock and 1st and 2nd cockerel, Philadelphia, 1900; 1st, 2nd, 3rd and 4th cock, and 1st, 2nd, 3rd and 4th cockerel, New York, 1901.

*White Minorcas.*—First cockerel, Washington, D. C., 1899; 2nd cockerel and 1st pen cockerel, New York, 1899; 1st cock, Hagerstown, 1899; 1st cockerel, New York, 1900; 1st cock and 1st and 2nd cockerel, Philadelphia, 1900; 2nd and 3rd cock and 2nd, 3rd, 4th and 5th cockerel, New York, 1901.

*White Langshans.*—First cockerel, Indianapolis, 1899; 2nd cockerel, Boston, 1899; 1st cockerel, Chicago, 1900; 1st and 2nd cocks, and 1st and [illegible] cockerels, Philadelphia, 1900; 1st cock, Indianapolis, 1900; 1st, 2nd, 3rd and 4th cocks, and 1st, 2nd, 3rd and 5th cockerels, New York, 1901.

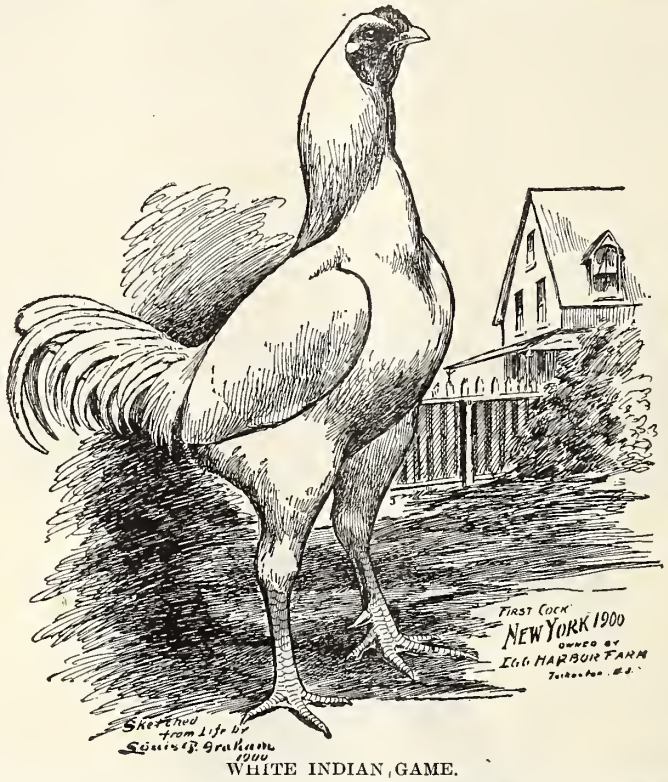
*White Dorkings.*—First cock, New York, 1900; 1st cock, Boston, 1900; 1st cock, and 1st and 2nd cockerels, Philadelphia, 1900; 1st cock, Jonnstown, 1900; 1st and 2nd cocks, and 1st, 2nd, 3rd and 4th cockerels, New York, 1901.

*R. C. White Leghorns.*—First cockerel, New York, 1900; 2d and 3d cock and 1st and 2d cockerel, Boston, 1900; 1st and 2d cocks and 1st and 2nd cockerels, Philadelphia, 1900; 1st cockerel, Boston, 1901; 2nd, 3rd, 4th and 5th cocks, and 4th and 5th cockerels, New York, 1901.

*S. C. White Leghorns.*—First cockerel —also winner of three specials—New York, 1900; 1st cockerel, Chicago, 1900.

*White Plymouth Rocks.*—First cock, Boston, 1900; 1st cockerel, New York, 1900.

As the transportation of their large number of exhibits required a special express car, the management was compelled to defer until next season the showing of S. C. White Leghorns and White Plymouth Rocks, in which varieties they have a fine lot of birds, sons and daughters of the famous New York, Boston and Chicago prize winners above indicated. It affords much satisfaction to the AMERICAN POULTRY JOURNAL to congratulate Egg Harbor Farm upon its gigantic strides in the realm of poultrydom, particularly as this establishment has been a patron of the advertising columns of this paper, from the very inception of the plant.



WHITE INDIAN GAME.
First prize cock at New York, 1900. Property of Egg Harbor Farm, Tuckerton, N. J.

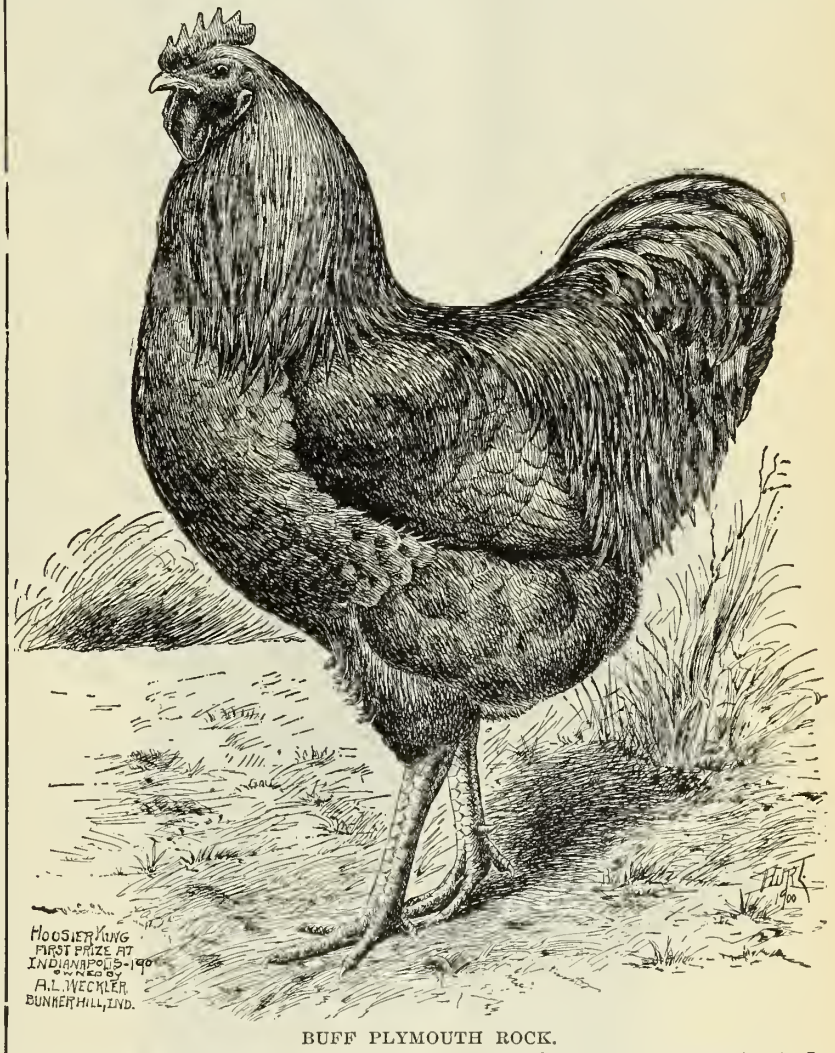
WHITE LEGHORN COCK "WONDER."
Winner of first and special at New York, 1900. Owned by Egg Harbor Farm, Tuckerton, N. J.

# POLLARD'S POULTRY FARM.

A New England Plant with a Reputation Abroad as well as at Home. Owned and Operated by Geo. H. and F. M. Pollard, South Attleboro, Mass.

One of the most interesting places in New England to the poultryman is Pollard's Poultry Farm, located at South Attleboro, Mass. This is so for the reason that it is in every way just what a plant of this kind should be, and an inspection of it and a few hours conversation with Mr. Geo. M. Pollard will prove to be a better education along this line than one could procure by reading volumes of instructions and experiences. The farm is best reached by taking the electric cars from Pawtucket, R. I., which is their freight and express office, and from which shipments are made. Visitors are welcome at the farm at all times except Sunday, and are given the most courteous attention. This business was established in a most modest way in 1888, and like all prosperous and substantial enterprises it has grown to vast proportions. It is poultry farms like the Pollard plant which enables the poultryman to knock out the pessimistic crank who takes a fiendish delight in claiming that the poultry business is a fad, conducted merely as a side issue, and that there are no successful poultrymen making the industry an exclusive occupation. With Mr. Geo. H. Pollard the conditions are reversed. He is the New England manager of the Cyphers Incubator Co., which position is one of importance and trust and requires executive and business ability to fill, yet with him it is secondary to his poultry business which until his connection with the Cypress Company was his only business. The farm consists of 60 acres and is admirably situated and arranged for the rearing of poultry on a large scale. About 1100 head of breeding stock is kept on the place. All the stock raised and sold both for market and exhibition purposes is brought up on the home farm, and all eggs used are produced by the breeding birds kept on the plant. In fact the entire business is confined to the 60 acres comprising the farm and not scattered over the immediate neighborhood, as is often the case with plants of this size. The houses to accommodate the fowls are built upon the scratching shed plan and Mr. Pollard says that the best results are obtained in this way. Mr. F. M. Pollard, upon whom devolves largely the management, has had 20 years' experience in handling live and dressed poultry for the Boston market. The superintendent is Mr. George Luck, who is an expert in all branches of the business and has had many years' experience. The varieties handled are White Wyandottes, White Plymouth Rocks and Pekin Ducks. Strict attention is paid to utility as well as fancy, and only birds of the best breeding are kept. They discovered long ago that the only sure way of getting vigorous, healthy, heavyweight birds was to have foundation stock of the same kind, and no time or expense was spared in getting it. They make a specialty of stocking plants with breeding birds, also with fine eggs for hatching at proper seasons, and their years of hard work, study and experience in the production of their strains enables them to offer the best to be had for thoroughly practical purposes as well as for exhibition. They make shipments to all parts of the world and have this season in addition to their immense trade at home made shipments to South America, Canada, Cuba, Porto Rico and Germany. Their strain of Pekin Ducks is known everywhere as Pollard's Pekins. They are the improved deep-keeled type, as introduced and bred by Mr. Pollard, and have become so near perfect in all the essential points of excellence that it would be hard to suggest material improvement. They are deep, full breasted birds with long, low body lines, broad backs, short, fine necks and heads and heavy thighs. They carry an extra large proportion of breast meat and have beautiful white plumage and deep orange legs and bills. The birds of their breeding have not only won more prizes as dressed poultry than any other strain but they have excelled as live specimens in the leading shows in the United States and Canada. Their White Wyandottes and White Plymouth Rocks are just as good for utility and exhibition as the ducks. At Philadelphia this season they won first and special on White Wyandotte hen, first on White Plymouth Rock cock; first, third and fourth White Plymouth Rock pullet and fourth White Plymouth Rock cockerel. At Boston they won one first, one second, one special and seven other ribbons; at New York one special and four ribbons in the open class. These prizes were won by birds direct from the farms and of Mr. Pollard's own breeding. The birds are practical utility stock, as that is the only kind bred on the farm. They have decided to mate a few pens of extra prize winning birds and to sell a part of the eggs to customers who are willing to pay a fair price for the very choicest stock it is possible to raise.

FRANK HECK.



BUFF PLYMOUTH ROCK.

"Hoosier King." First prize at Indianapolis, 1900. Owned and bred by A. L. Weckler, Bunker Hill, Ind.

*Steinmesch & Co.*, No. 2 North Main Street, St. Louis, Mo., are agents for Cyphers Incubators and Brooders, and in addition to this carry a full line of first-class poultry supplies, and the fast selling Steinmesch "Extra Quality" Chick Feed. Nothing better on the market.

Intending purchasers of Light Brahmas, Partridge Cochins or Barred Rocks will do well to write for prices to Willard & Johnson, Norwood Park, Ill. They have purchased J. B. Foot's stock and have some fine matings for this season.

# WHAT FRANK HECK SAYS

## Regarding American Poultry Journal Advertisers whom he has Seen and Visited; and Poultry Shows that he has Attended.

### A BUFF COCHIN RECORD.

Mr. Leslie Parlin, of St. Paul, Minn., Produces One Which is Probably Unequaled.

For thirty years Mr. Leslie Parlin, of St. Paul, Minn., has been breeding buff cochins, and has give nthe closest study to the principles of mating and the many details, all of which play an important part in the work of producing birds which shall pass muster under the critical eye of the judges. With such an experience it is but natural that he should have gained knowledge which enables him to produce birds that will win. To give an account of all his winnings would occupy several pages in A. P. J. He has won at many of the largest shows in the country under almost every prominent judge, and in competition witb tbe best birds found at these shows. During the past twelve years he hac confined his displays in the show room mostly to Chicago, Milwaukee, Minneapolis, St. Paul, Cedar Rapids and a few others. At these sbows in this lengtb of time be has won 210 regular prizes and a large number of specials, including several Silver Cups. Nearly 100 of the regular prizes have been firsts. Time after time he has had birds score 96 and 96½ points, and they were not private scores but were given in competition in the show room. In the past twelve years at Minneapolis and St. Paul at the exhibitions of the Minnesota State Poultry Association he has each year won more prizes than all his competitors combined, and has won sweepstake prizes over all varieties in the Asiatic class more times than he has lost them. He won the silver cup two years in succession for the highest scoring pen in the whole show, all varieties competing. These are only a few of the things he has done in the way of winning prizes. We never saw a record on Buff Cochins that equals Mr. Parlin's, and we honestly believe that he is in a class by himself in tbis variety. At the St. Paul show last month he made a clean sweep of every first, second, third and fourth prize on Cock, Cockerel, Pullet and Hen, and won 1st and 2d pen. He won the sweepstake prize for the largest number of birds in the Asiatic class, scoring 90 points and over. He had 12 females with an average score of 95 points. He won more prizes at Chicago this year than any other competitor, and at Cedar Rapids he won 13 prizes, including 3 out of 5 firsts and best display. He makes these records year after year wherever he exhibits and to comment further upon the quality of his stock is a waste of time. He has a large flock and can furnish customers with pairs, trios or pens of both old and young birds. His price for eggs is $3 per setting and we think he is justified in claiming that the same quality cannot be obtained elsewhere for the money.

BUFF COCHIN HEN.

Winner of first prize at Milwaukee, Waupaca and Chicago. Bred and owned by Leslie Parlin, St. Paul, Minn.

### PARTRIDGE WYANDOTTES.

Mr. W. A. Doolittle, of Sabetha, Kan., was one of the most successful exhibitors of this variety at the late Chicago show and in view of the fact that the class represented the cream of the country it places Mr. Doolittle's birds in position where they can consistently be called leaders. The reason for the unusual size and quality of the class at Chicago was that upon this depended largely the chances of the variety being admitted to the standard and this condition brought out the best specimens from all sections. Mr. Doolittle's first and second prize pullets were models and are not equaled by any we have seen anywhere this season. His other winners were also remarkable specimens. He is one of the very oldest breders of Partridge Wyandottes and has a large flock of choice specimens. We have seen some of the stock which he has sent out and have seen it win for his customers. The only thing cheap about his stock and eggs is the price.

### BURLINGTON ROUTE TRAIN SERVICE.

We wish to digress just a little from our legitimate field of poultry culture in order to pay a well-merited compliment to the Chicago, Burlington & Quincy railroad, familiarly known as the "Burlington Route." During the past five months we have spent most of our time riding on railroad trains, visiting breeders and shows in all sections of the country lying between the Atlantic coast and the Mississippi river, and have therefore had occasion to learn of the quality of service rendered on practically every railroad system of importance, both large and small. While on our way to the St. Paul show recently via the "Burlington Route" we could not help being impressed with the superiority of this line's train service and the conditions which seem to justify their claim to having the finest train on earth. Their evening train between Minneapolis and St. Paul and Chicago and St. Louis, is the handsomest production of the Pullman works and cost over $100,000. Its equipment consists of standard and compartment sleeping cars, a buffet library car, reclining chair cars and a "Burlington Route" dining car, all built upon new Pullman lines with steel platforms and wide vestibules between cars. The entire train is lighted by electricity and heated by steam. The interior finish is in vermil-

ion wood with decorations of royal blue. The Pullman buffet smoking car is fitted with bookcases, sideboard, writing desk and a compartment for card players. There will be found the current periodicals, daily papers and a set of duplicate whist boards complete. A fit mate for the other cars of this superb train is the dining car. It has all the latest improvements in the way of cooking apparatus and utensils, and the chefs are men of long experience in the gastronomic profession. It is equipped to prepare meals for 60 or 70 guests at a time. The tableware and plate are made specially for the Burlington, and are unusually attractive. At each table is an electric bell to summon the conductor when desired, and electric fans cool the air and aid in ventilation. One may order from a cup of tea and rolls to an elaborate six or eight course dinner, and is only expected to pay accordingly. The employees, from the porters to the conductor, are courteous and obliging and take an interest in the comfort and welfare of the passengers. The roadbed is the best that can be made and is almost equal to one of solid granite. This is not a paid advertisement but is a voluntary mention without the knowledge of the railroad company and is for the purpose of acquainting our readers who may have occasion to travel in this territory of the advantages and pleasures of a trip via the "Burlington Route."

## $175 FOR A BUFF ROCK.

Mr. W. F. Worth, box A, Wheatland, Wis., received a bona fide offer of $175 for his noted Buff Rock cock Tubalcain, which won first at the Chicago show. The bird is acknowledged by many Buff Rock breeders to be the best Buff Rock living. He has been exhibited at a number of prominent shows and has never been beaten. Mr. Worth has this bird mated to females of the same high quality and there can be no question about the results of the mating. He and his egg customers will surely be at the head of the procession at next winter's shows. He has a limited number of cockerels for sale that were sired by this bird and they are good enough to head the best yards.

Mr. E. S. Person, of Zumbrota, Minn., has a flock of Buff Wyandottes which entitles him to a place in the front rank of breeders of this variety. His record at St. Paul last month was an enviable one, as will be seen by referring to his advertisement in this number. He breeds Buff Wyandottes exclusively and is a member of the American Buff Wyandotte Club. He now has for sale quite a number of good breeding birds and offers to dispose of them at a very low price.

Mr. Wm. Schultz, of St. Paul, Minn., has added a few more links to his already lengthy chain of victories in the showroom. In Mr. Schultz's case it would be more a matter of surprise if he did not win than if he did, for he has been capturing the best prizes at Minneapolis and St. Paul so long and so regularly that his competitors do not expect to get the best of him. His Golden Wyandottes won at St. Paul 1st cockerel, 1st pen, 2d hen and 3d pullet in a class of 49 birds, which for quality is worthy of special notice. It took good ones to win, and was a class in which the prizes are generally widely distributed amongst all exhibitors. He was also strong in White Wyandottes, winning some of the most desirable prizes. He has a record on Whites at one of the St. Paul shows of having the highest scoring pen of birds in the show, all varieties competing. This was made with his White Wyandottes, and won for him the $50 silver cup offered by the association. Mr. Schultz is also a breeder of Pekin Ducks, and won 1st on drake with a score of 98 points. He has stock for sale now that will prove entirely satisfactory to those who send him their orders. He is making preparations for a large egg trade, and guarantees to please.

Made from photo of feathers taken from two Kimenour Barred Plymouth Rock females.

Mr. N. S. Beardsley, of St. Paul, Minn., has placed a card in our advertising columns, and we are pleased to say for the benefit of those of our readers who are not familiar with Mr. Beardsley's record and manner of doing business that they will find his stock to be of the best and his treatment of customers very liberal. He has been breeding Barred Rocks for 15 years, having started in 1887 by purchasing the first prize pen at Chicago, also first prize pullet. He has not taken a backward step and has gained a national reputation on his favorites. His last winnings were 1st cockerel, 2d and 5th cocks and 2d pen at St. Paul last month. He is very strong in pullets, and has a large number of surplus breeding birds which he now offers for sale. His stock won the silver cup 3 years in succession at St. Paul, which was offered on the highest scoring bird in the class having the most entries. He has had the highest scoring bird in the Barred Rock

"ROYCROFT MAID."

One of George G. Brown's White Wyandottes at Roycroft Farm, East Cleveland, Ohio.

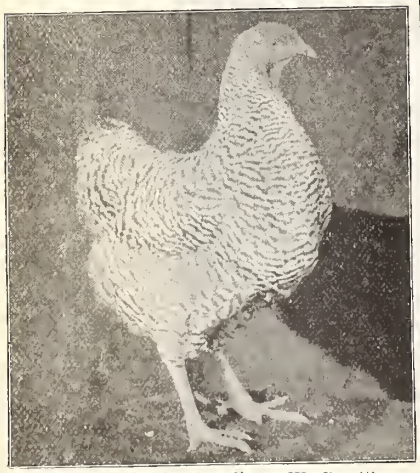
class at St. Paul five times out of six, and in fact his list of winnings shows that he has won most of the desirable prizes at St. Paul and Minneapolis during the past 15 years. Mr. Beardsley is the man who sold the noted pen of birds purchased by Mr. Geo. Vanderbilt. One of our most prominent judges was instructed by Mr. Vanderbilt to procure the best pen of Barred Rocks in America,

Sample feathers from a "Gibson" line-bred pullet. W. B. Gibson, West Alexander, Pa.

and after an extended trip over the country he found what he thought was the best, in Mr. Beardsley's yards. His birds are the blue barred kind that are so much admired and always win.

---

Mr. Grant Mott, of Austin, Minn., who has a national reputation for breeding winning White Wyandottes, has mated this season some of the best birds he has ever owned. In Mr. Mott's case this statement is worthy of more than passing notice by those who are interested at all in this variety, because his birds in the past have been the kind that win pretty much all they compete for and if they are as good or better than in the past it means that Mr. Mott and his egg customers are going to be among the winners again next



A "Gibson" line-bred pullet. W. B. Gibson & Sons, West Alexander, Pa.

season. At the last Cedar Rapids, Ia., show he won 1st cockerel, 2d hen, 3d cockerel, 1st, 2d, and 4th pullet and 1st pen which is more firsts and seconds than any other exhibitor secured and when the size and character of the show is considered it will be seen that the record is a valuable and important one. His two best pullets at this show scored 95 points each and some of his birds this season have reached 95¾, with every possible doubt scored against them. He is a business man who breeds his favorites more for pleasure than profit and is the kind of a fancier who has the nerve to use the hatchet on specimens that are not worthy of a good score. We have yet to find a breeder of this kind who did not have a flock far above the average and the one owned by Mr. Mott is not an exception to the rule. He has a limited number of birds and eggs for sale each season and always has more of a demand than he can supply. He has more breeding birds just at this time than he cares to use himself and somebody will get them at a bargain. He is now shipping eggs from his best pens and his combination of high quality and low price is bringing him a large and desirable trade.

---

One of the handsomest varieties of fowls is the White Crested White Polish and when properly bred they are not only beautiful but profitable. While attending the St. Paul show recently we met one of the old veterans among the breeders of White Polish, Mr. John Peterson. He as usual had all the ribbons on his coops worth having and the birds had honest merit back of them. He has the real thing in this variety and his customers are sure to be pleased with what they get from him. He breeds White Crested White Polish Bantams and Partridge Cochins, both of the same quality as his W. C. Polish. He has been winning the desirable prizes on them each season. He not only knows good quality but is willing to give it when a customer pays for it.

---

Mr. P. E. Kimpel, of Racine, Wis., president of the Racine Poultry, Pigeon and P. S. Association, sends in a list of his winnings, which will be found elsewhere in this number of A. P. J. Both the winnings and the scores are far above the average, and are worthy the special notice of all who are looking for the best in the varieties handled by Mr. Kimpel. He is one of Racine's most prominent business men, but finds time to give his birds his personal attention and the quality of his stock shows that his care is intelligently bestowed upon it. It is not an uncommon thing to find a few of what might be termed "top notch" birds in most any high grade flock of fowls, but we do not remember of having seen a flock the size of Mr. Kimpel's that contained as many high scoring birds. His first prize S.-c. White Leghorn pullet at the Racine show scored 96½, three others scored 95¾, four others 95, and six scored 94¾, making 14 birds, with an average score of 95 and a fraction. This is the best testimonial one could give of his birds and is all that is needed. In the S.-c. Buff Leghorn class he won 1st cockerel, with a score of 94, 1st, 2d and 3d pullets, with scores of 95 each, in addition to other firsts, seconds and thirds. He also breeds S.-c. Brown Leghorns and Barred Rocks, which are just as good in proportion as his other varieties and if any breeder is in position to satisfy his customers Mr. Kimpel is surely that man.

---

Mr. F. L. Wright, of Racine, Wis., was one of the most successful exhibitors at the Racine show this season. His specialty is White Wyandottes, and how well he knows how to breed them is shown by his record of 1st hen, 1st and 3d pullets, 2d cock and 3d pen in probably the hottest class ever seen at this show. It took good ones to win, but that is the only kind Mr. Wright breeds. His breeding pens are made up of carefully selected birds, properly mated for best results and a larger per cent of the progeny is show stock than is the case with the average breeder. Mr. Wright also breeds Rose Comb Black Bantams and won the silver cup offered at Racine for the best display in the bantam class. We have not seen a class of this variety at any show this season that was superior to the birds shown by Mr. Wright.

---

H. H. Bonniwell of Hutchinson, Minn., was one of the lucky exhibitors at the late St. Paul show. We may be wrong however in saying that he was lucky, because his magnificent winnings are the result of quality and skill in breeding rather than in luck. A string of birds such as he showed requires intelligent breeding to produce, is worth considerable in dollars and cents and is not seen

"ADVANCE,"

claimed to be the greatest Dark Brahma male living or dead. Exhibited 3 years in 7 shows and never lost 1st prize. Owned and bred by Clark E. Adams, Racine, Wis.

at many shows. Really the Buff Rock class at St. Paul has had few equals anywhere this season as far as quality is concerned. Many of the individual specimens could have been sold for good long prices. Mr. Bonniwell won 1st, 2nd,

3rd hen; 2nd cockerel; 1st pullet; 1st pen, best cock and best display. At St. Paul last year he had in addition to other regular prizes the best cockerel, pullet, cock, pen and display and would no doubt have won on hens had he entered any. One of the reasons for his success is that when he started several years ago he procured the best foundation stock that money could buy. We do not know that he would approve of our telling how he started but we will risk it. He wrote to H. S. Burdick who was then breeding his famous nugget strain and ordered the best trio of birds in the yards with instructions to draw on him for the price, no matter what it was. The birds were shipped and the price paid. This same determination to have the best actuates Mr. Bonniwell in all the details of his business and as a result he has gotten together a flock that has few equals. His business this season gives evidence of a great increase but he has more breeding birds than usual and will probably be able to fill all orders for eggs.

---

Mr. W. M. Stewart of Layton Park, Wis., who was one of the successful exhibitors at the Milwaukee show this season, has concluded to sell eggs from his best birds and places his card in the advertising columns of the AMERICAN POULTRY JOURNAL. His specialties are Buff and Black Langshans. In both varieties he has birds of exceptional merit and can make good his claims in the way of being able to supply his patrons with high grade stock and eggs. When starting with his birds he purchased the best regardless of price and as is usual in such cases he has gotten together a large flock of birds that are a credit to him and that will win prizes for his customers as well as himself.

---

Brainard & Hickman, of Milwaukee, Wis., made a record on White Plymouth Rocks at the late Milwaukee show which entitles them to a place at the top. The competition was unusually strong and the winnings are all the more valuable on that account. The strong points of their birds are yellow legs and beaks and clear white plumage which added to the general excellence of the flock makes a combination which will win for them everytime. They are in the business to stay and all their transactions with customers are made with a view to future business which is one of the sure results of fair treatment and full value given for each dollar received. Messrs. Brainard and Hickman are the kind of people who add dignity to the business and who are real additions to the fraternity.

---

Mr. George Cooke, of Lamberton, Wis. proprietor of the Orchard Home Poultry yards has made one of the best records we have seen this season and it is worthy of special mention. At Burlington, Wis., he won twenty 1st prizes and ten 2nd prizes on thirty-four birds, and at Racine he won twenty-nine 1st prizes and nineteen 2nd prizes in addition to several 3rds on seventy-three birds. Mr. Cooke breeds several varieties as will be noted by referring to his card in the advertising columns. Both these shows were first-class ones and as good as are held anywhere in the state. Some idea of the quality of his stock can be gained when we state that he had White Wyandottes at both shows which were passed by the judges without a cut for color. His Buff Cochins at Racine won 1st, 2nd and 3rd pullet, 2nd and 3rd hen, 3rd cockerel and 1st pen, with scores as high as 94½. In other varieties he did as well and four of his Brown Leghorn pullets scored 95¾ each, which will be acknowledged is about the top for this variety. His birds are raised on farms and receive the best care and attention and these conditions contribute largely to his success with his flocks. He is one of the few breeders who can successfully handle several varieties and intending purchasers of stock and eggs will find it to their advantage to correspond with him.

---

Mr. Charles P. Jorgensen, of Racine, Wis., had an attractive display of Barred Rocks at the Racine show and among other prizes he won the two most desirable ones of first cockerel and first pen. His first prize cockerel was pronounced by good judges to be the equal of the first bird at Chicago. His birds are well barred down to the skin and the color is strong. His foundation stock was procured from some of America's foremost breeders and he has bred it in such a manner as to keep up the high standard of quality originally obtained. He will have eggs to spare this season from his choicest matings and will make a special effort to please those who do business with him. He is the efficient secretary of the Racine Poultry, Pigeon and Pet Stock Association.

---

There is a firm at Waterford, Wis., which is going to please a lot of customers this season. We refer to Halbach Bros., who have for several years been breeding Light Brahmas and Barred Rocks. We know that they are going to please because we have seen some of the stock from which they intend to sell eggs and we know that they ship just what they say they will. They are prominent and successful business men and conduct their large poultry plant on business principles. Their winnings this season are the best recommendation of their stock but the birds are worthy of special mention. Their Light Brahmas are particularly strong in combs and color of wings. Some of their birds have passed the judges without a cut for color of wings and those breeders who are weak in this section will do well to send to Halbach Bros. for eggs from their choice matings. Their advertisement will be found elsewhere in A. P. J.

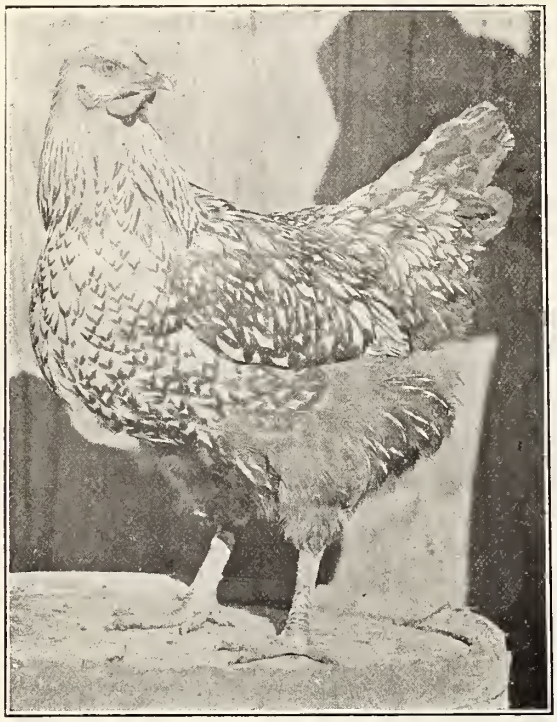
---

Mr. E. G. Roberts, of Ft. Atkinson, Wis., is enjoying a larger trade this season than usual. Mr. Roberts is one of the few breeders who can successfully raise prize winners of many different varieties. Two important factors in his success, however, are that he has practically unlimited room for his birds, and he has been breeding the principal varieties for almost a lifetime. He has won thousands of prizes on his birds. This is not an exaggerated statement. He has actually won thousands of prizes and any of the readers of AMERICAN POULTRY JOURNAL who will look up the reports of the leading fairs in the Mid-west for the past five years will find that he has won a majority of the prizes and that his exhibits have been the largest and best. He has all varieties of Plymouth Rocks and Wyandottes, also Brahmas, Langshans, Cochins, Leghorns, Minorcas and the new and popular breeds. He also breeds all the popular varieties of Bantams and water fowl and can please all who entrust him with their orders. He guarantees all stock to be just as represented or it can be returned and the purchase price will be refunded. His twenty-eight page catalogue will be sent free to all who

W. F. Coats, Columbus, Ind., and one of his elegantly laced wing bar Silver Wyandotte cocks. First prize bird at Louisville, Ky., 1900.

write for it and mention AMERICAN POULTRY JOURNAL.

B. F. Hislop, of Milford, Ill., is the kind of a breeder we like to recommend to our readers. He has good stock and does not keep it all in his yards. By that we mean that he does not advertise his best and send out culls. His customers get just what they pay for, and when they order good birds they get them. Mr. Hislop breeds Buff Leghorns and Golden Laced Wyandottes, but is better known as a breeder of Mammoth Bronze Turkeys, which are his specialty. The foundation of his strain was the noted tom "Champion," which won first prizes at Madison Square Garden, New York, Chicago, Indiana State Show, Illinois State Show and a number of smaller shows. At Chicago this season in what was said to be the strongest competition ever seen at this show he won first cock, 3d cockerel, 5th pullet and 2d pen. The demand for his stock is so great that he is compelled each season to refuse orders, but at this time he has more birds than usual and can furnish his customers with extra fine specimens in larger numbers than heretofore. At the recent meeting of the National Bronze Turkey Club. Mrs. Hislop was elected to the position of secretary, which is an honor well merited.



SILVER WYANDOTTE PULLET.

First at Indianapolis, Ind., Dec. 1900. Bred and owned by William F. Coats, Columbus, Ind.

—o—

One of the best records we have seen is the one made by W. H. Mayer, the Black Langshan specialist of Danville, Ill. At the Illinois state show at Bloomington, where the cream of the state as well as from some other states is shown, he won 1st and 2nd cockerel, 1st, 2nd and 3rd hen, 1st, 2nd, 3rd and 4th pullet, 1st and 3rd pen.

At Danville, Ill., he won 1st and 2nd cockerel, 1st, 2nd and 3rd pullet, 1st, 2nd, 3rd and 4th hen and 1st pen.

Mr. Mayer's Langshans possess size and shape almost to perfection and for color his flock is probably not excelled anywhere. He has birds that could score 96½ points easily. He always wins a majority of the prizes wherever he shows and this fact alone is testimonial enough of the quality of his stock.

Mr. B. H. Smith, of Coldwater, Mich., informs us that he bas 200 birds yet for sale that were sired by his Chicago and Detroit winners. Mr. Smith as a Buff Wyandotte specialist is a success. He is one of the kind who know what the judges want in this variety and he knows how to produce it. He has proven by his winnings tbat his birds are entitled to the position at the top which they now occupy. His booklet describing his birds and his winnings may be had free for the asking.

Mr. Jas. K. Page, of Indianola, Ill., is now selling some high grade Barred Rocks which are good enough to win in strong competition and solicits correspondence from AMERICAN POULTRY JOURNAL readers. We have personally inspected his birds and find tbat Mr. Page makes no claims for his stock that are not upheld by the facts. He has been breeding his favorites for several years and has been wonderfully successful in combining true shape and color. His birds are large, vigorous and barred to the skin and are sure to please those who purchase them.

—o—

Our readers will notice elsewhere in tbis number some half-tone illustrations of Barred Rocks from the yards of W. B. Gibson & Sons, West Alexander, Pa., where each season there is produced some of the best birds brought out at the shows. Their stock is line bred and is one of the popular and winning strains. Mr. Gibson has been breeding Barred Rocks for twenty-one years and during all that time he has given the work the most careful study and attention. This experience has necessarily given him a very thorough knowledge of mating and the results to be obtained from the various methods, and for this reason he is wonderfully successful in producing high-grade specimens. They make a specialty of furnishing winning show birds and have for several years sold the winners at many prominent shows. Their birds have the narrow, straight, deep barring which is required by the standard and are especially strong in color of wings and tail.

"LOGANSPORT."

Third prize Barred Plymouth Rock Cockerel at Logansport, Ind., Dec. 5-12, 1900. Heads yard 6. Weight 10 pounds; score 92. Owned and bred by W. P. March, Winimac, Ind.

# Market Report.

*Editor American Poultry Journal.*
Chicago, Feb. 21, 1901.

GENTLEMEN: The receipts of both poultry and eggs are light and market in good shape. Everything is selling on arrival at the following prices:

DRESSED POULTRY.—Turkeys, 8½ to 9½c; old gobblers, 7½c; chickens, 8½ to 9c; broilers, 1½ to 2 lbs each, 11 to 12c; capons, 9 to 13c; ducks, 10 to 11c; geese, 7 to 9c.

LIVE POULTRY.—Turkeys, 7 to 7½c; chickens, mixed, hens and young roosters without spurs, 8c; heavy hens, 8½c; broilers, 1½ to 2 lbs each, 10 to 11c; ducks, 9 to 9½c; geese, $4.00 to $10.00 per dozen, according to size. Pigeons, $1.50 per dozen. Belgian hares, 75c to $1.00 each, or about 10c per pound.

EGGS.—16 to 16½c per dozen. The future price of eggs will depend altogether on the weather. If the weather remains cold they may go a little higher during the next few days, but we look for them to go lower in the near future. We think the general market on eggs will be 12½c to 13c after the weather turns warm. We do not look for much less than the above price any time during the spring.

As long as the weather is cold all poultry should be shipped dressed except geese and heavy hens, which should be shipped alive to arrive Wednesday of each week. Dressed poultry should all arrive Wednesdays, Thursdays and Fridays.

For those who are not familiar with the manner of dressing poultry for the Chicago market we have gotten out a booklet giving instructions for making coops, dressing, handling and shipping poultry so it will bring the highest market price, which we will send free to any one asking for it. Since the snow has come we are having an extra demand for oyster shell, mica crystal grit meat, bone, clover meal, etc., of which we have a large stock on hand which we offer at a low price. We are also receiving orders for Sprague's Lice and Insect Killer, which we manufacture and guarantee to give satisfaction or money refunded. We will be glad to send our circulars and price lists to any one asking for them.

It is useless for poultry raisers to sell their poultry to local buyers when they can ship direct to the market themselves and get all there is in it. We will be glad to give any information we can and will furnish market report and shipping tags free.

We will be glad to hear from any of your readers who either want poultry supplies or have produce to ship. Yours truly, SPRAGUE COMMISSION CO.

First Pullet at Big 4 show. Sheldon, Iowa. Bred and owned by A. B. Wilson, Le Mars, Iowa.

Thomas H. Mills, of Port Huron, Mich., is a poultryman who is rapidly making his influence felt as a good judge of poultry. He is now making dates at reasonable rates to judge shows where his services may be required. He has been engaged to judge the show at Middletown, Ohio, December 17-21, 1901, with other dates pending. It is good policy for poultry associations to secure their judges early and thus dispose of the most important part of the business attending the formation of a successful show.

In our report of the winnings of D. F. Taylor De Ruyter, N. Y., at the Cortland County Poultry and Pet Stock Association, Cortland, N. Y., December 18-22, 1900, it should have read first and fourth prize cock in White Plymouth Rocks.

**CORNELL'S LEGHORNS—Buff and White—at New York and Boston.**

My Leghorns have won the highest honors of any strains of this variety at New York and Boston. They have been line bred for ten years and to day lead all other strains for breeding and exhibition purposes.

My Buffs have won 1st on breeding pen for five successive years at America's leading shows. 1st PRIZE BREEDING PEN AT MADISON SQUARE GARDEN IN 1897-1898-1899, 1900 AT BOSTON. 1901 AT NEW YORK. No other strain of Buff Leghorns has ever won 1st on breeding pen at the great New York show for so many years in succession.

At BOSTON 1900, they won four times as many 1st prizes as all competitors combined, and every special for which they competed, including the American Leghorn Club Cup for largest and best exhibit.

My White Leghorns have been well known winners for years. Besides my own great exhibit of Leghorns, my birds have won in the hands of customers, first prize during the past two seasons at New York, Boston, Philadelphia, and other leading shows throughout America.

Besides their show record, these birds are great layers. My matings are this year finer than ever, and I am now booking orders for eggs for hatching at $3.00 per 13; $5.00 per 26; $8.00 per 50; $15.00 per 100. Catalogue Free. Satisfaction guaranteed. EZRA CORNELL, Ithaca, N. Y.

THE AMERICAN POULTRY JOURNAL

Published the first of each month by
GEO. G. BATES, Editor and Proprietor.

FRANK HECK, Associate Editor.

Subscription price 50 cents a year in advance.

When delivered by carrier in Chicago 60 cents a year in advance.

Payment for AMERICAN POULTRY JOURNAL, when sent by mail, should be made by money order, registered letter or stamps.

Write name and address plainly, and if JOURNAL does not come regularly and promptly, write us at once

In requesting change of address, be sure to give the old address as well as the new one. This is important.

Advertising rates will be furnished on application.

The reliability of new advertisers must be ascertained before an insertion of an ad in the columns of AMERICAN POULTRY JOURNAL can be made. This is a business matter, the justice of which is readily seen, as protection to the readers who answer advertisements.

Alway say when writing advertisers, that you saw it in the AMERICAN POULTRY JOURNAL.

All copy for advertising and manuscripts for publication should reach us not later than the 20th of the month preceding the date of issue.

## THE OVERWEIGHT QUESTION AGAIN.

We took occasion to state in these columns last month that overweight birds were not desirable and that experienced breeders generally were of the opinion that the unreasonable demand for them amongst amateurs should not be encouraged. In support of this we present the latest evidence in the shape of a resolution which was adopted at the National meeting of the American White Plymouth Rock Club at the New York show. It is as follows:

"A motion was made and carried that we, in meeting assembled, request the Executive Board to take some action in regard to disqualifying birds that are so large as to greatly exceed the standard weight, as it is creating a tendency to breed the birds for size; thereby destroying the symmetry and reducing their egg production and commercial value. We would respectfully suggest that two pounds over standard weight in each class disqualify."

The White Rock Club is to be congratulated upon the bold stand it has taken in an attempt to correct this senseless evil. The way to get birds to standard weight is to hatch them at the proper time and brood them properly and not by the selection of overgrown, over-fat and unsymmetrical specimens as breeders.

## LESSONS LEARNED AT THE SHOWS.

The show season just closed has taught valuable lessons to many exhibitors, some of whom will profit by them and others of course will not. Those who did not win the coveted prizes, and they constitute a large majority, are the ones who need most to remember and ponder over the conditions which influenced defeat. Many have learned that the condition of a bird has much to do with its chances of winning. By that we mean show condition, which refers to unsoiled plumage, good health, docile disposition, etc. Those breeders who are not prejudiced can see the merits of their competitors' birds have gone home with a knowledge of the weak points in their own birds which must be overcome. Many have learned also that a bird can be a first class show specimen this week and "go all to pieces" in a short time. The weight question has also been forcibly presented and impressed many with its importance. We might mention dozens of lessons which could have been learned, but those breeders who are alive to their interests have profited by their experience and the other class would hardly be affected by advice when actual experience has not been heeded. The breeder who can take defeat gracefully and go to work with a new determination to overcome all obstacles is the one who will be found amongst the winners next year. This subject is referred to at this time because right now is the time to get ready for next winter's shows. Quality and condition of breeding stock is the first important step. The youngsters should be hatched early and kept growing by giving them proper care and feed. These two points well looked after will surely win over less careful methods.

## DESCRIPTION OF CLASSES AT THE SHOWS.

In our report of the Chicago show we have refrained from commenting upon the various classes and criticising the awards. In doing this we have departed from an antiquated custom which we are convinced serves no good purpose, but upon the contrary is positively harmful in its effects. As an evidence of this we call attention to the quite frequent absurd and unjustifiable descriptions of individual specimens. The opinion as to the correctness of the awards is always that of someone who has not examined the birds as carefully as has the judge and is therefore not competent to pass judgment. Even though the birds have been carefully handled, the opinion should not be given in justice to the winning exhibitors and the judges because it is that man's idea alone and should be considered as such. When an association employs judges their decisions are supposed to be final. The exhibitors by making their entries agree that these decisions shall be final. Why, then, should the winners be deprived of part of honors of winning by reason of the influence that unjust criticism has in many instances. We all know that the best judges differ in their opinions and after allowing for this, if there is anything radically wrong in the awards there is a business like way provided by all associations whereby matters can be adjusted. We believe, therefore, that our position is a tenable one, and we give without comment the awards as the judges placed them.

## WHERE AND WHEN TO BUY.

From the nature of correspondence which we receive from time to time we find that many of the people just becoming interested in Standard bred poultry do not thoroughly understand the objects of breeders in advertising their stock and when and how to start breeding the variety that has attracted their attention. This month and next are the two best months in which to buy stock for breeding purposes. Eggs may be purchased during March, April and May and good hatches may be expected. Stock and eggs may be shipped anywhere regardless of distance without injury to the birds or bad effects upon the eggs as far as chances of hatching are concerned. For this reason a subscriber in Massachusetts need have no hesitancy in sending an order to a breeder in California or the Western man need not hesitate to send East. The advertisements in AMERICAN POULTRY JOURNAL are put there for the express purpose of drawing the trade of the readers regardless of location. The advertisers are all breeders whom we guarantee to be fair and honorable in their dealings. We back up this guarantee to subscribers in a substantial way and not on paper alone. We therefore bespeak for them a liberal patronage and suggest that buyers in all cases state when writing to advertisers that they saw their advertisement in AMERICAN POULTRY JOURNAL. This is an advantage to all concerned.

## IMPORTANCE OF STAMINA IN BREEDING BIRDS.

The stamina—the parts that constitute the powers of endurance and productiveness—of a fowl are precisely like those of a human being. These may be encouraged by careful nourishment, but they must have their foundations laid deeply in the qualities of ancestry. The health of a fowl can not be told by the appearance of the egg. Constitutional weakness may be engrafted on the product of a vigorous female which is capable of producing a well formed egg, by the enervated sire. Both parents must possess the elements of strength. Natural laws govern this action. It is essential, therefore, in the building up of a flock, to know the history of both sides. No security can be felt in the work if chance or heedlessness is permitted in the breeding pen. Carelessness has for so long a time been allowed in the ordinary poultry yards that only the complete eradication of weaklings can be relied upon as a corrective measure.

Health is a primary requisite to the production of profitable poultry. There should be, first of all, a selection of stock which manifests its strength through activity, sleekness of legs, and general contentment. The "singing" hen is a wholesome hen. This characteristic of peace and normality is a sign worth heeding. Such hens are good to use as the mothers of flocks. The male should be, after his class, proud and alert, with the disposition to attention to his harem. But nervous, easily startled, and flighty birds; or birds that are sluggish, droopy, and indolent, should be taken from the pens. The first purpose of a flock is to reproduce. An indication of this power is the constancy of production, in normal regularity, of properly shaped eggs.

When by observation a breeder is satisfied that certain fowls are doing their duty, he should select them as producers. These suggestions are written for the benefit of those breeders who make their matings with only the fancy points of birds in view.

## THOROUGHBRED VS. PURE BRED.

BY H. B GEER.

[The following detailed definitions of the terms "Thoroughbred," "Purebred" and "Standardbred" may prove of interest to many poultrymen who have not taken the trouble to fully investigate the meaning of the terms and who use them indiscriminately to convey the same idea. Mr. Geer will find by consulting the latest authority that the word is used thus: "A thoroughbred animal, especially a horse." Common usage and custom also makes the word applicable to horses particularly. The fact is that the term "standardbred" is the only one which truly describes the fowls which poultrymen are trying to get to perfection. According to Mr. Geer's own explanation of the term "thoroughbred" it is possible for fowls to be thoroughbred and still not be a standard variety, as in the case of the Rhode Island Reds. They may also be properly called "purebred." We want to be put upon record as being for standardbred fowls, which means birds bred with a view to perfection as described by the standard of the American Poultry Association. In view of the fact, therefore, that "thoroughbred" and "purebred" do not necessarily mean standard bred we would suggest to all poultrymen the propriety of referring to their birds as standard bred.—*Editor.*]

In the November issue of this most worthy journal I notice that in the editorial columns the statement is made by our editor,—for whom I have the greatest respect,—that he frequently has occasion to mark out the compound word "thoroughbred" and substitute that of "pure-bred," and that: "Properly speaking, the word "thoroughbred means only a running-horse."

Now, this last clause is what caused me to get down my musty and dusty dictionary and synonyms; to see if a racehorse had a monopoly of the "thoroughbred" business.

And, mark ye, brethren, I shall not say that our worthy editor is wrong. But if he will permit me, insomuch as he has put forth a distinction. I shall state here what I found after brushing the dust off of my books.

First: "Thorough."—1, passing through; 2, passing through, or to the end. Hence, complete, perfect.

"Thoroughbred."—1, of pure, and unmixed breed, stock or race; bred from a sire and dam of the purest breed; 2, having the qualities or characteristics of pure breeding. High-spirited, mettlesome, elegant or graceful in form, bearing or the like.

3. Thorough, as a thoroughbred scamp.

It would seem, then, that the fancier who has a breed of chickens that he has bred through to a purpose—a breed that he has thoroughly bred, and in line, until the breed is about complete or perfect, has a flock of *thoroughbred* fowls.

Now, as to "pure bred." I do not find the compound in my books. Of course I find "pure," which is defined as follows:

1. Pure, clean. 2. Free from anything which defiles, or contaminates, or blemishes. 3. Free from moral blemish or defilement; innocent, blameless, spotless, chaste. 4. A pure color, as a pure white. 5. Free from anything foul or polluting; clear, not filthy. 6. Innocent, guileless. 7. Purity.

Now for the last half of the compound. Not finding it compounded in the books, let's see what "bred" means, and, if we can hitch it on to the word "pure," so as to fit poultry breeding. The definitions are extremely meager:

"Bred."—1. Breed. 2. "Their malice was *bred* in them." 3. "*Bred* to war." 4. Half-bred, ill-bred, well-bred.

Going to the first definition of "bred," which is "breed," hence it is defined in "breed," not "bred," we find: "Breed."—1. Race, lineage, pedigree, progeny, stock, family, line, extraction, strain.

Now for the third compound of "standard-bred," as suggested by our editor. Of course we would not expect to find the compound in the reference books mentioned. So we take up the word "standard." 1. A flag, or ensign. 2. An established rule, or model. 3. Gauge, measure, scale.

This is coming much closer to it than "pure," but should it supplant "thorough" or "thoroughbred," if we govern ourselves by the definitions given by the authorities? Because: 1st, it is only by breeding *through* a prescribed system, hence thorough breeding, which has for its purpose a *thoroughbred specimen*, that a fancier can hope to reach or approximate the *standard specimen*, which, of course is ideal.

In giving the definitions as I find them with my idea of the fitness of the three terms originally set forth: "Thoroughbred," "pure bred" and "standard bred," I trust no offense will be taken where none is intended. For I think we all want to apply correct definitions in speaking or writing about our poultry.

Nashville, Tenn.

**How Best To Set A Hen.**

**Hens Will Set**

And do their level best when given the right kind of a nest, the right number of eggs, the right kind of food, the right kind of care and dusted with the right kind of insect powder. For this latter purpose Lambert's Death to Lice fills all of the requirements.

**Eggs Will Hatch**

When the breeders are kept free from lice, and when they have daily out door or scratching shed exercise. Under these conditions eggs from healthy birds are usually well fertilized. When good eggs fail to hatch the trouble is often outside the eggs. Lambert's Death to Lice Powder never injures the fertility of eggs for hatching, the sitter, or the little chickens should they hatch in a handful of it.

**Chicks Will Grow**

When started free from vermin and kept so from the shell up. If allowed to become lousy they lose strength and vitality, which will stunt them in growth or cause an early demise. More chickens die every year from this cause than any other, while a little Death to Lice Ointment would save their lives.

**Death to Lice Remedies**

Death to Lice Powder for dusting layers and sitters—5 oz. sample, 10c postpaid; 48 oz., 50c; 100 oz., $1.00, from here or nearest agency to you by express. Death to Lice Ointment for head lice on children or chickens, also scaley shanks on fowls, 10c and 25c postpaid. Death to Lice Special, for making a liquid louse or mite killer and for mixing with the regular powder for fleas on dogs, moths, etc., 4 oz., 10c; 16 oz., 40c, by mail postpaid. Death to Lice Lice Liquid for spraying poultry houses, painting roosts, etc., (already prepared) 1 qt., 35c; 2 qts., 60c; 4 qts., $1.00, f. o. b. here. Book and "How Best to Set a Hen" sent free.

***All Our Stock is Produced On Our Home Farm.***

We don't holler so loudly as some, but as a matter of fact we are probably **producing and selling** more pure bred poultry and eggs than any other farm in New England.

***You are Invited to Come And See for Yourself***

How much and how good stock we have. You won't have to chase all over the country to find where it is kept.

***Eggs from Pekin Ducks, White Wyandottes And White Plymouth Rocks.***

Hen eggs $2 for 13; $5 for $39; $12 for 100. Incubator eggs, $8 for 100. Duck Eggs, $2 for 12; $5 for 50; $8 for 100. A few eggs from prize winning pens of ducks and hens, $5 for 13; $8 for 26. Send for circular.

**POLLARD'S POULTRY FARM, South Attleboro, Mass.** GEO. H. POLLARD. F. M. POLLARD.

# GARDNER'S BARRED ROCKS

Opened the New Century with the ***greatest victory ever won in Madison Square Garden,*** the Sweepstakes Barred Rock Show of World, and made the most phenomenal winning of the season, viz.:

***Cocks, 1, 3, 4 and 5; Hens, 1 and 2; Cockerels, 1, 2 and 5; Pullets, 1, 2 and 4; Pens, 3 and 5; with every special offered in the class, including the Grand Fisher's Island Challenge Trophy, value $100, for best display of Barred Rocks; the $100 Speepstakes Cup offered by the President for the best Cock, Hen, Cockerel and Pullet in any variety of Plymouth Rocks; the Gold Special for best P. Rock of any variety, hatched in 1900, and special for best Barred Rock Cockerel in the show.***

My record on ***First on Cockerel for three years in succession,*** and all firsts in the open class has never been equaled by any exhibitor, and surprised even the natives of Gotham. In the last two years Gardner's Barred Rocks have won in Madison Square Garden ***SEVEN FIRST PRIZES*** out of the ten offered, or more than double the number won by all competitors combined, and more than ***THREE TIMES*** the number won by any other exhibitor, proving that they are up to date, and placing them at the top of the ladder.

Many of the largest shows in the country have been won this season by birds bred and sold by me and from my eggs. My yards contain more New York and Boston winners than those of any other breeder. Free circular gives list of winnings and full description of stock, with prices of Eggs, etc.

## MORE ABOUT LINE-BREEDING.

JAMES CLENDENING, of Siloam Springs, Ark., writes as follows: "I have taken a great deal of interest in your articles, especially those touching on line-breeding. If not asking too much will you be kind enough to give a beginner the benefit of your experience, and tell me how to proceed with my Buff Cochins? They are up-to-date Buff Cochins, so I have the right kind of stock. I want to start right, and then keep right."

There are hundreds and thousands of men and women, who are this season starting in the poultry business, situated just as is our correspondent. It is very important that they "start right." It is absolutely necessary that the proper foundation be laid or else our breeding operations will surely fail.

To annually produce a flock of birds of high and uniform quality we must practice line-breeding—systematic breeding. Now and then a mating otherwise made will produce a few exceptionally good birds, but the percentage of such specimens in the year's production is very small.

Mr. Clendening says that he purchased a pen of choice Cochins. We take it for granted, then, that the females are not full sisters. Therefore we would select the very best and most typical female, giving careful consideration to all points, but especially to shape. "Shape makes the breed," largely. To this female we would mate the male. (Mr. C. says he is a typical Cochin.) Of course Mr. C. could mate the four females to this male, and in the future keep his male line unbroken, selecting each year the very best of the get, and systematically mating them, and thus secure far better stock than he could if he practiced the usual custom of introducing new blood and making radical changes on the sire line, but to get the best results he should use this season the single mating, as stated.

Now for our line-breeding operations. We will here summarize the papers heretofore appearing in this department relative to line-breeding.

We now have the pair mated. At the close of this season's breeding operations we separate the pair, placing the male in bachelorhood, and keeping him there until he is returned to the breeding pen next season.

We will call the original pair group No. 1, and the pullets from this mating, the ones we have reserved as breeders for another year—we have most carefully culled—we designate as group No. 2. As stated we have carefully—most carefully—selected these pullets, and only a few of the very choicest have been retained. The selection has been made for quality, not quantity. We reserve, also, the very choicest cockerel.

Now, another breeding season is upon us and we mate our pens. And here we take our second step in line-breeding.

We mate male from group No. 1 (the original male) to the pullets reserved.

The female from group No. 1 (the original female) is mated to the cockerel reserved.

We now have two pens for the season, and we will term them A and B for convenience.

The product from pen A will be three-fourths the blood of the original sire and one-fourth the blood of the original dam.

The product from pen B will be three-fourths the blood of the original dam, and one-fourth the blood of the original sire.

In selecting the stock for the next year we will retain only the very choicest specimens.

Again we mate our pens, and use a typical cockerel from the product of pen A and a pullet (or pullets) from the pen of product of pen B. This mating will give us stock but one-half the blood of the original sire and one-half the blood of the original dam.

Also, this same year, we mate a pullet (or pullets) from the product of pen B to the original sire, which will give us stock seven-eighths the blood of the original sire, and one-eighth the blood of the original dam.

Also, a cockerel from the product of pen A is mated to the original female, and this gives us chicks seven-eighths the blood of the original dam and one-eighth the blood of the original sire.,

Again we can mate a cockerel from the sire line side to pullet (or pullets) from the dam line, and this union will give us chicks one-half the blood of the original sire and one-half the blood of the original dam.

We have been changing blood lines without changing types. We have kept the male line unbroken without inbreeding, as generally understood. As Mr. I. K. Felch says, "With a line of sires selected of one shape, one color, one weight, mated to females of a uniform type, cannot we feel sure of results?" Why, of course we can.

We continue this breeding on the lines laid down. If for any reason whatsoever we should introduce new blood it should be done by bringing into our yards a female that is in every way representative of the breed. But we should never introduce new blood through a foreign male. We must keep our male line unbroken until that time in our breeding operations when we establish a new male line, carrying the blood of the original dam. This is absolutely the only way to produce an established strain of fowls. And while we see hundreds of advertisements of strains there are, in fact, but very few thoroughly established strains of fowls in America.

E W WHEELER, Cedar Springs, Mich.

The accompanying illustration of a breeder who made his first appearance in show room this winter with Barred Plymouth Rocks that have kept some of the breeders guessing. Mr. W. has a 92½ cockerel by Tucker which is one of the best in the state. At the Kalamazoo show we won 1st cockerel, 1st pullet, 2d pen in a large and strong class. At Belding he won 2d and 3d hen, 3d cockerel, 3d pullet, 3d pen. It is a pleasure for him to look after and care for his fowls, and he expects to raise many prize winners this spring. We present a photo engraving of one of his prize pullets and can recommend him to our readers who are looking after good stock and eggs.

SAPPHO.

Scored 92¼ by J. A. Tucker. First prize Barred Plymouth Rock, Kalamazoo, Dec. 24-28, 1899; also scored 92 by W. S. Russell, cut ½ point on weight.

## $500 IN CASH PRIZES.

This is the attractive heading of a full page ad of *Poultry Success*, Des Moines, Iowa, which appears in this issue. This handsome, pushing poultry paper proposes to give away $500 in cash to subscribers who can count the dots in the diagram shown in the ad. This amount is to be divided in 131 prizes, so that every one may have an opportunity to win a prize if they can count straight. There is no guess work, no chance, no getting your answer in before some one else—nothing of the sort. It is a simple test of skill. If you can count, you can win. These contests as conducted by *Poultry Success*, are perfectly fair and impartial, and every prize will be paid by them exactly in accordance with the terms of the advertisement, and on the very day specified. We note they also offer two special prizes amounting to $150, to be awarded to those who send $1 for a three years' subscription and win either first or second prize. For instance, the first prize is $100; if you send one dollar for a three years' subscription and win that prize, they double it, and send you $200.

Look up the ad and try your skill at counting. Go at it carefully, determined to win. Some one is going to get this money. Why not you? This prize contest is one of the methods used by *Poultry Success* to advertise their business. They say their success is made possible through their subscribers, and therefore they prefer to distribute $500 among them rather than spend it in advertising some other way.

## THE HANDSOMEST CATALOGUE.

Mr. Ed B. Murphy, box 3, Carmel, Ind., has issued what is without doubt the handsomest catalogue ever gotten out by any poultryman. That is a broad statement but it is the only way we know to describe the catalogue and do it full justice. It contains 16 pages, including cover, and is 9x12 inches, or the same size of American Poultry Journal. Its crowning feature and the one which places it ahead of all others is that it contains four full page illustrations of birds in natural colors. They consist of a Barred Rock male, White Rock female, Buff Rock male and White Wyandotte female. These are of ideal specimens and every breeder of these varities should have one of the catalogues. They are too expensive for promiscuous free distribution and he asks that 10 cents be sent for it. This amount may be deducted from the first order for stock or eggs. The four colored pictures are worth many times 10 cents to any one interested in these breeds. It explains fully his stock and manner of doing business and gives prices of stock and eggs of the varieties he handles. He has a record of prizes won which is ample evidence of the quality of his birds. He has about 250 extra good breeding birds in Barred White and Buff Rocks and White Wyandottes. They are all well marked and good in size and shape.

## FEEDING YOUNG CHICKS.

Do you know how many eggs you set last year and how many chicks were hatched? Do you know how many you never raised? Did it ever strike you that probably 90 per cent of those you lost died before they were eight weeks old? Very few of us want to look these questions squarely in the face. This is one of the dark sides of the chicken business. Too much soft feed, too much sour feed,—the chicks cannot stand it and they drop off, bowel trouble, indigestion, all caused by improper feeding.

We have studied this question for years and do not hesitate to say that Steinmesch Chick Feed will overcome most of these troubles. It is a mixture of 20 kinds of small grains and seeds, just such as the birds of the air are raised on; just such as the old hen will hustle and scratch for if turned loose with her flock on a 100 acre farm. Try a sack, 100 lbs $2.50. Satisfaction guaranteed. See advertisement of Steinmesch & Co., St. Louis, Mo., in this issue.

## COLUMBIA INCUBATOR CATALOGUE.

We are in receipt of the new catalogue of the Columbia Incubator Co., box 2, Delaware City, Del. This is the company which sends out incubators on approval and this plan has been very successful with them. The very fact that they are willing to do this should convince the most skeptical that the Columbia machines will do all that is claimed for them. The catalogue is profusely and handsomely illustrated with half-tone cuts of their incubators and brooders, and the various sizes and plans are fully described. It contains much other valuable information which will be appreciated by all poultrymen, and we would suggest to our readers that they send for a copy of it. The Columbia Incubators are being used exclusively upon some of the largest poultry farms in the country and the company has many unsolicited testimonials in which phenomenally large hatches are reported. They have a large factory in which all the parts that go into their incubators and brooders are made and are therefore enabled to turn out the best at the lowest possible price. Their warehouses at this season of the year are well filled and customers are assured of getting their orders shipped promptly. Those who have experienced delays in matters of this kind will fully appreciate this advantage which they will have in dealing with the Columbia people.

The condition of Mr. A. L. Weckler's business this season is pretty good evidence that the buying public are quick to see where they can get value received for money invested. Mr. Weckler, as our readers know, is the Buff Plymouth specialist of Bunker Hill, Ind. He has booked and sold more orders for eggs thus far this season than he did during the entire season last year. The reason for this is that he has not sold any of his many prize winners, but has retained them in his breeding yards. He has sold about all the stock he has to spare. His surplus at this time consists principally of a few first-class breeding cockerels.

# Red Ear Stock Farm.

Won 11 firsts and 18 specials at the Terre Haute Show, Jan. 28 to Feb. 2, 1901. Had the highest scoring pullet of any variety. Stock kept on four separate farms. No chance for mixed breeds. Mammoth Bronze and White Holland Turkeys, Barred and White Plymouth Rocks, Single-comb White Leghorns, Black Langshans, Imperial Pekin Ducks. My white birds are as white as the drifting snow, and will certainly please. Turkey eggs, $3.00 for 10; chicken eggs, $1.50 for 15; duck eggs, $1.50 for 11. Buy eggs and raise your own winners. White and yellow seed corn a specialty. Send for samples.

**B. HOWARD WHITCOMB, Terre Haute, Ind.**

# Hamm's Buff Plymouth Rocks Win Three Firsts

And a large number of specials at the Battle Creek Show, Dec. 4-7, 1900, in the strongest competition. (A representative of American Poultry Journal saw my exhibit.) Birds winning here are second to none. As I shall not show again this season, I offer a long line of grand exhibition and breeding birds for sale.

**G. W. HAMM,**

**Battle Creek, Mich.**

**A Fine Lot of Young Stock For Sale,**
**W. WYANDOTTES, Exclusively.**
**MYRON KENDALL, Lind, Wis.**

**Taylor's Remarkable Record on Bronze Turkeys.**

Winning sweepstakes at Chicago's great shows three years in succession. Show birds a specialty. Stamp if convenient.

S. H. TAYLOR, Sibley, Ill.

President National Bronze Turkey Club. (Poultry Judge.)

**Barred, White and Buff Rocks,**

**White Wyandottes, Pekin Ducks.**

We have the birds and can start you right or supply you with new blood. We guarantee everything we sell and our prices are reasonable. Stock raised on three farms. Eggs $1.50 per sitting. Prompt shipment. We are closing out some extra fine Light Brahmas. Write for prices and circular.

CLOVER MEADOW POULTRY FARM,
J. K. AUSTIN, Prop., Onargo, Ill.

**Buff Cochins,**

EXCLUSIVELY FOR THIRTY YEARS.

MY stock has won **FIRST** at Madison Square Garden, New York, Chicago, Ft. Wayne, Detroit, Indianapolis, Grand Rapids, London, &c., &c., &c. A few of the finest Buffs in the country for sale now. Eggs $3. Breeding stock for sale to make room for young chicks.

J. B. CLARK, 312 Evanston ave., Chicago, Ill.

**Now is the Time You Want Eggs!**

By feeding your fowls a little

**Banner Egg Food and Tonic**

your hens will lay lots of eggs, and you can double your profits, as this is the season of the year when fresh laid eggs are scarce.

Remember this TONIC does not force your hens to lay, it only brings them up to the pink of condition, which is necessary for egg production.

To those who have never used it, we simply ask you to give it a trial, and be convinced.

Prices: 1 lb. can 25c, by mail 40c; 5 cans $1 on board express in New York.

Our immense illustrated Poultry Supply Catalogue, FREE.

**Excelsior Wire & Poultry Supply Co.,**

**W. V. RUSS, Prop.** **26 & 28 Vesey st., New York City.**

When writing kindly mention American Poultry Journal.

## COLE'S ROCKS.

M. D. Cole, of Romeo, Mich., exhibited a fine lot of White and Buff Plymouth Rocks at the recent Detroit show, winning first on hen and second on pullet. At Saginaw, with 11 entries, he won 1st pen, 1st and 2d cockerel, 1st, 2d and 3d hens, 1st pullet, 3 specials and 3d cock tied 2d. His fowls scored from 92½ to 94¾. W. J. Ward, 300 Dragoon avenue, Detroit, writing Mr. Cole says, "The cock you sent me is a beauty, as white as snow. It would be pretty hard to find a better shaped bird anywhere. I must say that I have always received the full worth of my money and got the birds promptly and in first-class condition." We can recommend both Mr. Cole and his birds.

## CORRECTION.

Mr. G. W. Brown, of Camden, Ark., informs us that there was an error in the report of his winning Barred Rock cockerel in last number of A. P. J. The score of the bird should have been 94 instead of 93¼. This is a very high score and is in line with the scores usually received by him in all classes at the shows. He exhibited at four of the best shows in the south this season and won ninety-one prizes, two-thirds of which were firsts. At the Memphis show, in competition with the best birds from several states, he entered thirty birds and won twenty-three prizes. Our readers who are interested in his varieties should look up his advertisement.

Under date of February 12, Mr. Joe Farmer, the Barred Rock specialist of Flushing, Ohio, writes that he has finished showing for the season and sends in his record. At the Beach City, Ohio, show last November he won first and second hens, score 94 each. There were 120 birds in the class and Judge Bridge placed the awards. At the Ohio State show at Wooster, Burgott, judge, he won fourth cockerel, score 92½. At Cambridge, Ohio, with a different lot of birds, under Judge McClave, he won first, second, and third hens, first and second cockerels, third and fourth pullet. A pair which he sold for this show won fourth on cockerel and second on pullet. Trade has been good with him and he has sold nearly all his surplus stock.

**How to Build Poultry ..Houses..**

# THE NEWEST, BEST AND MOST COMPLETE BOOK OF INSTRUCTIONS ON HOW TO BUILD POULTRY HOUSES, FIXTURES, INCUBATOR HOUSES, Etc.

Half the success with poultry is in proper housing. Any old thing with a roof will not bring best results. Many people fail for this reason and wonder why it is. This book does away with all experimenting. You don't have to guess at anytning. You get the results of years of experience and thousands of dollars spent in trying different plans of houses. There is no worrying, no scheming, no doubt, about the proper amount of space and interior arrangement. Everything is illustrated and thoroughly explained. The value of this book cannot be appreciated without a perusal of it. **It is of great value to the small breeder with a few fowls, and to the large breeder with his hundreds.** No time or expense has been spared to make it complete. Price 50 cents, postage paid.

This book will be given with a 15 months' subscription to American Poultry Journal for 75c, or will be given free for four subscriptions.

Address AMERICAN POULTRY JOURNAL, - - 325 Dearborn Street, CHICAGO, ILL.

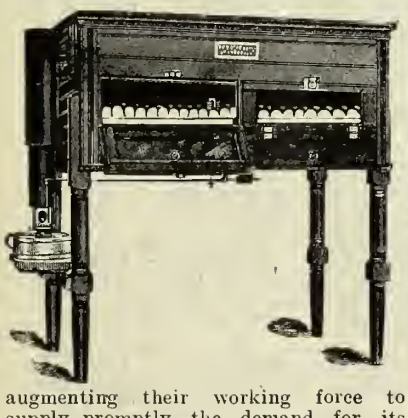
## THE "PETALUMA" INCUBATOR.

The public has read from time to time of the numerous heavy orders received from all over the United States, Europe, Asia, Africa, Australia, and the Hawaiian Islands, besides the enormous home sales for "Petaluma" Incubators and Brooders. They have also read of the large daily shipments; that factory hands are working overtime, in some cases working day and night; that the force is daily being increased as rapidly as suitable men can be found. These big orders and heavy shipments are not the exception, but the rule. This machine holds no unimportant place in our American manufactures.

For several years there has been no "closed season" for the factory. Except on the Sabbath its busy pulse has not ceased to throb for a day, and the interior of the several floors have resembled a bee-hive in activity and life.

While the poultry season was in its annual quietude the company was receiving orders from distant lands and foreign shores and was kept busy making steamer connections.

The revival of the American season comes with not all of their foreign orders shipped and as a result they are heavily



augmenting their working force to supply promptly the demand for its world famous goods.

From a modest beginning the concern has advanced until now, although our people do not realize the fact, it is the leading concern of its kind in the world. Its people have asked no lands and no bonuses. They have paid for what they possess. Through their enterprise the "Petaluma" Incubator is known and appreciated as the most practical and successful Incubator in the world.

Of late years the "Petaluma" Incubator of Petaluma, Cal., has been "reaching out" for the eastern trade, sending annually a traveling representative to the principal cities and as a result the best houses in the world are engaged in selling "Petaluma" Incubators, and it will be found on visiting any town or city that the representative and most influential firms in the place sell these machines. The daily shipments of "Petaluma" Incubators and Breeders, therefore, all through the United States are very large indeed. They sell more machines on the Pacific Coast than all other makes combined.

Extract from a speech made by the Hon. John P. Irish, under the auspices of the Lecture Bureau at the Opera House, Feb. 27, 1900:

"The lecturer was introduced by Attorney F. A. Cromwell as a man known from Cape Cod to the Philippines." The lecturer said that this was "his first visit to Petaluma. All over the state and the east, he has heard of Petaluma. San Francisco, Los Angeles and Petaluma were the three California cities known in the east. It is the "Petaluma" Incubator which gave Petaluma this fame. Everywhere he went in the east the people asked him if he lived in Petaluma. When he wanted to know the reason of the question they told him of the "Petaluma" Incubator. He hoped that when Petaluma secured a new seal, the device would be a "Petaluma Hen" cackling over a new-laid egg.

Readers will find their advertisement in this issue of AMERICAN POULTRY JOURNAL.

Their machines are sold in this section by jobbers in Cincinnati, Columbus, Indianapolis, Fort Wayne and many others.

Write the company for name of nearest dealer to you.

---

New catalogue of Green's Nursery Company, Rochester, N. Y. We have just received this attractive catalogue, well illustrated, with lithograph covers, illustrating four varieties of peach, four varieties of apple and four varieties of Japan plums. Green's Nursery Company was established over twenty years ago, and has pleased patrons in every state and territory. Rochester trees are famous all over this country. This firm makes a specialty of plums, apples, peaches, cherries, small fruits, and ornamental plants, trees and vines; also issues two catalogues, one devoted to fruits and another devoted to ornamental trees, plants and vines; either or both catalogues will be sent free on application.

---

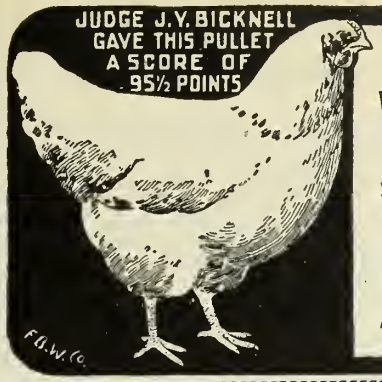
Mr. H. S. Marks, proprietor of the Lanark Poultry Farm, Lanark, Ill., has enlarged his advertisement in this number and quotes very low prices on stock and eggs of the varieties he handles. He states that he has 500 head of fine breeding stock from which to fill orders and guarantees the birds he ships to please those who receive them. He has sold many birds that have won for his customers this season, and he has just as good stock left, which he wishes to dispose of this month, and hence the low price he has placed upon them.

---

Mr. C. O. Duffy, the White Rock specialist of Owensboro, Ky., has a change of advertisement in this number. Mr. Duffy is perhaps the leading White Rock man in the South. He has birds that have met and downed the strongest competition and it is from stock of this kind that his customers will get eggs for hatching this season. He has been breeding fancy poultry for many years and has always kept his flocks up to the highest standard of excellence.

---

Schwab Bros., of Rochester, N. Y., have won twenty-eight regular and eighteen special prizes this season on their Nonpareil strain of Barred Plymouth Rocks. Among the specials are four silver cups. Two were won at Cortland, N. Y.; one at Rochester, N. Y., which was the Barred Rock Club's State Cup and one at Chicago, which was the National Cup open to competition of all club members. This last cup was won on best cock, cockerel, hen and pullet.



**Majestic Strain**

**White Wyandottes.**

There are no handsomer, more profitable birds in the world than the White Wyandottes. My stock is bred from prize winners at the Eastern shows. I now have yearling stock for shipment—a limited number of pullets and plenty of cockerels. **Score Cards by Judge J. Y. Bicknell. Eggs for Hatching** from stock scoring 93½ to 96½ points. One sitting, $5.00; two sittings, $8. A trio of Pedigreed Belgain Hares for sale.

**C. S. WETMORE,**
**Box 377, Lockport, N. Y.**

**BIG STRAWBERRIES.**

I want 200,000 people to send for the finest plant catalogue ever published of strawberries, raspberries, blackberries, fine fruit or novelties, currents, grapes, &c. 16 years in the business. The most complete strawberry nursery in America. Send for catalogue today. Address,

D. BRANDT, Box 420, BREMEN, OHIO.

**20½ POUNDS**

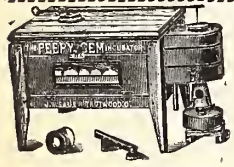
Was the weight of my 1st prize pair of Pekin Ducks at La Crosse Show, Dec., 1900; age 7 months. Stock and eggs for sale. Also White and Barred Ply. Rocks and Toulouse Geese.

HARRY H. HUGGETT, Fall River, Wis.

**Buff Orpingtons.**

The new buff breed—wonderful layers and handsome birds. At Indianapolis, Dec., 1900, I won 1st, 3d and 4th cockerel, 1st and 2d pullet and 3d hen. Stock and eggs for sale.

JOHN McMILLAN, Bridgeport, Ind.



**60 Egg Incubator Complete $5.**

Self regulation, ventilation and moisture Four sizes, Brooders $3.00 up. All machines warranted. New catalogue and testimonials free.

J. W. SAUER, Trotwood, Ohio.

**RED-GOLD.**

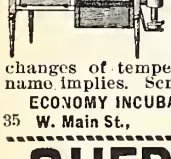
An Eastern strain of Golden Wyandottes. In our 15 years' experience and study we have brought them to a high state of perfection. Some of our recent winnings at Brattleboro, largest fall show in all N. E., I. K. Felch judge, we won 3d cock (in molt), 1st, 2d hens, 1st, 2d pullet, 1st, 2d pens. At Hartford, first week Dec., 1900, on 7 entries, won 7 prizes and special SILVER CUP. Circular free, giving other winnings and prices on eggs and stock.

E. S. WAYNE, Rainbow, Conn.

**Golden Hamburgs.**

Stock and eggs of this beautiful variety for sale. They are unexcelled as layers. I won at Jacksonville, Dec. 1900, 1st, 2d, 3d ckl. 1st, 2d, 3d pullet and 1st pen. Write for prices.

Richard C. Reynolds, Jacksonville, Ill.



**—ECONOMY— Incubators and Brooders.**

Hatches all fertile eggs. Absolutely automatic. Saves oil. Constructed so it is not affected by sudden changes of temperature. It is all that the name implies. Send for circulars.

ECONOMY INCUBATOR AND BROODER CO.,
35 W. Main St., Battle Creek, Mich

**SHERIDAN'S CONDITION POWDER**

Nothing on earth will make hens lay like it. It will keep chickens strong and healthy; will make your pullets lay early; is worth its weight in gold for molting hens and prevents diseases. It costs only one-tenth cent a day per hen. Large cans most economical to buy.

**MAKE HENS LAY**

No matter what kind of foods you use, mix with it Sheridan's Powder. It will increase your profit this winter when the price for eggs is high. It assures perfect assimilation of the food elements needed to form eggs. Sold by druggists, grocers and feed-dealers.

**A Nestful of Eggs!**

May be obtained in winter if you do as many successful poultrymen do, namely, mix daily with the mash food Sheridan's Powder. Has been used and indorsed over thirty years.

**Free,** post-paid, M. K. Boyer's book on Poultry Diseases and Treatment.

If you can't get the Powder send to us. One pack, 25 cents; five, $1. Large two-lb. can, $1.20. Six cans, exp. pd., $5. Sample best poultry paper sent free. I. S. JOHNSON & CO., Boston, Mass.

A HAPPY FAMILY.

The accompanying illustration shows a Sure Hatch "Happy Family." It is one of the many pictures made from real photographs, given in the handsome catalogue of the Sure Hatch Incubator Company of Clay Center, Neb. The Sure Hatch incubator has been one of the surprises of recent years in the poultry world. Its inventor, M. M. Johnson, is a practical poultry raiser. In designing this incubator he was guided more by practical common sense than by any untried theory, and believed that it takes several things to make a perfect incubator; the material, the construction and the principle of operation and management. As to material, the Sure Hatch is built of California redwood, the only thing which stands continually the heat and moisture needed for perfect incubation without cracking, warping or pulling apart. It has copper tanks guaranteed for twenty years. The ventilation and application of moisture follow the natural method of the hen; the lamp is the famous hydro-safety with a water-jacket which prevents all danger of explosion or smoking; the water regulator is as certain and as positive as a thermometer. The Sure Hatch has three walls and two dead-air spaces, being one more wall and one more air space than any other incubator—in short, from first to last there is not a point overlooked which will contribute to its success, durability and ease of operation.

While the Sure Hatch has been in use for a number of years, it has been generally advertised for only four seasons, but in that short time the demand for the machine that "hatches sure" has so increased that a new factory became necessary, and last summer a complete plant was erected and equipped with all modern machinery, putting the company in position to manufacture at a lower cost than most of its competitors, and it gives this advantage to its customers.

The record of the Sure Hatch at shows and fairs is something of which its makers are justly proud. Their list of first premiums is a long one and has been won strictly on the machine's merits.

The same company make the celebrated Common Sense Folding Brooder, which meets the needs of poultry men who haven't the time to teach chicks to climb a ladder.

Hatch is sold is one of the strongest that it is possible to give. One trial is all they ask—it must out-hatch other machines the first time, not after the season is nearly ended.

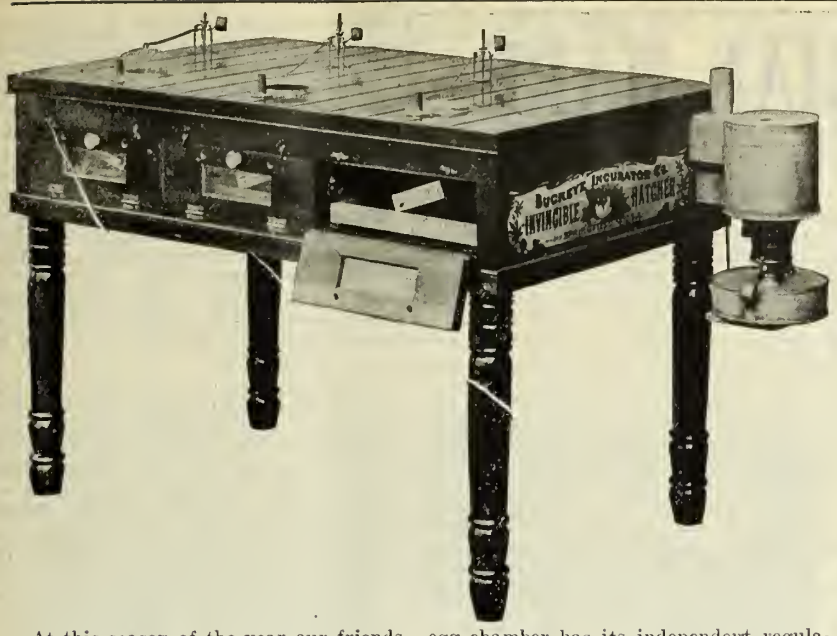
The handsome catalogue, profusely illustrated and containing a vast fund on poultry information, will be sent to any of our readers free. Ask for it. Address Sure Hatch Incubator Company, Clay Center, Neb., and mention this paper.

R. E. Haeger, of Algonquin, Ill., has 200 Barred Rocks for sale, and can make prompt shipment of stock. He can mate up pairs, trios or pens that will produce show birds. He won at the late Chicago show 2d and 3d hens and 3d cockerel, also Gold special for second best largest and best display. His pullets were most too young to show up to best advantage. His 3d cockerel was pronounced by judges to be the best in the class when fully developed. Mr. Haeger refused $50 for this bird. He also refused $25 for his best hen and $20 for a pullet that did not get a place. He has won regularly at Chicago for several years past.

Blaisdell & Quimby, of East Rochester, N. H., are Barred and Buff Rock specialists (Montauk and Burdick's strains), with a splendid show record won at New York, Boston, Amesbury, Beverly, Worcester, Milford, etc. Mr. Quimby breeds Barred Rock, and Mr. Blaisdell, Buffs. Their stock is farm raised, strong and vigorous, and satisfaction is guaranteed every customer.

Mr. L. E. Meyer, breeder of Black Langshans, Bowling Green, Mo., won nine prizes at the St. Louis show, as will be noted elsewhere in the list of winnings of AMERICAN POULTRY JOURNAL advertisers. Four of these prizes were firsts. He is having a great demand for eggs and is making some shipments to eastern points.

C. C. Hassler of Hollowayville, Ill., is very much pleased with his season's business and with business secured through A. P. J. He writes that his Silver Laced Wyandottes are better than ever, of which he will have two pens headed by first and second cockerels, at La Salle. He still has a few cockerels for sale at a bargain.



At tbis season of the year our friends, the incubator manufacturers, are working over time to answer tbeir correspondence and fill their orders. Probably no ads or editorials in this issue will be more carefully read than the announcements of the makers of the various hatchers. Among tbe several excellent machines on tbe market none enjoys a higher reputation than those made by the Buckeye Incubator Company of Springfield, Obio. We present herewith a view of only one of their several different patterns. For some time tbe Buckeye people have made a leader for general trade of their bantum at only $5. While this is a marvelously low price, the fact that it is but a 50-egg machine puts it out of the question for the practical poultry raiser, who must make larger hatches. However, the Bantam is a dependable machine and at the price is great value.

The Buckeye Company build a full line of incubators of all kinds. As will be noticed from the above illustration, each egg chamber has its independent regulator, so that any one chamber or all can be operated independently of the others. Tbis assures more perfect regulation during the process of incubation, even wben all chambers are filled. The Buckeye machines are well constructed in every respect, only the best materials being used and they are sold under a broad guarantee. The Buckeye catalogue is a plain sensible talk on the machine; one that can be readily understood. The catalogue will be gladly mailed to any one on receipt of 4c to pay postage. Thousands of poultry raisers are using the Buckeye incubators all over this and in many foreign countries. This would not be so were it not true that the Buckeye is a thoroughly satisfactory machine in every way.

Write them to-day for their catalogue and judge for yourself. Address Buckeye Incubator Company, Springfield, Ohio, and mention this paper.

## ARNOLD'S BUFF LEGHORNS, BUFF ROCKS, AND WHITE AND BLACK BELGIAN HARES.

Aug. D. Arnold informs us that in Buff Legborns and Buff Plymoutb Rocks he never was so strong in breeding birds. He has only a few yards of each but great in quality. He says he has sold more successful winners this season tban ever before and that many winners in the leading shows both east and west are direct out of his yards. He informs us that his exbibit of white and black Belgians at tbe late Madison Square Garden sbow attracted much attention, and that tbe greatest authority on Belgian hares in America, Dr. B. C. Platt, of Los Angeles, Cal., who is president of the National Association of Belgian Hare Judges saw the whites and spoke of them in the bigbest praises and tbeir future. The editor of the Belgian Hare *Gazette* of Boston says this of them in tbe February number of the *Gazette*: "We never saw any wbite Belgian hares until we saw Mr. Arnold's. They are true Belgians, having extra good size and fine boned. Dr. Platt and several otbers who examined them said tbey were excellent specimens and possessed all the true characteristics of the Rufus reds." Mr. Arnold has in the white Belgian hares done what he did in the Buff Leghorns, being the first one to introduce them to the fanciers of America, and he thinks there is a great future before them.

John W. Yates, of Burnett Junction, Wis., is a very extensive breeder of Imperial Pekin ducks, White Rocks, White Wyandottes and Buff Cochins, witb stock and eggs for sale. Mr. Yates devotes his whole time to poultry and is making this his business right along. He has splendid facilities for shipping and fills all orders promptly, giving value received to all customers.

Mr. Geo. Muck, of Edinburg, Ind., now has his several yards of prize winning Barred Rocks mated and is prepared to fill all egg orders promptly. His magnificent show record this season has brought him an immense trade in stock and he has not had a single dissatisfied customer.

The publishers of the *Fanciers' Guide*, of Montpelier, Ind., have purchased tbe *Belgian Hare Champion*, of Los Angeles, Cal., and *Poultry and Pet Stock Review*, of Poneto, Ind. The three publications bave been consolidated and will be published under the name of *Fanciers' Guide*, Montpelier, Ind.

## Reliable Breeders' Directory

**OF THOROUGHBRED POULTRY.**

We believe all breeders whose names appear below to be thoroughly reliable and honorable, and their stock to be of superior quality. Address will be inserted in the JOURNAL for such breeders as can satisfy us upon the above points, and that their stock is thoroughbred, for **$2.00** per year, payable strictly in advance. Those who breed more than one variety, can have address under other headings (after the first) for **$1** for each variety.

# THE BELGIAN HARE.

## HOUSEE AND HUTCHES.

Continued from February Number.

It will be necessary for us to construct our floor so that it will keep out mice and rats and a foundation of brick with a liberal coat of cement makes a floor that is easily cleaned and if built to drain, can hardly be excelled; but it must be built high enough to make the connection with the building absolutely tight. The floor should be a little higher—say three inches on the high side—than the ground outside and sloped to about level with it on the low side, unless a drain be constructed in the center. Another good floor is made by sinking a close woven wire netting on edge around the inside of the building, fastening same to the frame work near the bottom. After replacing the dirt around the wire pack it, as well as the remainder of the floor as hard as possible, soaking it with water and sweeping it level. After you thus get your floor hard a light coat of cement will make it firm and hard and you will not be troubled with rodents coming up from beneath.

Each breeding doe or stud buck must have a separate hutch, which should be no less than 2½x1½x3 feet in size. In building the hutches be as liberal in the size of them as possible as the hares should not be too closely confined. When making the hutches in the building just described use 2x4 inch uprights set four feet apart, broad side out, and two and one-half feet from the outside wall. The uprights should be 7 feet 3 inches long and connected with another attached to your outside wall by 1x3 inch cross pieces, on which the floors of your hutches are to be placed. The top edges of the lower cross pieces should be fourteen inches from the ground and on these lay the floor for your first tier of hutches, fitting it nicely around the uprights and letting the outer edge come flush with the face of the uprights. The second and third floors are laid the same way, putting each two feet above the one below. Use tongue and grooved flooring to prevent drainage from the hutch above to the one below it. The top of the third tier may be made of the same lumber as your casing instead of the flooring, if you desire to cheapen it a little. Next put in the partitions in each tier attaching them to the uprights. Wire netting is sometimes used in making these partitions, but a solid wooden one is preferable as it gives each animal quarters in which it cannot in any way be disturbed by its neighbors. Now set a 1x3 inch upright six feet long, into the edge of the floors in front of each row of hutches, putting them twenty-five and one-half inches from their center to the center of the 2x4 uprights, this will allow your wire to lap over the edge of each of the uprights one inch which will be sufficient for stapling. Take a roll of one inch mesh rabbit wire netting twenty-four inches wide and staple end to edge of roof of top tier of hutches and the sides to edges of 2x4 and 1x3 uprights and to floor of each hutch, stretching it tight and cut off at floor of lower hutch. Repeat this with each row of hutches. You thus cover a part of each hutch in the row with one piece of wire, which avoids much unnecessary cutting and makes your hutches all look alike and adds to their appearance.

In making the door frames, to fill the remainder of the opening in each of the hutches use 1x3 inch white pine, mortising the ends to make a strong and neat joint. Stretch your wire netting over the inside of the frame and as tight as possible and staple. Do not use staples that will go through the frames as you will have a neater job and no danger to yourself or your animals if you use those that will not quite reach through. After fitting your doors attach the hinges, which should be the small strap hinge and the hasps, which should be light and strong. Do not use several different sizes and kinds of hardware as it makes a very bad general effect. In attaching the wire to the fronts and doors, be careful that there are no rough edges or stray wires. A good way to cover up these is to put a strip of small moulding over the edge, or place the staples so that the ends of the wires will come under them. This completes the hutches for one side of

# BELGIAN HARES.

A practical breeder knows "that good points do not come by accident;" there must necessarily be good blood to sustain points. High grade **Imported Does** bred to such bucks as Fashoda's Image, sired by Ch. Fashoda, world's prince of Belgians; Banbury Dude, sired by Lord Banbury, h y Ch. Banbury, by Ch. Moulton Mystery; Yukon Lad, sired by Lord Dearborn, by Ch. Yukon, by Ch. Unicorn; Lord Curzon, sired by Gold I V, by Old Gold, by Ch. Moulton Mystery; Edinboro Boy, sired by Golden Edinboro, by Ch. Edinboro, by Real Gold; mean points and pedigree combined. The above bucks ar stnd—service limited. No job lots. No bargain sales$ No scrubs. No 95 to 98 polut Hares for $5.00. I am not selling **score cards.** Will give you **honest animals** at the **right price.**

**W. T. GALLAWAY, 496 La Salle Ave, Chicago, Ill.**

our house and the other side should be built up in the same way.

The nest boxes for the does may be built into the hutches during their construction if desired and should not be less than 12x16x12 inches in size with an opening about 6x6 inches in one end and the top or cover hinged so as to enable one to look in and clean it out easily. Probably the best style of nest box is the one that may be placed in or removed from the hutch at any time and can be cleaned and thoroughly aired before being used again. Do not make the nest box so high that the doe cannot get on top of it, when she desires to get away from her young and rest, for you will find her here most of the time after the young are a week or ten days old until they are weaned.

The hay rack, which may be made of wire netting, pouch or bag shaped, should be attached to the side of the hutch about six inches from the floor and the food and water vessels should be set in small frames, which can be made of wire, and attached to the side or floor of the hutch to prevent them from being upset. The hares will often seem provoked at something and if the food and water cups are not fastened they will take them in their mouths and throw them from one side of the hutch to the other, thus wasting the food and making the hutch wet and dirty. Our diagram No. 2 shows one hutch in detail and complete, while No. 3 illustrates one side of our house inside after the hutches have been built.

After placing the rows of hutches on each side of our building, we have only taken up five feet of our twelve in width, and have seven feet left in center. In this space we construct our inside runs making them three feet wide and twelve feet long after the same plan as the hutches and three tiers high. This leaves us a passage way two feet wide around runs and in front of hutches. We will put only one partition in each tier and make it movable thus we can have two runs of medium length in each tier, or a long one and a short one (which can be used for a hutch) as occasion may demand. By building our run floors two feet above each other we can again use our twenty-four-inch netting to advantage, but instead of putting it on up and down as on the front of the hutches we put it around the tiers of runs, one strip to each tier, letting each piece cover both ends and one side. We will make our doors, one for each run and built same

Belgian hares owned and bred by Chas. McClave, New London, Ohio.

as those for the hutches, on the other side of the runs and at the extreme ends and then covering the remainder of the fronts between the doors with the netting we have our runs complete. Our diagram No. 4 shows the floor plan and arrangement of hutches and runs, also outside runs. In the runs, either outside or in, at different distances place barriers or hurdles that will force the hares to jump and exercise and in this way develop that racy appearance they should have. These obstacles should be from six to eight inches high and sometimes higher.

BELGIAN HARE BREEDERS.

We will tell any one how to cure snuffles, slobbers, barrenness and indigestion. Inclose stamp. Address Vt. Belgian Hare Co., 10 Center St., Lyndonville, Vt. 3-1.

A REMARKABLE OFFER.

*Home and Flowers*, of Springfield, Ohio, is one of the brightest and sprightliest of the modern magazines. It discusses how to grow flowers, how to make the house and the landscape beautiful, and is really practical and helpful. Without question it stands at the head of all floral publications, and there is not a home in the land which will not be better and happier for its monthly visits. While the regular subscription price is $1 a year, the publishers are making a special offer good for thirty days of three months' subscription for only ten cents, and they send postpaid to each subscriber received on this offer a choice rose plant of vigorous stock—such a plant as many florists ask 25 cents for. We know every one of our readers will be interested in *Home and Flowers*, and we do not know of a better way in which to spend 10 cents. Send for it. Address Floral Publishing Co., Springfield, Ohio, Citizens' Bank building.

CHARLES McCLAVE'S WINNINGS.

Charles McClave of New London, Ohio, made remarkable winnings at Cleveland and Akron shows held January 8-12, 1901. He made two exhibits at the same time, winning forty-three firsts, two thirds, one fourth and one fifth prizes, winning 80 per cent of all prizes entered for at these two large shows. This fully sustains Mr. McClave's statement that his is the largest and best equipped practical poultry plant in Ohio. Mr. McClave has been very busy during the past season judging at different shows and reports a splendid business for the season. He still has a large stock on hand and can fill almost any number of orders of his specialties for the next two months.

We are in receipt of a copy of the Cyphers Incubator Company's new catalogue for 1901 entitled, "Profitable Poultry Keeping in All Its Branches." AMERICAN POULTRY JOURNAL readers will be especially interested in the photographic groups showing over sixty of America's largest and most successful

poultry plants including duck ranches, broiler farms, egg farms, winter chicken and roaster farms and the yards of numerous breeders of standard poultry. The Cyphers Incubator Company is now operating its own offices and sales rooms in Chicago, Boston and New York City. This brings them closer to their trade and has proved a good investment. All goods of their manufacture are made at their model factory, Wayland, N. Y., under the personal supervision of Mr. Chas. A. Cyphers, inventor of the Cyphers Non-Moisture incubator and president of the company. Additional to these goods, they carry at each of their stores a very complete line of poultry supplies and are prepared to furnish the customers the best of everything for the poultry yards or farm. Send ten cents for their No. 5 catalogue.

In the description of the Boston show in February number of A. P. J. Mr. Thos. F. Rigg was inadvertently given credit for the entire article. The description of the show was given by Frank Heck and comment on the classes was made by Mr. Rigg. We make this announcement in order that the readers may know whose opinions were presented and in justice to both Mr. Heck and Mr. Rigg.

Mr. Morton Ingalls, of Middletown, Ohio, was first on cockerel in the Silver Wyandotte class at the last Cincinnati show, in competition with birds of the most noted strains. He also won first on pullet in the Golden Wyandotte class. He only entered four birds and would undoubtedly have won as much more in proportion had he entered more birds, as his stock is of the best.

Mr. John Coolidge, of Galesburg, Ill., informs us that he has quite a number of fairly good White Wyandotte cockerels which he is disposing of at $2 and $3 each. These birds were bred from high-grade stock and have good breeding back of them.

Those wishing eggs from J. L. Vandermast, Jr., & Co.'s pea comb barred Plymouth Rocks should order them this coming month, as they are having numerous calls for eggs of this variety. Address at Monroe, Iowa.

AN ARTISTIC CATALOGUE.

The 1901 catalogue of Mr. E. F. Hodgson, of Dover, Mass., the manufacturer of the Peep O' Day poultry specialties, has just come to hand and it is a fine specimen of the printer's art as well as a book worth keeping for future reference. Everything advertised therein is thoroughly practical, having been carefully tested by the maker. Mr. Hodgson's latest novelty is a series of portable poultry houses, in all sizes, which have been so favorable received that the spring orders are already taxing the capacity of the large 'Peep O' Day" plant. A copy of this catalogue may be had free by writing to the manufacturer.

## AS TO WEIGHT.

The standard weight of a fowl of any variety should be its natural weight under normal conditions and good health. The very fat bird is not in a normal condition. Hence it is wrong to place the standard weight of a variety so high, that, in order to get up to weight in the show room, or eltsewhere, it shall be necessary to fatten the specimen. For fowls should be fattened excessively when prepared for market only.

The weight of the Plymouth Rocks in the Standard is so high now that it

A perfect wing of a line-bred Light Brahma pullet, owned and bred by U. Grant Davidson, Manson, Iowa, originator of the "Great American Strain."

is usually necessary to fatten them to get them up to the required weight. Every exhibitor knows the evils that result to breeders that are thus fattened for show.

The Plymouth Rock is the utility fowl par excellence, and in my opinion

Sample group of line-bred Light Brahma cockerels of the "Great American Strain." Bred and owned by U. Grant Davidson, Manson, Iowa.

should be bred on the blocky order, with medium legs, in length, broad back and full breasts. This type can only be perpetuated, or maintained by breeding to a good medium weight. Because, if we try to get extra heavy specimens, we shall be forced to breed to more height, and so breed tall angular specimens, that lose in symmetry and beauty; while at the same time their practical qualities are more or less sacrificed.

On the contrary, the beauty and the majesty, so to speak, of the Light Brahma, consists in its great size and noble appearance as it stalks about the yard,—the monarch of the feathered tribe. Fowls of this class I would breed to great size and height, and the greatest possible weight, consistent with good health. But, I do not consider it advisable to fatten even the Brahma in order to attain excessive weight. But, I would breed for all the weight that great height and breadth would carry in a normal condition.

To sum up: I think that the Asiatic class should have heavy standard weights—all that they can tip-toe and possibly reach; but I would not put a weight on the American breeds that they must be fattened for, and in a manner diseased, in order to attain when placed on exhibition. In this class, the medium weight specimen is the most desirable—the more beautiful and profitable.

H. B. GEER.

Nashville, Tenn.

---

We have sent you sample copy of A. P. J. Our new book "Why Poultry Pays and How to Make It Pay" will give you the information you desire. It will be sent postpaid upon receipt of price, 50 cents. Cold storage plants are not practical upon a small scale. The best plan would be to ship your eggs to a good market and have them held in cold storage. You can get the names of reliable poultry dealers as well as manufacturers of appliances by referring to our advertising columns.

---

The Stephani Poultry Co., of Belleville, Ill., have a change of advertisement this month. They have recently purchased a high priced pen of Barred Rocks from A. C. Hawkins and are selling eggs for hatching from these birds at a very reasonable price. This last addition to their already high grade flocks gives them a number of breeding yards of great excellence.

# 4 More Silver Cups 4

**Awarded to the "Nonpariel" Strain of**

# Barred Plymouth Rocks,

AMERICAN PLYMOUTH ROCK CLUB. MEMBER.

2 at Cortland, N. Y., 1 at Rochester, N. Y., being the New York State Cup, and the National Club Cup at Chicago, Ill., for the best cock, hen, cockerel and pullet. This with 28 regular and 18 special prizes completes their record for season of 1901.

We now have our yards mated, each headed by a winner of note from OUR WINNING STRAIN. All our prize birds are in these yards from which we will sell eggs at

**$3 per 13; $5 per 26.**

Satisfactory hatch guaranteed. SPECIAL—We still have 3 cocks and several cockerels, hens and pullets. The right kind at right prices, which with description will be gladly given,

**SCHWAB BROS., Rochester, N. Y.**

The Fishkill Poultry and Pekin Duck Farm, of Fishkill Landing, N. Y., have 30 first prizes to their credit this season. They breed Mammoth Pekin Ducks, Black Minorcas, Silver Spangled Hamburgs and Golden Sebright Bantams. The proprietor of the farm, Mr. William E. Knight, is a thorough fancier and not only understands mating his favorite breeds but he knows how to put them in show condition. His exhibit of Pekin Ducks at Chicago was admired by all breeders of these fowls and the birds were exceptionally fine specimens in all respects. They were fit to win anywhere.

**NATIONAL MEDICINE CO., Doll Dept. 489, New Haven, Conn.**

## O. K. EGGS.

Editor AMERICAN POULTRY JOURNAL.

I was recently called to Ashley, Ohio, to do some private scoring for several fanciers, and was much surprised to find in the yards of Mr. Charles Hopper such a fine flock of Barred Plymouth Rocks. It is the best average flock I have seen this year in quality, numbers, shape and color. Mr. Hopper has a large number of Rocks of his excellent strain, and I did not find a cull among them. They are free from feathers on the legs, have about the correct color, are good on feet, comb and wing, with size above standard weights. Mr. Hopper has about solved the single mating system. Those of your readers who wish good Rocks should correspond with Mr. Hopper. I found many birds good for 93 in good show condition, and the number of the flock is so great he can supply many with good colored, heavy weight birds. He is a perfect gentleman and reliable.

FRANK W. MCKENZIE.

We are in receipt of the following from Mr. M. S. Gardner:

PHILADELPHIA, N. Y., Jan. 28, 1900.

Editor A. P. J., Chicago, Ill.

DEAR SIR:—Have just returned from New York and enclose list of winnings there (B. P. Rocks):

Cocks, 1st, 2d, 4th and 5th.
Hens, 1st and 2d.
Cockerels, 1st, 2d and 5th.
Pullets, 1st, 2d and 4th.
Pens, 3d and 5th.

Also the $100 cup for best cock, hen, cockerel, pullet and pen; the grand sweepstakes, president's cup (value $100) for best Plymouth Rock cock, hen, cockerel and pullet, any variety; the special for best Barred Rock cockerel in the show and gold special for best Plymouth Rock of any variety hatched in 1900, making a clean sweep of all specials offered and all firsts in the open class, a record never equaled in Madison Square Garden by any Barred Rock breeder.

I could have left my four first prize winners at home and still have won three firsts and all specials. In the last three years I have won eight of the first prizes at Madison Square Garden out of the fifteen offered, or more than all competitors combined.

My first cockerel scored two points more than his nearest competitor and is without douht the best Barred Rock male in America.

## A GREAT INCUBATOR.

The accompanying half-tone cut shows an Indiana lady who took her Sure Hatch Incubator to her nearest poultry show and made a big hatch with it. It is a fact which has been much commented on at shows this winter throughout the west, that the Sure Hatch is almost always represented hy some enthusiastic user of the machine and not by an "expert" from the factory. The Sure Hatch operates well in the hands of "everyday" poultry raisers. That is why it is gaining an immense popularity;

many of our readers write enthusiastic letters in their praise. Four years ago Mr. Johnson, the inventor of the Sure Hatch, was making machines to order in a back room in his house; today his company employs more than 100 persons, and its sales are doubling and trebling every year. There is no great mystery ahout it, though. The Sure Hatch somehow or other does manage to create a great deal of enthusiasm wherever introduced, and there is no advertisement like a pleased customer. The Sure Hatch Incuhator cases are made of California redwood, which takes on a handsome finish and which stands the heat and moisture of an incuhator hetter than any other wood. The tanks are 12-oz. rolled copper; the fixtures throughout, including the safety lamp, are the very hest. Above all else, however, the Sure Hatch has made a great record as a hatcher and is sold at a reasonable price. Write the Sure Hatch Incubator Company, Clay Center, Neb., for their free catalogue—a strictly up-to-date hook, dealing with the poultry question in a common sense practical manner. Notice the illustrations in their full page ad in this issue, and mention the A. P. J. when you write.

## KLONDIKE.

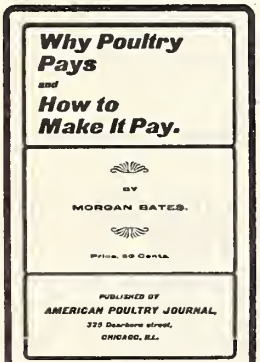
The name suggests a cold country, but also a good country. It is the latter significance of the name that prompted the Klondike Incuhator Company, of Des Moines, Iowa, to take the names they did and apply it to their wonderful chick producers. Klondike Incuhators have proved veritahle gold mines to their purchasers. The large sized 48 page catalogue the company issues contains lots of letters from folks you may know who testify voluntarily to the profits and the large hatches they have secured with Klondikes. They are made in sizes ranging from 80 eggs to 360, regularly, with larger sizes made to order as required.

They are equally efficient in any size. Their process is simple and free from complications.

The Klondike Incuhator Company's catalogue—which is free to any one on request—is as full of helpful facts as an egg is of meat. It tells the whole hatching and hrooding and feeding and raising story for amateurs or professionals, and will be a hook that every farmer and poultry raiser will keep. We recommend that our readers send for it to-day.

J. L. Stair, of Altamont, Ill., commences an ad in this issue. He is a painstaking hreeder of Barred Rocks and has followed a line of breeding that enables him to give a pedigree for several generations hack of any stock hought of him, as he has used the nest box ever since it came into use. He says a customer must he satisfied or no sale. Look up his ad.

Exchange, 9323 Cloud avenue, South Chicago, Ill., have a card in the advertising columns of the AMERICAN POULTRY JOURNAL this month. This plant is managed by Mr. John A. Tipton, who gives all orders his personal attention. Our readers will no doubt find it to their interest to write to Mr. Tipton for a copy of his circular. He has 1,000 head of stock now for sale and is hooking orders for eggs.



# The Short Route to Success

Our new book "Why Poultry Pays and How to Make It Pay," will tell you what you want to know and what you must know if you succeed with poultry. The book was written by Morgan Bates, who was for 14 years editor of **American Poultry Journal.** It is the newest book of the kind and has been pronounced by expert poultrymen to be the

**MOST COMPLETE AND THOROUGH TREATISE ON THE POULTRY BUSINESS**

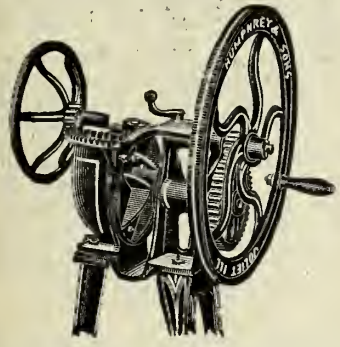
which has thus far appeared. Chapters are devoted to various subjects, and just the points you desire to know are easily found. It tells how to start and how to keep going right after you have started. It instructs its readers in the methods of feeding and the best foods for layers, breeders and exhibition birds. It has chapters on "Diseases of Poultry," "Poultry Houses and Fixtures," "Success With Incuhators," "Success With Brooders," and, in fact, covers every phase of the question. It is a complete and practical guide and directory to the best methods which have brought success to thousands of poultrymen. **It is a school for the amateur and a help to the expert.**

**GRAND SPECIAL OFFER** The regular price of this book is 50 cents. We will send it to you and give you a 15 months' subscription to American Poultry Journal for 75 cents, or the book will be given free for four subscriptions at the regular price of 50 cents.

Address **AMERICAN POULTRY JOURNAL, 325 Dearborn Street, CHICAGO, ILL.**

## GREEN BONE AND EGG PRODUCTION.

There are lots of good things in this world that are more trouble than they are worth. For instance, in many places on this continent there is gold to be found—good gold—but the labor to get it out costs more than the gold brings. A good many poultry raisers have felt the same way about the green bone question. They admit that cut green bone is a fine poultry food, but after trying to reduce the bone to edible shape with a bone-cutter of the ordinary type, have decided that it is more trouble than it is worth, and have given up the idea of using it. It was to meet the demand for a rapid-cutting, easy-running bone-cutter that the Humphrey Green Bone and Vegetable Cutter was put upon the market. Every one who has ever used it admits that it is a wonder, and we are not in the least surprised that it has met with such large sales. In the first place, as will be seen from the accompanying illustration, it is of the open-hopper type; that is, you don't have to chop the bones into fine pieces with an axe, nor pack



them into a cylinder. You simply drop the bone into the hopper and turn the crank, and the machine does the rest. The operator controls the feed, cutting as rapidly or as slowly as he may like. There is nothing about the machine to clog up; there is no friction and no waste of power. In short, it marks the top notch in bone-cutter construction. It is because the Humphrey is built on this plan that the manufacturers are able to sell it under such a strong and binding guarantee. They warrant it to cut more bone in less time and with less labor than any other bone-cutter made, and agree to refund the purchase price in case the purchaser does not find the machine all that is claimed for it. The catalogue and poultry record book issued by this company is one of the handsomest and most complete that we have ever seen. It contains blanks for a full year's poultry record, besides valuable discussions of interesting poultry topics. Send to Humphrey & Sons, box —, Joliet, Ill., for a free copy. Every poultry raiser owes it to himself to investigate this machine.

## CHANGE OF MANAGER AT MAPLEWOOD FARM.

Mr. Walter A. Vonderlieth, of Mt. Pulaski, Ill., is a breeder of winning Light Brahmas and comes well recommended. He has an ad in this issue. His Light Brahmas won six special and seven regular premiums at Mt. Pulaski, Ill., December, 1900, in a strong class of 109. This was in competition with first prize winners at Lincoln, Carlinville, Bloomington and Illinois State fair. This is a record that speaks for itself. He has a fine lot of cockerels and pullets with score cards from Shellabarger for sale at right prices. Mention A. P. J. when you write.

M. Bliss Dewey, Concord, Mich., has had some excellent winnings recently. At the big Battle Creek, Mich., show, in a class of 117 Barred Rocks, he won second cock (losing first by weight; the bird is now up to standard weight); second, third and fourth cockerels. At Lansing, Mich., in a class of 92 Barred Rocks, he won first cockerel, second cock. Three years in succession he has won first pullet in Michigan state show; two years he won first hen in Barred Rocks. His Buff Rocks have won at the Michigan and Ohio state fairs, 1899, and at Jackson, Mich., 1899.

Mr. C. A. Hollis, of Hudson, Iowa, breeder of Hollis' White Rocks, is keeping up his record as a winner by capturing five of the regular prizes at the late Cedar Rapids show in strong competition. Mr. Hollis, whose card will be found elsewhere, has been breeding Whi Rocks for the past ten years and has never lost an opportunity to improve his stock whenever money and skill could accomplish the object. He has used both freely and as a result has a flock of birds which for quality it would be hard to equal. He has some choice birds mated this season from which he will get eggs that are bound to please his customers.

Mr. F. A. Edgeworth, Downer's Grove, Ill., is one of AMERICAN POULTRY JOURNAL's new advertisers, whom we can refer to those of our readers who are looking for something good in Barred Plymouth Rocks. He breeds E. B. Thompson's strain and is selling eggs at the low price of $2 per setting. He has a few first class birds to spare which will make fine breeders for those who purchase them.

James K. Page, of Indianola, Ill., won at Georgetown, Ill., Barred Plymouth Rocks, first, second and third, pullets; second hen, and third pen. Entered fourteen pullets, none scoring below 90¼; five scored from 91 to 92, seven from 92 to 93. Shaner, judge.

We are pleased to call the attention of our readers to the advertisement of Mr. J. K. Austin, of Onarga, Ill., proprietor of the Clover Meadow Poultry Farms. Mr. Austin is a new patron of the AMERICAN POULTRY JOURNAL but an old breeder and enjoys an enviable reputation for sending out high quality at a low price. He has the best shipping facilities and we have every reason to believe that his customers will this season as usual find that they have made no mistake in sending their orders to him.

WHITE WYANDOTTES.

Group of White Wyandotte cockerels on Highland Poultry Farm of C. S. Wetmore, Lockport, N. Y.

GIBSON CITY, ILL., Dec. 28, 1900.

*Mr. Harvey H. Huggett.*

DEAR SIR: The Pekin ducks I received of you were entered at Indianapolis at the Indiana State Poultry Show, and won as follows: First young drake, 97½; third and fourth young ducks, scores 95½ and 95½.

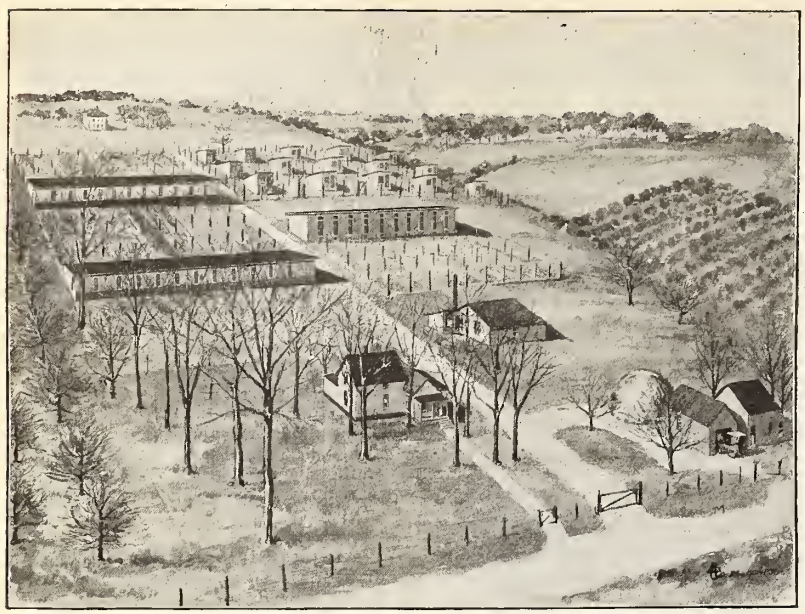
W. C. MOTTIER.

Mr. Jno. J Warren, box A, Victor, Ill., has mated up his pens and is now supplying his customers with eggs. He is a Buff Rock specialist and has given this variety much study. When starting with Buff Rocks some years ago he procured the best, regardless of cost, and by reason of his systematic methods in mating he has gotten together a flock of birds that are

J. H. Geidner, of Rock Falls, Ill., has been breeding Buff Rocks for the last six years and has stock good enough to satisfy the most particular. He had an elegant line at the Chicago show. Look up his ad in this issue.

H. O. Thompson, of Wheeler, N. Y., has just bought the entire stock of Houdans of W. A. Widger, of Baldwinsville, N. Y. By this purchase he now has one of the best flocks of Houdans in the state.

Dr. W. A. Gibson, of Jackson, Mich., was a winner at Cincinnati on Magpies in all colors in every class where shown.



HIGHLAND POULTRY FARM, DES MOINES, IOWA.

It is with pleasure we have this opportunity to call the attention of our readers to this fine illustration of Highland Poultry Farm, Des Moines, Iowa, of which J. D. W. Hall is manager. This farm (of 15 acres) is devoted to the rearing of Hall's prize winning White Wyandottes, and the records he has made at the shows the last few seasons proves the fine quality of his stock. Note his winnings in his ad in this issue. We cheerfully recommend our readers to place their orders with this firm, as they will get full value for their money. Mr. Hall's Roup Cure is giving such fine result that in the near future a stock company will be formed and these goods will be placed in the hands of every poultryman on the continent. His air cell egg model is almost a necessity and certainly a great help in securing good hatches with an incubator. Write them for one.

Jan. 12, 1901.

*Mr. G. G. Bates, Editor American Poultry Journal, Chicago, Ill.*

Dear Sir: Please tell your readers that I have secured full control of the Pleasant View Poultry Farm and will continue the business as before. Having just completed a new hen house 100x14 feet, and will breed the following: Light Brahmas, of which I will have six yards, headed by cocks and cockerels scoring 91¾ to 94, mated to hens and pullets scoring 90 to 94½. Many are prize winners at the Southwestern Iowa Poultry Show held at Clarinda December, 1900, where I won all firsts, etc. (see ad), where I also took first prize cockerel and pullet in Golden Sebright Bantams, scorin 93¾ and 94, also took first prize on young pair and first prize old pair Toulouse Geese, all of which will be in our breeding yards this year, I also have a litter of six Collie pups ready to ship from our fine pair of Scotch Collies. They are registered and have the best blood in them from the best Collie in America and England. I will furnish pedigrees free to purchasers. I have secured also the finest lot of hand sorted seed corn, potatoes and oats to be had, and as I have too much stock of all the above I will sell at half price to close out by March 1. So all who order at once will get hargains. As your readers will see by looking up my ad on page —, I will guarantee all stock to be first class and to be as represented. I remain, yours for honest Standard bred Light Brahmas, etc. ANNIE LEMBKE.

Box C, Griswold, Iowa.

## FISHEL'S GREAT RECORD.

Fishel "came, saw and conquered" at the Chicago show. His string of White Rocks took so many prizes it left but few to competitors, and in a strong class. His winnings are described in his ad. this month. This simply goes to show the careful, intelligent care he has given to his birds and his ability to know a good one when he sees it. Out of his winners, a lot of 900 birds, he certainly must have many others just as good that simply could not be brought to the show. Mr. Fishel has certainly made a big winning.

## O. H. FOSTER'S WINNINGS ON BUFF PLYMOUTH ROCKS.

O. H. Foster, of Gowanda, N. Y., made a grand lot of winnings on his Buff Rocks at Rochester State Show: 1st cock; 1st, 3d and 4th cockerel; 1st, 3d, 4th, and 5th pullet, in a class of 69 competing birds in the open class. He also won all the specials offered and the New York silver cup. He wants to sell a part of these and we can assure AMERICAN POULTRY JOURNAL readers that no better opportunity can be found than this.

## BLACK LANGSHAN.

The winners, Jan. 1-4, 1901, at Danville, Ill. W. M. Mayer: 1st, 2d cockerel; pullet, 1st, 2d, 3d; hen, 1st, 2d, 3d, 4th; first on pen.

Winners at the Illinois State show: 1st, 2d, cockerel, 95¼, 94¾; pullet, 1st, 2d, 3d, 4th, 96, 95½, 95, 95; hen, 1st, 2d. 3d, 95½, 95 95; 1st and 3d pen 191, 190. W. M. Mayer is a breeder and his showing proves it, and in his ad you will see he don't advertise cheap stuff. He is going to put eggs at a reasonable price, $2.00 15 straight, and that isn't all, he guarantees to replace any sale if the fault is caused by his negligence. Refer to the First National bank.

P. Newcomh, of Cedar Rapids, Ia., just won 1st on black Crested fantails, blue Crested fantails, blue Booted fantails; 1st on Splash fantails, 1st on black saddle fans, 1st on my blue Pied pouters, 1st on red Pied pouters, 1st on light Arkangels, 1st on dark Arkangels, 1st on yellow Jacobin hen, 2d on red Jacobin cock, 1st on blue Muff tumblers, 2d on red Bald T. cock, 1st on black Dragoons (cock and hen), 1st on yellow barb hen, 1st on Splash Jacobin hen, 1st on black wing Swallows, 2d on my black Magpies; also won four special prizes. Any one of the above fine birds will be sold at one-half their value to make room for his breeding pairs.

Enoch Idso, of Worthington, Minn., carried off two first prizes on his White Plymouth Rocks at the Luverne (Minn.) show, December, 1900, Shellabarger, judge.

# Agents and Club Raisers Wanted Everywhere

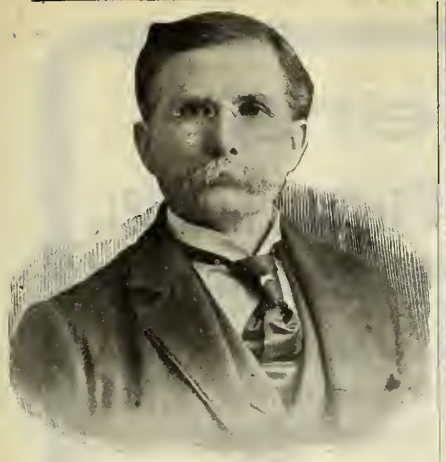
POULTRY ELECTRIC FOOD



DR. J. H. BOYER, FRANKFORT, IND.

## GOLD DOTTE CLUB.

A Golden Wyandotte Club was organized at the Chicago show, its object being to promote the breeding of the Golden Wyandotte fowl of the true type, colors, lacings and markings. R. E. Jones, of Flat Rock, Ind., a breeder of this fowl of national reputation, was made president. A. L. Ringo, of Ringo Bros., of Glen Land, Mich., who won the leading prize for the best exhibit of fowls of this breed at the Chicago show, was made secretary, and Ira C. Kellar, a Golden Wyandotte breeder whom everyone knows, was made chairman of the executive committee.

## R. E. HAEGER.

Mr. Haeger is a live poultryman. He was born in 1875 and has made a specialty of Barred Plymouth Rocks for fifteen years. His home and yards are at Algonquin, Ill. Mr. Haeger has exhibited his stock many times and won many prizes, including every first prize at two of Chicago's shows. He is sending out a new catalogue and will send it to any of AMERICAN POULTRY JOURNAL readers who will write him.

## A GOOD POULTRY HOUSE.

A first-class poultry store has been established at 38 Vesey street, New York. It is under the management of Mr. Adin G. Pierce, the well-known expert incubator operator and poultryman, who will be glad to give authoritative advice as well as to sell the best of all that the poultry raiser needs.

The new store is owned by the Star Incubator Company, of Bound Brook, N. J., and carries a choice and full line, including the sterling "Star" incubators and brooders, "Lincoln" Flint Coated Roofing, "Franklin" Lice Killer, "Star Specifics," bone-cutters, etc.

This is a step in the right direction, and we wish the new store well-merited success.

East Rochester, N. H., Jan. 17, 1901.
*Editor American Joultry Journal.*

DEAR SIR: At the great Boston show, Jan. 15-19, 1901, in competition with America's best breeders our Barred Rocks, Montauk strain, won 1st and special pen, four cocks and six pullets. On Buff Rocks, Burdick's Nugget strain, won 1st cockerel, 2d and 4th pullets. We are ready to book orders for eggs for early delivery and guarantee satisfaction.

F. A. QUIMBY.
W. E. BLAISDELL.

The Flower City Incubators manufactured at Rochester, N. Y., have a world-wide reputation. They are used by the best class of poultry breeders all over the world, and are pronounced to be the best by all who use them. Every machine is warranted. They only use patented fireproof lamps on all machines they manufacture. Every machine has the best and most perfect improvements and are manufactured to last for years to come. Nothing to get out of order. Send for their catalogue.

Wm. Trost, of Westville, Ind., has Buff Cochins of way-up quality. Those wanting eggs this spring will receive honest treatment at his hands. His ad is in this issue.

Dr. J. H. Boyer's Poultry Farm, Frankfort, Ind.

F. C. Bailey, Buff Rock breeder, has a change of ad this month. Look it up and read special bargain offer. He guarantees satisfaction.

W. B. Gibson & Sons, of West Alexander, Pa., announce this month Barred Plymouth Rock eggs from the finest matings of their birds.

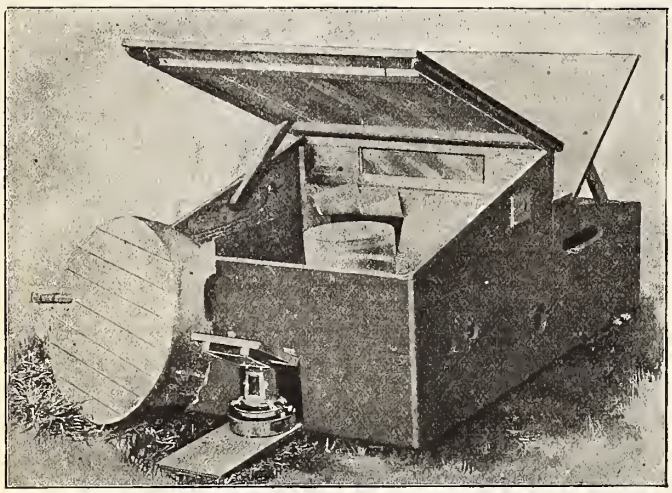
We call especial attention to the illustrations showing the White Plymouth Rocks and general views of C. O. Duffy, Owensboro, Ky., in this issue.

View of Dr. J. H. Boyer's Poultry Farm, Frankfort, Ind.

# The Cyphers

## Unequalled, Three-Apartment, $12 Outdoor Brooder.

Next to its Latest Improved ***NON-MOISTURE, SELF-VENTILATING AND SELF-REGULATING INCUBATOR,*** the Cyphers Incubator Company especially prides itself on the ***THREE-APARTMENT OUTDOOR BROODER*** it manufactures and sells for the ***LOW PRICE*** of ***$12.00,*** complete with seamless bottom, brass bowl brooder stove, tested thermometer, etc. We unhesitatingly pronounce this to be the best brooding device on the market, for ***EITHER INDOOR OR OUTDOOR USE, REGARDLESS OF PRICE.***



REAR VIEW OF THE CYPHERS THREE-APARTMENT $12 OUTDOOR BROODER

### Let Us Enumerate Separately the Special Merits of this Brooder:

FIRST—It is the largest single-flock brooder ever placed on the market.

SECOND—It is rain-proof and storm-proof, having a heavy tin-covered roof over both the chick chamber and the feeding apartment, or run.

THIRD—It is fireproof, a Cyphers Safety Brooder Stove being used instead of a lamp, and the entire lower floor of the chick chamber being protected underneath by a solid sheet of galvanized iron, with an air space between it and the wooden floor.

FOURTH—A brass cold-water pan is used on the Cyphers Safety Brooder Stove, located between the flame and the seamless bottom, brass oil bowl. Cold water placed in this pan keeps the wick from charring and the flame from smoking, thus rendering the stove and brooder perfectly safe, also insuring a uniform heat.

FIFTH—The fumes from the brooder stove cannot pass into the chick chamber (into either apartment), but are carried out at the sides of the brooder by an ingenius and infallible device.

SIXTH—The surplus brooder stove heat preservs all the lower woodwork of the brooder by warming and drying the soil underneath the brooder, thus making the brooder not only safer and more comfortable for the chicks, but also more lasting.

SEVENTH—The brooder stove is easy of access, being above ground, and the sliding board not only brings it quickly within reach but replaces it in exactly the right location.

EIGHTH—This brooder need not be placed in a pit, nor need the ground be excavated for the brooder stove, hence a saving in labor and in the trouble thereafter in caring for same.

NINTH—When the temperature underneath the chick hover is at ninety to ninety-five degrees, we have a surrounding atmosphere of eighty to eighty-five degrees, while in the front apartment the temperature will average about seventy degrees. The chicks, therefore, may suit themselves, going to or from the heat at will.

TENTH—The round chick guard prevents any crowding of the chicks, and also prevents their coming in contact with the circular heat dome, to their injury.

ELEVENTH—In the night apartment of this brooder there are no stairs to climb, hence no danger of the little chicks getting lost and becoming chilled while learing the way.

TWELFTH—It is the most durable and best-made brooder on the market, regardless of price. Both the chick chamber and front run may be reached through full-sized doors, and these doors or lids are covered with heavy tin, painted with two coats of mineral paint. We unhesitatingly recommend this brooder both for outdoor and indoor use. It may be left out in rain storms or wind storms, and, with reasonable care, the chicks entrusted to it will be comfortable and do well.

# PERSONALS.

Editor AMERICAN POULTRY JOURNAL.

Dear Sir:—Enclosed please find change of ad for March issue. While I hope to raise a larger amount of chicks than ever before, my aim is quality and not quantity.

I know my stock is far beyond what it has ever been. Have thirty grand females mated to five grand males and I hope to raise enough good ones, so that I will not have to turn down orders next year, as I have been for over two months past. Have never been able to some anything near filling orders for what Al birds I could sell before but this season past was the worst, all good birds being spoken for even before they began to mature nicely.

With best wishes for your success, I remain, Yours truly, W. C. DENNY.

Wayland, N. Y.

---

Mr. F. H. Thomas, Jacksonville, Ill.

Dear Sir:—The bird arrived this morning in good shape. He is a very fine bird. Yours truly,

H. A. HULY.

---

Mr. Frank H. Thomas, Jacksonville, Ill.

Dear Sir:—I received the birds this a. m. and will say I am well pleased with them. They are beautiful. Yours truly, JOHN FINISY.

---

Millersville, Ohio, Feb. 1, 1901.

Mr. W. H. Fisher, Lafayette, Ind.

Dear Sir:—The birds arrived all O. K. and must say they are far better than I expected for the money. I consider the pullet worth more than I paid for both. I took them to the Fremont Poultry show and won first on both of them. The pullet scored 94½ and the cockerel 91½, by Judge McClave. The pullet was only cut 1¼ point for shape. Pullet weighed 5½ pounds, cockerel 7¼. Please send me your price list on your best eggs.

Thanking you for your kind and honest treatment and wish you success. Yours respectfully, D. B. HENRY.

P. S.—If in need of any more stock I will remember you.

---

SAND'S ROCKS,

showing tail of five months old Barred Plymouth Rock cockerel which shows very fine and even barring for which his strain is noted; this bird is the property of E. P. Sand, Spring Hill, Ill. Photo gives good idea of the kind Mr. Sand raises.

---

T. H. Butler & Son, Oak Park, Ill., inform us that they have some extra fine cockerels for sale and that they are selling eggs from their choicest matings at $2 per setting. Their varieties are Light Brahmas and White Wyandottes of the Duston and Thomas strains. They make a special effort to please their customers by sending extra value for the money.

---

The receivers have been discharged at the end of only five months and the Page Woven Wire Fence Company, of Adrian, Mich., are doing business in their own name again. We congratulate this concern in their relief from their temporary financial embarrassment. The company has been recapitalized at $1,000,000 and they are now in splendid shape to continue their business.

---

A. J. Bargahiser of Rockford, Ohio, proprietor of the Old Honesty Poultry Yards and breeder of White Plymouth Rocks, Houdans and White Wyandottes, writes that his pens are mated up and are ready for the egg trade. He says he has quite a number of Plymouth Rock cockerels that he will let go at prices within the reach of all and also a few White Wyandotte cockerels up to and above standard weight.

---

The general health of a flock of fowls, same as the general health of individuals, depends largely on the quality and variety of food. Many fowls are grain fed to unprofitableness and death. A hen will live on corn alone but she will not be profitable because her food does not contain the necessary elements to make her so. Other things being equal the greatest poultry success results from a variety of the proper kind of food. Animal food in some form is an absolute necessity. Particularly is this true

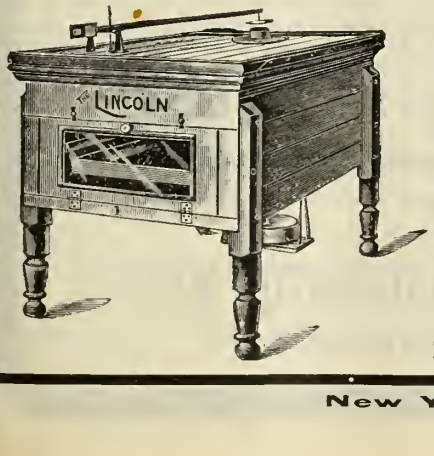
Send for our Catalogue and see what our Customers say about our Incubator.

STAR INCUBATORS

Send for our Catalogue and see what our Customers say about our Incubator.

This is to tell WHY the STAR INCUBATOR hatches more chicks and stronger chicks than any other:

1. Because by our system of heating, every part of egg chamber is uniformly heated; there are no cold corners.
2. Because our system of ventilating so perfectly controls circulation of air that no moisture need be supplied (this is the condition under the sitting hen).
3. Because our system of automatic heat regulating is the best (though, to be candid, it has been this year copied bodily by some other makers).
4. Because our system of turning the eggs is the most satisfactory.
5. Because, in short, the STAR INCUBATOR, is more than a heated box. Every advantage that science has discovered has been turned to account in it. We have not advertised as extensively as many firms in our line. It may be that you never heard of the STAR before; if so, there was *one good thing* you did not know about.



**Our little 60-Egg "Lincoln" is a gem.** (*See cut.*)

STAR INCUBATOR CO., 14 Church St., Bound Brook, N. J.

New York Office, 38 Vesey st.

in the winter time. Darling's Pure Poultry Foods meet the requirements to a nicety. See ad in this issue.

Mrs. Henry Gaiser, Charleston, Ill., is receiving many inquiries for high class and show turkeys. She has a June hatched tom which now weighs 32 lbs., especially well marked and has some for sale as well as about fifty choicest Barred Plymouth Rocks and a number of Silver Wyandottes or Mrs. George M. Hanley's stock.

There appears elsewhere in this issue the ad of the Draper Publishing & Supply Company, of Chicago, which we hope every reader of this paper will see. These people have three high class papers, each occupying a separate and distinct field. *Dairy and Creamery, Wool Markets* and *Sheep and Commercial Poultry*—all semi-monthlies. The subscription price of each is only 50 cents a year and valuable premiums are offered. Those who are in a position to secure subscriptions will receive liberal terms on application. Write Draper Publishing & Supply Company today for sample copies and tell them where you saw this ad.

What Judge Greer said in Fanciers' Gazette about W. P. March's Barred Plymouth Rocks: In November, 1900, I took a trip to Winamae, Ind., for the purpose of scoring birds. The first place I went was that of W. P. March, where I found a lot of Barred Plymouth Rocks that were about as fine as silk and after all defects were counted against them many of his best ones scored from 91 to 94 points. Mr. March is not an old breeder but he started right and that is the secret to success. His stock is right at the top and that is no joke.

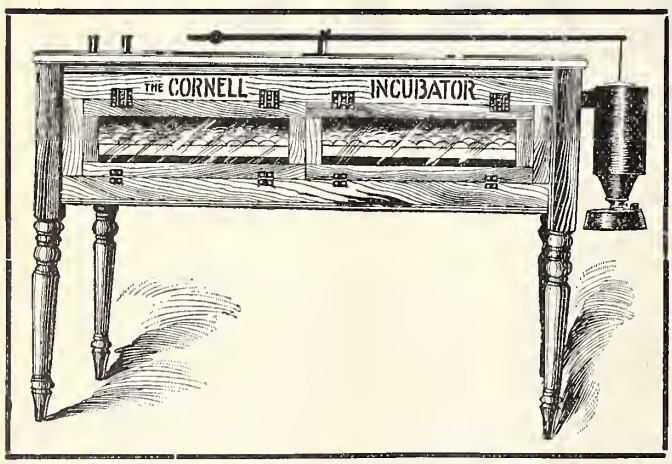
The accompanying half tone is a faithful reproduction of one of Mr. Chas. B. Sayers' prize winning Barred Rock males. Mr. Sayers is located at Waynetown, Ind., and has for years bred Barred Rocks and Silver Wyandottes that have held their own where competition was the strongest. The Barred Rock shown herewith is a grand shaped bird all over. He is broad in back and breast, and carries himself magnificently when at liberty in the yards. We have examined feathers from the various sections and find that they are Barred to the skin, with close, even bars. The bird is a truly remarkable specimen and Mr. Sayers has him mated to females high up in quality. He will have a limited number of eggs to spare from the pen. He has a few cockerels that are almost equal to the one shown herewith, and will sell them at a low price to the first persons sending in their order.

The white Plymouth rock cockerel which headed the E. H. & S. H. George second prize exhibition yard at the great Boston show has passed by purchase into the flock of H. D. Hopkins, at Montpelier, Vt., and will head his best breeding pen for the present season.

Reliability is of the utmost importance in the purchase of trees and seeds. It's a waste of money to buy the kinds that won't grow. The Storrs & Harrison Company, Painesville, Ohio, who have been in the business almost half a century, enjoy an enviable reputation for accuracy and honesty, and any of our readers in want of any thing in the nursery line should send for their valuable catalogue for which no charge is made.

Look up the change of ad of Mr. J. W. Grier, Coldwater, Ohio, the White Plymouth Rock specialist. He still has a few fine cockerels, which he is offering for sale. He will sell them very low considering quality of stock and will give satisfaction or will refund your money. Mr. Grier is making a specialty

# CORNELL INCUBATORS AND BROODERS



Are the latest and most modern inventions for artificially hatching and rearing chickens.

The great superiority of the Cornell Incubators and Brooders are due to the regulation of ventilation and heating.

No foul air or poisonous gases can accumulate in the egg chamber to poison or destroy the germ, as in the case of nearly all other makes.

Our new improved Brooders are also automatically heated and ventilated. You can keep the heat at a constant temperature, with no cold corners nor hot spots in which the chicks will crowd.

Send as soon as possible for our descriptive catalogue; you will get it free by return mail. Let your order follow quickly; it will be promptly filled. If the machines do not please you send them back. We will refund the money.

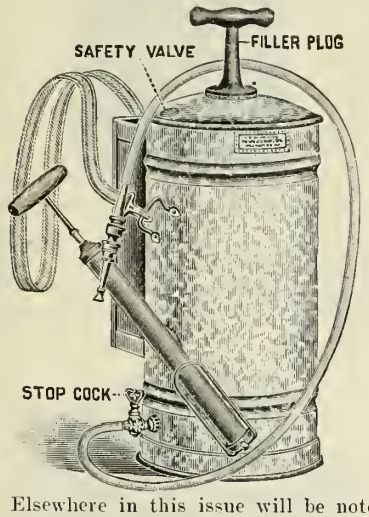
## THE CORNELL INCUBATOR MFG. CO.

**Dept. G, Ithaca, N. Y.**

of furnishing eggs for hatching this season. He has mated up four choice yards of his stay white fowls; one yard is headed by a pure white cock weighing 11½ pounds; three yards are headed by three fine white cockerels weighing from 9 to 10 pounds each. These males are mated to a choice collection of females. Mr. Grier says he has several orders booked for future delivery.



Elsewhere in this issue will be noted the advertisement of Rippley compressed air sprayer, which is being used by many of the leading breeders for applying lice killer, white-washing poultry houses, fences, etc. Since it can be used for so many other purposes than spraying, it is a convenient article at all times. It is made of various substantial material and will last for years. It is fitted with a positive acting safety valve, and is far superior to any compressed air sprayer on the market. No labor, any child can use it. Every breeder, fruit grower and farmer needs one. As is seen by their ad it is sold at very low prices. This sprayer is sold under a guarantee to be as represented or money refunded. A "Spraying Calendar" is furnished with each sprayer. Send your orders either direct to Rippley Hardware Company, Grafton, Ill., or to the eastern branches, 8 Park place, New York city, and 34 Merchants' Row, Boston. We know this firm is reliable, and our readers we are sure will never invest a like amount of money to better advantage. Please mention this paper in writing them.

WELLFORD, S. C., Feb. 3, 1901.
Mr. H. A. Emmel, Box 43, Ogle, Pa.

MY DEAR SIR:—On Nov. 15, 1900, I purchased of you a light Brahma cockerel of May, 1900, hatch, with the understanding "that if I was not satisfied with the bird at maturity that you would refund the amount I paid for him, and that I might also keep the bird."

That cockerel has fully matured, weighs ten pounds today, is by far the finest specimen of Light Brahma cockerel that I have seen in this section of the south. You certainly deserve great credit for having such magnificent birds and should be able to command a ready sale. Yours truly, R. C. HULL.

George H. Northup, Raceville, N. Y., the Black Minorca specialist, who is distinguished the world over as a successful Minorca breeder, has a new advertisement in this issue. Anyone interested in Minorcas should have his book

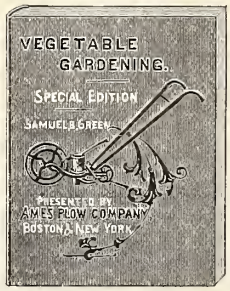
on the breed and his free catalogue for the information they contain. We say he is "distinguished the world over" because he reports that he has made repeated shipments to eighteen different foreign countries successfully, has birds now on the way to South Africa, orders on hand for Cuba, Trinidad, Venezuela and New Zealand and buyers from several other foreign ports are negotiating with him for fowls and eggs. Mr. Northup's Minorcas, in the hands of his customers, either birds direct from his yards or hatched from eggs which he has sold, have won more than 2,000 prizes, silver cups, medals and specials in the best shows of America. Dates and places of winning are given in Northup's catalogues and new spring price list.

HYDRO-SAFETY LAMPS.

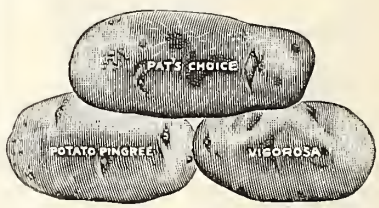
The success of artificial incubation depends, to a greater degree than many persons seem to think, upon the source of heat. "Just any kind" of a lamp will not answer the purpose. The ideal incubator, to do the best work, must have a lamp which can be left to itself without danger of going out, smoking or exploding. The Hydro-Safety Lamp, now used in the best incubators, answers this purpose perfectly. A water jacket surrounds the wick tube, preventing it from becoming overheated, and thus generating more gas than the flame consumed. It assures absolute safety and gives a uniform blaze, producing uniform heat. A new catalogue just issued by the inventor and manufacturer of the Hydro-Safety Lamp, L. R. Oakes, Bloomington, Ind., gives many valuable pointers on incubation; lists a large variety of poultry supplies such as thermometers, regulators, thermostatic bars and other articles needed by the poultry raiser. Send for it.

## "VEGETABLE GARDENING" FREE.

No book ever published on gardening has proved to be more popular or of more practical value than "Vegetable Gardening," written by Prof. S. B. Green, of the University of Minnesota. It is now used as a text book in the Minnesota School of Agriculture, the North Dakota Agricultural College, the South Dakota Agricultural College, the Iowa Agricultural College, the Virginia Agricultural College, the Massachusetts Agricultural College and in the Illinois and Washington State Agricultural Colleges. We have received a special edition of this book, issued for the Ames Plow Company, which contains 240 pages, more than 120 illustrations and treats of the cultivation of every variety of vegetables grown in America. While the regular price of the book is $1.25 (and it is well worth it), the Ames Plow Company is offering it free to every purchaser of a Matthews New Universal Seeder in any of its various styles. These Seeders are unsurpassed by any implement used by the gardener and truck grower, being adapted to all classes of work, both seeding and cultivating. They are used by Prof.



Green in his field tests. We trust that our readers will avail themselves of this opportunity to secure free so valuable a book, by so capable an authority. Look up the advertisement in another column, and write them today, mentioning this paper.



THREE GREAT POTATOES.

Among the catalogues we have recently received is that of L. L. Olds, the well-known potato specialist of Clinton, Wis. Mr. Olds, who has been in the seed

# The Natural Hen Brooder

Heats up in 10 minutes in zero weather.

## A Natural Heat And Natural Ventilation.

Is one reason why the Natural Hen Brooder raises most every chick and duck. Also so arranged that they have almost the same temperature in brooder as if they were out doors. Also the hover is so arranged that chicks can have any temperature they want in mother—60 up to 100 or more degrees. Cannot get over heated nor chilled; also cannot crowd round inside of brooder. No corners and a free range of heat and cold inside of brooder. No watching necessary and chicks regulate their own wants as to heat and air, etc., etc. Lamp burns 90 hours and burns only 4 cents worth of oil in that time in the coldest weather; 4 ventilators, 5-inch diameter, and are to be left open; no draughts, etc. Don't fail to give this brooder a trial. The cause of chicks dying is not the proper heat. A hot, dry heat poisons blood, drys up legs and lungs, causes bowel trouble leg weakness. Send 10 1-cent stamps for catalogue. Scored ckls. $2.50 to $5 each; Pekin Ducks, pair, $6; trio, $8. B. Rocks, Black Langshans, Buff Wyandottes.

**NATURAL HEN BROODER CO.,**

**JNO. M. SONTAG, Pres. Box 476, St. Charles, Ill.**

business for fourteen years, is making a specialty this year of three great potatoes: "Pat's Choice," a splendid variety, introduced for the first time last year; "Potato Pingree," introduced in 1899, one of the very earliest potatoes that grows; and "Vigorosa," the best yielders of all early potatoes. His catalogue is handsomely illustrated from photographs, and gives the lowest prices on potatoes, seed corn, oats and other grains and grasses, besides a full line of vegetables and flower seeds. Mr. Olds' three-fold motto is "Truthfulness, Promptness, Carefulness," and we know that very many of our readers have found that he lives up to this business ideal which he has set for himself. Do not fail to send for the catalogue. It is free. Please mention this paper in writing him.

---

Mr. John Coolidge, of Galesburg, Ill., again won some of the most desirable prizes at the Chicago show on his unconquerable White Wyandottes. This is a habit he has wherever he goes, as his record proves. He was the heaviest winner in the class at Chicago last year, also which makes his record all the more valuable, for it is seldom that any breeder wins the desirable prizes twice in succession at a show of the size and character of the Chicago show. In score card shows his birds always score around the top notch, and he has several times won over birds purchased at long prices. He has been breeding White Wyandottes for years and his matings always prove successful.

---

Mr. H. A. Emmel, of Ogle, Pa., is a very successful breeder of Light Brahmas and S.-c. Brown Leghorns, as his winnings this season show. He won the desirable prizes at Sharon, Pa., including special for the best display in the Brahma class. In Brown Leghorns he won with scores as high as 95 points. He also sold winners for the Butler, Pa., show. He is a very conscientious breeder and says that he will lose a sale rather than misrepresent his stock. He is open for engagements to judge the coming season and solicits correspondence from secretaries of fairs and shows.

---

Mr. Oscar E. Brooks, the White Rock breeder of Edison Park, Ill., won 4th on cockerel at the late Chicago show in one of the best classes ever seen at Chicago. This bird is an exceptionally fine specimen and heads one of Mr. Brooks' best yards from which his customers get eggs.

---

In the list of winnings of A. P. J. advertisers elsewhere in this number will be found those of George Krensicher & Co., of Somers, Wis. This firm won sixty regular prizes on seventy-two entries at Burlington, Wis., besides a large number of specials, including a $10 silver cup for greatest number of first and second prizes.

---

Mr. John H. Good, of Louisville, Ky., has been elected secretary of the Kentucky State Poultry Association. This is a fitting acknowledgment of his ability and a better man could not have been placed in the position. This association is one of the most important in the South and attracts many breeders each season breeder of Brown Leghorns and Barred from the northern states. Mr. Good is a Rocks, and has some of as fine specimens as are produced anywhere. They have always won for him in the strongest competition, and he has at times made clean sweeps in some of the classes. His foundation stock was the best that could be procured from the most noted yards, and he has maintained this high quality. Some of his best customers are his old ones, which shows that he pleases those who entrust him with their orders.

---

ATHENS, TENN., Feb. 15, 1901.

*G. W. Brown, Propr. Ouachita Valley Poultry Farm.*

DEAR SIR: The Barred Rocks shown by you at Memphis I consider of the very highest quality, and are truly as good as any I have seen this season at any show. Your first and second prize cockerels were grand and good in size, shape and color. The second prize bird in barring was the best I have ever seen on a Barred Rock male. Wishing you success. Am truly,

D. M. OWENS,
Poultry Judge.

---

Mr. John S. Parker, of Tallmadge, Ohio, had the pleasure of going home from the Cleveland show with most of the ribbons in the White Plymouth Rock class. This show was the state meeting of the White Plymouth Rock Club, and the competition was of the warmest kind. He won the silver cup and the club diploma offered on first pen, also 1st and 2nd cocks, 1st hen, 1st and 3rd pullets and 2nd and 5th cockerel. He got twelve premiums on thirteen entries. At the Akron, Ohio, show the same week with a different lot of birds he won 1st and 2nd hens, 1st and 3rd cockerels, 1st 2nd and 3rd pullets, 1st pen and special for ten highest scoring birds in the American class. He was also a heavy winner in the White and Buff Wyandotte classes. His birds have won first prizes at Philadelphia, Cleveland, Columbus, Akron and Canton. One of the things we like about Mr. Parker is that he guarantees satisfaction to his customers and refunds money without question if birds fail to please. He can well afford to make good this offer because his stock is high grade in every respect and is sure to pleasc.

---

We are pleased to note the winnings at Chicago of Schwab Bros., Rochester, N. Y., on Barred Rocks, for the reason that it proves the assertion made by us in a recent number of A. P. J. that their birds would be found among the winners at the largest shows. Among the prizes won was the magnificent silver cup for best Cock, Cockerel, Hen and Pullet. These are the kind of prizes which count, because a breeder to win them must have exceptional quality in his entire display. Mr. H. L. Schwab, of this firm is the well known and popular secretary-treasurer of the American Plymouth Rock Club.

---

W. C. Pierce & Co., of Indianapolis, Ind., have gotten out a new and attractive circular which will be sent free to readers of A. P. J. It is illustrated in colors and describes their matings of Buff and White Plymouth Rocks and Buff and White Wyandottes. We have seen their birds at various times and have had occasion to inspect them carefully and do not hesitate to say that some of their individual specimens are as good as it is possible to produce and

MAMMOTH BRONZE TURKEYS

far ahead of many birds which we have seen win first prizes in strong competition. At the late Indianapolis show they had six birds scoring 96¾ and one scoring 96½. These were not private scores but were given in the show room by Judge Hewes. They have birds of their other varieties which are just as good as is evidenced by the scores ranging from 93 to 94½.

Mr. E. L. Miles of Sag Harbor, sends us the following testimonial which he received unsolicited from Charles R. Harker, of San Jose, Cal.:

"Friend Miles: Needless to say, I like the birds. I always do like what you ship me as it is all right. Notice report of San Jose show in our December number where reference is made to a Montauk Barred Rock hen, which took first in a fine class. This is one of the pullets you sent me last fall and she has come up into a fine hen. The judge says she cannot be beaten by any hen in the state. That is something to your credit and will do you good not only in California but outside of it."

In Barred Rocks at the Chicago show Mr. William Webb of Joliet, Ill., won first cockerel and third and fourth cock and fifth pen. The third prize cock bird was in poor feather, not being through moulting, although good enough that Mr. Webb refused to sell him for $100. Last year as a cockerel he won 1st at Chicago. Mr. Webb wisely refused to sell him as he states he is the best breeder he ever owned and he has mated him with the same females for 1901. He sold the 1st prize cockerel at the Chicago show this year for $100 to J. Foster Rhodes of Woodstock, Vt.

Mr. Geo. Westwood, Streator, Ill., is sellling eggs from his winning Partridge Cochins this season at the same prices as last. Breeders of this variety who wish to introduce new blood into their flocks can get stock and eggs from Mr. Westwood at a reasonable price. His advertisement appears elsewhere in this number.

Mr. Geo. W. Wagner of Canton, O., has sold his entire flock of Barrred Rock and will breed Black Langshans exclusively. He has mated up two very fine pens of prize winning birds. His best pen is headed by a 12-pound cock which won first at Greencastle, Ind., fourth at Indianapolis and fifth at Chicago.

J. S. Hoffman, Sharon, Pa., informs us that in addition to the regular prizes won by him at the Sharon shows he won the silver cup for highest scoring pen in the American class. There were over 300 birds in the class and his birds won after being handicapped 1½ points each in favor of the post-colored specimens. He refused an offer of $50 for his winning cockerel. At the Meadville show this bird was pronounced by the judge to be the best shaped Rock he ever saw.

Mr. A. C. Hawkins, of Lancaster, Mass., has three large cards in this number in addition to his regular space opposite title page. Mr. Hawkins uses this additional space to tell AMERICAN POULTRY JOURNAL readers about his Barred Rocks, White Rocks and White Wyandottes. There never has been a time when his birds were not leaders. He has bred these varieties since their origin and has furnished the foundation stock for more good flocks than any breeder in America. We believe that all will acknowledge this to be a fact. His success is the result of having the right kind of stock and eggs at the right prices.

R. M. Cole, of the Normandy Poultry Farm, Bangor, Mich., has made special arrangements this season to supply his egg customers with eggs that will produce satisfactory results both in regard to fertility and quality of young stock produced. His specialty is White Wyandottes. He has quite a number of good cockerels to spare and guarantees to please his customers. His advertisement will be found elsewhere in this number of A. P. J.

Mr. Daniel P. Shove, of Fall River, Mass., won the N. E. Club Silver Cup for best 8-months-old buck in the Belgian hare class at the late Boston show. Mr. Shore has as good Belgian Hares as he has Rhode Island Reds, and his record on these birds is one of the best.

Mr. Chas. G. Arnold, of Leland, Ill., is better prepared than ever before to supply his customers with White Wyandottes that will please. He breeds them exclusively and has built up a strain from foundation stock Duston, Hawkins, Knapp Bros., Forsyth and other leaders in this variety. If there is such a thing as any breeds having the best it would seem that Mr. Arnold can justly claim his share of it, for he has combined these strains in an intelligent manner, as is proven by his long list of winnings for the past eight years. His circular is free and gives full information regarding his winnings and manner of doing business. It is also properly illustrated with half-tone cuts of his winners.

Lloyd M. Hallenbeck, of Catskill Station, N. Y., has an advertisement in this issue which ought surely be the means of bringing him a great deal of business. We do not know of any one who offers as much quality at so low a price as does Mr. Hallenbeck. By referring to his advertisement it will be noted that his stock is from the most prominent strains. He breeds Barred Rocks and Brown Leghorns and has sold many birds during the past season that have won for his customers. Mr. Hallenbeck is also a judge of all varieties and solicits engagements as such. He furnishes some very flattering testimonials as to his ability.

S. B. Johnston, the noted turkey breeder of Boggstown, Ind., informs us that his birds are finer in color and larger in size than ever before, and he has mated them so as to produce best possible results. The National strain of turkeys, so Mr. Johnston states, has the record of being the greatest layers. It is noted for great vigor, and those who contemplate purchasing eggs will not make a mistake in sending their order to Mr. Johnston. He has prepared this season to fill orders for eggs in large quantities, one of his customers wanting 600 eggs. He wishes us to say that those who want eggs from him should send in their orders at once and have them booked so that there will be no delay whatever in having them shipped when wanted.

## PENCILARIA.

The use of fodder plants is growing greatly every year, and we have no doubt the readers of this paper will be interested in the new candidate for public favor called Pencilaria. It is a most wonderful forage plant of great productiveness, unexcelled, if equaled, by any other plant for its quick growth, immense size and splendid quality, and it is thought that it will prove of much value to stock farmers. It has been improved and acclimated so that it not only produces an immense crop of fodder, but will produce a good seed crop as far north as central Iowa.

It is claimed to be equally as nutritious as corn fodder, which it greatly resembles, and it is greatly relished, either green or dry, by horses, cattle and in fact all kinds of live stock.

Knowing that thousands of our readers would be interested in trying the new plant, we have made arrangements with the Iowa Seed Co., of Des Moines, Iowa, who are introducing it this year, to forward a small package (sufficient for planting a row 100 feet long) to any one who asks them for it, provided they mention this paper. A postal card request is sufficient.

C. A. Porter, box B, Flat Rock, Ind., still has about 300 head of fine Barred Plymouth Rocks which he will sell at prices which make them bargains. We have seen Mr. Porter's birds at various times and know that he has all he claims. His show room record, however, should be sufficient evidence that his birds are the proper kind because he always wins in strong competition, and his birds receive high scores. At the exhibition of the Indiana Poultry Association at New Albany, Ind., this season Judge Felch gave one of Mr. Porter's pullets a score of 94½ and he has many others in his breeding pens just as good as this one. He has quite an extensive plant, but all orders for stock and eggs receive his personal and prompt attention.

### CORRECTION.

In February issue we gave all the winnings of Dr. H. F. Ballard of Cherroa, Ill., as having been secured at Wenona. This was an error as the prizes on Black Cochins were won at the State show, Bloomington, Ill. These winnings on Black Cochins were as follows: First cock, 90½; first hen, 94; first, second, third cockerel 93, 93, 91½; first, second, third, fourth pullet, 94, 94, 94, 94.

**BUFF WYANDOTTES and BUFF LEGHORNS.**

Two grand yards of Buff Wyandottes for this season. Yard one, contains hens that score as follows: 93½, 92½, 92, 92. Yard two, pullets 94, 93½, 93, 92, mated to a 92½ cock bird. One yard of Leghorns, hens scoring 94½, 94, 92½, 92½, 92, 91½; cockerel 91, cut two points for wing being cut. Stock and eggs at all times. Satisfaction guaranteed.

B. J. LUCAS, 1002 Robinson St., Danville, Ill.

# Mammoth Strain Light Brahmas,

as bred by

**H. T. ROGERS, Cainesville, Mo**

**are Great Prize Winners.**

At the Cainsville, Mo., Show, against birds that have since won at St. Louis and other large shows, we made a remarkable record, which proves the Mammoth Strains are as good as the best. First cock, 1st hen, 1st, 2d and 3 cockerels, pullets and pens; also every special, including the grand prize over all. EGGS from our great St. Louis, Kansas City and Cainsville, Mo., winners, $3 per 13; $5 per 26. Have mated two grand pens for early shipment—"Big Bug," a 94 point cock, with pullets 95 to 96½; Monarch cockerel, 94 1-2, with hens 93 1-2 to 95.

# The NEW YORK SHOW.

## *A Grand Success as Usual, Though many Drawbacks were Encountered. Reported by Mr. A. C. Smith, Waltham, Mass.*

NEW YORK Poultry, Pigeon and Pet Stock Association held what the officers of that organization declare to be and apparently was the most successful show ever given in the metropolis. This, in face of several circumstances that hampered the association in its efforts to eclipse all former undertakings. The Boston show, which had just closed with a record of holding the largest exhibition ever in America, and the Chicago Show, pending and attracting much attention, have interfered much with the successful maangement of this show. The interference with Chicago has been the subject of some criticism, but in view of the fact that the show yields but comparatively small returns to the proprietors of the Garden, they may be excused from insisting that the poultrymen accept the unoccupied dates. This is the Garden's busy season; it not only becomes fanciers to take what they can get, but it behooves them to smile as well. The variety of the pet stock and wild fowls made the show an opportunity for study for the naturalist. There was such a range and variation in the class of stock that space does not permit us to enumerate. As to the fowls themselves, the quality on the average was very high.

Light Brahmas were strong in number, with the quality good. Norwood farms won the best prizes, as well as the bulk of them. There seemed to be no complaint about the judging in these classes. Dark Brahmas were scarcely represented, and the entry in Buff Cochins was light.

George W. Mitchell made almost a sweep in Partridge Cochins, and they are beautiful birds. The Barred cock classes missed one or two of the old standbys, but "Madison Square Gardner" was there and wins all the first and all but one second in the open classes. The number of entries was about the same as heretofore, and the quality was good. The judging gave excellent satisfaction. The largest and best classes of White Rocks shown here in recent years were brought out at this show. The birds almost as a rule were exceptionally large and white, and it is a question if they were not too large for Plymouth Rocks in many instances. Silver Wyandottes were not a host in themselves nor were Golden, but the quality was up to the average.

Several very nice Silver Pencilled Wyandottes were shown, both males and females were very handsome.

White Wyandottes were very strong in quality, though in numbers they were not quite equal to Boston or Philadelphia. Several of the winners at these shows won places here. The most noable bird in the class, or perhaps in this section of the country, was the first prize cock. He is notable for having won first at Philadelphia, Boston and New York.

BARRED PLYMOUTH ROCK.
Third prize pullet at Wenona show, December, 1900; score 93¼, by Heimlich. Owned and bred by Thos. McKee, Washburn, Ill.

The first prize pen had also won at Boston before coming here.

The sensation of the show came in the news of the sale of the four females in the first prize—White Wyandottes—Yard, the first cockerel, and second hen to Mr. Horace Havemeyer. The price is not named, but it is understood to be a long one.

A very few exhibitors did the showing

# Did Fishel Win?

# BLANCHARD'S WHITE LEGHORNS.

## The Leading Strain of Heavy Layers

Are no experiment, having been carefully selected and bred for over 20 years with results that fully justify the claim that they are **THE GREATEST LAYING STRAIN OF SINGLE-COMB WHITE LEGHORNS IN EXISTENCE.** No labor or expense has been spared in building up this strain, and while the production of large, pure white, fancy market eggs has been the main object, **STANDARD QUALITIES** have not been neglected. They are large, vigorous, active and handsome, unexcelled for introducing new blood or as foundation stock. 1,000 birds for sale. Cockerels for sale. **Eggs for hatching from finest stock** in large or small lots.

**H. J. BLANCHARD, Box 997, Groton, N. Y.**

in Black Langshans and Black Minorcas, but the birds were excellent. .

S.-c. Brown Leghorns were away ahead of the Garden record in quality. The leading breeders of this variety were all there, each with a pen of his very best. The prizes were somewhat divided, Bright winning first, second and third on cocks; Morris, first on hen and first on pullet; Forsyth, first on cockerel and Bright first and second on yard.

Of late years the S.-c. White Leghorns have not been up to the standards shown this year. The classes of this variety were large and quality good, with some especially fine specimens. The uniform good quality of the S.-c. Buff Leghorns was a matter of note among all fanciers at the show. It is certain that great strides are being made in this variety every year. The improvement in color, shape and head points is most obvious.

There was rather more interest than usual in the display of Indian Games. The first and second cocks were very close together, both nice specimens. The first hen was a remarkable bird in color and lacing. She has very even colored and double laced feathers in breast, fluff shoulders, wing-bows, back and even in tail coverts. The first prize pullet is another excellent specimen. Competent authorities state this to be the best display seen here for eight years.

Some classes of pigeons were small and weak, some fair only; but the displays of Carriers and Jacobins were of extra quality, and left nothing to be desired in this line.

The leading feature in the exhibit of water fowl was the classes of Rouen ducks. Large size, wonderful depth of keel, strong lacing and rich coloring made these birds a special target for spectators.

There were several strong classes among the bantams. The Black-reds were almost uniformly good. The special for best colored bantam was won by a Birchin game cockerel, the property of Mountain Side Loft. This even by a bird of an off-colored variety is considered by bantam cranks extraordinary.

The show as a whole was run smoothly. Following so close after Boston it was decided not to open until Wednesday in order to have the coops from the latter show. Mr. Rockham, from the Boston end of the office, managed nobly and landed his cages here Monday morning, but the Spratt's people in New Jersey did not quite come to time. Tuesday night found things in a backward state, but by special effort of the management things started on time Wednesday and the judging was promptly done. The handling of the preliminaries indicated that the only Tomsey was missed.

Some faults are bound to be found in the judging of a show of this magnitude and no doubt some mistakes were made, but at this writing everything, as far as we have been able to learn, was satisfactory to the exhibitors:

The following awards were made:

LIGHT BRAHMAS.—Norwood Farm, Buffalo, 1, 2, 3, 4 ck; 1, 2, 4 hen; 1, 2, 3, 4 ckl; 1, 2, 4 pul; 1, 2, 4 pen. George W. Hillson, Amenia, 5 ck. J. P. Keating, Westboro, Mass., 5 hen; 3, 5 pul. Klee Bros., Blauvelt, 3 hen; 3 pen. C. P. Nettleton, Shelton, Conn., 5 ckl; 5 pen.

DARK BRAHMAS.—F. W. Rogers, Brockton, Mass., 1 ckl; 1 pul. Wm. R. Pease, Middletown, Conn., 1 pen.

BUFF COCHINS.—Geo. Ball, Rahway, N. J., 1 ck; 3 hen; 4 ckl; 4 pul; 1 pen. Lizzie Herman, Wayland, 2 ck; 2 hen; 3 ckl; 5 pul. A. F. Pierce, Winchester, 1 hen; 2 ckl; 2, 3 pul;. A. P. Ingram, Jr., West Chester, Pa., 1 ckl; 1 pul. White Oak Ridge Poultry Yards, East Orange, N. J.,

FIRST PRIZE WHITE WYANDOTTE COCK, SCORE 95¼.

Sire of first prize cockerel, score 95; first and second prize pullets, score 96 each, and other prize winners. Also *all* the breeding stock offered by the breeders of the above birds, S. F. Flint & Son, Peoria, Ill. These winnings, together with every other first and many others on both White and Buff Wyandottes were made by them at the Peoria show in strong competition, December, 1900. Thes. Hughes, judge.

# Arnold's Buff Leghorns

This season at twelve of the largest shows in America won leading prizes

## And are Champions of the World!

At Madison Square Garden, N. Y., 1900, they won 2 Silver Cups; 5 Gold Specials; 4 out of 5 firsts, including 1st and 2nd pens. Twice as many firsts and three times as many regulars as any one won at the late New York show. No stock for sale. Eggs from the finest yards we ever owned. $5.00 for 15; $9.00 for 30; $12.00 for 45; ten chicks guaranteed.

# Arnold's Buff Rocks

We have only a few yards but as fine matings as any breeder in America has. A Western judge who saw our birds says: we had the finest he saw in the East. Birds from our yards at the late shows win leading prizes at two of the largest shows in America. Eggs $3.00 for 15 straight.

## White and Black Belgian Hares.

***12 Prizes on 12 Entries at Madison Square Garden, N. Y.*** Dr. B. C. Plat, of Los Angeles, Cal., who is President of the National Association of Belgian Hare Judges, and the leading judge and authority on Belgian Hares, in America saw our Whites, at New York, and spoke in the highest favor of their quality and future. Young stock in Whites at $20.00, $30.00, $50.00, $75.00 to $100.00 per pair. Blacks $15.00 to $25,00 per pair. These two varieties will be the greatest money makers of the age.

AFRICAN GEESE.—To Cushman.

CHINESE GEESE.—To Fernwood Farm.

———o———

Mr. S. A. Noftzger, of North Manchester, Ind., invaded the East this season with his unheaten strain of Partridge Cochins and made good his claim of having the aristocracy of this variety in his yards. At Boston his birds won four firsts, one second, four thirds and two fifths. At Madison Square Garden, New York, he won first pen, the most desirable prize, and second pullet, third hen and fifth cock. This is a phenomenal record under the circumstances and clearly proves that his birds are capable of winning in any competition. These winnings place him in a position where he can command the trade of those who want the very best and as his flocks are large he is admirably situated to take care of it. We have seen his birds at a number of the largest shows and have yet to find a low grade specimen amongst them.

CRESTY, QUEEN OF HOUDANS,

is a Houdan hen owned hy B. H. White, of Peoria, Ill., and is one of the finest of her class we ever saw, taking size, shape, color and crest into consideration. The illustration was taken from a photograph, and as is usual with that class of pictures, fails to show her in her natural position. This hen holds her color remarkably well. She was scored last winter by Felch at Peoria, Ill., 96 points, winning 1st and special for highest scoring bird in the show; at Henry, Ill., by Pierce, 96 points, winning first and specials for highest scoring birds in the show. As a pullet she scored at Peoria 95½, winning 1st and special for highest-scoring hird in the show. Cresty weighs 7½ pounds, is evenly mottled and has a large crest and beard, both evenly mottled. Mr. White has a fine lot of Houdans. See his advertisement elsewhere.

I WANT

You to have Nissly's Poultry Annual and Catalogue of "Everything for the Poultry Yard," for 1901 (17th year). It's a pretty book of 80 pages. It tells all about "Michigan Poultry Farm," its stock and buildings; describes and prices the *Biggest*, *Best* and *Cheapest* line of *Poultry Supplies* in the U. S.; prices you eggs at $1.50 per sitting, from prize-winning stock. It's yours for the asking if you mention this journal.

G. J. Nissly, Saline, Mich

S. H. BIRD,
Oak Center, Wis.

BLACK MINORCAS.

Second prize cock at recent New York Show; weight, 10¼ pounds; and full sister, weight 8½ pounds. Owned and bred by J. H. Doane, Gouverneur, N. Y.

One of the best pairs of birds that have been illustrated in A. P. J. for a long time is the one shown herewith of J. H. Doane's Black Minorcas. Those who are familiar with this variety will readily see that these birds are extraordinary specimens. The male bird is the second prize cock at the New York show, 1901, and weighs 10¼ lbs. The hen weighs 8½ lbs and is a full sister. These birds were sired by a son of Mr. Doane's noted first prize cock at New York, 1898, he by first cockerel at Newburgh and Troy, 1896, and first as cock at Newburgh, 1897. A full brother of these birds won fourth at New York this year, and their sire won second at Johnstown, N. Y., 1900, another of Mr. Doane's birds winning first. All of his breeding birds have a record of this kind back of them, they all having descended from a long line of winners. A breeder with stock of this kind has a great advantage in that he can more easily satisfy his customers by being able to send them birds that will most surely transmit their desirable points to the offspring, and eggs from these birds will not only produce better quality but more of it. The birds in this half-tone are the desirable, full-breasted kind and have long reach, long bodies and almost perfect slant from head to tail. It will also be noted that they are strong in firmness of comb and apparent closeness of feather. Our readers who are interested in Minorcas can obtain one of Mr. Doane's handsome new catalogues free by addressing him at Gouverneur, N. Y., and mentioning AMERICAN POULTRY JOURNAL.

Mr. W. M. Mayer, the well-known breeder of Black Langshans at Danville, Ill., informs us that he has about thirty cockerels for sale that are first-class breeders, fit to head pens of winning birds. He is booking orders for eggs and the season promises to be a very heavy one. His winnings at Bloomington and Danville this season will be found in his card in the advertising columns.

**COSTS YOU NOTHING**
NOT ONE CENT PAID UNTIL TRIED. The
**NONE-SUCH Incubators**

are sent on **30 days trial.** This shows our faith in them. Antomatic egg tray. Perfect ventilation. Ample moistnre. Self regulators that **keep the heat just right.** No getting up nights to look after them. So simple a child can run them. Sold at low prices and fully guaranteed. Send four cents for Catalogue and special prices. **FOREST INCUBATOR CO., Lock Box D, FOREST, O.**

**KLONDIKE INCUBATOR**

You cannot fail to appreciate the value of Klondike Incubators and Brooders if you examine the principles of their construction and operation. Their simplicity makes them easy to run. Lack of delicate parts makes them durable. Results make them successful. Low prices make them popular. What more do you want? For free illustrated catalogue which gives full descriptions, prices and much information for poultrymen, address **KLONDIKE INCUBATOR CO., Box 908, Des Moines, Iowa.**

**Partridge, White Buff and Black COCHINS**

Over 200 premiums won by my Cochins during the last 19 years, at Peoria, Bloomington, Springfield, Decatur, Danville, Henry and Wenona, Ill., by Judges Hewes, Felch, Pierce, Russell, Heimlich and Hitchcock. Fine breeders $2 to $5 each. Exhibition birds at special prices. Eggs $3 per 13.

**DR. H. F. BALLARD, Chenoa, Ill.**

**BARRED PLY ROCKS OF MONTAUK FAME**

Bred in line. I can help you to WIN, or to exceptionally fine breeding birds. Twelve years experience in mating and breeding this variety. **A RARE CHANCE** to get Finest Stock Cheap for Quality.

A limited number of Eggs only will be sold at $3.00 per 13; $5.00 per 26.

***R. W. DURYEA, Great River, Long Island, N. Y.***

# Winnings of American Poultry Journal's Advertisers at Recent Shows.

C. F. Stratton, Woodstock, Ill., won at Nunda Poultry Show, Nunda, Ill., Feb. 4 to 6, 1901, on Dark Brahmas, four birds exhibited: Second cock, first cockerel, first pullet and first pen. On Buff Cochins, four birds entered: First cockerel, first pullet and second pen.

C. F. Lang, LaCrosse, Wis., the S. C. Brown Leghorn specialist, has for two years in succession secured a first prize at the Wisconsin State Show on cockerel, hen, pullet and pen, securing the same at LaCrosse (Wis.) show last December on Langshans. He has also some Buff Cochins and Belgian Hares. His complete winnings at the Wisconsin State show at Oshkosh, Wis., January, 1901, with Bicknell as judge, are as follows: First and second cockerel; first, second and third pullet; first hen; first pen; on S. C. Brown Leghorns.

F. C. Wilcox, the White Wyandotte specialist, proprietor of the Hickory Grove Poultry Farm, Joliet, Ill., won at the Illinois State show, Bloomington, Ill., January 7 to 12, 1901: First and second hen, 95¾, 95½; second pullet, 96; third cockerel, 94; third cock, 93½. Mr. Wilcox writes that he is especially strong in cockerels.

F. B. Schlotter of Keokuk, Ia., won at Cedar Rapids on Barred Plymouth Rocks as follows: Second cock, third and fifth hen.

William Tobin, 301 Morris street, Indianapolis, Ind., won at Cincinnati January 15 to 19, 1901, on White Leghorns as follows: First cockerel, 95½; first and second hen, 96½, 96½; first, second third pullet, 97, 97, 96½; first pen, 192½, and special on ten high scoring birds.

G. N. Kersten, Chilton, Wis., won at Milwaukee's recent show: First cockerel, first hen, second and third pullet, first pen. In Barred Plymouth Rocks; first cock, first, second and third hen, second pullet, second pen, in White Wyandottes; third pullet, Light Brahmas. He also made a clean sweep at Chilton, Wis., 1900-1901, with Phelps, judge.

Chilton (Wis.) Score Card Poultry Club will hold its second annual show January 6, 1902, with I. K. Felch judge and G. N. Kersten president.

Bowlus Bros., of Fremont, Ohio, won at show held there recently on Barred Plymouth Rocks: First cockerel, first and second pullet, first pen; White Plymouth Rocks, first and second cockerel; M. B. Turkeys, first Tom, first and second hen, first cockerel, first and second pullet.

VICTORIA, SCORE 93¾.

A hen in one of the breeding yards of J. K. Stair, Altamont, Ill.

Thomas H. Mills, of Port Huron, Mich., won at Michigan State Belgian Hare and Poultry Association, Flint, Mich., anuary 14 to 17, 1901, as follows: Buff Orpington, first hen, first cockerel, second pullet. C. L. Hogue, judge.

C. A. Porter, of Flat Rock, Ind., won at Bloomington, Ill., as follows: Barred Plymouth Rocks, first cockerel, first pullet, first hen, first pen.

E. F. Stratton, of Woodstock, Ill., won at Nunda, Ill., as follows: Dark Brahmas, seven birds shown; won second cock, first cockerel, first pullet, first hen; Buff Cochins, four entries, first cockerel, first pullet, second hen.

I. E. Bever, of Keithsburg, Ill., won at Galesburg show as follows: Buff Rocks, third cockerel; Buff Cochin, fourth cockerel; Buff Rock, pullet scored 91½, cut 2½ points on weight; she is now up to standard weight. At Galva, on Buff Rocks, first and third cockerel, first pullet, first pair, besides several specials.

D. L. Quirk, Jr., of Ypsilanti, Mich., won as follows: S. C. Brown Leghorns, at Battle Creek, three birds entered, first cockerel, first pullet, third pullet. Luverne, Minn., three birds entered, first cockerel, first pullet, second pullet. At Detroit, ten birds entered, first, second, third and fourth pullet; first cockerel, second hen, fourth cockerel, first and second pen. Chicago, ten birds entered; first pullet, fifth pullet, second cock.

E. R. Bradley, of Hillsdale, Mich., won at Chicago on Silver Spangled Hamburgs, first hen, fourth pullet, third cock; Detroit, second and third cock; first, second, fourth and fifth hen; first pullet; fourth cockerel; second pen, in hot competition. At Battle Creek, Mich., first and second cockerel; second, third, fourth and fifth hens; first cockerel; second and fourth pullet; first pen. Mr. Bradley breeds extra choice birds. Prospective buyers will do well to correspond with him.

D. E. and A. J. Blick, of Galesburg, Ill., won at Galesburg: Buff Rocks, first cockerel; first hen; first, second and fourth pullet and first pen. Buff Rock breeders should refer to their advertisement in this number.

# HECK'S

## WHITE PLYMOUTH ROCKS

Are now laying eggs which will produce the winners at the shows next season, just as sure as they have done it in the past. We won more prizes at more large shows last season than any other breeder in America. Chicago, Toronto, Can., Cincinnati, Indianapolis, Memphis, Tenn., and New Albany, Ind., in the largest class ever shown in the State. No State Fairs included in this list. They were all winter shows and meetings of White Rock Club except one. **This makes Heck's White Rocks the leaders till someone equals the records.** You can now get eggs from my choicest matings at $5.00 per 15. Birds scoring from 95 to 96½. You get the same kind of eggs that produce winners for me.

**FRANK HECK, box 12 New Albany, Ind.**

Sec'y. and Treas. American White Plymouth Rock Club.

# Kegley's Barred Rocks.

JOURNAL readers desiring something extra choice in early batched exhibition Barred Plymouth Rocks, should write **DR. E.A. KEGLEY, Cedar Rapids, Iowa,** president of the American Poultry Association, for prices, as he is prepared to furnish extra early hatched, well matured cockerels or pullets; also a few yearling cocks and hens that are strictly first-class. Judge Russell, who recently visited his yards, pronounced them one of the most even lots of Barred Plymouth Rocks he had visited this fall. At the great Cedar Rapids show, in a class of 243 birds, Mr. Kegley won the grand special of $25 for best ten; special for best five pullets and five best cockerels; special for best cock, cockerel, two hens and two pullets; also 1st cockerel, 92; 1st hen, 93; 1st pen, 184 7-16; 2d, 4th and 5th pullets, 92½, 92 and 92; 4th hen, 92¼. All scores given by Judge Lambert who is pronounced as one of the most critical Barred Plymouth Rock judges in America.

Will breed from eight pens of birds. Pens No 1 and 2 for cockerels. Eggs from pen 1 $5 per 15; pen 2 $3.50 per 15. Pens A and B for pullets. Eggs from pen A $5 per 15; pen B $3.50 per 45. Have 4 pens of Standard matings and will sell eggs from these pens $1 per 15 Larger quantities at reduced prices.

**E. A. KEGLEY,**
**Cedar Rapids, Iowa.**

WHEN WRITING TO ADVERTISERS SAY YOU SAW IT IN AMERICAN POULTRY JOURNAL

# Snugly Tucked Away

There are often a thousand lice on one fowl or hog where a careful inspection would not reveal a dozen. When Lee's Lice Killer is used, it kills not only the mites on the roosts and about the poultry house, but also all the body lice on the fowls. That's just the difference between Lee's Lice Killer and cheap imitations. They all kill some lice, but Lee's Lice Killer gets them all. You can take a lousy chicken or hog that has been treated with other lice killers and insect powders, and by use of Lee's Lice Killer bring to light more lice than you ever dreamed existed on a chicken or hog.

## Lee's Lice Killer

Is applied to the roosts for poultry; on bedding or rubbing posts for hogs. It kills all mites and lice on the roosts or wherever applied and it then evaporates, forming a gas of the same weight as air. This gas or vapor penetrates the feathers of the chickens or the bristles of a hog, killing all insects on their bodies. A portion of the fluid evaporates more slowly, remaining about the place for a long time, disinfecting the premises and excluding all insect life. Lee's Lice Killer is never sold in bulk. When you buy it in our original air-tight packages you get it full strength, undiluted. For sale in every State in the Union; endorsed by Poultry, Farm and Stock Journals everywhere. Send for handsomely illustrated booklet with testimonials and valuable information to the raiser of poultry and stock. Special introductiory offer to points where we have no agent.

# News and Announcements of Poultry Associations and Specialty Clubs.

Mr. S. H. Taylor, the retiring President of the National Bronze Turkey Club, has been at the head of this organization for a number of years. He declined to accept the office again but will be prominently identified with the interests of the club. Its present excellent condition is due largely to his zealous work and the hearty co-operation of the other officers and members. He was instrumental in bringing out the large display of turkeys at the late Chicago show.

---

The National White Wyandotte Club held its second annual meeting in the new Coliseum, Chicago, Jan. 22, 1901.

President Fred L. Kimmey in the chair.

The meeting was called to order by the president, and the minutes of last meeting read and adopted.

Thirty-one names were presented and elected to membership.

Officers elected were: Fred L. Kimmey, Morgan Park, Ill., president; J. D. W. Hall, Des Moines, Iowa, vice president; George G. Rose, Shawneetown, Ill., secretary and treasurer; executive committee, John Coolidge, Galesburg, Ill., Fred L. Kimmey, Morgan Park; Ross C. H. Hallock, St. Louis, Mo.

The complete success of the Western Poultry Fanciers' Association show for this year insures one of the largest in the west being held at Cedar Rapids, Iowa, the third week in January, 1902, with Theo. Hewes and Jas. A. Tucker as judges.

---

At the annual election the following officers were elected:

Geo. M. Armstrong, president.
O. A. Bassett, vice-president.
A. J. Smith, superintendent.
E. E. Richards, secretary.
Board of directors, Geo. M. Armstrong, E. A. Kegley, J. A. Fuller, E. A. Morgan and Geo. Ilten.

Exhibitors should put the dates on their list and not forget that it will be one of the attractions for the year.

---

Mica Crystal Company, Concord, N. H., manufacturers of Mica Crystal Grit, report a very prosperous business this season. Their grit is a standard article and should really be in every poultry yard.

SILVER LACED WYANDOTTES.

First prize pen at Iowa City, Iowa, December, 1900. Score 187¾. Owned and exhibited by Richard Lyon, Morrison, Ill

On motion the secretary was directed to have made as early as possible badges for each member of the club, free of cost to members, also cuts for use of members, to be paid for by members and the profit of the same to go into the treasury of the club, also to get out new club catalogues as early as possible.

The secretary was directed to offer a free membership in every poultry show of importance for best display of White Wyandottes.

## ANNUAL MEETING AMERICAN PLYMOUTH ROCK CLUB.

DEAR SIR:—The tenth annual meetisg of the American Plymouth Rock Club was held at Chicago, Ill., Jan. 23, 1901, 33 memberes attending; the following officers for 1901 were elected, W. S. Russell, president; F. J. Marshall, J. Y. Bicknell, E. B. Thompson, J. F. Crangle, G. W. Miller, D. T. Heimlich, J. M. Rapp, vice presidents; H. P. Schwab, secretary and treasurer; A. C. Smith, C. H. Welles, W. B. Gibson, Sid Conger, H. S. Fletcher, F. H. Shallabarger, Wm. Towler, executive committee.

The secretary and treasurer's report showing balance of $175.00 in treasury, was accepted. Two hundred and eighty-seven applicants were elected to membership. Much other business was transacted a full report of which will be mailed for the asking.

There still remains a few 1900 catalogues; breeders not supplied can have a copy for stamp. We hope to hear and to receive the generous aid of all interested parties. Fraternally yours,

H. P. SCHWAB, Secretary-Treasurer.
Rochester, N. Y.

---

**The South Dakota State Poultry and Pet Stock Association** held their annual exhibition Jan. 29 to Feb. 2, inclusive. Everybody pronounced it a success in every way and any exhibitor at the chicken show from whose coop of chickens dangles a blue or red ribbon has every reason to feel proud of the same for in a good many instances it was won by a very close competition. This was particularly true in the Barred Plymouth Rocks and the prize was won by merely the fraction of a point.

---

The American Langshan Club annual meeting was held in connection with the National Fanciers' Association at the Coliseum, Chicago, Ill., Jan. 24, 1901, President Ben S. Myers presiding. The meeting was a very harmonious and enthusiastic one, a large number of members being present. The minutes of the previous meeting, together with the special committees and the report of the executive, were read and, on motion, were accepted and placed on file, including the report of the secretary and treasurer, which showed, after paying all expenses, including several valuable cups, to still have a nice balance on hand. After a number of applications for membership were accepted, which showed a gain in membership for the last eight months of about 100, the invitation from the Pan-American Exposition at Buffalo, N. Y., for the next annual meeting was acted upon and it was unanimously decided to hold the next annual meeting at Buffalo, N. Y., during the poultry exhibit in October, 1901. President Ben S. Myers, of Crawfordsville, Ind., was recommended to the management of the exposition as judge, to place the awards on Langshans and such other varieties as they might see fit. The following officers were elected: President, Ben S. Myers, of Crawfordsville, Ind.; vice president, Franklin L. Sewell, New Troy, Mich.; secretary and treasurer, A. H. Asche, Princeton, Ill. A list of vice presidents were selected for several states, upon whom devolves the management of the club, they to act as president in their state, and in partieular as to the state meetings, which shall be de-

# HAWKINS' STAY WHITE ROCKS

Are the admiration of all breeders. They originated on my own farm and have won more prizes at ***New York*** and ***Boston*** for ten years than all others. The summer sun has no effect on them as they are bred from ***SNOW WHITE BLOOD.*** My customers all win and you can join the charmed circle by buying ***STOCK*** or ***EGGS*** from the ***BEST WHITE ROCKS THAT LIVE.***

# Barred Rocks....

**Buy Birds with Records and Eggs from Winners.**

I sell you the right kind at prices you generally pay for the cheap kind. I have a record for the past 15 years that places my birds at the top. It is show records that count, and that is the proof I offer as to quality. I have some fine birds yet to spare and will mate them for customers. I can pick out just what you want. If you need new blood in your flock I can send you one or more birds which will more than please you. I guarantee the eggs I send out to be from prize-winning stock. Have won most of the desirable prizes at St. Paul each year for the past 15 years.

**N. S. BEARDSLEY, Box C., St. Paul, Minn.**

# Rhode Island Reds.

***The General Utility Fowl of the Twentieth Century.***

Our WINNINGS the PRESENT year demonstrate without a doubt that we have MORE PRIZE WINNERS than any breeder in the country. Having won in 1900 nine firsts and sweepstakes for best male, Concord State Fair, Concord, N. H. Eight firsts and one second, nine entries at Brockton Show. Two firsts and special for best R. I. Red male bird in Fall River. Six first prizes, six entries, Malden, Mass. Forty-two prizes Philadelphia, including the special offer of $50 in gold and $25 in gold, also including nine firsts and nine seconds out of a possible ten each.

**1901**

Boston Show in the hottest competition. Forty-eight prizes, including four firsts, three seconds and eighteen specials. At New York, seven firsts and five seconds, which is a result unequalled by any breeder of any variety of any fowl. If you desire to obtain stock from the very best that there is, state what you want and write us for quotations.

**DR. O. P. BENNETT, Mazon, Grundy Co., Ill.**

# Parlin's Buff Cochins.

The old reliable strain with a record so remarkable that it reads like a fairy tale. Send for a catalogue and see for yourself. Winuers at the World's Fair at Chicago; also at the Chicago, St. Paul, Miuneapolis, Milwaukee and other shows for the past 12 years, aud always winning the majority of the best prizes. At Cedar Rapids, Ia., this season I won 13 prizes, including 1st cock, 1st pullet, 1st pen aud best display. At Chicago 6 prizes aud at St. Paul a clean sweep of all firsts and seconds. It this show I had 12 pullets with au average score of 95 poiuts. I have lots of this kind of stock for sale and the prices are reasouable. Eggs only $3 per sitting from birds scoriug as high as 96½ poiuts. I challeuge any breeder to produce a record equal to mine. My birds are typical cochius aud strong in all good points.

**LESLIE PARLIN,**

**19 Phalen ave., St. Paul, Minn.**

## You Can't Raise Prize Winners

Unless you have the blood. My birds have it. Never fail to win in hottest competition. **WHITE WYANDOTTE** pen No. 1, headed by large, magnificent, snowy white cock, that won first prize as cockerel at Chicago iu '99, scoring 95 by Russell, and pronounced by expert judges to be the best Wyandotte they ever saw. Mated with females scoring 94½ to 96. Eggs from this pen $3 per 15. Eggs from pen 2, $2.50; pen 3, $2. My **WHITE P. ROCKS** and **S. C. WHITE LEGHORNS** are also first prize winners, scoring 93½ to 96 by Bridge, McClave, Keller and Kohll. Eggs from these pens $1.50 to $3. All my breeders are heavy layers. You get what you buy. Send for circular; it's free. Refereuce, First National Bank, Van Wert, Ohio.

**C. E. DETTER, Van Wert, Ohio.**

# HOUDANS.

Breeding pens now mated for 1901. No. 1 pen—headed by a male scoring 93½; females—95¾ ,95¾, 93½, 93¼, 95¼, 94½, 93. by Sharp Butterfield, Dec. 20, 1900. No. 2 pen—male 91, females from 90 to 92. A few sittings of eggs from No. 1 pen, $5 straight; No. 2 pen, $3.00 per 15. Young stock for sale.

**JAMES H. & FLORA A. WADDELL. Wauseon. Ohio.**

## Williams' White Wyandottes

**Were the Hottest Bodies in the Bunch.**

At the great Indiana Poultry Association Show, at New Albany, Ind., Dec. 24-29, 1900, in competion with 800 birds and in a class of 80 White Wyandotles. With only 14 birds entered I won 1st and 3d cockerel; 1st and 2d hen, 2d pullet, 1st pen and six specials and the highest-scoring pen in the show. My customers will get eggs from a pen headed by a 95-poiut male bird mated to females scoring 93½, 93½, 93¾, 94¼, 95¾, 96, 96¼. If you want quality, write me.

**T. L. WILLIAMS. 218 Willard ave., New Albany, Ind.**

## JORGENSON'S BARRED PLY. ROCKS.

My birds are winners in strongest competion. They are large size, elegantly marked and the kind you will be proud to own. In addition to other regular prizes won at Racine Show, I had 1st cockerel and 1st pen. First prize cockerel was prouounced by experts to be a duplicate of the first prize bird at Chicago. I have some **FIRST CLASS BREEDING BIRDS** for sale, and am accepting orders for eggs from my choicest birds at $2.50 per sitting.

**CHAS. P. JORGENSON, 922 Forrest st, Racine, Wis.**

Secy Racine Poultry. Pigeon and Pet Stock Assn.

## Eggs From World Beaters!

**Barred, Buff and White Rocks.**

Barred cockerels scoring up to 95; pullets 93½, Buff cockerels 94½; pullets 94½. White cockerels 95; females 96 15 eggs $2; 30, $3.50. Pen headed by 95 Barred cockerel, 15 eggs $3; 30, $5. Warrant a good hatch. Birds scored by Rigg and Russell.

**J. T. MALLOY, Box 30, Laurel, Iowa,**

## WRIGHT'S WHITE WYANDOTTES. BLACK ROSE COMB BANTAMS.

15 regular and several special prizes on 19 entries at Racine, Wis., this season, including silver cup for best display on Bantams, birds scoring from 95 to 95¾, On Wyandottes we won 1st hen, 1st and 3d pullet, tie for 2d. Have others scoring within a fraction of the winners. I have the two best males exhibited at this show and one of them is for sale (score 94). Am now booking orders for a limited number of eggs, either variety, at $2 per 15. You get the same kind of eggs that produce winners for me, and they will do it for you. You will not make a mistake in sending me a trial order.

**FRED L. WRIGHT, Racine, Wis.**

cided by a vote of the members in the state and taken by the vice president, after which it shall be forwarded to the secretary.

A. H. Asche,
Princeton, Ill. Secretary.

---

Mr. E. D. Leland, of Lanark, Ill., secretary of the poultry show held at Mt. Carroll, sends us a list of awards which we regret cannot be published in this number. He reports that the entries showed an increase over former years and that the show was a satisfactory one in all respects.

---

The Cincinanti Poultry Association and the Cincinnati Belgian Hare Club held the annual show Jan. 14-19 at Cincinnati, Ohio, and everybody pronounced it a great success, eclipsing all previous records.

There were over 100 exhibitors and about 1,000 entries made. The association is uniting all breeders in this vicinity, having had many acquisitions to its membership from exhibitors at the show.

Work will be commenced at once laying the foundation for the great exhibition next year of poultry, Belgian hares, pigeons and pet stock, also dressed poultry and eggs.

They have united with them several breeders of Scotch collie dogs, who made an exhibit at their third annual show. The Scotch collie dog is pre-eminently fitted for poultry raisers, and will be a feature of the annual show of this association.

The fanciers of Charleston, Ill., have recently organized a poultry association to be named the Eastern Illinois Poultry and Pet Stock Association, with eighteen charter members, which it is expected will be rapidly increased.

---

The Ypsilanti Poultry Association of Ypsilanti have selected Dec. 31, 1901, Jan. 3, 1902, as the date for their next show. A large number of birds is then expected, as the Wayne, Mich., Association has decided not to hold a show, and will join the Ypsilanti Association. We believe this is one of the first if not the first association to announce its next year's date and we congratulate them on their enterprise.

---

The Eighth Annual Silver Cup Show of the North Indiana Poultry Association was a grand success in every way, nearly 1,300 birds being exhibited. The Barred and White Rocks were magnificent specimens, especially first cockerel and first hen in the Barred class, and first cock and first hen in the Whites. The Wyandottes were well represented, and some fine birds were shown. The Association were also well represented, the first Light Brahma cock being especially fine. Extra fine specimens of Buff Cochins, especially in hens and pullets, were exhibited.

---

The Fremont, Ohio, show this season was a great success. Over 900 entries were received, and the quality in all classes was above the average. Ohio breeders will do well to put this show on their list and send their birds there next season. We understand that the exhibitors were all well pleased, and that premiums were paid promptly, as usual.

---

The Wenona, Ill., Poultry and Pet Stock Association has selected Dec. 16 to 21, 1901, as the date for their next show. It will be held over Saturday and this

day will be known as sale day. All persons desiring to bring birds for this sale may do so by paying an entry fee of 10 cents for each bird entered. This entitles them to a score card if they desire it. All birds not sold privately will be sold at auction. Mr. U. G. McAdam has been selected secretary of the association.

---

At the last annual meeting of the National Wyandotte Club held in connection with the recent New York show, the following officers were elected for the ensuing year: President, Jas. Cheston, Jr., Philadelphia, Pa.; vice president, E. G. Tool, Jr., Poughkeepsie, N. Y.; secretary and treasurer, C. S. Mattison, South Shaftsbury, Vt.; directors, the president, Secretary Ira Keller, Jas. E. White and T. E. Orr. Honorable Vice Presidents, Fred A. Houdlette, Frank E. Wray, Henry Steinmesch, Theo. E. F. Holdhauser, L. C. Piser.

It was voted to hold our next meeting in connection with the Keystone Poultry and Packing Association at Philadelphia, Pa., in December, 1901.

It was thought best to distribute our specials somewhat and the directors were authorized to offer specials in four different states, besides the one our meeting is held in and that the total cost of same not exceed $125.

It was voted to rescind our action of last year in adopting the new variety of Wyandottes as Penciled and that we hereafter know them as Partridge Wyandottes.

The Buff Laced Wyandottes were recognized as a standard variety of Wyandottes and it is to be hoped they will be more extensively bred as they are beauties and deserve greater popularity.

At the present time we are making an effort to secure cash specials to be offered in connection with the Pan-American Exposition at Buffalo, N. Y., in October next, we have already received some cash for this purpose and will our members please take this as an invitation to subscribe for this purpose and to send their subscriptions to our secretary right away. It is very evident that a great many people will attend this exposition, and if our Wyandottes are there in quantity as well as quality they will form a very favorable opinion of them, which will stimulate the demand for them as we all know its but to see them to love them.

C. S. MATTISON, Secretary.
South Shaftsbury, Vt.

---

At the eighth annual meeting of the National Bantam Association, held at Madison Square Garden on Thursday evening, Jan. 24, the following officers were unanimously elected to serve for this year:

President—Philander Williams, Taunton, Mass.

Secretary—E. Latham, Flatbush, L. I., N. Y.

Treasurer—A. A. Parker, Dunellen, N. J.

Board of directors—John Glasgow, Mahwah, N. J.; J. F. Kirkpatrick, Easton, Pa.; T. F. McGrew, New York, N. Y.; Wm. Holmes, Shelton, Conn.; Wm. Barber, Toronto, Canada; H. J. Quilhot, Johnstown, N. Y.; the president, secretary and treasurer.

***Eggs, $3 for 18; $5 for 36.***

**C. I. FORSYTH, Winfield, Kansas.**

# Blood Meal

**Greatest Egg Producer on Earth.**

**Blood Meal** is manufactured by the Summer's Process, and is absolutely odorless. Everyone knows that blood contains all the elements necessary to build flesh, make eggs or to grow anything of an animal nature. Hence, it is nothing strange that blood, after being dried and submitted to a process which makes it odorless, should be the best of all poultry foods.

It is cheaper than most poultry foods, because being so nutritious a small amount will do for a large flock of fowls, as it must be mixed with other food when fed.

Blood Meal contains no ground bone or other cheap adulteration of any kind. It has less than five per cent of moisture, and is the only **Perfectly Dry** poultry food made. Send for circulars and testimonials from those who have used it.

BLOOD MEAL (TRADE MARK)

**10-lb. bags, each 50c. 50-lb. bags, each $2.00**

**FOR SALE BY ALL DEALERS IN POULTRY SUPPLIES.**

**F. S. BURCH & CO.** Sole Mfrs.

Stocking farms a specialty, Show birds, breeding stock, eggs for hatching.
**Buff Cochins, White Leghorns, Buff Plymouth Rocks, White Wyandottes.**
Main Office, Cleveland, Ohio. Central Farm, Kent, Ohio.

**Just as I Expected.**

When you found I had a **GOOD** thing in Buff Rocks, you wanted them all. Well, you have got them. You have drained me. **BUT I HAVE GOT ANOTHER GOOD THING! IT'S EGGS.** $5.00 buys 15. My matings cannot be beat. But for "Heaven's Sake" don't order them by the crate.

**H. D. FOSTER, Gowanda, N. Y.**

**Barred Plymouth Rocks and M. B. Turkeys.**

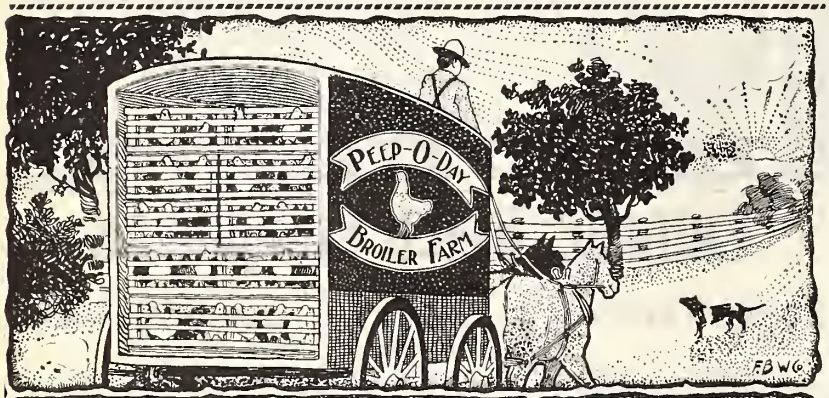
100 more Barred Plymouth Rocks for sale from my prize winners. Won 1st, 2d and 3d pullet and 1st pen at Southeastern Wisconsin Poultry Show, in Jan., 1900. Barred Rock pullets and hens and a few pullet-breeding cockerels, $1 each. Exhibition breeding cockerels, $2. This stock is good—not pretty good—but GOOD. Turkeys $2. They are pure M. B. and monsters. My birds are grand in shape and in color and barred to the skin. Barred Plymouth Rock eggs $1 per 15, from either one of 4 grand pens. If you want good stock and fair treatment send your order to

**J. D. BUCKLES, Walworth, Wis.**

**Brook's White Rocks.**

I have now mated up my breeding pens of White Rocks and can fill your order for eggs at $2 per sitting of 15. My breeding birds are big healthy, fine-shaped specimens, as white as the whitest and fit to win at Chicago. Eggs at above price from the best females, mated to my 4th-prize cockerel at Chicago this year.

**OSCAR E. BROOKS, Edison Park, Ill.**



**THE INEXPERIENCED**

**STARVE THEIR CHICKS**

by not giving them food rich in protein which they need to develop them. If you will **begin right**—feed our foods from the time the chicks come from the shell, we can reduce the mortality and give you pullets which will begin laying when five or six months old.

**DARLING & COMPANY'S**

**Beef Meal, Concentrated Meal and Beef Scraps contain from 60-65 Per Cent Protein.**

They cost no more than others, but go much further.

Push your broilers, develop your chicks and get lots of eggs by using our goods. Our Booklet, "Fill the Egg Basket" tells you all about them. We send it free upon request.

A detailed report of the business which occupied the attention of the members will appear in the next issue.

E. LATHAM, Secretary.

---

The Findlay Fanciers' Association has been organized at Findlay, Ohio, and starts out under the most favorable conditions. The membership is a large and enthusiastic one and the breeders composing it are able to and no doubt will make the Findlay show one of Ohio's representative exhibitions. Mr. Willliam Demland, of Findlay has been elected secretary and is well fitted for the position. Mr. John A. Meeks has been chosen president.

---

Some time ago the head of the agricultural department of the Rhode Island college conceived the idea of calling a meeting of the students and instructors of the poultry classes of that institution to consider the formation of an organization for the advancement of poultry culture and to assist in the carrying on of investigations and experiments in poultry keeping. As a result of a notice to the effect that such a meeting would be held in Boston during the poultry show, a goodly number assembled in Mechanics' hall, Friday, Jan. 18, at 8 p. m., to consider the question. Among the number were representatives of all four poultry classes, a number of instructors and many friends of the institution.

A committee was appointed to draw up a constitution and by-laws and the report as read by the chairman was adopted by the association with the change of but a few words.

The following officers were elected:

President—Frederick H. Stoneburn, Morristown, N. Y.

Vice President—F. L. Marion, North Woburn, Mass.

Secretary-Treasurer—Thos. H. Taylor, Jr., Kingston, R. I.

Executive Committee, one year—Mrs. F. H. Valentine, Westfield, N. J.

Executive Committee, two years—Dr. A. A. Brigham, Kingston, R. I.

---

Single Comb Brown Leghorn breeders will be interested to learn that there is now a specialty club devoted exclusively to their interests.

It has often been remarked that fanciers interested in this most popular variety of fowl should wake up and organize a club. The subject came up at the recent Chicago show, with the result that the breeders present got together, held an enthusiastic meeting and now we have the American Single Comb Brown Leghorn Club.

Like all other specialty clubs, our aim will be to advance and protect the interests of this favorite bird. To this end it is to be hoped every person handling Single Comb Brown Leghorns will become members and take an active part in pushing our claim to the desired end.

The present officers are all members of the National Fanciers' Association of Chicago, and meetings are booked to be held each month to transact such business as may come up for consideration. Much should thus be accomplished before the fall shows of 1901, when we hope

to have a large membersbip list covering every quarter of the country.

Realizing that the success and influence of our club depends largely on the hearty co-operation of fanciers through the country, an earnest, cordial invitation is extended to eacb and every one to join our ranks. Let us make this the largest and most progressive specialty club in existence.

For membersbip blanks and further information write C. M. Davidson, secretary, Chicago Lawn, Ill.

---

The annual meeting of the American Belgian Hare Association held Monday evening, February 4, at the Sberman House, Chicago, was well attended. The officers and executive board for tbe ensuing year will be as follows: President, Fred E. R. Jones, 155 La Salle street, Cbicago: vice president, W. M. Caldwell, 344 Warren avenue; secretary A. C. Biederman, 436 North Normal Parkway; treasurer, Fred L. Kimmey, Morgan Park, Ill.

Executive board: C. L. Chandler, 6731 Parnell avenue; C. L. Thayer, Sixty-ninth and Union avenues; J. C. Knapp, 218 La Salle street; S. J. Chapman, 269 South Sacramento avenue; Ed A. Suenders, 1520 Ogden avenue; B. M. Allen, 925 Van Buren strect, Chicago; Frank S. Jones, Wheaton, Ill.; S. Ford, 491 East Sixty-second street.

---

The Blue Andalusian Club of America was organized at the Boston show last January and starts out with six states represented on the membership list. The officers are E. L. C. Morse, president, South Cbicago, Ill.; vice president, Newton Cash, London, Ontario; secretary and treasurer, R. W. Lovett, 234 Marlborough street, Boston, Mass. It is the purpose of the club at first to secure better notice of the breed and to bring the merits of this variety more prominently before the public. The membership fee is one dollar. The club should and no doubt will receive the hearty support and encouragement of all breeders of Blue Andalusians.

---

The Nebraska State Poultry Association held tbeir annual poultry show at Auditorium in Lincoln, Neb., Jan. 14 to 18. One thousand four hundred birds were on exhibition, and Judges Russell, Hicbcock and Harris were kept busy until tbe last day of the show.

The display of water fowls was one of the largest and best ever exhibited in Nebraska, and tbe show was said to be tbe best ever held in any state west of the Missouri river.

Poultry fanciers are looking forward with a great deal of interest to 1902 show.

---

The fourth annual meeting of the American Buff Plymouth Rock Club was beld at Cbicago in the new Coliseum Jan. 23, with many members present.

Tbe report of the secretary sbowed the club to be in good financial standing and a steady growth of members.

The following named were elected officers for the year 1901: President, Dr. O. P. Bennett, Mazon, Ill.; vice president, H. R. Kingman, Battle Creek, Mich.; secretary and treasurer, W. C. Denny; executive committee, Dr. O. P. Bennett, W. C. Denny, H. E. Benedict, Elmira, N. Y., F. C. Sbepherd, Toledo, Ohio, F. E. Mow, Union Mills, Ind.

A new list of names of members will soon be issued and to all who would like

---

The next annual exhibition of the Central Missouri Poultry and Pet Stock Association will be held in Boonville, Mo., Nov. 26, 27, 28, 29, 1901. D. T. Heimlich, Jacksonville, Ill., who gave universal satisfaction last year, has been again employed. It is expected to make this the leading show in Missouri this year.

H. P. Mason, Secretary.
Fayette, Mo.

---

The third annual show of the Akron Poultry and Pet Stock Club will be held the second week in January, 1902. As in the past the club will coop the whole show free of charge and pay every obligation on the last day of the show. F. B. Zimmer will again place the awards. Officers for the ensuing year are J. M. Tupfer, president; B. J. Hill, secretary; O. Coolidge, treasurer; Julius Frank, superintendent.

---

A goodly representation of members attended the eighth annual meeting of the National Bantam Association which held its deliberations in one of the press rooms of Madison Square Garden on the evening of Thursday the 24th of January, during the progress of the twelfth annual exhibition of the New York Poultry and Pigeon Association. In the absence of President Williams, the Hon. David A. Nichols presided. Twenty-one new members were elected.

A communication from the Boston Poultry Association requesting the association to meet at Boston in 1902 was received and after reviewing the details it was moved and seconded that one-half of the cash specials raised for 1902 be awarded to Bantams shown by members at Boston and the other half at New York. By this method the members believed they would very materially assist the efforts made by the management of both New York and Boston, and thereby bring out a large display of Bantams at each show.

The members expressed satisfaction at the very generous treatment they have received from the poultry press, and a vote of thanks was taken on behalf of the editors throughout the United States and Canada.

The meeting also nominated for judges of bantams other than game, at New York, 1902, these fanciers: H. J. Quilhot, C. E. Rockenstyre and F. B. Zimmer. One of these gentlemen will be selected by a popular postal card vote to be taken in the early fall.

E. Latham, Secretary.

---

The Colorado Fur and Feather Association will hold its third annual show at Denver, Jan. 13 to 18, 1902. Mr. Ben S. Myers, of Crawfordsville, Ind., has been selected to judge the poultry, and Mr. John Haman, of Topeka, Kan., will pass upon the pigeons. Mr. Chas. W. Stidger, of Denver, is the secretary.

---

The annual meeting of the National Bronze Turkey Club was held at Chicago during the show. Seven new members were admitted. It was decided to get out a club catalogue and a committee was appointed to take the matter in charge. It was also decided to offer a $25 silver cup to be awarded at the Pan-

American Exposition, also one at the next Chicago. These cups are to be competed for by members of the club only. The following officers were elected: President, D. A. Stoner, Rensselaer, Ind.; vice president, M. J. Griffin, Alexandria, Va.; secretary, Mrs. B. F. Hislop, Milford, Ill.; treasurer, B. F. Ulrey, New Richmond, Ind.

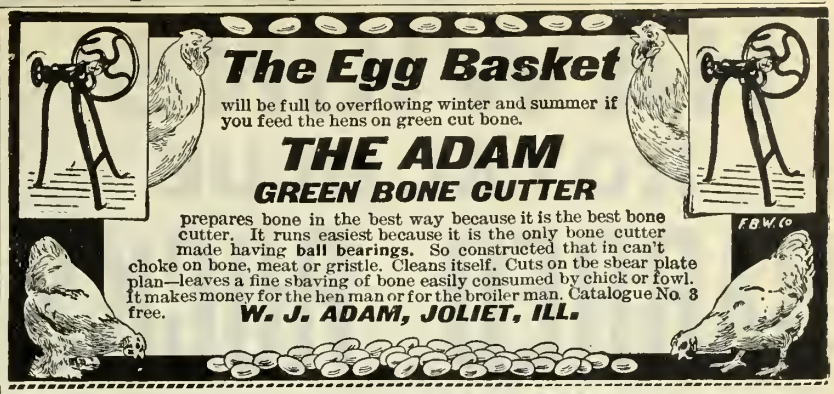
The first annual meeting of the Western Light Brahma Club was held at Cedar Rapids, Iowa, during show week. The meeting was a success in every sense of the word, there being a good attendance of prominent Light Brahma breeders and everybody seemed to be very enthusiastic about this grand old breed of fowls and its future prospects. I was glad to see so much interest taken and I hope that each and every member of our club will do all they can this coming year for the Brahmas and our club. We must all take hold and help push the thing along if we expect to make a success of the enterprise. This we certainly expect to do, and will do, for we have the grandest breed of fowls on earth, and have men and women in our club that are capable of making a success of anything they may undertake. So let us all work together and make this the largest specialty club in the west. Membership fee is $1. I urge every Light Brahma breeder in the west to join our club. The officers elected for the coming year are as follows:

President, James B. Lloyd, Des Moines, Iowa; secretary-treasurer, W. S. Gregory, Keota, Iowa; first vice president, George H. Henneman, Keokuk, Iowa; second vice president, A. F. Humbert, Nashua, Iowa; third vice president, C. C. Richards, Cedar Rapids, Iowa.

For membership blanks and any other information address the secretary-treasurer, W. S. Gregory, Keota, Iowa.

The second annual show of the Walla Walla, Wash., Association demonstrated the influence that a properly conducted show can have on the poultry interests of a community. Almost double the number birds were brought out this year that was shown last. This association is planning for a mammoth show in this city next year, which if it carries, will be the greatest thing of the kind ever attempted on the coast. The idea is to secure a general meet here, at which will be shown and will enter into competition the prize winners of the entire season from Portland, Spokane, Tacoma, Seattle, Yakima, Colfax, Pullman, Lewiston and all other northwest points where poultry shows are held. The belief is general throughout the entire section that Walla Walla is the most central point and that facilities are better here than at any other city which is not so far toward the side of the "chicken belt" as to be impracticable. Should this plan materialize the display resulting will prove the Madison Square of the Pacific coast.

The exhibition of the Minnesota State Poultry Association held at St. Paul was a grand success in every way. The public attendance was so great that the show was continued one day longer than the date fixed for closing. This is the largest and most representative show in the Northwest and the winning birds each season are as good as can be found anywhere. There were about 1,500 entries this year, and all classes were well



**Doane's Black Minorcas**

**Eggs From Winners.**

Look up my winnings at Chilton and Milwaukee this winter and Waupaca, Wis., 1899-1900. I shall have

**10 Grand Pens 10**

My prize and Silver Cup winners will be in these pens, and my customers will get eggs from these winners, of Blue Barred Plymouth Rocks, White Wyandottes and Light Brahmas. Eggs carefully packed and guaranteed to arrive at destination in good condition.

No circular this year. This money I have spent on my pens.

**Eggs $3 per 15; $5 per 30.**

**G. N. KERSTEN, - - Chilton, Wis.**

**COOLIDGE'S**

**WHITE WYANDOTTES.**

Have won the lion's share of ribbons at the leading shows in the West. We have an unequaled record at Chicago for two successive years. At State Show every first but one; at Galesburg a clean sweep and sterling cup for best 10 birds in American class. We will sell EGGS—a limited number from pen containing 1st prize birds at above shows, at $5.00; from stock that produced these winners at $2.00. Incubator lots, $7 per 100. A few cockerels for sale with score cards.

***JNO. COOLIDGE, Galesburg, Ill.***

**Buff Plymouth Rocks, Only.**

The show season has closed and all my prize winners mated for best results. I have four of the grandest matings this season that I ever had, headed by Hoosier King and Indiana Boy, two cock birds that are the sires of more high class show and breeding birds than any other two birds in the West. Eggs from these matings $3.00 for 15 straight. A few good cockerels for sale. Write

**A. L. WECKLER, Bunker Hill, Ind.**

**Clarke's White Wyandottes.**

Line-bred since 1892. Reports show that birds hatched from eggs from my yards last spring have sustained their repulation as **WINNERS.** My matings this year are, if anything, better than last. Eggs from six matings, scoring 93 to 96 points, $3 per 13; $5 per 26. A few cockerels, hens and pullets for sale.

**G. A. C. CLARKE, Box A, LeMars, Iowa.**

**BLACK MINORCAS,**

**EXCLUSIVELY.**

Won at La Porte, Ind., Nov. 26 to Dec. 1, 1900, Hewes, judge, 1st cock 92½, 2d, 3d and 4th cockerel, 94¼, 93½, 93½; 2d and 3d pullet, 94, 94; 2d and 3d breeding pens; silver cup for eight highest-scoring birds in Mediterraneau class. Stock for sale. Eggs $2.00 per 13.

## EPPERSON'S BARRED PLY. ROCKS

### and Mammoth Bronze Turkeys

My birds are all farm raised. Will have five yards for 1901. Eggs, $3 for one sitting; $5 for two sittings. No more stock for sale until fall. Satisfaction guaranteed. Reference, Champaign National Bank. No turkey eggs for sale. Farm three miles from city.

***E. H. EPPERSON, Box 226, Champaign, Champaign Co., Ill.***

filled. Premiums were paid to exhibitors in full before the close of the show, which is a commendable and unusual proceeding. The affairs of this association are conducted along liberal lines, which accounts for its many years of successful existence.

---

The Milwaukee show this season attracted a fine lot of birds, among which were some of the best in the state. Exhibitors were well pleased with the management of the show. Next season will undoubtedly bring an increase in the number of entries, and Wisconsin breeders especially should remember Milwaukee when making up their list of shows to attend. About 800 birds were on exhibition.

---

The fanciers in and around Racine, Wis., held another successful show this season. The birds as a rule were specimens of exceptional merit and were in every way representative of the several breeds. The show was uniformly cooped and presented a handsome appearance. Seven hundred birds were in the coops, and the winners gained their honors in strong competition.

---

The Massawippe Valley Poultry Association held its first annual exhibition at North Hartley, Quebec, Feb. 13 and 14. About 300 birds were shown and most of them were of high quality. The show was eminently successful and the management has decided to hold the next one in December, 1901.

---

W. S. Gregory, of Keota, Ia., reports big prizes with his Light Brahmas and has a change of ad this month. He was a heavy winner at Cedar Rapids, Ia., and has plenty of hens and pullets for sale but only a few cockerels. He will sell Light Brahma eggs and has also a few Dark Brahma eggs to dispose of. Mr. Gregory is secretary and treasurer of the Western Light Brahma Club and is doing much good for the success of the club.

---

R. E. Jones, Flat Rock, Ind., has made some good long distance sales through AMERICAN POULTRY JOURNAL at good long prices. One of these sales was a trio of S. L. Wyandottes to P. M. Cullum, Dallas, Tex. Mr. Cullum writes us very enthusiastically of these birds with which he is very much pleased. Mr. Jones has a change for his ad this month in which he makes announcement of his Silver, Golden, and White Wyandottes, Golden and Silver Seabright Bantams being now mated up from which he is selling eggs from his prize winners. Mr. Jones has been having good business but still has a great deal of stock that he can dispose of.

---

Dr. H. F. Ballard, of Chenoa, Ill., has purchased the entire stock of White Cochins from E. Drew, of Avon, Mass. This will give him one of the finest lot of White Cochins in the West. He has bought a cockerel from Chas. Steinberger, of Topeka, Kan. Mr. Ballard is a true fancier and a conscientious man in caring for his customers.

---

Darling & Co., Union Stock Yards, Chicago, manufacturers of many kinds of poultry foods and dealers in grit and crushed oyster shells, are sending out a very unique book-mark made of celluloid in a neat arrangement of a chick and an egg.

# *The* Black Langshan

Interesting Communication from A. C. Croad, Worthing, England, whose Yards are Acknowledged by all to be the Fountain Head for the True Langshan.

*Editor American Poultry Journal, Chicago.*

I BEG to thank you and your able correspondent, Mr. C. I. Forsyth, for his well thought out contributions to Langshan literature. His description of the tail feathers and of the way in which the bird carries them, in your November number, especially pleased me. Mr. Forsyth and American fanciers generally will be edified and amused to hear that the admirers of and winners with the "modern game" type of bird are now beginning to repudiate their "creation," and I should not be surprised to find when we have arranged for our classes next year (especially should they be well endowed) many of these gentlemen will have a bird (probably a true one) ready to compete for them. There appeared a letter in a highly respected poultry paper on Feb. 15, this year (1900), from a prominent member of the present so-called Langshan club. He declares that the present show pen type has been produced by selection, and points out that the Langshan was from the first branded as a mongrel, and adds that the wants of fanciers are due to those who, breeding only from their *best* specimens, rejecting the imperfect ones, although *equally pure*, as only fit for the farm yard, but very *good at that*." A few weeks ago there appeared a letter in the *Standard* from Mr. Robinson, a gentleman who, I have understood, takes a great interest in the "Utility Poultry Club." He writes that in making their experiments as to which breed gives the greatest average of eggs, the Langshans came in first, and he pointedly mentions the old fashioned type, not the long-legged "modern." Now the show pen Langshan breeders have declared my birds to be "only fit for the *farm yard, but very good at that*."

If the present Langshan club had banded itself together to belittle and finally exterminate this noble breed, I could understand their motives of action. I have long ceased to exhibit, but I naturally continue to take an interest in the Langshan and I now and then visit a local show, but go wherever I will, the one cry is repeated "that the reputation of the Langshan has been ruined, and that a *mongrel* that has derived all its best qualities from the Langshan is taking a *secondary* place in the show pen. No doubt the original bird as introduced to the show pen would, had it been allowed fair play, have stood first. At present I regret to say my own yard, and those of a limited number of true fanciers, are the only reliable ones now to be met with, but the "modern game" has, we hope, had its day, and the new century opens with a return to the birds as first shown by my late uncle. May I be allowed to conclude by quoting the full text of a letter of mine that appeared in an English contemporary on Nov. 2, this year (1900):

After an unprecedented opposition, one, I have been told, that has never been surpassed or even equaled in the annals of

## MANN'S GREEN BONE CUTTERS

continue as in the past, to be the very best machines of the kind it it possible to own. They have done more to place the poultry business on a true and paying commercial basis than all other poultry appliances combined. They have always led and have taken more first premiums than all other similar machines together. They excel in material, mechanical construction, design for the purpose, quality of product, ease of operation and durability. Only a **Mann** will give the best results. Remember this.

***Mann's Clover Cutters*** are real machines, not toys or playthings. They are fast, durable cutters. Large capacity. Only one knife to keep sharp. One turn of wheel makes 12 cuts. Cut green or dry feed. Lasts indefinitely.

***Mann's Swinging Feed Trays*** save cost in feed quickly. Keep feed in and hen and dirt out. All iron—lasts always.

***Mann's Granite Crystal Grit***—All grit, no dirt. Every surface cuts. Better than anything else. Cash or instullments.

MANN'S GRANITE CRYSTAL GRIT

## Clover Lawn Buff Plymouth Rocks.

**FOR 1901.**

### Are Winners of More Prizes than any Buff Plymouth Rocks in Michigan.

At the great Michigan State Show, Detroit, Jan., 1901, in a class of over 60 birds, 1st cock, 1st, 2d, 3d and 4th cockerel, 1st and 2d hen, 1st pullet, 1st and 2d pen and the **State Silver Cup**, offered by the American Buff Plymouth Rock Club. Also are winners at Michigan Fanciers' Association, Battle Creek, Dec., 1900, and the National Fanciers' Association of Chicago, Jan., 1901. Think I am safe in saying that my pens are mated with 6 of the **highest class** Buff Plymouth Rock males that can be found in the Western States. 1st pen with **GOLD MINE**, the phenomenal sire and prize winning cock. 1st at Michigan Fanciers' Association, Battle Creek, Dec., 1900; 1st at Michigan State Show, Detroit, Jan. 1901; 2d at National Fanciers' Association, Chicago, Jan., 1901. 2d pen with **PRINCE WOODEN**, 1st prize cockerel at Chicago's great show, Jan., 1901, winning in class of over 20 other cockercls. 3d pen with **SOLID BUFF**, 1st prize cockerel at Battle Creek, Dec. 1900; 1st at the State Show, Detroit, Jan., 1901. 4th pen with **COL. BARNES**, 2d cockerel at Battle Creek, Dec., 1900; 3d at Detroit, 1901. 5th pen with **GOLD CAP**, 5th prize cockerel at Chicago, Jan., 1901. 6th pen with **GOLD BOND**, a late hatched gem. Never been shown but will be heard from next year as a cock bird. The above 6 high class males are mated with my prize-winning and high-scoring females. Eggs from the above pens, 13 for $3.00; 26 for $5.00; 40 for $7.00, and 65 for $10.00. Eggs from prize-winning Buff Cochin Bantams, $3,00 for 13. A few Buff Rock cockerels for sale.

**H. R. KINGMAN, Clover Lawn Stock Farm, Battle Creek, Mich.**

## Now, Will You Believe It?

I claim that **PILE'S WHITE WYANDOTTES** are the real thing and fit to win anywhere. Look at the record at Cleveland, O., this season: 1st and 4th cockerel, 1st and 3d pullet, 1st, 2d and 5th hen, 3d cock, 2d and 5th pen, $100 silver cup for best pair, silver cup for best pullet, special for best cockerel, $10 in gold for best exhibit. Remember that these prizes were won in competition with some of the best birds in the country. If you want a record like this, buy some of the same stock or eggs and send me your order at once so you will be sure to get what you want.

**FRED E. PILE, Cleveland, Ohio.**

## Barred Plymouth Rocks.

**My Birds** { Are strong and vigorous, quick growers, great layers, true Rock shape, nice bay eyes, clear, even barring.

**My Prices.** { Cockerels $3 up. Fertile eggs for hatching, $2 per sitting. Why not write

## Barred P. Rocks

## THAT WIN THE RIBBONS.

I have some rare bargains to offer in cocks, hens, cockerels and pullets. I won at the Clinton County Show, in a class of 160 birds, more ribbons than any one breeder, including 1st special for ten highest scoring birds. Eggs in season from my best matings only $3 per sitting. Barred Rocks exclusively. Address,

**ED N. MAISH, Frankfort, Clinton Co., Ind. Rural Route No. 1.**

## SIMMONS,

**The White Wyandotte Specialist,**

Has mated up three grand yards for 1901. Pen 1 has 8 pullets—score 96, 96, 96, 95½, 95½, 95, 95, 95, headed by a grand, pure white cock, score 95. Pen 2 has 8 pullets—score 94, 94, 94, 94, 94, 93½, 93, 93, headed by a pure white cock, score 93. Pen 3 has 8 choice hens—score 95, 94½, 94½, 93½, 93, 92½, 92½, 92, headed by a grand, 8-pound cockerel, score 93, cut 2 points on not being developed. Eggs pen 1, $3 per 15; $5 per 30. Pen 2 and 3, $2 per 15; $5 per 45; $8 per 100. A few choice pullets and cockerels to spare from same yard as pullets in pen 1, with score card for each. Address,

***F. R. SIMMONS, Casstown, Miami Co., Ohio.***

any club or known breed, I at length succeeded by the mere iteration of truths concerning the conformation and habits of this noble fowl, in establishing the fact that the Langshan was a pure and distinct breed, and not in any way allied to the Cochin, to which it had been sought to be connected.

After exhibiting our birds in 1872 and 1873 my uncle was on more than one occasion the recipient of anonymous letters, warning him and begging him not to cultivate or exhibit his Langshans. One of these correspondents, I remember, pointed out to him that fanciers already possessed the black Cochin, and did not require this bird with its voluminous tail and scant leg feathering. A favorite charge against the Langshan at that time was that it "was a bad black Cochin," and the "waste of the black Cochin breeder's yard."

It was very evident from all that transpired that Cochin breeders at first feared a rival in the Langshan—this fear, has it not been amply proved merely the result of inexperience and ignorance of the nature and habits of the Langshan? For myself I cannot boast of any scientific knowledge of our feathered tribes, but my close observation during twenty-eight years convinces me that the plumage of the true Langshan differs essentially from that of the bird that at present usurps its place in the show pen; the scales of the legs are also laid on in a different way.

Mr. Harrison Weir, Mr. C. W. Gedney, and Mr. John Gabb of Bewdley, have from the first been firm friends and admirers of the Langshan. They are well known as experienced ornithologists, and I feel sure that to any of your readers who might be fortunate enough to meet them at our great shows they would willingly explain to them the difference between a half bred Cochin and a pure-bred Langshan, or between the Langshan and any cross whatsoever. Lest your readers should have been led into the belief that I and those writers who have written in approval of the genuine Langshan are in collusion I must claim space to give the history of my connection with them. Mr. Herbert P. Mullins was my customer many years ago; I then lost sight of him for a considerable time. After the Crystal Palace Show last year (1899) some letters in the poultry papers brought him again to my notice. In the following January, he having discovered my address, wrote to tell me how disappointed he had been in the Langshans he had seen at the recent Palace Show, and now sincerely regretted the perfect specimen he parted with previous to his departure from England. We kept up a brisk correspondence for a time, but owing to his serious illness last spring and subsequent journeyings, I again lost sight of him, but a week or two ago I had the pleasure to receive a letter from him which contained the assurance that he intended keeping Langshans, and those only of pure stock.

Mr. Coke Burnell had also just returned to England after a prolonged absence in 1899, and seeing his letter of surprise at the style of bird that was taking the place of the true Langshan in the show pen, I sent him a copy of my latest edition of the "Langshan Fowl." In acknowledgment of this I received a courteous letter of thanks, in which he kindly said fanciers owed me and my family many thanks for the stand we had made on behalf of this "handsome and useful breed," and Mr. Coke Burnell was

well qualified to speak on this matter, for in the early eighties he was frequently called upon to award the prizes at our great shows.

It is well known that birds from our yard were the first to introduce the Langshan to the show pen; indeed the first prizes given to the Langshan as a breed were procured by me. This was before the institution of the first Langshan club, when, after holding the secretaryship of the club for some years, I found myself so out of pocket that I felt it prudent to abandon that office; I yet contributed largely towards the challenge cups given in 1884. During the time that I had held office I had always arranged for classes at the Birmingham show. Whilst the new club was under discussion I received a letter from Mr. J. B. Lythall asking what we were disposed to do in the matter of the Langshan classes. I wrote at once explaining that the club was at the time in abeyance, but promised to write again as soon as matters were settled; but shortly came another reminder. This time it was to warn me that the schedule would be closed on a certain day. Being unwilling that these fine classes should fall through, in an evil hour I became guarantee for the cups, acting the "Lady Bountiful" in a way I could ill afford. I did not exhibit at this show, but hoped that an appeal to those who did and were successful prize winners would meet with some response, but in this "I had reckoned without my host." It is true one exhibitor sent me 10 shillings, but this I returned as no more seemed to be forthcoming.

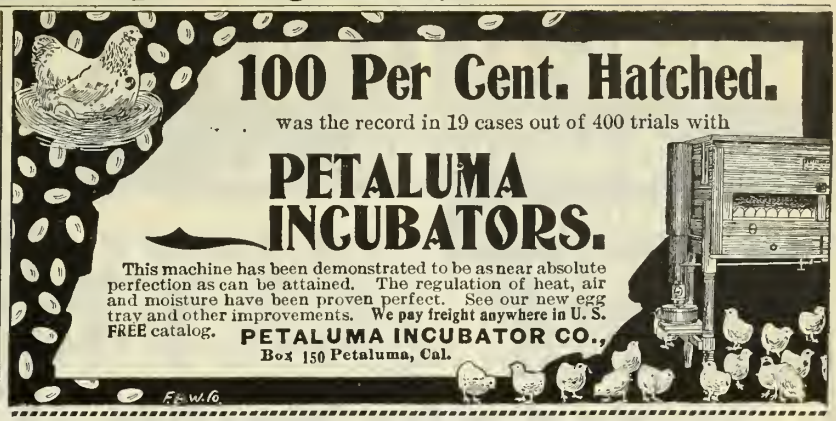
It must be borne in mind that in addition to these extravagances, I had been at the expense and risk of several importations from China, that I had succeeded in establishing the breed that was at first reviled as "not a breed," and even at length admitted only as the "so-called Langshan." I had also been at the cost of giving a lithograph of the Langshan district from an admiralty chart in order to prove that the place that had been declared to be "non-existent" did exist. A few months ago it was suggested that the present show pen bird should be further elongated in order to make way for a mongrel that owes its very existence to the Langshan. I would refer your readers to pages 29 and 105 of my history of the Langshan in order to refute a cowardly charge that has recently been made against my yard. A successful exhibitor of the present style of bird has lately offered to contribute towards a prize for my type of bird. Seeing that I proved my case long ago, I do not desire or require to place my birds in with any others at the present time.

Worthing, Eng. A. C. CROAD.

—o—

Cleveland Poultry Co., Plattsburg, N. Y., come out in this issue with a new ad for La Porte's French Lice Powder and Disinfectant, of which they are sole agents of the United States and it is claimed that this powder is superior to any domestic article known. Thirty cents brings a 12-oz. package to you; it don't cost much to give at a trial.

The new ad of E. A. Wilson, Cainsville, Mo., is a record in itself of his splendid winnings. He has won at the last two shows held at Cainsville in 1898 1899 almost a sweep on Light Brahmas. In 1898, first, second hen. In 1899, first, second hen; first, second pullet; first, second cock.



100 Per Cent. Hatched.

was the record in 19 cases out of 400 trials with

PETALUMA INCUBATORS.

This machine has been demonstrated to be as near absolute perfection as can be attained. The regulation of heat, air and moisture have been proven perfect. See our new egg tray and other improvements. We pay freight anywhere in U. S. FREE catalog. PETALUMA INCUBATOR CO., Box 150 Petaluma, Cal.

BABCOCK'S

White P. Rocks and Buff Cochin Bantams

Have made a clean sweep at La Porte, Goshen and Columbia City this season, and have won highest honors at many other shows, such as Chicago, Detroit and Grand Rapids. Our White Rocks are pure white, large bone and always over weight. Our Bantams are simply grand, being a soft, golden buff, small in size and good Cochin shape. A few good birds for sale. Write for show record. Eggs, $2 per 13; $4 per 30. Correspondence a pleasure.

J. A. BABCOCK & SON,
Goshen, Ind.

McClure's Barred Ply. Rocks

Are better than ever. No experiment. An established fact. A large number of cockerels and pullets for sale. Prices to correspond with quality. Write for what you want. Correspondence cheerfully answered.

T. W. McCLURE,
Carey, Ohio.

Buff Cochin Pullets and Breeding Cockerels.

Having sold my Minorcas and all my exhibition Buff Cochin cockerels I have a few fine Buff pullets and a few good breeding cockerels that I will sell at prices that will astonish people wanting breeders. Remember I offer nothing for sale that will not score 90 points or better.

L. E. DOVE,
Proprietor of the South Side Poultry Yards,
Shelby, Ohio.

PARKER'S White Rocks

Won every first except one at the great Cleveland Show, and this same show was the State Meeting of the White Rock Club. 1st and 2d cock, 1st hen, 2d and 5th cockerel, 1st and 3d pullet, 1st breeding pen, winning silver cup and White Rock Club diploma. At Akron, same week, won 1st and 3d Cockerel, 1st, 2d and 3d pullet, 1st and 2d hen, 1st breeding pen and best 10 in American class. Cockerels and pullets for sale. Eggs, $3 per sitting; two sittings for $5. Address,

J. S. PARKER,
Tallmadge, Summit Co., Ohio.

CLOSING OUT
My Entire Flock of Buff Rocks

Without reserving any, at prices too low to talk about. Choice breeders in cocks, hens, cockerels and pullets. I will breed Barred Rocks hereafter and must give them my entire attention. I can please you with my stock. I have some fine breeders and exhibition stock for sale in Barred Rocks and Silver Laced Wyandottes, and will book orders for a few sittings of eggs from my best matings at $2.50 per 15; $4 per 30. Correspondence invited.

GEO. J. GLEASON, Box C, Elburn, Ill.

Harshman's White Rocks.

If you are wanting the BEST, I have them that are WHITE and up in WEIGHT. Russell placed the awards at the State Show and they won 1st and 3d pullet, 2d and 3d hen, 2d cock and 4th cockerel, and there was just one point between 1st cockerel and 4th; 2d breeding pen and the $3 special for the best display in their class. Birds for sale, with or without score cards. If you are thinking of buying, write me your wants. Correspondence solicited. Mention A. P. J. Address,

PAUL B. HARSHMAN,
Sunnyside Poultry Yards, Box 117, Sullivan, Ill.

J. K. PAGE, Prop., Indianola, Ill.

# Brooders and their Capacity.

Conducted by G. C. Flegel, Westville, Ind.

ONE of the most important matters connected with brooding the chick artificially that presents itself to the novice is that of the number of chicks to put in the brooder. In fact, I know of no material fact that has such an important bearing on the future health and growth of the chick as this one particular. The one great element tending to the success or failure of the operator is whether he overcrowds his brooder or not.

The capacity of the brooder must be regulated by the conditions under which it is operated, and as this is the month when a large number of the readers of the AMERICAN POULTRY JOURNAL will be starting their incubators or setting the extra early broody hens and of necessity will be compelled to use the brooder to rear his chicks that will be hatched by incubators.

During February and March the weather is generally so inclement that outdoor brooding is at the best a very risky piece of business. Therefore some kind of shelter should be provided in which to place the brooder, and it should be of such size as to permit the little chick to have a run of say four by six feet. It is advisable that this shelter should at least be free from draughts and warm as it can be made, so as to reduce to a minimum the liability of the chicks getting chilled.

In such a shelter as this a greater number may be placed in the brooder with safety than where there is no shelter at all, but even in this case great care should be exercised not to crowd too many together. My years of practical experience in this matter has demonstrated that there is greater economy in using two brooders in rearing one hundred chicks to broiler age than one.

In making this assertion in the presence of poultrymen I have been often asked to explain myself. This is not a hard thing to do, and only requires a moment's thought to plainly see that it is not only a practical but a sensible conclusion.

In making this explanation it will be necessary to notice the capacities given the different make of brooders and comment on the same, but in doing so I do not wish to be understood as criticising any particular make, or any of them, for that matter, and only do so in order that I may plainly show that theory will not always work in practice. This calls to my mind an instance that occurred at the Chicago show two years ago. I was examining the incubator and brooder exhibit and noticed a brooder in operation. I asked the gentleman in charge the capacity of that particular brooder, and was informed that it was 225 chicks. Farther along in our conversation I ascertained the dimensions of the brooder, and behold, each of the 225 chicks was compelled to exist in a space not quite two inches square. Now, such ratings of the capacity of brooders is what I call theory, and the person that buys such a thing expecting it to fulfill all the require-

ments as represented is going to be disappointed, because it is an utter impossibility for it to do so. The result will be sickness and death among the chicks until they are thinned down to the natural capacity of the brooder, and the owner may congratulate himself if the dying stops there, as those remaining will be so badly stunted and enfeebled that in all probability they, too, will follow in the path of those gone before. This is no picture drawn from imagination, but the hard facts, as taught by experience.

This peculiarity, if so it may be termed, is found in nearly every brooder advertised. For instance, let us take the most common capacity 100 chick, The largest brooder rated at this is 3 by 3 feet, and only allows a space of 3 by 4 inches for each chick.

This may be enough if the chicks can run out on the ground all the time, but when they are shut up for the night, and when they are compelled to be kept inside the brooder for two or three days on account of bad weather, it is just double the number that ought to be confined in one place.

This brings us to the point in question how many chicks should be put in a brooder for best results. I claim not more than 50, and personally I limit the number to 35 or 40, and the results obtained speak loudly in favor of the smaller number. They have more room for exercise when confined. There is less sickness, fewer deaths, more rapid growth and, in fact, it is more satisfactory in every respect.

By limiting the number I confess I am compelled to use more brooders, but this is counterbalanced by the greater number of fowls raised to a marketable age, and experience has demonstrated that financially I am ahead each year by following out this practice, and I know a person will save the price of the extra brooder each year by so doing. To those who are starting brooders for the first time this season, I feel that the best advice I can give is, be careful not to overcrowd the chicks, and if you insist on placing 100 chicks in a single machine, do not claim the brooder is faulty if you have plenty of dead to take out and bury.

One of the things connected with artificial brooding that must be looked after closely is the condition of the brooder. Don't let it go week after week without cleaning it; if you do you will regret it.

You cannot expect to have fine, healthy, fast-growing chicks if they are compelled to live, sleep and eat in the midst of the filth caused by their own droppings. It is not reasonable to expect it, and if there is a person who thinks they can raise poultry and not keep things clean they will be disappointed.

Clean the brooder at least three times a week, and each morning is much better. Then it don't take so long to do the job, and by making it the practice to clean up each morning you are always ready for visitors, and can show a fine, clean, bright looking place.

I think I hear some say, does he do this himself. I will say this: If you think I don't, come to my place next spring and see for yourself. I will try to treat you courteously and make your stay pleasant and profitable.

---

Frank Willing Leach, proprietor of the Egg Harbor Farm, of Tuckerton, N. J., was elected president of the White Minorca Club at New York, Jan. 25, 1901.

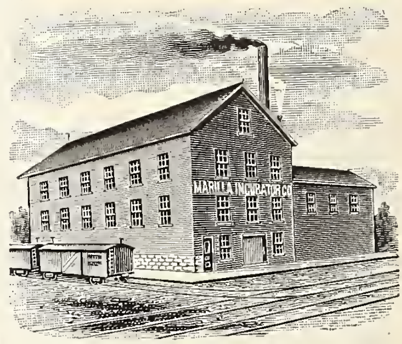
***JAMES HANKINSON, Maroa, Ill.***

## A MODEL INCUBATOR FACTORY.

The accompanying illustration shows the factory of the Marilla Incubator Company, newly built this season at Rose Hill, N. Y. It is devoted entirely to the manufacture of the Marilla Incubators and Brooders and is thoroughly equipped with new machinery, including a 60-horse power Corliss engine, and everything found in a first-class up-to-date wood-working factory and planing mill. The metal working department is also equipped with a number of special machines used in making the hot air tank or radiator, which is a special feature of the Marilla Hot Air machine. This radi-



ator is made of galvanized iron and has three inlets of pure warm air, instead of one as in the ordinary incubator. The radiator hangs suspended by a flange so that it does not touch the side of the incubator, and as the sides are lined with asbestos paper, there is absolutely no danger of fire. The radiator is so constructed as to give the greatest possible heating surface, thus maintaining an even temperature with the least amount of fuel. A return flue system carries the hot air to all parts of the incubator, conducts it along the sides and finally discharges it through two ports on top of the machine. No direct heat from the lamp enters the chamber.

The Marilla Company has never claimed to manufacture the "Cheapest" incubator, preferring to put out at a fair price a machine that will stand every test and do perfect work. They buy all their lumber in car-load lots and pass it through large double dry kilns, thus thoroughly seasoning it before it goes into the factory. Only first-class mechanics of unquestioned skill are employed and every incubator is tested before being crated. All this care is necessary because the Marilla is sold on 30 days' trial, and the company cannot afford to send out a machine that is not entirely up to the mark.

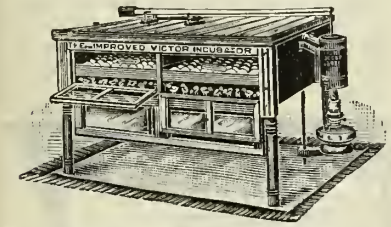
The new catalogue of the Marilla is a handsome little book full of practical suggestions on incubation and brooding. Send for it.

---

A. P. J. readers will be interested to know that George G. Brown, of Cleveland, Ohio, the White Wyandotte breeder, has secured the services of M. E. Wurts, who will have charge of the Poultry Department of "Roycroft Farm" for the coming year. They have about fifty head of White Wyandotte hens and pullets, have made excellent matings and every one of the birds are fit to show in most any company, and with the combined knowledge of Mr. Wurts and Mr. Brown in mating and breeding they expect to please their customers and be heard from at the show next season.

## POULTY PROFITS.

The biggest side issue of farming is poultry raising, and it can be made positively profitable, if carried along with some degree of forethought. The very first thing to do is to get a good incubator—the Victor incubator is one of the very best. Let the hens do the laying, feed them up and keep them up to the laying point, but do not waste chances in setting hens. The utmost care will not prevent hens breaking eggs and leaving the nest—the Victor incubator, it has been said, is "the hen that never leaves the nest," it certinly don't break any eggs. The Victor is so very simple, so strong, almost self-regulating, that it is much easier to handle than even one self-willed hen, while it takes care of more eggs than a score or more of hens. As to results, the incubator produces such greater proportion of chicks that it is hardly possible there is a chicken raiser



unfamiliar with that feature. After the Victor has produced the chicks, the third striking point of difference from the hen is that the chicks are free from lice and disease—they start out in the world endowed with health and strength. That means earlier to market, if you raise to sell to the meat dealer; or it means quicker maturity of egg-producing pullets, if you are going to market eggs. The farmer or chicken raiser that is not familiar with the Victor incubators and brooders should write at once to George Ertel Company, Quincy, Ill., for the 178-page illustrated descriptive book of incubators and brooders. It is "chockful" of poultry lore. It will tell you how to increase a hatch in almost any machine that is made anywhere near right. There is much in it, too, about hatching and raising ducks, how to build poultry houses, etc.

## ROSES AND OTHER FLOWERS.

Every species of bowers and plants from the hardy pansy and dainty sweet peas to the majestic and beautiful rose; as well as the more homely potato and other vegetables, are described in the 1901 issue of Vick's Garden and Floral Guide. The book is handsomely gotten up, contains 130 pages, and more than 250 elegant half-tone illustrations showing in almost life-like effect the various flowers, etc. How to plant, cultivate and secure best returns from flower and vegetable gardens, whether operated for pleasure or for profit, is fully treated upon, making the volume a cyclopedia of useful and valuable information to any one interested in the subject of gardening. By writing to James Vick's Sons, Rochester, N. Y., and mentioning which plants most interest them, our readers can secure a copy of the Guide without cost.

Klondike Incubator Company, of Des Moines, Iowa, is furnishing A. P. J. readers free, upon request, their splendid new catalogue. Every poultryman should have one.

# Warren's Buff Rocks.

The foundation birds of my flock were the best that money could buy and that experience could produce. They are Plymouth Rock in shape and Buff in color. They will win for you and their eggs will produce winners. I can please you and will guarantee to do so. A limited number of eggs from choicest matings at $3 per sitting.

**JNO. J. WARREN, Box A, Victor, Ill.**

# A LAND SLIDE. . . .

At the New Albany Show, Dec. 24-29, 1900, we won on **BUFF ROCKS** every prize awarded except 3d pen. **BUFF WYANDOTTES,** 1st cock, 1st and 2d pullet, 1st pen (no cockerel or hen shown). **BUFF COCHIN BANTAMS,** 1st cock, 1st and 3d cockerel, 1st, 2d and 3d pullet, 2d hen, 1st pen. 45 prizes at two State shows in January, 1900. Egg orders booked now. Buff Rocks, $1.50 per 15. Wyandottes and Bantams, $1.50 per 15 straight. Some nice Bantam cockerels at $1 each. Also pedigreed Belgian Hares at right prices.

**J. C. BROWN & CO., Lock Box 17, Campbellsburg, Ind.**

# By Crackee! Do You Know

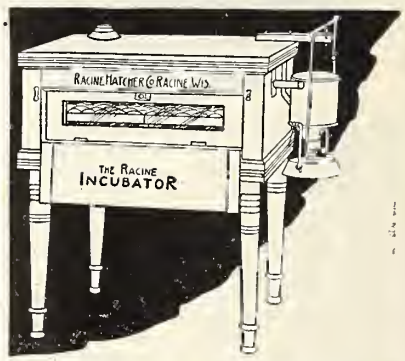
## WHAT INCUBATOR TO BUY.

The question of the artificial hatching brooding of chickens has now become so much a necessity in the successful handling of poultry that its value is no longer questioned. The only thing left for the purchaser to do, therefore, is to select those machines which seem best fitted to his or her requirements. In this connection we wish to direct the attention of our readers to the Racine Incubator, which we illustrate below, and which is manufactured by our advertising patrons, the Racine Hatcher Company, Box 26, Racine, Wis. This machine combines in a high degree all those requirements necessary to produce the very best obtainable results in hatching chickens artificially. Being entirely automatic, they require practically no time and attention. They are equipped with a thoroughly reliable regulator which automatically adjusts itself to all conditions so as to keep the egg chamber hovering around the desirable 103 degrees. They ventilate themselves and thus obviate the necessity of opening and closing the doors for this purpose. They



heat with hot water, which has been demonstrated to be the best because it prevents sudden extreme changes in temperature. The specially constructed lamp requires the very minimum of attention and is perfectly reliable and safe. There is a convenient nursery under the egg chamber for the drying off and temporary brooding of very young chicks. The machines are well constructed of fine, straight-grained wood, well seasoned so as not to check or crack under any circumstances. Handsome turned legs, and the whole finished with coach varnish, which brings out the great richness and natural color of the wood. They have double walls all over with extra non-conductor packing in the dead air space between the walls. This further prevents the loss of heat or any chill from the outside. They are made in several convenient sizes, holding from 50 to 300 eggs. They are sold under a positive guarantee to give satisfaction. The Racine people also make a complete line of indoor, outdoor and sectional brooders of equal superiority. Write them for their catalogue, "Poultry Pointers," and address them as above; they will take pleasure in mailing you a free copy.

We have received a copy of the work, "Great Crops of Small Fruits and How to Grow Them," published by R. M. Kellogg, Three Rivers, Mich., president of the Michigan State Horticultural Society. This is not a mere catalogue, but a treatise on plant life and the laws which govern the development of fruit in plant. Mention A. P. J. when sending for it.

Messrs. Goette and Schroeder, of St. Paul, Minn., have this season added a large number of victories to their showroom record. They have for fourteen years been breeding high grade s.-c. White Leghorns and Silver Wyandottes, and we can consistently say that their birds are as near perfection as it is possible to get specimens of these varieties. Their show record is too lengthy to include in this mention of their stock, but those interested in these birds can obtain a list of this firm's winnings by addressing them. The Silver Wyandottes are bred by Mr. Goette, and at St. Paul last month he won all the firsts and seconds on cockerel hen pullet and pen and was awarded first for best display. We have seen Silver Wyandottes at many of the largest shows this season, but have not seen a display that equaled Mr. Goette's in quality. His birds are wonderfully laced and possess grand shape and size. We will stake our reputation for truth and veracity on the statement that Mr. Goette has as fine Silver Wyandottes as were ever exhibited in a showroom and that his customers will get all that he promises them. Mr. Schroeder of the firm breeds the White Leghorns and his record on them this season is the best evidence of their superiority. At Chicago he won nine regular prizes and at St. Paul 19 prizes, including first and second on cockerel, hen, pullet and pen, and first for best display. He also won the $50 silver cup offered on the highest scoring pen of birds in the show, all varieties competing. This pen had the phenomenal score of 190½. He had 22 birds in his exhibit scoring from 94 to 96 points. If records and prizes count for anything this firm surely has good cause to make the claims for their stock which they do.

---

Mr. Ira C. Keller, Prospect, Ohio. Won at the Ohio State Show at Wooster, Jan. 17, 1901, on Golden Wyandottes, cocks 1st, 2d; hen, 1st, 2d 3d; cockerel, 1st, 2d, 3d; pullet, 1st, 2d, 3; breeding pen, 1st; special for the best 10 birds; White Wyandottes, tie for first cock, 2d, 3d; pullet, 3d, 4th; breeding pen, 1st; gold special for best 10. Golden Sebrights, cock, 2d; hen, 2d; pullet, 3d; cockerel, 1st; Silver Sebrights, hen, 1st; cockerel, 1st; pullet, 1st; Belgian Hares, matured buck, 1st; littered doe, 1st; buck, under 6 months, 1st; doe, under 6 months, 1st, 3d; doe litter, 1st; State championship for best buck bred and owned in the same on doe.

At the Great New York show he won 23 regular premiums on 25 entries. Golden Wyandottes, cock, 1st, 3d, 4th; hen, 1st, 3d, 4th; cockerel, 1st; pullet, 5th; breeding yards, 1st, 2d; $100 challenge silver cup for Wyandotte cock cockerel, hen and pullet, and 11 cash specials, also nine premiums on nine entries of Golden and Silver Sebrights. These two shows occurred the same week and he had 76 head at these two shows. Keller has, so he writes us, 500 head of fine birds and hares to sell at low prices considering the quality. He breeds great quality and lots of them and are all line bred for many years.

---

W. G. Griffith, of McNabb, Ill., writes of a splendid business and says that his stock is doing nicely. He still has some fine Barred and White Plymouth Rock cockerels, also White Holland Toms yet on hand.

# Bronze Turkeys

**OF THE**

## National Strain

## Winners Wherever Shown.

We have the finest lot we have ever raised, in both size and color. We breed from 12 different pens, and can at all times mate pairs, trios and pens, not kin and for best results. Our birds are winners and will produce winners. The National Strain enjoys the greatest record of producing prize winners of any other strain in the world, and has won more first prizes in hot competition than any other. Sell very low considering the quality. We have pleased customers in nearly every State in the Union besides Canada, Africa and Australia. Send to headquarters and get the true National Strain. Eggs are $5.00 per 12 or $20.00 per 50. We also have a grand lot of

***Show Birds that Win in the Fastest Pace.***

## Barred Plymouth Rocks

in any quantity, for sale cheap. Western agents for the famous Star Incubators and Poultry Supplies. Send for the best catalogue out on Bronze Turkeys—28 pages. It is worth a dollar to you. Write for prices. Catalogue free. Send 10 cents in silver or stamps for our new 1901 catalogue and guide, "How to Make Money with Turkeys"—20 pages, 8½x11½ inches, with colored plate valued at $200,00. It will tell you how to feed and care for old and young stock, how to mate to produce winners, how to judge them and score them, giving cut, section by section, as I would in the show room; giving secret in a nutshell to the successful raising of turkeys; valuable recipes for diseases, and is a book that is worth $25.00 to anyone who is interested in turkeys, but will be sent for only 10 cents and you may deduct that from your first order. It is the greatest work of the kind ever put out. Send to-day; do not delay.

**J. RITTENHOUSE,**
**Larwill, Indiana.**

# White Wyandottes. Only.

Hawkins strain. Eggs for hatching a specialty, from first-class breeding stock, 15 for $1.25; 30 for $2; 50 for $3; 100 for $5. Order direct from this ad and your orders will receive my prompt attention. Reference, Havana National Bank.

**HARRY HILL,**
**Box 327, Havana, Ill.**

# Silver Laced Wyandottes.

With an unexcelled show record. Last record at Battle Creek, Mich., Dec. 1900. **Clean Sweep** except on cocks. No cocks shown. A choice lot of cockerels bred from winners at reasonable prices.

**E. C. HUNGERFORD. Concord, Mich.**

# NATURAL HEN BROODER.

## Natural Heat.

## Millions of Chicks

die every year in brooders, because the brooders are not up to nature. The brooder should have a natural heat and natural ventilation in the hover of brooder. Hot, dry heat causes bowel trouble, leg weakness, weak lungs and consumption. We get letters every day from experienced poultrymen who say: "We cannot raise one-third of our hatch—we are looking for a better brooder." We are sending out large orders to old customers who say our brooders beat the old hens and every other brooder tried. We are also sending out inside brooder fixtures to go in other brooders, and all report great success. ***Price $8,*** for heater, mother corner plates, lamps, ventilators, etc. The lamp never smokes and is sure and safe. It burns only 2 cents worth of oil in 90 hours. The hover has perfect vetilation, is 30 inches in diameter and filled with a warm, moist heat. We send, with each order, blue prints showing how to make brooders or re-arrange other brooders, and how to make a roosting coop and brooder for chicks after they are six weeks old up to maturity. This is worth $50 to you, and is the only way to raise chicks healthy. Free with every order.

### A Customer's Latest Report:

Rockland, Pa., March 11, 1901.

MR. JNO. M. SONTAG, St. Charles, Ill,

My Dear Sir:—Send me five more brooder heaters at once. I now have one complete brooder and three heaters and fixtures and I want more. This explains what I think of the Natural Hen Brooder. I tried a whole lot of brooders, but your invention is so far ahead of the others that I cannot find a word that is good enough for it. I had your brooder out in a snow storm, 10 to 23 below zero and the heat was very easy to keep up. The chicks are doing finely, not a sickly one and none have died except five which got lost in the snow storm and froze to death. The other brooders which I have could not keep up the heat in the shed, and could not get the heat up to 70 degrees. I never could raise one-half of the chicks, but now I can raise all of them and will do well in the business. Your brooder is a wonderful invention—a natural heat and ventilation. It beats all the other brooders tried. I will be pleased to answer anyone who cares to write to me, if stamped envelope is enclosed, regarding the Natural Hen Brooder. Very respectfully.

REV. F. D. A. SUTTON.

## *Eggs From Show and Laying Strains.*

***Records of 209 and 239 eggs per season.*** ***Triple Line Breeding System.***

I have won in the past four years over 200 prizes and silver cups and hold two world records on Chinese Black Langshans, won in last winter show, with B. N. Pierce judge. No purple and not cut for color, score 94½ to 96½. I use three cockerels to each pen and change cockerels every day. You need not be afraid of getting infertile eggs. ***Eggs $3 per 15.***

Buff Wyandottes, that are buff to the skin, wings and tail, fine shape and heavy weight, 7 to 9 pounds. Eggs, $3 per 15.

Rhode Island Red Reds. Winners. No better layers and general purpose fowl lives. Eggs, $3 per 15.

Barred Rocks, score 91 to 94½. Eggs, $2 per 15. China Ducks, silver cup winners at Chicago. Large, heavy-weights. Eggs, $3 per 13.

***Send for brooder and Stock Catalogue. It is free this month. It is worth $100 to you***

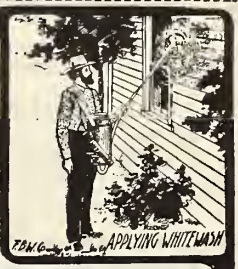
# RIPPLEY'S

**Compressed Air Sprayer and Whitewashing Machine**



is something all Breeders and Farmers should use. It saves labor and time, and makes the same amount of solution go twice as far as other sprayers. Fine for spraying sheep dip, lice killer, fly remover and all liquid insecticides and disinfectants on animals, in stables, vaults, etc. Best thing made for whitewashing poultry houses, barns, fences and cellars, or for washing buggies, windows, etc. Makes a fog-like mist; will throw a continuous stream 35 feet. Made of galvanized iron and copper; tested to 60 pounds pressure. Has safety valve, can't burst. Has fine brass pump, fitted with Rippley's special Interchangeable Spray nozzle and 4 feet of fine hose. Made to strap to body or carry in hand. One minutes pumping gives sufficient pressure to discharge entire contents. Guaranteed to be as represented or money refunded. Guaranteed to be the best compressed 5 gallon air sprayer made or money refunded. Fine machine for applying Rippley's Fly Remover and Rippley's Lice Killer on large herds of cattle and horses.

**RIPPLEY'S LICE KILLER** for poultry, hogs, cattle, sheep, horses, etc. Endorsed by leading Breeders everywhere. ½ gal. 50c, 1 gal. 90c, 5 gal. $3.75. Special price for larger lots. Chas. McClave, New London, O., "Your Lice Killer and Sprayer I believe is the best on the market." Arthur Duston, Marlboro, Mass., "Your Lice Killer and Sprayer is the best I have used." Geo. Northrup, "I am sure there is nothing better on the market." Sid Conger & Son, "Your Lice Killer does the work. Quote price on 1 bbl." Hollyhock Poultry Farm, Des Moines. "Ship 1 bbl. at once. Your Lice Killer and Sprayer is O. K." Meadow Brook Farm, Dallas, Pa., "Your Lice Killer and Sprayer will do all you claim."

**RIPPLEY'S FLY REMOVES** instantly removes flies from all animals sprayed with it. Cows rest easy all day, and give more milk. Calves increase in flesh, Work horses rest easy. You save feed, and your horse will work better. Price 1 gal. $1.10, 2 gal. $2.00, 5 gal. $4.50, 10 gal. $9.00. Special price bbl. lots. Rippley's Special Compressed Air Hand Sprayer to apply our Lice Killer and Fly Remover $1; common tin hand sprayer 50c.

# BULL-STRONG!

***....PIG-TIGHT....***

An Illinois farmer said that after harvest he had fully 200 bushels of loose oats on the ground that he could not secure any benefit from, because the fence around the field would not turn hogs. Figure the loss for yourself. He also said, all this would have been saved if he had used the Kitselman Woven Wire **Coiled Spring Fence**, and the value would have gone a long ways towards paying cost of the fence.

With the **Duplex Machine** any farmer can make it himself at the actual cost of the wire. Catalogue free for the asking.

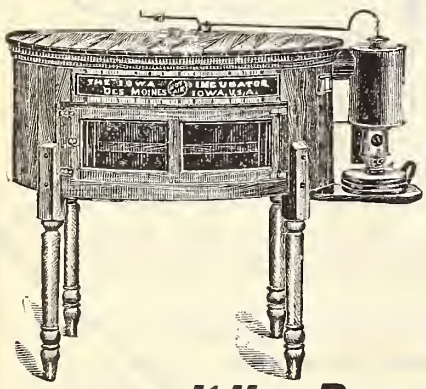
# The Reasons why a Round Incubator is Superior to a Square One



## The IOWA

*"The Incubator that is Different,"*

***Has No Cold Corners,*** but an ***Equal Heat*** in the ***Egg Chamber.*** Because our method of heating allows the heat to travel from the center outward, giving the same distance in all directions and an absolute equal temperature. This is impossible in square machines because of the corners.

### *Our Central Ventilation*

is under control at all times and can be regulated to suit the surroundings which the machine is being operated in, doing away with supplied moisture and the changing of the trays from ***"Side to Side,"*** and ***"End to End,"*** as found in the square incubator instruction book.

***It Has Been Proven that a Square Silo Is Not a Success.***

**WHY?** Because the contents will not ferment in the corners, due to the fact that the air does not circulate in that part.

## The Iowa Has No Cold or Non-Circulating Corners.

Our Catalogue will prove our claims. It is FREE.

***IOWA INCUBATOR COMPANY,***

***Box B 163.*** ***Des Moines, Iowa.***

## HOLLIS' WHITE ROCKS.

First Prize Pullet, Cleveland, O., Show, December, scored 94½ by L. G. Jarvis, Gnelph, Canada.

If you do not believe it **SEND AND GET HIS CATALOGUE** and it will tell you who scored his birds. He stands in front, with highest scores by leading judges. I. K. Felch gave one of his cockerels score of 95 points, and wrote across score card, every doubt given against this noble big fellow; weight, 11 lbs. H. A. Bridge gave one of his birds score 95 points. B. N. Pierce cut one of his cockerels one-half in color. L. G. Jarvis, Gnelph, Canada, scored 4 birds 94½. J. Y. Bicknell scored cockerel 94½. Charles McClave, 93½ scores of birds. I have exhibited 30 times in past 8 years and won 29 times on cockerel, and tie the other one score. Sharp Butterfield scored 3 cockerels in one show 93½. Send for my catalogue and see my winnings and scores, and who scored them, and you will say he leads the procession in winnings.

## Never Lost on Breeding Pen

in any score-card show, nor any pullet where they were weighed and weighed correctly. Eggs $3 per sitting. Only lost once on first cock. I won all prizes at Springfield, O., Aug. 21-24, 1900, all prizes offered. My strain won all prizes at Urbana, O., Aug. 14-17, 1900, this season making 30 times I have exhibited in 8 years. No breeder ever made such record.

## Ten Times I Have Won Every Money Prize Offered. Eggs $3 per sitting.

500 cockerels—choice ones—for sale, and pullets in any number. I have a grand lot of show birds for winter shows. They never fail to win for me, and they will win for my customers. Residence, 363 South Fountain ave. Farm one-half mile from city. 265 acres.

***GEO. M. LEFFEL, Springfield, Ohio.***

# They Are Winners.

## Roycroft Strain

# WHITE WYANDOTTES.

They contain four very essential points that constitutes an Ideal Wyandotte: True Wyandotte Shape, Snow White Plumage, Size and Yellow Legs. First pen and 2d pullet at the great Cleveland Show, 1901. First and 5th pullets Chicago, 1901. EGGS from SHOW BIRD pen, $3 per 13. A few good COCKERELS for sale.

***ROYCROFT FARM, East Cleveland, Ohio.***

***GEO. G. BROWN, Proprietor.***

# Vass' Buff Orpingtons,

At the Crystal Palace Show of America, Madison Square Garden, N. Y., 1901, in the hottest class of Buff Orpingtons ever shown in this country, won 1st and 2d cock, 1st and 2d hen, 1st cockerel, 1st and 4th pullet. In the last three years I have won more firsts on Buff Orpingtons at Madison Square Garden than all my competitors together. My Orpingtons have won at all the leading shows of America—at Boston, Philadelphia, Orange, Hagerstown, Trenton and Dryden. I made 34 entries at seven leading shows, winning 19 firsts, 8 seconds, 3 thirds and 1 fourth. My Orpingtons have the size, shape and color. Pens headed by imported birds. A few trios left at reasonable prices. Buff Rocks and White Wyandottes of high quality. Eggs for sale at all times. Satisfaction guaranteed. Circular free. Write for prices.

**C. E. VASS, Washington, N. J.**

**DO YOU KNOW**

# Scott Deaner?

If not you had better get acquainted with him and his prices for poultry and eggs for **1901.**

## Please Read Carefully.

The prices quoted for stock and eggs are as low as I can afford to make them and send you birds and eggs from first-class thoroughbred stock. Any breeder who offers to sell at a less price must either furnish you with inferior stock and eggs or lose money. I have birds in my yards that are hard to duplicate for quality. They are premium winners. I showed at Rockford, Ill., (F. H. Shallabarger, judge,) 24 birds and received 17 firsts, 4 seconds and 3 thirds. At Freeport, Ill., I showed 30 birds and received 25 firsts and 5 seconds. My guarantee on eggs are 7 chicks from each sitting or duplicate same at half price. I replace broken eggs free of charge.

### Can You Ask for Anything Better Than This?

You may order of different varieties if you wish to make up one, two or three sittings. Order direct from this ad and get what you want at prices that cannot be duplicated for the quality of the stock. **Remember I guarantee everything I ship and refund the money if not exactly as represented.** I have bred fancy poultry for thirty years, and will send a score card with each bird if desired.

**Mating and Scoring Birds a Specialty. Terms within Reach of All.**

### Birds, $2 each, $5 trio; Eggs from following varieties $1.50 for 13, $2.50 for 26, $3.50 for 40.

## Buff Wyandottes.

Quality and price are both right. Winnings at St. Paul this year: 1st, 2d, 3d and 4th pullet, 1st and 2d hen, 4th cock, 5th cockerel, 2d pen, best display. Zumbrota, Minn., 1st, 2d and 3d pullet, 2d cock, 3d cockerel, 1st, 2d and 3d hen, 1st and 3d pen. 20 good pullets for sale at $2.50 each; also a lot of cockerels. Eggs from winners $2 per sitting.

***E. S. PERSON, Zumbrota, Minn.***

Member American Buff Wyandotte Club. Sec'y and Treas. Goodhue Co. Poultry Assn.

## Light Brahmas, Cornish Indian Games, Buff Rocks.

**EGGS** A GRAND CHANCE TO GET **EGGS**

From fine exhibition matings that will not fail to hatch you high-scoring, exhibition birds. I have mated up 8 pens of the above breeds. Each pen contains nothing but choice birds, and will breed choice birds. I guarantee satisfaction, and will not let a customer feel otherwise. Have a few choice cockerels and pullets to spare that are fine,

***J. S. PIPER, P. O. Box 187, Hannibal, Mo.***

## Light Brahmas, Barred Rocks.

Nothing cheap except the price. At Burlington, wis., we won more prizes on Light Brahmas than any other exhibitor. We won 2d pullet, tied for 1st; 3d hen, tied for 2d; 2d and 3d cockerel, 3d cock. No pens entered. One of our best breeding pens contains seven females with an average score of 93½. Our best Barred Rock pullet at this show was prononnced by the judge to be the best and evenest surface colored bird in the show. We can please you and will guarantee to do so if entrusted with your order. Eggs from our winning Light Brahmas, $2.50 per 13; Barred Rocks, $2 per 13. Mention A. P. J. when writing.

**VILLAGE POULTRY FARM.** ***HALBACH BROS., Waterford, Wis.***

## White Wyandottes.

A few choice cockerels and a grand lot of extra fine, early hatched pullets for sale. All bred from my Chicago winners. Eggs from prize winners, one sitting, $2; 3 sittings, $5.

**C. H. DANFORTH, Batavia, Ill.**

## RECORDS COUNT.

You don't have to believe what I say. See what the judge says: Barred Rocks at the great Cleveland Show, Jan., 1901, 1st cock and 2d ckl., 2d hen, 1st and 4th pullet, 1st pen, 13 exhibitors in the class, and we won three firsts and two seconds. Talk about your records! Where can you find one to equal this at a National show? Eggs from these winners $3 per sitting; two sittings for $5. Choice birds for sale. Send for circular.

**M. J. TEMKOVITS,**
**Brooklyn, Ohio.**

## Golden and White Wyandottes, Pekin Ducks.

Get them from Schultz and you can depend upon them being all right. We breed only the best. Our show record proves it. Have been winning for years and always get our share of the first prizes. Won on Goldens this year at St. Paul, 1st cockerel, 1st pen, 2d hen and 3 pullet, in a class of 49. 4 prizes on Whites, including 1st pullet. 1st Pekin Drake, score 98; 2d Duck, 96½. Don't place your order for stock or eggs till you write me.

# You Can Beat the Band, or the Express Co. Either,

By bnying eggs for hatching. Yon do not have to pay two rates on them as on breeding stock. Yon can raise your own winners, save that $10 to $25 per show bird you paid Brown or John Jones, and laugh at yonr neighbor because he said there was nothing in it. We sell you the eggs from our best matings at only $3 per sitting of 15 or $5 per 30. Will positively make no frnther reduction as we send you from the same pens we set from in our own yards. Remember, we breed Barred Plymonth Rocks exclusively, and have had twenty year's experience with this breed. We have furnished winners in many of the largest exhlhitions of the past, also winning in onr own exhlhit at Cedar Rapids, Ia., Jan., 1900, the most valuable prize ever offered on this variety, by the American Poultry Association—the grand $50 sweepstakes cnp, for best cock, cockerel, four hens and four pullets in American class. Mention this paper in writing me. Also send for our 1901 circular, which is free.

**F. H. SHELLABARGER, West Liberty, Iowa, U. S. A.**

# Did You Ever Get Left?

## King Never Did.

First, 2d and 3d cockerel, 1st and 3d pullet, 1st hen, 1st pen, at Macomb, Ill., Dec., 1900, Chas. McClave, judge. Ten of the grandest matings of my life in single and double matings. Eggs from them will not disappoint you. They are the best in the country. My customers say so. I guarantee results, as per my circular. A poor hatch made right. Get new circular for a postal card. Address the Exclusive Breeder of Barred Plymouth Rocks,

# TALK ABOUT QUALITY!

At the Indiana Poultry Association Show, at New Albany, Ind., Jan. 8-13, in a class of 141 White Plymouth Rocks, the cream of Indiana's production and the largest class ever exhibited at any show in the State, with only 12 birds entered, winning four ont of five possible firsts and all cash specials but one. These proud winners are the result of seven years of careful selection, scientific mating and systematic line breeding—the only method by which any breed can be brought to perfection. My customers will get eggs from a pen headed by a 95 1-2 point male bird mated to females scoring 94 1-2, 94 1-2, 94 1-2, 95, 95, 95, 95¾ by Pierce and Heimlich, at New Albany, Ind., and Bridge and McClave at Louisville, Ky.

**W. A. GREENE,**
**Box 401, New Albany, Ind.**

# Farrar's White Rocks

## Cannot be Downed.

They are still winning the best prizes at such shows as Detroit, Mich., Bluffton, Toledo, Fremont and Cleveland, Ohio. At Toledo, O., this season, they won 1st, 2d and 4th cockerels, 1st, 2d and 4th hen and first pen. No cocks or pullets entered. At Cleveland's great show this season they won 1st and 3d cockerels on three entries. The first prize cockerel scored 95½ by Frank Heck. Stock and eggs for sale, and I absolutely guarantee satisfaction. Write me before placing your order.

**W. J. FARRAR, Toledo, Ohio.**

are now coming out. (E. B. Thompson Ringlet strain exclusively). High time you were placing that egg order of yours with me, if you want the **BEST** this coming fall. Eggs only $2 per sitting, and a good hatch guaranteed. A few choice cockerels to close out this month.

**F. A. EDGEWORTH, Downer's Grove, Ill.**

## Partridge Wyandottes

***Male Birds now in Breeding Pens at***

**Beaver Hill Farm,**

**T. E. ORR, Prop,**

**1st—The Cock** that won 1st at Chicago and 3d at Pittsburgg; when in condition, the most perfect male we have yet seen.

**2d—The Cock** that won 2d at New York and 2d at Pittsburgh; also 3 specials at N. Y., one for best shaped male. A handsome bird—wt. 10 lbs.

**3d—The Cock,** bought at Pittsburgh show, that won 1st at Erie, 1st at Cleveland, 3d at New York and 1st at Pittsburg; has the most perfect plumage we have ever seen on a male bird.

**4th—The Cockerel** that won 1st at New York, not entered elsewhere. Quite similar in plumage to No. 3; fine in shape and comb.

**5th—The Cockerel** that won 4th at Chicago and 1st at Pittsburgh. Very rich, dark plumage; said by many entitled to the plumage special at Chicago.

**6th—The Cockerel** that headed 1st pen at Pittsburgh. Artist E. S. Comings, one of the originators of Wyandottes, selected him for sketching at Pittsburgh, among all the above, as the handsomest Wyandotte in shape and plumage he had ever seen.

**7th—A Cockerel,** never shown, almost exact duplicate No. 6, but with a more perfect comb.

**All Have Very Bright, Yellow Shanks.** The most serious defect in the lot is on No. 3, the greatest prize-winner.

***They are now properly mated to FIFTY FINE FEMALES,***

16 of which have been entered a total of 20 times this year at 7 leading shows, and have won **8 First, 4 Second, 4 Third and 2 Fifth Prizes,** getting left only twice.

**Yes, we're pretty well fixed on Partridge Wyandottes.**

***Eggs, $5 per Sitting.***

# Clover Lawn Buff Plymouth Rocks.

## FOR 1901.

## Are Winners of More Prizes than any Buff Plymouth Rocks in Michigan.

At the great Michigan State Show, Detroit, Jan., 1901, in a class of over 60 birds, 1st cock, 1st, 2d, 3d and 4th cockerel, 1st and 2d hen, 1st pullet, 1st and 2d pen and the **State Silver Cup,** offered by the American Buff Plymouth Rock Club. Also are winners at Michigan Fanciers' Association, Battle Creek, Dec., 1900, and the National Fanciers' Association of Chicago, Jan., 1901. Think I am safe in saying that my pens are mated with 6 of the **highest class** Buff Plymouth Rock males that can be found in the Western States. 1st pen with **GOLD MINE,** the phenomenal sire and prize winning cock. 1st at Michigan Fanciers' Association, Battle Creek, Dec., 1900; 1st at Michigan State Show, Detroit, Jan. 1901; 2d at National Fanciers' Association, Chicago, Jan., 1901. 2d pen with **PRINCE WOODEN,** 1st prize cockerel at Chicago's great show, Jan., 1901, winning in class of over 20 other cockerels. 3d pen with **SOLID BUFF,** 1st prize cockerel at Battle Creek, Dec. 1900; 1st at the State Show, Detroit, Jan., 1901. 4th pen with **COL. BARNES,** 2d cockerel at Battle Creek, Dec., 1900; 3d at Detroit, 1901. 5th pen with **GOLD CAP,** 5th prize cockerel at Chicago, Jan., 1901. 6th pen with **GOLD BOND,** a late hatched gem. Never been shown but will be heard from next year as a cock bird. The above 6 high class males are mated with my prize-winning and high-scoring females. Eggs from the above pens, 13 for $3.00; 26 for $5.00; 40 for $7.00, and 65 for $10.00. Eggs from prize-winning Buff Cochin Bantams, $3.00 for 13. A few Buff Rock cockerels for sale.

**H. R. KINGMAN, Clover Lawn Stock Farm, Battle Creek, Mich.**

## EGGS---MAMMOTH BRONZE TURKEYS.

Tom, 1st prize as ckl. at two shows in 1900, score 97, weight 33 lbs. at 9 mo. old; mated to hens and pullets scoring 95 to 96½., wt. 20 to 25 lbs. Eggs $3 per 9; $5 per 18. S. L. Wyandottes, score 90 to 92, $2 per 15.

MRS. HENRY GAISER, Charleston, Ill.

are acknowledged the World's greatest strain of heavy layers. Also winners of Highest Honors at America's Leading Shows. Our matings for 1901 are the best we ever had, and we offer Eggs for batching from prize matings $2.00 per 15; $5.00 per 45.

***H. G. MALTBIE, Geneva, O.***

## Burnett Poultry Yards

Guarantee a hatch of seven or duplicate setting at half price from seven yards of White Wyandottes, (Duston strain) White P. Rocks, (Empire strain) Buff Cochins (Hughes strain.) These birds score from 92½ to 94¾ by Judge Hewes, Felch, Pierce and Bicknel. Eggs $1.50 per 15; $3.00 per 30; $4.00 per 45; $5.00 per 100, and $40.00 per 1000. Pekin duck eggs, (Hallock and Pollard strain) 10c each.

**JOHN W. YATES, Burnett Junction, Wis.**

## S. L. WYANDOTTES

Steinmesch strain, direct from the fountain-head. Bred in their purity for four years. Every Pen leader has grand laced wing bars. Females splendidly marked Large typical birds.

Eggs $2.00 for 13. $3.50 for 26. $5 for 40. A few extra choice cockerels to spare.

**MRS. J. A. RIGG, Iowa Falls, Iowa.**

## J. D. WILSON, Box P WORCESTER, N. Y.

## BUFF PLY ROCKS.

When we say the original "Wilson Strain," you know the rest. As their unequalled winnings on both sides of the Atlantic Ocean substantiate.

Line bred since originated, 1888. Birds from $2.00. Eggs $5 for 13. $8 for 26. $10 for 39. $15 for 65.

# Buffington's Buffs

Price of eggs for 1901 from No. 1 stock: Buff ducks, the only specimens in America, $5.00 for 12; Buff Plymouth Rock, buff Wyandotte, Buff Leghorn, Rose, Pea and Single Comb Rhode Island Reds, Partridge, Wyandotte and Partridge, Plymouth Rocks, $2.00 for 13, $5.00 for 40, $10.00 for 100; Buff Cochins and Barred Plymouth Rocks, $1.25 for 13; $3.00 for 40; $6.00 for 100. Buffington's R. I. Reds are fine bred and have won more prizes for his customers than all the R. I. Red stock in the country. Be sure and get eggs from Buffington's R. I. Reds. We also have for sale pedigreed Belgian Hares. Send for circular.

**ROWLAND G. BUFFINGTON, Box 677, Fall River, Mass.**

# White Wyandotte Eggs

15 for $2.00; 30 for $3.50; 45 for $4.50. Incubator eggs, 100 for 500. Eggs from noted birds, such as **2d Boston Cockerel, 1900; 1st N. Y. Cock and 4th N. Y. Cockerel, 1900,** mated to good strong females. I am better fixed than ever before to ship promptly and better eggs. Order early and avoid disappointment.

## LIGHT BRAHMA BANTAM EGGS

15 eggs for $3.00. **No reduction.** Last season I was compelled to refuse many orders. Better order early and be on the safe side. No eggs sent before April 1st. At N. Y., 1901, three 1sts and four 2ds out of 8. **Remember this is the best flock in America.** Circular and information gladly given. Send at once.

# Miller's MILLHOOK FARM

# Special Prices on Eggs

***We want to become acquainted with every reader of this paper. We want you to know something of Millhook Farm, of the good poultry we breed, how careful we are in mating our breeding stock and the good care we give them so that they will produce good, strong, fertiie eggs that will hatch strong, healthy chicks.***

***The best way for us to get acquainted is for you to send us an order for eggs. If you want any eggs for hatching from the best pure-bred stock in this country, you can get them from us at less than one-half their actual value.***

## $1 per Sitting of 13 Eggs.

### CONDITIONS:

Yru must say that you saw our advertisement in this paper and your order must not be for less than two sittings and cash must be sent with the order.

**VARIETIES** { Barred P. Rocks, White P. Rocks, White Wyandottes, Brown Leghorns, Buff Leghorns, R. C. Br. Leghorns, Light Brahmas, Black Minorcas.

These are the only varieties that we will sell at $1 per sitting. For prices for other varieties and on fowls see our catalogue.

## OUR GUARANTEE:

We guarantee every egg bought from us to be true to name and that they will reach our customer in good condition and hatch good enough to satisfy any reasonable person.

Eggs sold at $1 per sitting will be from the same stock from which we sell eggs at catalogue prices and from the same stock we breed from ourselves. Order direct from this advertisement and save unnecessary correspondence.

## OUR CATALOGUE.

Perhaps you do not know that we issue a very complete and handsome poultry catalogue: well, we do, and if you are interested in poultry, even just a little, you will surely want this book. We will name just a few of the good things it contains: We show in colors B. P. Rocks, Buff Cochins, Black Langshans, S. C. Brown Leghorns, Black Minorcas and Buff P. Rocks. We tell you how to build poultry houses and yards; how to prevent and cure all diseases of poultry; how to feed and care for your poultry from the time they are hatched until they are full grown. We illustrate and describe forty of the leading varieties of poultry, answer hundreds of important questions, give lowest prices of poultry and eggs and much other useful information. This book contains 84 pages and should be in the hands of all who are interested in poultry. Sent post-paid for 10 cents. Address

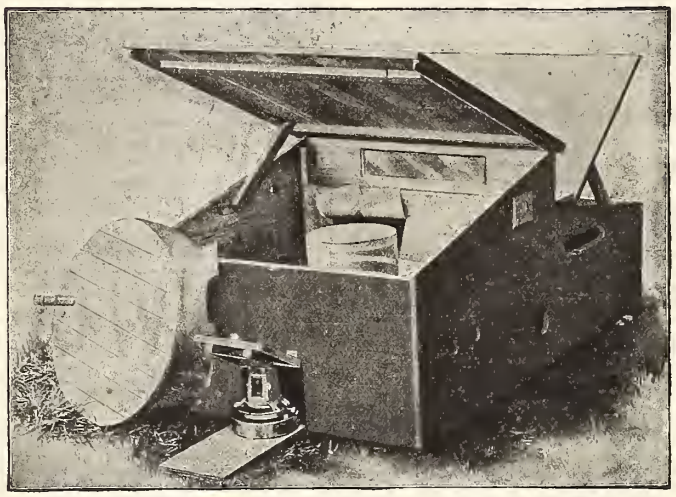
# The Cyphers

## Unequalled, Three-Apartment,

# $12 OUTDOOR BROODER.



Rear View of the Cyphers Three-Apartment $12 Outdoor Brooder.

Next to its Latest Improved, ***Non - Moisture, Self-Ventilating and Self-Regulating Incubator,*** the Cyphers Incubator Company especially prides itself on the ***Three-Apartment Out-Door Brooder*** it manufactures and sells for the ***Low Price of $12,*** complete with seamless bottom, brass bowl brooder stove, tested thermometer, etc. We unhesitatingly pronounce this to be the best brooding device on the market, for ***Either Indoor or Outdoor Use, Regardless of Price.***

## Let Us Enumerate Separately the Special Merits of this Brooder.

FIRST—It is the largest single-flock brooder ever placed on the market

SECOND—It is rain-proof and storm-proof, having a heavy tin-covered roof over both the chick chamber and the feeding apartment, or run.

THIRD—It is fireproof, a Cyphers Safety Brooder Stove being used instead of a lamp, and the entire lower floor of the chicken chamber being protected underneath by a solid sheet of galvanized iron, with an air space between it and the wooden floor.

FOURTH—A brass cold-water pan is used on the Cyphers Safety Brooder Stove, located between the flame and the seamless bottom, brass oil bowl. Cold water placed in this pan keeps the wick from charring and the flame from smoking, thus rendering the stove and brooder prefectly safe; also insuring a uniform heat.

FIFTH—The fumes from the brooder stove cannot pass into the chick chamber (into either apartment), but are carried out at the sides of the brooder by an ingenius and infallible device.

SIXTH—The surplus brooder stove heat preserves all the lower woodwork of the brooder by warming and drying the soil underneath the brooder, thus making the brooder not only safer and more comfortable for the chicks, but also more lasting.

SEVENTH—The brooder stove is easy of access, being above ground, and the sliding board not only brings it quickly within reach but replaces it in exactly the right location.

EIGHTH—This brooder need not be placed in a pit, nor need the ground be excavated for the brooder stove, hence a saving in labor and in the trouble thereafter in caring for same.

NINTH—When the temperatnre underneath the chick hover is ninety to ninety-five degrees, we have a surrounding atmosphere of eighty to eight-five degrees, while in the front apartment the temperature will average about seventy degrees. The chicks, therefore, may suit themselves, going to or from the heat at will.

TENTH—The round chick guard prevents any crowding of the chicks, and also preveuts their coming in contact with the circular heat dome, to their injury.

ELEVENTH—In the night apartment of this brooder there are no stairs to climb, hence no danger of the little chicks getting lost and becoming chilled while learning the way.

TWELFTH—It is the most durable and best made brooder on the market, regardless of price. Both the chick chamber and front run may be reached through full-sized doors, and these doors or lids are covered with heavy tin, painted with two coats of mineral paint. We unhesitatingly recommend this brooder both for outdoor and indoor use. It may be left out in the rain storms or wind storms, and, with reasonable care, the chicks entrusted to it will be comfortable and do well.

## Buff Rocks, Only.

I won at Danville, Ill., Show, 2d and 3d cock, 91½, 90½; 1st, 2d, 3d and 4th hen, 93½, 93½, 92¾, 92½; 1st cockerel. 93; 1st, 2d, 3d and 4th pullet, 93½, 93½, 92¾, 92½, and 1st pen. Chas. McClave judge. The finest of stock for sale. Eggs from my best stock at $2.50 per 15 straight. I always win with my stock. Mention A. P. J. when you write.

**W. E. RUSSELL, Office 218 West Main st., Danville, Ill.**

## Barred P. Rocks
## *THAT WIN THE RIBBONS.*

I have some rare bargains to offer in cocks, hens, cockerels and pullets. I won at the Clinton County Show, in a class of 160 birds, more ribbons than any one breeder, including 1st special for ten highest scoring birds. Eggs in season from my best matings only $3 per sitting. Barred Rocks exclusively. Address,

**ED N. MAISH, Frankfort, Clinton Co., Ind. Rural Route No. 1.**

AMERICAN PLYMOUTH ROCK CLUB. MEMBER.

## What do You Think of This

For a season's winnings on Barred P. Rocks: Hamler, O., Dec, 4-7, McClave, judge, 1st and 2d cockerel, 93, 92¾; 1st hen, 92½; 1st, 2d and 3d pullet, 93, 92½, 92; 1st pen and best display. Toledo, Dec. 22-26, D. J. Lambert, judge. 1st, 2d and 3d cockerels, 44 in class; 1st, 2d, 4th and tied 5th pullets, 44 in class; 1st pen and special for best display. Cleveland, Jan. 8-to 12, Thos. F. McGrew, judge, 2d pullet, only one shown. Ohio State Show, Wooster, Jan. 17-22, Geo. H. Burgott, judge, 2d ckl. 93½, tied with 1st; 3d and 4th pul. 93½, 93, and 2d pen 186. Eggs $2.50 per 15. Care Rural Delivery. E. F. PEIRCE. Port Clinton, Ohio.

## Silver Wyandottes, Exclusively.

At Louisville, Ky., last season I won 1st cock and 2d pen. At Indianapolis, Dec., 1900, I won 1st, 2d, 3d and 4th pullet. Lost 1st cockerel, 93¾, by one pound in weight. Pullets scored as follows: 91¼, 91¾, 91½, 92, 92¾, 91, 91½, 90¾, 91, 92, 90¾, 91, 91, 92. 91¾, 91½, 91¾, 91, 93½, 93¾. Scored by Hewes. I had 13 birds with an average score of 92 points. Choice birds for sale now at reasonable prices. Eggs from prize winners a specialty, $3 per sitting straight.

# Buff Plymouth Rocks, Only.

The show season has closed and all my prize winners mated for best results. I have four of the grandest matings this season that I ever had, headed by Hoosier King and Indiana Boy, two cock birds that are the sires of more high class show and breeding birds than any other two birds in the West. Eggs from these matings $3.00 for 15 straight. A few good cockerels for sale. Write

**A. L. WECKLER. Bunker Hill, Ind.**

# Clarke's White Wyandottes.

Line-bred since 1892. Reports show that birds hatched from eggs from my yards last spring have sustained their repulation as **WINNERS.** My matings this year are, if anything, better than last. Eggs from six matings, scoring 93 to 96 points, $3 per 13; $5 per 26. A few cockerels, hens and pullets for sale.

**G. A. C. CLARKE, Box A, LeMars, Iowa.**

# BLACK MINORCAS,

**EXCLUSIVELY.**

Won at La Porte, Ind., Nov. 26 to Dec. 1, 1900, Hewes, judge, 1st cock 92½, 2d, 3d and 4th cockerel, 94¼, 93½, 93½; 2d and 3d pullet, 94, 94; 2d and 3d breeding pens; silver cup for eight highest-scoring birds in Mediterranean class. Stock for sale. Eggs $2.00 per 13.

**LUNY REYNOLDS, 1221 Maple ave., Westville, Ind.**

# Doane's Black Minorcas

**Have Won at**

## Madison Square Garden,

***1898, 1899, 1900 and 1901.***

## FOUR YEARS

In succession. At recent show Black Minorcas were one of the best classes ever shown in the Garden. My winnings—2d and 4th on cock (should have 1st and 3d; see report of show), 3d on pen and 5th on pullet. My best pen was cut out for a slight tip of gray on one feather in wing of one female. Have won at the best shows of the East for eight years. **TWENTY LINE-BRED COCKERELS** for sale, $5 to $10 each. **EGGS** from the **SAME NESTS** my own chicks will be hatched from at $3; two sittings for $5. A beauty catalogue and mating list free if you mention A. P. J.

**Black Minorcas, Exclusively.**

***J. H. DOANE. Lock Box D, Gouverneur, N. Y.***

# Wright's WHITE PLYMOUTH ROCKS WON

Their share of prizes this season. My pens contain winners at Detroit, Pontiac, Lansing and Northville, under such well known judges as Tucker, Bridge, Russell, Bicknell and Traviss. Here's a sample: At Pontiac, Jan., 1901, I won 1st, 2d and 3d cockerel, 1st pullet, 1st and 2d hen, 1st and 2d pen and 8 special prizes. No cock bird shown. Write for my circular giving full description of all my matings for 1901, scores, winnings, etc. My birds are noted for their size, shape and white plumage. They have wide range on my new Roselawn Farm at Birmingham, Mich., thus insuring strong, fertile eggs. Don't forget to send for circular.

**E. B. WRIGHT, Detroit, Mich.**

Address all communications to me at Birmingham, Mich.

## Blue Barred P. Rocks, Lt. Brahmas, W. Wyandottes.

**Eggs From Winners.**

Look up my winnings at Chilton and Milwaukee this winter and Waupaca, Wis., 1899-1900. I shall have

**10 Grand Pens 10**

My prize and Silver Cup winners will be in these pens, and my customers will get eggs from these winners, of Blue Barred Plymouth Rocks, White Wyandottes and Light Brahmas. Eggs carefully packed and guaranteed to arrive at destination in good condition.

No circular this year. This money I have spent on my pens.

**Eggs $3 per 15; $5 per 30.**

**G. N. KERSTEN, - - Chilton, Wis.**

# COOLIDGE'S WHITE WYANDOTTES.

Have won the lion's share of ribbons at the leading shows in the West. We have an unequaled record at Chicago for two successive years. At State Show every first but one; at Galesburg a clean sweep and sterling cup for best 10 birds in American class. We will sell EGGS—a limited number from pen containing 1st prize birds at above shows, at $5.00; from stock that produced these winners at $2.00. Incubator lots, $7 per 100. A few cockerels for sale with score cards.

***JNO. COOLIDGE, Galesburg, Ill.***

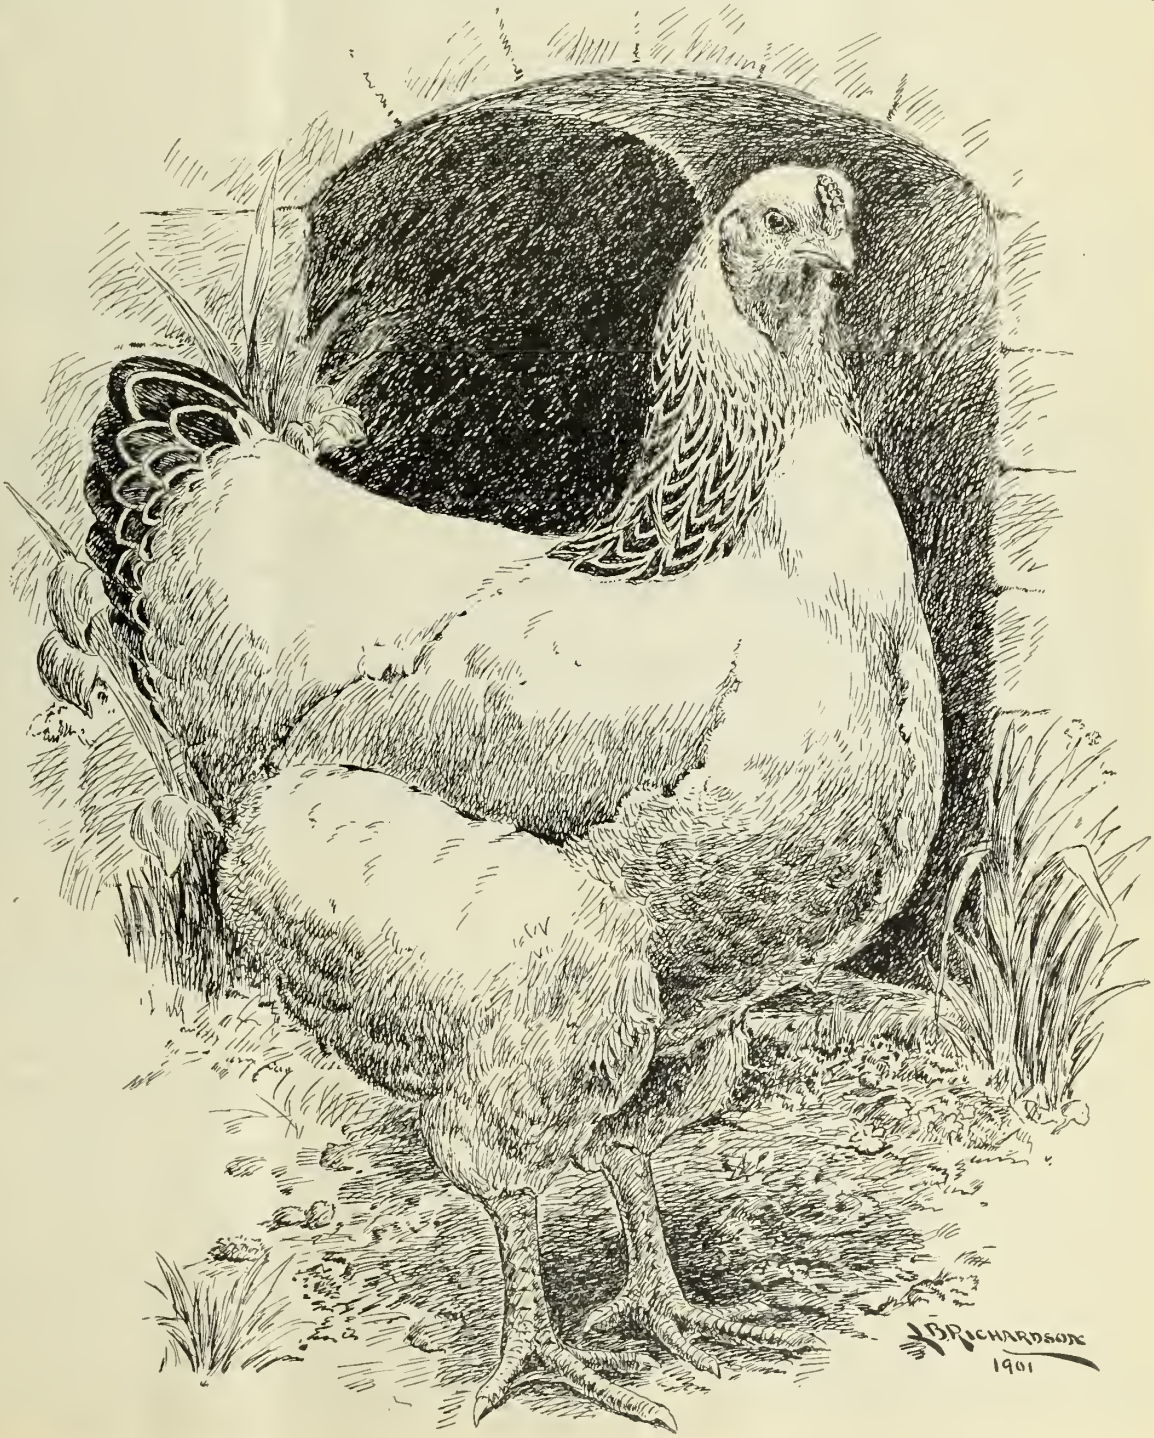
Entered at the Postoffice at Chicago, Ill., as Mail Matter of the Second Class.

VOL. 32. CHICAGO, ILL., APRIL, 1901. NO. 4.



BAREFOOT BRAHMA

# Bare-Foot Brahmas.

The light Brahmas are one of the oldest and most deservedly popular of all breeds of chickens. They are the largest of all breeds, very handsome in appearance, vigorous and hardy. They are the very best of winter layers, producing an abundance of large, handsome eggs at just that time in the year when prices are the highest. The hens are good setters and mothers. The chicks are strong from the first, good growers and easily raised.

As a market and table fowl they have many excellent qualities. They are easily fattened, have a fine yellow skin and do well. They make good broilers, are fine for ordinary table use and furnish the very best of capons. A well developed ligbt Braham capon will rival a turkey in size and afford the sweetest and tenderest of meat.

The great objection to this breed is their feathered legs, and this objection is more serious now than formerly, as the tendency of fancy breeding has been towards heavier leg and toe feathering. This tendency is to be viewed with alarm. We have already seen the Buff and Partridge Cochins practically taken out of the ranks of utility breeds by forcing them to be, first of all, feather producers. It will be too bad if the Brahmas, the grandest of all breeds, shall be forced to follow them.

Feathers on the feet and legs of chickens are objectionable from a practical standpoint. They become accumulators of filth in pens and yards and present an unsightly appearance upon the dressed carcass. Neither do they add to the beauty of the fowl. It is true we have been accustomed to think that they are a necessary adjunct to the Asiatic breeds, but why should it be so? Laying aside prejudice, who shall say that a fine light Brahma would not be as handsome with nice clean yellow legs and feet as with a mass of more or less soiled feathers hiding those members?

Having been an admirer of light Brahmas from boyhood, and thinking they would be improved both in utility and appearance if they could be produced with featherless legs and feet, I have been experimenting for years with that object in view. It has been no easy task. My first efforts were along the line of crossing with clean-legged breeds, but the results were so unsatisfactory that I soon abandoned that method. It seems out of place to alloy the blood of the grand old breed with that of any other.

I then began with birds of absolutely pure breeding, selecting those with as light leg and toe feathering as I could find, and breeding from the cleanest-legged of their descendants, until I have succeeded in establishing a strain of pure bred light Brahmas that are practically without leg and toe feathering, and they are beauties, as the very life-like drawing of Mr. Richardson, accompanying this article, clearly shows. It is believed the new variety has merits that will commend it to the poultry fraternity.

# Is Extra Size Desirable.

I notice in your February issue you invite discussion upon size in fowls. Presuming tbis discussion is understood to be in no way a question of desirability between large and small breeds, but simply size as desirable in itself and relatively applied to all breeds, I place myself on record as an advocate of good size, or stronger still, large size, excepting under certain peculiar circumstances, as, for instance, if I were so located that I possessed a fancy trade for fresh eggs at fancy prices, say 35 to 50 cents per dozen, I would prefer (laying capacity being equal) the smallest hen I could get that would lay eggs of acceptable size, for the simple reason that despite the oft asserted statement that small birds and animals consume tbe most food, or as much at least, as large ones, my knowledge of facts, from careful experiments of my own endow me with perfect contempt for the statement.

The productive capacity of an animal, whether the product be labor, flesh, eggs or milk, affects the consuming power of the individual, and so sometimes a small specimen turning off a large product, consumes as much food as a large idle and non-productive specimen. Now, whether in the correlations of animal parts and functions the large specimens shall be and are indolent non-producers is not borne out by facts. In mankind the noted athletes and pugilists have been large men. The intellectual giants of mankind have most invariably been above the average size. The winners of races and draft prizes among borses have most invariably been among the largest of their breed. The winners of beef, pork and wool prizes have most invariably been representatives of size, and tbe winners of milk and butter records have seldom been below the average size of their respective breeds. The Bronze Turkey breeder, the Pekin Duck man, the goose breeder, and even the new-comer, the Belgian hare advocate, lauds size above everything else. Yet a large class of poultrymen seem to decry size, and it is a little singular that this cry is predominant in any breed just in proportion to the extent that this breed is especially fitting to and appropriated by the specialist known as a "fancier."

If there is pleasure and profit in this line of work for professional men, retired capitalists and mankind in general, and I know there is, then it is just and honorable and commendable that there shall be fanciers who care little for the size of a specimen so his color be Standard, and nothing for its egg producing capacity, so its tail be set at the right angle. Wealthy people and sporting classes can afford to deal in this class of birds, as it lends much to the work that partakes largely of the game of cbance and the profits are looked upon only as trophies and the losses are good jokes. Nor is it impossible nor really uncommon any longer that some level-headed farmer or mechanic who is a breeder as well as a fancier turns his attention to this line and reaps the profit to be derived from this highly artificial demand.

But there is another demand much more intimately connected with the welfare of mankind; a demand of vastly greater magnitude, demanding a million fold greater supply, much more modest in its individual prices, but vastly greater in its aggregate representation of wealth. It is the demand of the consumer, and midway between these two classes and their respective demands stands the amateur breeder, who at once becomes the prey of the one and despised by the otber. The one regards him as a "sucker," and the other a fool. Then the two ends come together. The consumer is a utilitarian from personal interest and styles the fancier a robber, a liar and a thief, while the fancier looks upon the utilitarian as a sort of police official, who, having been omitted at the division of spoils, is now determined to raid bis joint. And so the fight goes on. And as the fancy side of the question seems to spend tbe most money, and "money makes the mare go," so, it seems to me, sometimes money makes the poultry press go, and go largely in the interest of fancy at the expense of utility, while utility should stand far out above fancy.

I yield to no man a higher or more pleased appreciation of beauty, or of a beautiful fowl, than I possess; but when it comes to a question between a 6½-lb. Barred Rock cockerel, perfect in fancy appointments, and another cockerel 9 to 10 pounds weight, with "imperfect undercolor," or not "barred to skin," "slightly colored in beak," or six points to comb, for reasons already intimated I may keep both, but the big bird has my preference, is given place in my first pen, and bis product sells for the most money.

Out of scores and scores of calls for birds this season, scarcely a half dozen have omitted to say, "I want heavy bone and large size," and those who have omitted this are evidently from the ranks of exclusive fanciers. That class who state, the "Standard says cockerel 8½ pounds," then if a bird weighs 9 or 10 pounds, cut him as you would if he weighed only 6 or 7. What folly! when in every other line of live stock the breeder is left free to follow his own wishes, to go on and up to perfection—not perfection tbat is of the hour, but perfection that is to future generations even. We poultry breeders must "stop there." This sort of man reminds me of Lincoln's sub-official, whom Lincoln said was a great man in little affairs, but a pigmy in great affairs.

The big bird a "poor breeder," "a poor layer," "ill-formed," "unsymmetrical," etc. I will not speak for breeds, for I do not know of personal experience. In an early day, when the horses of tbis region were, near as I can designate them, natives, I often heard it said, "It is impossible to procure or produce a large horse of pony build." In refutation of this came the Morgan, then tbe Norman, the Clyde and the Sbire. Now I hear Barred Rock men say, "The Standard weight is too high," it puts upon us a loggy, non-productive bird, and a 10-lb. cockerel is not a breeder of any certainty, he is a loafer, etc. Words are but toys in an argument. In procuring my start, it seemed most impossible to get the size I wanted.

I purchased a cockerel of a fancier, specifying it should he large. He said it was, yet it never weighed ahove 8 pounds at 2 years of age. On complaint being made, be said it was just the thing; I should get my size from the hens; and I fain would ask, where in Sam Hill shall I get the hens? Am I to hreed draught horses hy crossing Clyde mares with Shetland stallions?

I decided to get the hest I could find, and do some hreeding on my own account, and for size I found a doctor who was hreeding stock. He said be had size. I knew a doctor understood principles of reproduction. I hought some of his stock; it was very good. Then I found a farmer and professional hreeder of fast horses. I knew he understood principles of reproduction. He had ——— and ——— stock, and said it was large. I bought it, and when I saw it the force of Theo. Hewes' statement, made perhaps a year ago, tbat ——— showed hetter stock twenty years ago than fanciers show today, struck me, to say tbe least, forcibly. son to douht my claims, their entertainment will not cost them anything, or they may stay another week to perfectly satisfy themselves.

Now why, especially in a hreeder, is size desirahle? Because the greatest demand is for extra size; also, at the final end, in usefulness of a hird, it sells by the pound, and while it may take more food to produce the large bird, it takes no more time to care for him. He is not a high flyer; it costs less to fence him. As a hroiler and a roaster be gives more pounds and an increased price per pound. As a common carcas to he disposed of he nets me the most money. As a hreeder be is picked from the flock first, and wben shipped to a customer, he never sends back a kick. And as to bis being "clumsy," "don't lay," and all that, there are large hirds that possess all these faults. It may he it is the tendency.

But "there are others," and they are not subject to these faults. They are like all desirahle things—difficult to ohtain, but well wortb tbe effort when hand. They are liberal advertisers and as such add much to the support of the poultry press and the fraternity. But such breeders are not often exhihitors—they are too much taken up with tbe main thing.

The great hulk of the fanciers—tbe living and the strength of the hig hreeders and the press alike—are the fanciers, pure and simple. The thousands of men and women scattered all over the country, to whom poultry breeding is a diversion—a rest from their real pursuits in life. They make something out of it sometimes, perhaps; and, again, they as often spend all that they make in trying to improve the quality of their stock. Many of them do not care for profit, but they do care for success in the show room, and it is for it that they strive, regardless of cost. To such fanciers a first prize is recompense for all the work and expense of a season. This class of hreeders are the real strength of the fancy poultry industry.

The true diversionists, however, are

E. B. Wright's residence, "Roselawn Farm," Birmingham, Mich., where White Plymouth Rocks of the highest quality are bred.

Then, heing experienced in practical stock hreeding myself, and not foolishly hampered hy anybody's Standard, I set out to get size and keep everything else desirable, and now, as words are idle, I will make a proposition tbat is not idle, first giving some facts. I have hens that lay the year around. One ben laid twenty-three eggs in thirty days. I have hens that weigh 8 to 9 pounds that are persistent layers. I have one April cockerel that has weighed 10 pounds, weighs 9 pounds now in thin flesh (breeding) fit. I have a June hatched cockerel that now weighs 10 pounds (Feb. 8). Both are fine in sbape, good in color and markings, prouder than a peacock, and as to activity, if some of my 8-lb. fancier friends will hring me an 8-lb. Barred Rock cockerel, or send one, that can lick mine, I will ship them my bird prepaid. And if anyone will visit my premises, and stay a week, and then have any reayou get them. Let the size of your birds be such that your culls will he large, and you will have a profitahle flock. I shall be proud to be known as a "fancier" when I can at the same time be known as a good hreeder possessed of originality, and not until then.

J. E. T.

Greenville, Mich.

## The Fancier & the Farmer.

The farmer cuts a very small figure in the hreeding of fowls as laid down hy the rules of the Standard of Excellence. Likewise, the hreeder who has an extensive estahlishment, and is in the business for the money that is in it. There are some who make money out of it; and some few, who, perhaps, have made quite a fortune out of it. But, sucb lucky fellows can be counted on the fingers of one those wbo do not sell either their fowls or eggs, seldom exhihit, hut hreed solely for their own pleasure, and as a relief from their business cares and worries. With such it is an outdoor amusement. This class is a large one. It comprises doctors, lawyers, professors, business men, clerks, mechanics—tbousands, in fact, of all professions and callings, who are largely confined indoors, but who love nature and natural ohjects.

It is well, indeed, that it is so, for there is no more pleasant way in wbich to divert one's thougbts from the cares and worries of a busy day indoors tban hy spending an hour or so daily out in the air and the sunshine with a few feathered pets. It refreshes both tbe mind and the hody, and sufficient income is, or may be, derived from tbe fowls to offset any ordinary expense in connection with their housing, feed and yarding.

# Feeding of Brooder Chicks.

By G. C. FLEGEL, Westville, Ind.

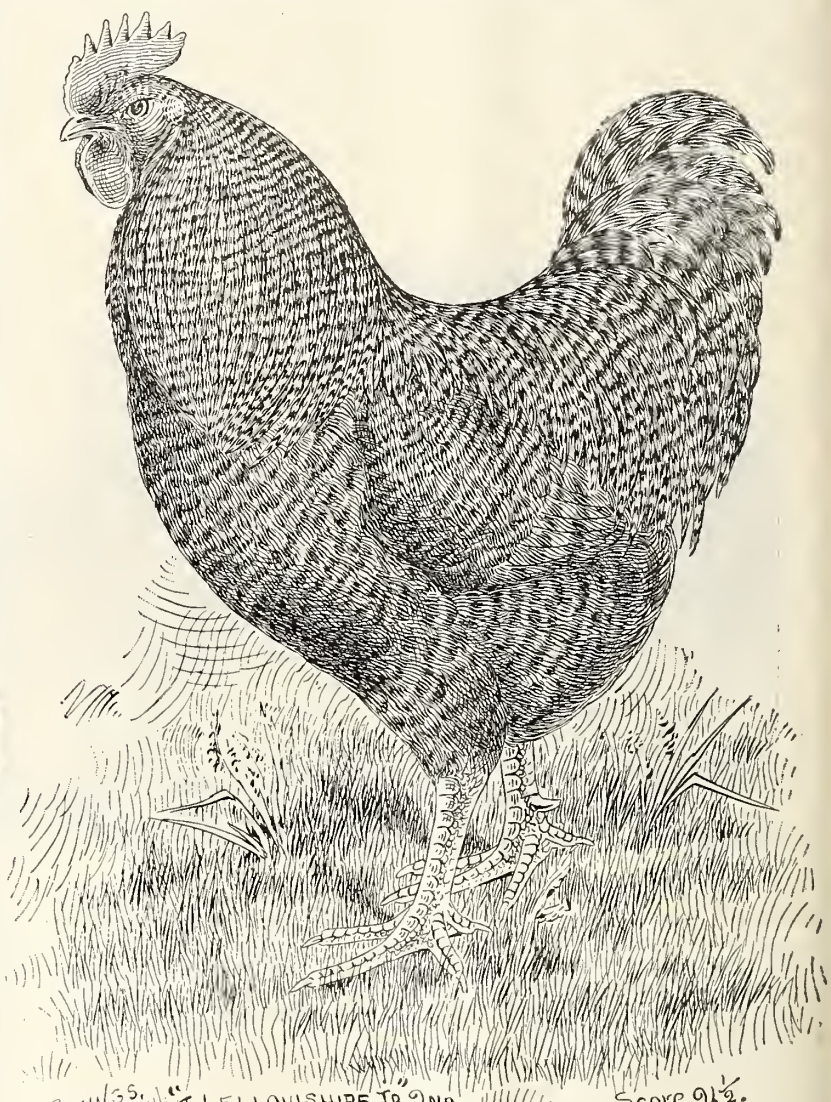
The matter of feeding cuts a pretty big figure in the successful rearing of brooder chicks. In fact I firmly believe that the matter of the number of chicks put in the brooder and the system of feeding are the prime factors in the solution of this problem. In all matters pertaining to rearing of poultry we believe the information given should be from practical experience and not theory. Therefore this article on feeding is intended to show results obtained by me from my system.

Let us take the chick from the incubator to the brooder as early as they can be moved in safety; have the brooder at near 95 degrees under the hover when the chicks are placed in it. I do not feed them anything for 36 to 48 hours after being hatched. Then I scatter a little dry corn meal where they can get it easily. This is done often for the first three or four days the meal being varied with cracker crumbs or stale bread toasted until it is crisp enough to crumble easily. I never keep feed of any kind by them at all times, as my experience has taught me that such a system will kill as many as it will raise. After the third day I begin to feed cracked wheat and finally cracked corn. I, however, should have said that I keep fresh water and chick grit by them all the time, all other feed I scatter in the litter covering the bottom of the brooder. The above represents foods given with the exception of green stuff and meat. This I give as often as I think they need it. For green food I use cabbage, apples, potatoes, etc. I feed some of these every day and always chop it up very fine so the small chick has no difficulty in picking it until they are strong enough to pick an apple or potato to pieces themselves. Then I place such stuff in the run or brooder so they do the chopping themselves. As for meat I give them a little finely chopped beef about twice a week, using care not to give them too much, for this is an article of diet that must be handled carefully; enough doing good while too much does much harm. It will be noticed I have not mentioned soft food of any kind nor will I recommend it as a food to any one raising brooder chicks at least.

A mash of different meals if fed with judgment may be all right, but the great trouble lies in the fact that it is next to impossible to feed it without a little of it remaining to become sour and we all know what the result is. Now I wish to say a word regarding the ideas of following the system of any particular person as regards feeding and care of brooder, or in fact, chicks of any kind. I do not advise that anyone should follow any particular system of feed literally, for I do not think the best results can be secured by so doing. There are many things to consider when the matter of successful poultry raising is being thought of. There are location, kind of soil, suroundings of all kinds that must be taken into consideration as well as the fact that the chicks must be fed.

It is a fact that has been exemplified time and again that fowls of the same breed and variety occupying adjoining pens will not give the same results on the same feed; this will be found to be true, only to a much greater extent, when they are located at great distances from each other. It looks to me as though it would be foolish for me to set up any particular system of feeding here in Indiana and expect the same results to be secured in Florida or British Columbia. For this reason, while I think it a good idea and that undoubtedly much good results from the information we read of the experience of others, yet we must all use judgment in following out the ideas presented, and if we do not make use of the abilities given us we can not expect to make a perfect success in any particular business and especially poultry raising.

Originality is a great thing and everyone should use a little originality when it comes to feeding and care of young chicks. Don't copy all the time and see if greater satisfaction is not the result.



Barred Plymouth Rock, Yellowshire Jr. 2d, owned and bred by Ira A. Gregory, Lexington, Ill.

## WISE SAYINGS.

The egg season is with us and what an opportunity it is for those who wish to enter the field and become owners of some real choice specimens. Remember, dear reader, if you pay the price asked, and buy of a reliable and honorable breeder, you are very likely to obtain stock of the same value as he has in his breeding pen, for "like begets like," it may be a wonderful cockerel, a beautiful pullet or a whole pen, who knows. I have heard many; yes, many! interesting reports and I do not wonder that people will persist in buying eggs for hatching purposes. Just one word of caution, and that is this: Be sure that you are dealing with an honorable breeder and fancier. Then go ahead.

*Don't Overfeed.*

Too many people make the mistake of overfeeding their fowls. Do not feed too much, especially corn, as the fowls become too fat and die of disease.

Hope, Ind. ED. ISLEY.

# Toulouse Geese--Their Characteristics and Commercial Value.

We have been asked questions by letter by amateur geese fanciers from many states, but as our time is too fully occupied with various other duties, we could not think of answering those letters privately. As the AMERICAN is such a popular journal of its kind, with the editor's permission we will answer some of those letters through its columns.

The Toulouse is the largest of the goose family and no doubt it is the most profitable. Of all the domestic fowls raised none are more hardy than the goose.

The per cent of loss among the young is very small if given proper care, nor is there much to be done even then, all the raiser need know is what they require and he will be successful. The loss of mature birds is so small one can hardly say there is any. We have raised them several years and never lost one from sickness (wish we could truthfully say that of our other fowls).

Now to begin, have good breeding stock, big ones, if you expect to raise big ones, for like begets like, and you can expect to improve but very little on the parents. Let them have free range on pasture or grass of some kind, see that they have plenty of water to drink; it is not necessary they should have it to swim in, but it won't hurt them if they do. Feed lightly on some kind of grain till there is an abundance of grass, even then a very little grain will do no harm. Gather the eggs soon after they are laid, if the weather is cold, as it is when they first commence to lay, and keep them as you would any fowls' eggs you expected to incubate. We set them on the small end and keep till we are ready to set them, sometime two weeks or even three, but set them as soon as we can conveniently.
